

EDU 637 assignment:

--EITHER--

Design an instructional digital video that incorporates multiple literacies or modalities which are culturally, developmentally, and linguistically responsive to the needs of all ability levels, including gifted students, students with disabilities, at-risk students, and English language learners. Here's how: Select a topic within your content area and identify the NYS/Common Core standards that it addresses; Create a video that is between two and five minutes long, using iMovie or Windows Movie Maker. Be sure to save it as a movie file; Share the video with this class. It might help you to think of the video as an anticipatory set for a lesson or a review of a topic.

--OR--

Create a teacher website that incorporates multiple literacies or modalities which are culturally, developmentally, and linguistically responsive to the needs of all ability levels, including gifted students, students with disabilities, at-risk students, and English language learners.
