While this catalog was prepared on the basis of the best information available at the time of publication, all information including statements of tuition, fees, course offerings, admissions and graduate requirements is subject to change without notice or obligation. This catalog is not a contract or an offer to contract.

D’Youville College provides equality of opportunity to all persons with respect to employment and to admission of students. The college does not discriminate on the basis of race, religion, color, gender, age, creed, marital status, sexual orientation, veteran status, national or ethnic origin in administration of its educational policies, hiring policies, admissions policies, scholarship and loan programs and athletic and other school administered programs. It continues to be the policy of D’Youville College not to discriminate on the basis of disability. No person is denied admission, employment or access solely because of any physical, mental or medical impairment, which is unrelated to the ability to engage in activities involved in the education requirements or occupation for which applications have been made.

While D’Youville College makes strenuous efforts to contain costs, it reserves the right to increase tuition or fees without prior notice. D’Youville College also reserves the right to change its policies and requirements, without notice, for admission, conduct, coursework, graduation and other regulations affecting students. These regulations may govern current and new students and shall be effective when determined by D’Youville College. It is the student’s responsibility to keep well-informed with respect to such regulations appearing in D’Youville College publications.

Inquiries concerning the application of Title IX may be referred to the college’s Title IX coordinators, located in the College Center, Room 111, 716.829.8198, and the Niagara Street Annex, Room 206, 716.829.7811 or by e-mail at titleIXcoordinator@dyce.edu.

Dear Friends,

The challenge of making good choices is a part of our everyday experience, and it gives us an opportunity to achieve our life's goals. It is for this reason that selecting a college is a critical choice. It is a decision that ultimately impacts our future professionally, economically, socially, personally and spiritually. It also helps us enrich our lives, develop our talents and have an effect on people and the world around us.

For more than a century, D'Youville College has provided a quality environment for students seeking an education that translates into successful careers and personal satisfaction. The faculty and staff are devoted to helping students achieve their academic goals in a supportive and dynamic atmosphere. This effort, a small class size and the opportunity to interact personally with faculty and students alike, form the basis of a well-integrated education which provides graduates with exceptional possibilities grounded in values based on the college's mission.

You will find our campus convenient and comfortable. You will find our faculty and staff friendly and available. At D'Youville, you will be taught to think critically and to communicate your knowledge and ideas persuasively. While these are key elements in preparing you for a profession, they are also skills designed to assist you in achieving personal growth and lifelong learning.

D'Youville College fosters an environment of mutual trust and respect. A strong heritage and mission, a gifted faculty, a responsive support staff and motivated students are the ingredients of our success. The formula is simple and has withstood the test of time. You choose D'Youville and D'Youville chooses you, and together we influence, for the better, your life, the lives of those you love and the society in which we live.

Sincerely,

Sister Denise A. Roche, GNSH, Ph.D.
President
D'Youville College is an independent, urban, coeducational institution. It provides liberal arts and professional programs for more than 3,000 graduate and undergraduate students in day, evening, weekend and summer sessions. The Grey Nuns founded D'Youville as the first college for women in Western New York. It became coeducational in 1971. Under its 1908 charter of incorporation, D'Youville College is legally authorized to conduct an institution of higher learning and to grant recognized degrees. A self-perpetuating board of trustees has governed the college since a charter amendment in 1970.

The college offers bachelor's, master's, post-baccalaureate, doctoral and advanced certificate programs in a variety of disciplines and professions. Undergraduate programs are offered in the liberal arts and sciences, nursing, business and management, health services management, exercise and sports studies, pre-professional programs and education. Graduate programs are offered in nursing (family nurse practitioner), education (elementary, special and TESOL), health services administration, international business, MBA, and occupational therapy. Dual/combined degrees are offered in dietetics, international business, physician assistant, occupational therapy and education (special, childhood). D'Youville also features an early admissions assurance program for pharmacy and certificate programs in advanced orthopedic physical therapy, clinical research associate, family nurse practitioner, health services administration and long-term care administration.

D'Youville offers the Ed.D. in health administration as well as in educational leadership. Professional doctorates are offered in chiropractic (DC), pharmacy (PharmD), physical therapy (DPT) and doctor of nursing practice (DNP).

D'Youville is accredited by the Middle States Commission on Higher Education, One Dupont Circle, NW, Suite 530, Washington DC 20036, 202.887.6791. The Commission on Accreditation for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), located at 4720 Montgomery Lane, Suite 200, Bethesda, Md., 20814-3449. The ACOTE’s phone number c/o AOTA is (301) 652- AOTA and its web address is www. acoteonline.org. The three-year graduate D.P.T. program is fully accredited by the Commission on Accreditation of Physical Therapy Education (CAPTE) of the American Physical Therapy Association and is registered with the New York State Education Department (NYSED). Refer to the physical therapy department section of the catalog for CAPTE contact information. All business programs are accredited by the International Assembly for Collegiate Business Education (IACBE). The combined B.S./M.S. dietetics program is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics and is registered with the New York State Education Department. The combined B.S./M.S. physician assistant program is accredited by the Accreditation Review Commission on Education for the Physician Assistant, Inc., ARC-PA. Programs of study are registered with the Office of Higher Education of the New York State Education Department. All programs in the education department, leading to a New York state teacher certification, are accredited by Regents Accreditation of Teacher Education (RATE). The doctor of pharmacy program at D'Youville College is accredited by the Accreditation Council for Pharmacy Education, 20 North Clark Street, Suite 2500, Chicago, Illinois, 60602-5109; Fax: 312.664.4652 or 312.664.7008. For more information, contact the School of Pharmacy at 716.829.7846. The doctor of chiropractic degree program at D'Youville College is awarded programmatic accreditation by the Council on Chiropractic Education, 8049 North 85th Way, Scottsdale, AZ 85258-4321, telephone: 480.433.8877, website: www. cce-usa.org. Individuals with complaints about compliance of the program with the CCE standards should be directed to the Commission on Collegiate Nursing Education, One Dupont Circle, NW, Suite 530, Washington DC 20036, 202.887.6791.

D’Youville College is named for Marguerite d’Youville, an 18th-century Canadian woman whose love of God inspired her to spend her life responding to societal needs and finding creative ways of serving the poor. She was born near Montreal in 1701. Marguerite was a widow with young children, who never neglected the poor. She was an astute and resourceful businesswoman, a compassionate friend and a person whose life was deeply rooted in her trust in God. Other women joined in her efforts to offer asylum for the elderly, blind, orphaned and abandoned. Known as the Grey Nuns, Sisters of Charity, the group became one of the first congregations of religious women to be founded in Canada. During her life, Marguerite assumed the responsibility for administering the General Hospital of Montreal, founded homes for the poor and aged and cared for unwed mothers, orphans, and sick and wounded military men, regardless of their allegiance. She earned the title Mother of Universal Charity, insisting that, “The poor must know that we never refuse to serve.” On Dec. 9, 1990, she was declared St. Marguerite d’Youville in St. Peter’s Basilica, Rome.

D’Youville College seeks to continue the spirit of Marguerite d’Youville, especially by encouraging students to be proficient, innovative, resourceful, compassionate, and well-informed members of society.

**CORE VALUES**

1. A comprehensive education, grounded in the liberal arts and sciences, is a divine gift bestowed for the well-being of the educated individual and the community.
2. Providing a premier education with significant value to students is our primary purpose.
3. Education continues throughout a person’s life.
4. Service to others, as part of the educational experience, fosters empathy, compassion and reliability.
5. Students have a responsibility to engage in the learning process and the college is responsible for helping students to succeed in their academic endeavors.
6. D’Youville embraces diversity among its students, faculty, staff and trustees.
7. Because we are all brothers and sisters within God’s family we treat all people with dignity and compassion and care for all of creation with gratitude for God’s gifts.
8. Decisions are made based on the DYC mission and values, and the best information available at the time.
9. We act with integrity, following through on our promises.

**HONORS CONVOCATION**

Honors Convocation is a unique event of the academic year. Its purpose is to recognize the academic achievements of some of the top students, as well as those students who not only achieve academic success but also show great leadership ability, service to the community and compassion for their fellow students.

Each academic department honors select students for their academic achievements. Scholarships are awarded by the Student Association. The prestigious J. Warren Perry Scholarship is also awarded to a student in a health care program.

Students selected for Who’s Who in American Colleges and Universities, Lambda Sigma (the sophomore honor society), Pinnacle (the adult student honor society) and Kappa Gamma Pi are also recognized.

Finally, the most prestigious awards that the college presents to students—the D’Youville Medal, the Grey Nuns of the Sacred Heart Medal, the Lee Conroy Higgins Award and the St. Catherine’s of Alexandria Medal—are also bestowed on three students.

**HONORARY AWARDS**

The D’Youville Medal is awarded annually to a senior who, exemplifying the spirit and ideals of the college, is deemed outstanding for achievement, service and loyalty to the college.

Grey Nun of the Sacred Heart Medal is awarded annually to a graduate student who has demonstrated outstanding academic achievement as well as service to the college and the larger community.

The Lee Conroy Higgins Award, presented annually by the alumni association, recognizes a senior for outstanding support of and involvement in campus activities and shows concern for fellow students.

The St. Catherine of Alexandria Medal, presented by the Buffalo Chapter of Kappa Gamma Pi, is awarded annually to a junior who is outstanding in scholarship and notable for service to the college and community.

Candidates for these awards are nominated by the faculty and employees of the college, with final selection by an ad hoc committee.

Department awards are conferred annually on those students who demonstrate mastery of subject content and exemplify service to the college and community.
THE COLLEGE COMMUNITY
D'Youville is a small, friendly college and plans to stay that way. It is small enough for people to know each other by name, but large enough to offer course choices and activities. The relatively low student-faculty ratio in many programs provides the opportunity for students to receive additional personal attention in and out of class.

Faculty: Because D'Youville is a teaching college, faculty members regard instruction rather than research as their first priority. They hold degrees from leading universities in the United States and abroad, including Columbia, Bombay, Dublin, Berkeley and Toronto. They represent many ethnic and religious backgrounds, a diversity that adds to the richness of academic life at D'Youville.

Students: About 80 percent of D'Youville’s students commute; the rest live on campus. Most are from New York State and nearby Canada, but there is a growing representation from other states and other countries.

COMMUNITY SERVICE
D'Youville is committed to developing a diverse and well-educated workforce. The college engages in cooperative programs with the Buffalo Public School system on the childhood, adolescent and special education levels.

Service learning programs have been developed to link a student’s classroom experience with real-world situations. Service learning is a mode of education that combines academic learning with community service. This work is integrated into the course content and is part of the student’s evaluation and grade.

Campus Ministry offers many volunteer opportunities designed to encourage student, faculty and staff participation in the community. Specific volunteer efforts organized by Campus Ministry include: Habitat for Humanity, Adopt a Grandparent, alternate fall and spring break service opportunities, Lending a Hand (an intensive five-to-seven-day community service endeavor) and a variety of fund raisers for local community agencies. Campus Ministry also assists in connecting D'Youville College persons to local agencies with volunteer opportunities in Buffalo's West Side community and Western New York.

Community Outreach
D'Youville builds on its mission of service by providing innovative community outreach programs to support its students and the surrounding West Side and greater Buffalo communities. The college works to enhance the quality of life for the students and communities it serves by providing greater access to higher education through a variety of sponsored programs. These programs are designed to create opportunities for collaboration and partnership between the area's K-16 systems and community-based organizations.

The purpose of the Health Careers Opportunity Program (HCOP) is to increase health professions education opportunities for individuals from disadvantaged backgrounds in order to increase workforce diversity. The program includes recruitment of potential health profession students and the implementation of a summer program as well as retention/support services, including structured Saturday Academies, for economically and/or academically disadvantaged students seeking admittance into and matriculated students in one of six health professions programs: chiropractic, dietetics, occupational therapy, pharmacy, physician assistant or physical therapy.

The purpose of the Nursing Workforce Diversity program is to increase nursing education opportunities for individuals who are economically and/or academically disadvantaged. The Nursing Workforce Diversity program provides academic support to 25 freshmen nursing students from diverse backgrounds to improve retention in the nursing program. The pre-entry component located at East High School provides college and career preparation opportunities to 30 high school students to support entry into nursing by providing mentoring, tutoring, career exploration, SAT preparation and character development. Both aspects of the program aim to increase nursing workforce diversity.

The purpose of the Upward Bound program is to provide year round support services for high school students in the City of Buffalo who have the desire, motivation and potential to pursue and complete an post-secondary degree. The student population served falls under the federal TRIO guidelines of low-income, first generation, and/or academically “high risk” students. The services provided to the students include, but are not limited to academic tutoring and advisement, enrichment activities, standardize test preparation, cultural & social field trips, leadership and character development and an exciting six-week summer program.

Leonardo DaVinci High School, a college-prep magnet school for the liberal arts, is housed at D'Youville. DaVinci students participate in 28 collaborative programs including DaVinci students taking D'Youville college courses for credit, high school/college student mentoring and tutoring programs, and a creative art program. Teachers from both schools collaborate with D'Youville faculty members on professional projects.
THE CAMPUS

Koessler Administration Building (1874) This five-story building once housed the entire college. It contains administrative offices, the chapel, The Kavinsky Theatre, the Learning Center, faculty offices, classrooms, financial aid and reception rooms.

Madonna Hall (1959) This five-story building houses the Leonardo DaVinci High School, part of the Buffalo Public Schools system, on three floors, a dietetics lab/kitchen and administrative offices. A large lounge is also available for meetings and social events.

Alt Building (1967) Classrooms, laboratories, lecture halls and faculty offices are located in this six-story, air-conditioned building. Spot Cafe is also located in this building.

Marguerite Hall (1968) The tallest building in the immediate area is this 12-story residence hall, which offers panoramic views of Lake Erie and the Buffalo skyline. The facility houses men and women on separate floors. The residence life office, health center and personal counseling are located on the first floor.

College Center (1969) The center lives up to its name as the hub of campus social, cultural and athletic events. Its gymnasium, swimming pool, game room, fitness/wellness area, dining rooms, and meeting rooms also make it a popular site for community activities. Main dining facilities, a spacious lounge, some administrative offices and the college store are also located in the center.

Niagara Annex (1991) - 631 Niagara Street This building houses vital administrative support offices. These include alumni, institutional advancement, human resources, publications and public relations. The facility is within easy walking distance of the Porter Avenue campus and helps integrate the college into the surrounding neighborhood.

Montante Family Library (1999) The four-story library serves as the research center of the campus. It contains approximately 100,000 volumes and subscribes to almost 500 print journals. The library’s catalog and 90+ databases provide access to over 70,000 unique full text journals and over 50,000 e-books, which are available to students from both on and off campus. Librarians are available 96 hours per week and can provide one-on-one research assistance at any time as well as classroom information literacy instruction by appointment. In addition to print and electronic resources, the library collection includes a variety of software and equipment, a large DVD collection, skeletal models for study and more. The library also houses the college archives, where rotating displays highlight resources of significant value to the college. A 96-station computer lab, study rooms, and wireless connectivity and printing are also available.

Bauer Family Academic Center (2001) The 57,000 square-foot, five-story Bauer Family Academic Center provides state-of-the-art classrooms, laboratories and faculty offices. It is an excellent learning environment for students.

Student Apartment Complex (2005) Fully furnished studio and four-bedroom apartments with cooking facilities are available to students 21 years of age or older. Each apartment has kitchen facilities; cable and computer hookups; secure, off-street parking; and laundry facilities. A computer lab is also available.

D’Youville Education Center (2006) This one-story structure, adjacent to the West Avenue parking lot, houses five large classrooms and serves as an academic resource for the campus.

D’Youville Academic Center (2010) This 93,000 square-foot building houses the School of Pharmacy, graduate, undergraduate and international admissions, the International Student Office (ISO), state-of-the-art laboratories, classrooms and a computer lab.

Dr. Charles and Mary Schweitzer Bauer School of Arts, Sciences and Education Building (2015) To open in the fall of 2015, this multi-complex building will be the home for the School of Arts, Sciences and Education as well as the business program. The 85,000 square-foot academic center will be state-of-the-art, and include science, computer and fine arts laboratories, smart classrooms, faculty offices and conference rooms, along with a cafe and student lounge space.

Dobson Athletic Fields and Fieldhouse (2014) Opened in August 2014, D’Youville constructed a multi-purpose, synthetic turf athletic field as well as an athletic fieldhouse and field maintenance storage building. The college has a growing athletic program and currently participates in NCAA Division III athletics. Teams utilizing the new field include women’s softball as well as men’s and women’s soccer.

LOCATION

D’Youville’s campus is less than a mile from the heart of downtown Buffalo and within walking distance of the Peace Bridge to Canada. It overlooks two parks and is near the city’s greatest cultural centers: the Albright-Knox Art Gallery and Kleinhans Music Hall, home of the Buffalo Philharmonic Orchestra. The Kavinsky Theatre, known for its professional productions, is part of the D’Youville campus. Close to two exits of the New York State Thruway, D’Youville is only minutes away from beaches, ski resorts and the stadiums where the Buffalo Bills, Sabres, Bandits and Bisons play their home games.

DRIVING DIRECTIONS

D’YOUVILLE COLLEGE is located less than one mile from downtown Buffalo, near the Peace Bridge, the gateway to Canada. Off-street parking is available, or you may park in any of our parking lots.

• If you are driving SOUTHbound on the Niagara section (190) of the NYS Thruway, exit EAST on to PORTER AVENUE-EXIT 9, turn LEFT on to Porter Avenue and continue to the college.

• If you are driving NORTHbound on the Niagara section (190) of the NYS Thruway, exit on to NIAGARA STREET - EXIT 8, turn LEFT on to Niagara then RIGHT on to Porter Avenue and continue to the college.

• If you are driving from CANADA, take the GEW, follow the signs to Fort Erie, then the Peace Bridge. After you go through U.S. customs, bear to the left and follow the signs to Niagara Street (266 SOUTH). Travel to the second light and turn left onto Porter Avenue. Continue straight (four traffic lights) to the college.

CROSSING THE U.S./CANADIAN BORDER

As of June 1, 2009, American or Canadian citizens entering or re-entering the United States from anywhere in the Western Hemisphere are required to show one of the following forms of identification:

• Current passport

• U.S. passport card

• Enhanced state driver’s license

• Federally issued “trusted traveler” card such as the NEXUS or FAST

These regulations pertain to all land travelers over 18 years and air travelers of any age.
ALUMNI
D’Youville alumni have an excellent history of support and loyalty to the college. Their achievements are a testimony to the quality of the education received at D’Youville. Over 17,000 alums, living on six different continents, continue the college’s mission of service within their professions and their communities.

Their gifts of time, talents and financial support have had a tremendous impact on the college community. From capital campaigns, financial aid, scholarships and the annual fund to guest lecturing, clinical supervision, attendance at athletic events and volunteering on campus, D’Youville alumni are committed to enhancing the mission and reputation of the college.

The office of alumni relations is located at the south end of the campus in the annex at 631 Niagara Street. The staff acts as the liaison between alumni and the campus college community, and works closely with the Alumni Association board of directors. Alumni news may be found on line at: www.dyc.edu/alumni and in the publication D’Mensions.

ALUMNI ASSOCIATION
The Alumni Association is composed of more than 17,000 graduates. All students who earn their degree are automatically enrolled in the Alumni Association and from time to time honorary membership status is granted as determined by the association’s board of directors. The purpose of the association is to promote fellowship among members and to assist in advancing the best interests of D’Youville College. The association is led by an elected board of directors. The board also includes four non-voting members consisting of the alumni relations director, two students for the D’Youville College Student Association and one individual who has completed their undergraduate work and is continuing as a student at the graduate student.

Realizing that involvement with students is necessary for the vitality of the association, the board of directors, in conjunction with the alumni office, is committed to working on admissions recruitment, sponsorship of various programs and recognition of student leadership and achievement. The association funds the Sister Mary Charlotte Barton Alumni Kinship Scholarship.

The association presents annual awards to recognize the achievements of alumni and current students. These awards include the Anne Lum Award, Delta Sigma which is in conjunction with induction into the St. Marguerite d’Youville Honor Society, the Lee Conroy Higgins Award and the Young Alum Award.

NEW STUDENTS

New students will have many exciting challenges and opportunities as they begin their careers at D’Youville College. To assist in the transition, they may be invited to attend an orientation program specifically designed to meet their needs. There are orientation programs for freshmen, families, transfers, and graduate students. At the orientation program, coordinated through Connections: Your Information and Resource Office (Bauer Family Academic Center, Room 101), students learn what is required for their program, course selection with an academic advisor, registration and information seminars.

The D’Youville Freshman eXperience (DFX) is designed to assist the freshman class. The first year will be exciting, fun, and challenging. DFX will help students successfully deal with the adjustment issues that all freshmen face. Starting with orientation, freshmen are assigned a college mentor who they work with their first semester and are registered for FOCUS: Freshmen Seminar. In addition, there are specific activities and leadership opportunities designed for freshmen.

All new students (and their families) receive a copy of the New Student Handbook when they attend orientation. This publication contains essential D’Youville College information and is used as a guide during the orientation session.

RESIDENCE LIFE

Living on campus is a good way to make the most of one’s college years. The convenience of being within a block of labs and the library makes it easier to use free moments for study or research. Being on the scene for campus activities, scheduled and unscheduled, makes it easier to attend events.

The most important benefit of living on campus is learning to share and to live with people from different backgrounds. New students become familiar with their new surroundings quickly and are soon sharing in the experience of campus life.

The atmosphere in a residence hall is different from that of any other place. Friendships somehow seem stronger; the college experience seems somehow more vivid.

D’Youville offers two styles of on-campus housing. Marguerite Hall houses up to 300 students in traditional double and single rooms. Each floor of this residence hall has a study lounge, a TV lounge and a kitchenette. Other amenities include a 24-hour computer lab, coinless laundry facilities, cable TV and 24-hour security.

A resident advisor (R.A.) is a student staff member who lives on and supervises each floor. The R.A. is responsible for programming activities, enforcing policies, distributing information and maintaining a positive living environment. They are available to answer questions, listen to students’ concerns and help with the adjustment to D’Youville College.

The room and board charge includes three meals each weekday in the Porterview Room of the College Center and brunch and dinner on weekends.

Through Residence Council, students sponsor activities, review policies, make recommendations for change, maintain harmony and work together with the residence life staff to meet the challenges of community living.

The Apartments residence complex can house 163 upperclass students and students 21 years of age or older in fully furnished studios and four-bedroom apartments. Amenities in this complex include a 24-hour computer lab, recreation room, cable TV, coinless laundry facilities and 24-hour security.

A meal plan is not required or included for students in The Apartments. A meal plan can be purchased if desired and all residents of The Apartments receive $225 in Spartan Bucks that can be used in the Porterview Room or the Spartan Spot Cafe.

SERVICES TO STUDENTS

ACADEMIC ADVISEMENT

Academic advisement is provided to each enrolled student directly from the student’s academic program. Throughout their years at D’Youville, students meet with their advisors to review progress in completing requirements necessary for a degree, certification, licensure and/or graduate work. To find out who your academic advisor is, contact your academic department, the registrar’s office or students can log onto their STACI account.

ATHLETIC PROGRAMS

D’Youville provides athletic opportunities to the college community at the intercollegiate, intramural and recreational levels.

The intercollegiate program is a Division III member of the National Collegiate Athletic Association (NCAA) and competes in the Alleghany Mountain Collegiate Conference (AMCC). D’Youville student athletes are eligible for championship opportunities at the conference regional and national levels.

The college sponsors 14 intercollegiate sports teams: men’s: soccer, basketball, volleyball, baseball, cross-country, tennis and golf; women’s: soccer, basketball, volleyball, softball, cross country, tennis and rowing. A variety of intramural offerings are sponsored by the Student Association.

The D’Youville College Center and the new outdoor athletic complex serve as the homes for D’Youville athletics. The College Center houses the athletics offices along with the gymnasium, swimming pool, aerobics room, fitness center and a state-of-the-art sports medicine and training center for the healthcare of our student-athletes.

The outdoor athletic complex opened in fall 2014 and is a multi-sport synthetic turf field, complete with lights for evening events and a locker room, and is home of our soccer and softball teams.
CAREER SERVICES CENTER

The D'Youville College Career Services Center assists all students and alumni with preparation for the job market. Individual career advisement, major-specific resume/cover letter assistance, interview preparation and job-search support are available. Related classroom workshops, on and off-campus career events and online resources help students stay updated on career and employment trends. Additional services include scholarship and graduate school essay assistance, online job posting system for current full- and part-time employment seekers and a resource to assist in locating international volunteer and internship opportunities. Alternate appointment options are available to international students and alumni living outside the area. Career services welcomes all active military and veteran students/alumni with assistance in transitioning a military to civilian resume.

CAMPUS MINISTRY

Campus Ministry seeks to provide a variety of opportunities for the development of the student’s social, moral and spiritual potential while serving the various needs of the college community and its surrounding society. Campus Ministry encourages all members of the college to grow in personal spirituality and to volunteer time and talent so as to enhance campus and community life.

Mass and other worship services respecting various religious traditions are available on and off campus. A directory is published providing places and times of worship for both Christian and non-Christian churches. In an effort to celebrate religious diversity, a variety of ecumenical experiences are also offered to the D’Youville community.

Campus Ministry offers a variety of programs throughout the academic year. Such programs include religious education, spiritual guidance, Bible study, counseling, retreats, social action programs, service trips, social events and both short-term and long-term volunteer opportunities. Campus Ministry serves as a custodian for a databank in which volunteer hours of both D’Youville students and staff are logged for future verification and reference.

CONNECTIONS:

YOUR INFORMATION & RESOURCE CENTER

Connections is located on the first floor of the Bauer Family Academic Center, Room 101, the heart of student academics. The office accommodates all students, faculty and staff, and it functions as a general student affairs office. Office hours during the fall and spring semesters are 8:30 a.m. to 7 p.m. Monday through Thursday, and 8:30 a.m. to 4:30 p.m. on Friday to accommodate both day and evening students, faculty and staff.

The office is a central point for college information. College ID cards, commuter lockers, calendar and resource guide, and commuter parking hang tags are available as well as forms, applications, brochures and information on local and regional places of interest. Additionally, students are able to return required forms to the office. The office will then deliver the information to the correct location the next day.

The office is concerned with the interests of all students and provides outreach to commuter, graduate, non-traditional and evening students. Suggestions, comments and concerns are welcomed. Students may stop by Connections or set up an appointment by e-mail at connections@dyec.edu or by calling 716.829.7766.

DAY CARE CENTERS

The college does not offer on-campus childcare facilities. The Childcare Resource Network, 716.877.6666, is an information and referral service on childcare services; pre-school, day care, before and after school extended programs; family day care providers; nursery schools; and quality and regulations. There is no fee for the network’s service.

FINANCIAL AID

The financial aid office is the key to obtaining all the aid possible to meet the expenses of a college education. Financial aid personnel will help determine what types of aid to apply for and will explain deadlines, requirements and conditions in accordance with federal and state regulations.

FRESHMAN MENTOR PROGRAM

In addition to an academic advisor, each new full-time freshman is assigned a mentor. The Mentor Program is designed for the student to work, one-on-one, with a D’Youville administrator, faculty, support staff member or upperclassman who has volunteered to assist new students in their transition to college life. Mentors are assigned to students through Connections as part of the D’Youville Freshmen eXperience. The program lasts for one semester.

GRIEVANCE PROCEDURE

The college is committed to the education and social development of its students. If, in the course of this complex educational process, a student feels he/she has been treated unfairly by a college employee, the college has both a grievance procedure and a grievance officer. Students can refer to the “Calendar, Resource Guide and Planner” for a description in detail or contact the associate vice president for student affairs for more information, 716.829.7766.

HEALTH SERVICES

The health center, on the first floor of Marguerite Hall, provides information, health counseling, emergency treatment, tuberculosis screening, immunizations, health insurance information and printed materials. Clinics are offered Monday through Friday. A full-time physician assistant staffs the center. A complete pre-entrance physical examination, which includes New York state immunization requirements, is required of all students. D’Youville College strongly recommends that all full- and part-time students have medical insurance. Medical insurance can be purchased through the Affordable Care Act. Contact the health center at 716.829.8777 for information on individual and family policies. By policy, all international students must carry health insurance coverage. International students will be billed directly by the college for this insurance, which will be managed through the health center.

Students pursuing clinical placements and/or other forms of training external to the college are required to have health insurance and additional immunizations, depending on the off-campus placement. Students should check with their academic department for the specific requirement for each placement.
INTERNATIONAL STUDENT OFFICE

D’Youville College prides itself on its cultural diversity and is pleased to host students from more than 30 different countries. With the ever-expanding international student population at D’Youville, the International Student Office (ISO) plays a pivotal role in helping those students with visas, I-20s, adjustment issues, orientation, obtaining Social Security numbers, optional practical training as well as other immigration matters. The ISO is also involved in the international host family program, the international student club, the annual International Fiesta and many more cultural and immigration presentations on campus. The ISO plays another vital role on campus. It is responsible for administering the study abroad program offered by D’Youville. Many students take advantage of spending a semester or summer overseas. Students are encouraged to plan ahead and visit the ISO early for more information about the destinations and programs sponsored by the college.

The ISO is located in the D’Youville Academic Center (DAC), Suite 219 and office hours are Monday through Friday, 8:30 a.m. - 4:30 p.m. All students are welcome and are encouraged to stop in.

LEARNING CENTER

The Learning Center helps students meet their academic goals. Professional tutors provide tutoring and class instruction in reading, writing, chemistry, math and ESL. Peer tutors lead study groups in selected courses. The Access Program provides academic counseling for selected entering students. Disability Services provides support and accommodations for students with special needs. For further information, students may visit the Learning Center on the fourth floor of the Koessler Administration Building or may call 716.829.7774.

MULTICULTURAL AFFAIRS

The office of multicultural affairs provides multicultural students with academic, social and personal support services. The office works to foster, within the college community, a respect and appreciation of the history, traditions and culture of all students, with a focus on multicultural groups. Toward this end, the office provides a range of programs, services and activities. Multicultural affairs also provides counseling and other support services to help students maximize their learning experiences and involvement in the campus community.

PERSONAL COUNSELING

Licensed and board-certified professional counselors are available for free, confidential, individual or group counseling sessions and consultation. Mental health counseling deals with issues related to growth, development and adjustment in personal, social and educational areas of students’ lives. For additional information, including links to on-line mental health resources, visit the personal counseling website at www.dyc.edu under offices and services. Programs, including seminar workshops and stress relief clinics, are provided throughout the year to promote student mental and emotional health and positive well-being.

CAMPUS SECURITY

The campus security department is a division of U.S. Security Associates. As the need arises, security is empowered by the college to take whatever actions are necessary to maintain order, enforce campus discipline and to ensure the safety of all students and employees. This especially applies to emergency situations that need immediate attention. In addition, a campus safety escort is provided on campus by security to further ensure student and employee safety. Information on the college’s crime statistics are located at the U.S. Department of Education website, http://nces.ed.gov/security. Student may also contact the vice president for student affairs at 716.829.8199.

STUDENT ACTIVITIES

The student activities office works closely with students, clubs, college departments and student leaders to provide the D’Youville community with entertainment, community service, recreational and leadership opportunities. These activities improve the quality of campus life, build a sense of community and compliment the academic experience. The student activities office staff understands that students who participate in campus activities and organizations perform better academically and remain in school at a higher rate than non-involved students. These activities will allow a student to relax, explore new ideas, make life-long friends, develop career and leadership skills and just have FUN!

STUDENT ASSOCIATION (SA)

The D’Youville College Student Association is the voice of the student body that addresses student concerns and issues. The elected governing body of SA is the senate, which is comprised of four executive officers, committee chairpeople and class senators. All D’Youville College students are members of the Student Association and are welcome to attend the bi-monthly senate meetings. It is during these open meetings that decisions are made by the senate which affect the entire student population. Additionally, SA administers the student activity fee. These funds are used to finance club events, the college calendar, special events and athletics.

STUDENT ORGANIZATIONS AND ANNUAL EVENTS

D’Youville College provides an array of organizations, clubs and events in which students can become involved in. They can join academic, cultural and recreational clubs, serve on campus-wide committees, contribute to student publications, attend numerous exciting activities and take advantage of many volunteer opportunities. These wonderful experiences allow students to develop leadership skills, make friends, receive recognition, meet faculty and staff and enhance their academic experience. Interested students are encouraged to participate in these activities upon their arrival at D’Youville.

THE KAVINOKY THEATRE
Now celebrating its 36th anniversary, The Kavinoky Theatre, is owned and
sponsored by D’Youville College to promote the cultural richness of both the
campus and the wider community. It is a fully professional company presenting
a season of six plays each year in its beautifully restored Edwardian auditorium.
The Kavinoky presents a wide variety of works from classic dramas and musicals to
world and regional premieres of important and emerging writers. D’Youville College
students may purchase tickets for Kavinoky performances at greatly discounted prices.

DISABILITY STATEMENT
D’Youville College attempts to assist employees and students on individual
concerns they may have while they work or learn at the college. Individuals with
disabilities, who provide appropriate documentation, will be provided
with reasonable accommodations to assure access, independence and full
participation in the mainstream of the educational and work process. For more
information, contact the coordinator of disability services at 716.829.7728.

VETERAN AFFAIRS OFFICE
D’Youville College is approved by the New
York State Division of Veteran Affairs and the
United States Veterans Administration
for training service members, veterans and
their eligible dependents. D’Youville ranks
fourth out of 4,000+ college/universities
nationwide as a Veterans Friendly Campus.
Veterans, service members, reservists,
guardsmen and eligible dependents of
same should contact the director of the
veterans affairs office at 716.829.7836 for
an application or for more information.

VETERANS ADVANTAGE
• A full service office that provides not
only educational counseling but also
assistance for all other issues affecting
the student-veteran.
• A liberal military leave of absence
policy.
• The Veteran Affairs Office provides to
all veterans and dependents enrolled
both a mentoring and tutoring
program to assist the veteran and/
or dependent with the transition
to college, as well as overcoming
weaknesses in specific subject areas.
The mentors and tutors are likewise
veterans and/or dependents of
veterans.
• The college has a very active Student-
Veterans’ of American Chapter (SVA)
on campus.
• The Veteran Affairs Office has a full
time social work intern along with a
part-time mental health counselor,
both of whom are veterans, to work
with our military students and their
families.
• All veterans receive up to a 50% waiver and dependents receive a 20% waiver.
• A veterans’ lounge
• The Veteran Affairs Office, through the
college, has a Veterans’ Emergency Fund that provides
funding to the military student
who might be facing a financial
emergency/crisis.
• The Veteran Affairs Office in
conjunction with the SVA, provides
our veteran population with many
social and community service
opportunities during the course of
each semester, most of which are
family inclusive.
• The Veteran Affairs Office at
D’Youville College is directed by a
Vietnam-Era combat veteran.
ADMISSION

ADMISSION PROCEDURES AND POLICIES

Admission to D'Youville College is moderately competitive. The selection process attempts to identify those qualified men and women who will benefit most from the wide variety of academic and extracurricular programs that the college offers.

Full-time enrollment or status means the student is registered in a specific degree program and carries 12 or more credit hours. Part-time enrollment or status means the student is registered for fewer than 12 credit hours and may or may not be enrolled in a specific degree program. Students should note that part-time enrollment may affect the status of their financial aid.

All students may select an academic major at the time they apply to the college. Students who are interested in attending D’Youville College, but prefer to (or must) delay their commitment to an academic major, can be admitted through the Career Discovery Program.

FRESHMAN ADMISSION

While D’Youville College does not require completion of specific high school subjects for general admission, it believes that the best foundation for college-level work is the traditional college preparatory high school program consisting of subjects in English, natural science, social science, mathematics and/or foreign language. However, certain programs do have specific admission prerequisites (see: Courses of Instruction). Applications are evaluated on the following basis:

1. Academic performance based on an official high school transcript from an accredited high school with a minimum of 16 credits/units or evidence of completion of a general equivalency diploma.

2. Official SAT or ACT scores. Freshmen applicants who have been out of high school for at least two years prior to enrolling at D’Youville are not required to submit scores for either exam.

3. Rank in class (if provided by high school).

4. Letters of recommendation are optional, unless otherwise required by the academic program.*

5. An optional admission essay.

FRESHMAN APPLICATION PROCESS

Applications will be processed when the following items have been forwarded to the office of admissions:

1. The undergraduate application
   Visit www.dyc.edu/apply for details.

2. Official high school transcripts and/or proof of completion of the GED as well as any transcripts for any post-secondary courses completed.

3. Results of the SAT or ACT testing if required (SAT or ACT test scores are often recorded on the student’s high school transcript).
PERSONAL INTERVIEW

Although a personal interview in most programs is not required, it is highly recommended. Appointments can be made by writing, e-mailing or calling the office of admissions. The college admissions e-mail address is admissions@dyc.edu. Phone 716.829.7600 or toll-free 1.800.777.3921. Only candidates for the physician assistant department will be contacted on an individual basis by the P.A. department office for an interview during the application process.

TRANSFER ADMISSION

Individuals who have attended a college or university following high school graduation are considered transfer applicants. Admission to D’Youville College as a transfer applicant is based on the following:

1. Academic performance based on all previous college credit earned from an accredited institution(s). Minimum grade point average (G.P.A.) for acceptance will vary based on the program of interest.
2. Competitive ranking among other applicants (for certain majors).

TRANSFER APPLICATION PROCESS

Applications will be processed when the following items have been completed/forwarded to the office of admissions:

1. The undergraduate application
   Visit www.dyc.edu/apply for details.
2. Official transcripts from any and all colleges and universities previously attended.
3. Letters of recommendation (for certain majors).
4. A personal interview (for certain majors).
5. All veterans, active military, reserve and national guard personnel should request official copies of their Joint Services Transcript (JST) to be forwarded to admissions.

TRANSFER CREDIT POLICY

D’Youville will grant maximum credit consistent with the core curriculum and the requirements of the program/major into which the student transfers. Previously earned credits may be used for degree requirements if an equivalency of the course is established. Courses accepted for credit require an earned grade of C or above with some majors requiring higher grades for specific courses. Students accepted for admission will receive, by mail, an evaluation of their transfer credits.

Students may transfer up to one-half of the major requirements and all the core requirements. Students must, however, complete a minimum of 30 semester hours at D’Youville and meet all course requirements of their department (major) and the general college requirements for graduation. No more than 35 credits may be transferred from a two-year college or its equivalent unless transferred under an existing and functioning articulation agreement between D’Youville College and another institution.

Students entering D’Youville College holding a B.A. or B.S. from another accredited institution are not required to meet the core curriculum requirements. However, they must make up any prerequisites required of the major or program and complete at least one-half the major course requirements at D’Youville as well as fulfill all other policies and requirements pertaining to the degree.

PHYSICIAN ASSISTANT DEPARTMENT ENROLLMENT

In addition to satisfying other general requirements for freshmen or transfer admission to the physician assistant program, applicants must supply the following items:
1. Documented completion of at least 80 hours of direct patient interaction in a healthcare setting
2. Three letters of recommendation
3. The physician assistant essay
4. Starting for the fall 2016 application cycle, all transfer applicants to the physician assistant department are required to apply to D’Youville using the CASPA application found online at: https://caspa.liaisoncas.com.

For more information, call 716.829.7772.

RE-ADMISSION

Any student who previously attended D’Youville College and withdrew, officially or failed to register for a successive semester, must apply for re-admission through the office of admissions. Re-admitted students are responsible for the graduation requirements and academic policies that exist at the time of readmission. As part of the readmission process applicants must provide official transcripts for all coursework completed since their last enrollment at D’Youville College.

Previously enrolled students who have been dismissed from the college may not apply for re-admission for at least three years after their dismissal. An application for re-admission should include an explanation of the reasons why re-admission should be considered at this time, along with supporting evidence.

HIGHER EDUCATION OPPORTUNITY PROGRAM (HEOP)

The Arthur O. Eve Higher Education Opportunity Program (AOEHEOP) is sponsored jointly by D’Youville College and the New York State Education Department. This program provides financial aid, academic, personal and career counseling to academically and financially disadvantaged students for up to five years of undergraduate study. Students who demonstrate potential and a high level of motivation to earn a college degree are encouraged to apply. Applicants must be New York state residents, first-time college students or transfers from an EOP/HEOP college program. Students interested in HEOP should indicate this on their application. For more information, call 716.829.7772.
FRESH START RULE

1. An undergraduate student who re-enrolls at D’Youville College after an absence of five or more years may petition the registrar to re-evaluate all coursework attempted in the student’s previous residency. If the petition is approved, all courses taken will remain on the permanent record. Those with grades of C- or higher or S (satisfactory) will be counted for credit; all others will not.

2. If the petition is approved, the student resumes his/her academic program with no cumulative grade point average and, therefore, is subject to the conditions of warning, probation and dismissal that govern all students.

3. Under the provisions of this rule, a student, prior to graduation, must be re-enrolled for a minimum of 30 credit hours.

4. All courses ever taken at D’Youville College will be used in the calculation of the cumulative grade point average required for graduation with honors.

ADULT STUDENT ADMISSION

Adult or “returning” students are those who have been out of high school for two years and are now looking to enter college to start or complete a degree. Adult students are regulated by the same procedures as FRESHMAN or TRANSFER students depending on their educational history. In addition, adult students should be aware of the following:

1. Returning adults may choose to apply to any of the degree programs now offered or through the college’s ADVANCE Adult Degree Completion Program (see business management on page 80).

2. SAT and/or ACT scores are not required for students who have been out of high school for two years or more. For students who have been out of high school for five years or more and who are applying to physical therapy, occupational therapy, dietetics or the physician assistant degree programs, these scores are not required. Prior experience and strength of recommendations will replace standardized tests.

3. Notification of veteran status (if applicable) is required on the application. Letters of recommendation from an employer, former employer or supervisor and a personal interview are optional. The exception to this requirement is in the physician assistant department which requires three letters of recommendation. If qualified, P.A. applicants will be contacted on an individual basis for a personal interview.

SENIOR CITIZEN ADMISSION

Space permitting, individuals 65 and older may enroll, tuition free, for any course offered during the school year as a non-matriculating student. Senior citizen students are responsible for the college’s general fee, except residents of Mary Agnes Manor and Santa Maria Towers for whom this fee is waived.

INTERNATIONAL STUDENT ADMISSION

D’Youville College has welcomed students from over 50 countries throughout the world. While academic requirements are the same for U.S. and international applicants concerning admission, international students are additionally required to demonstrate proof of English proficiency unless they attended a high school or university in the U.S., Canada, Great Britain, or Australia. International students are also required to submit ALL school/university records to an approved transcript evaluation agency unless from a U.S. or Canadian Institution.

International Student Full-time Enrollment Requirements

According to the federal regulations, an alien seeking to study may be classified as a student (F-1 non-immigrant) only if he/she intends to pursue a full course of study at an approved school.

International Student Application Process

Prospective international students are encouraged to visit our website, www.dyc.edu, to view and or download international application materials. To request an application packet by mail, please contact the international admissions office:

International Admissions
D’Youville College
320 Porter Avenue
Buffalo, NY 14201 U.S.A.
Tel: 716.829.7600 /Fax: 716.829.7900
Toll Free (U.S. and Canada): 1.800.777.3921
E-mail: intadmissions@dyc.edu

All prospective international students must submit the following items:

1. D’Youville College application.

2. Official international transcripts/school records of secondary or university work evaluated by World Education Services (WES) www.wes.org or one of our approved transcript evaluation agencies on our website (unless from a U.S., Canadian or U.S. diploma granting institution). Applicants must submit a course by course evaluation or equivalent.
4. Proof of English proficiency can be demonstrated by achieving one of the following: a minimum accepted score of 61 on the internet-based (IB), or 500 on the paper-based (PB) Test of English as a Foreign Language (TOEFL) exam www.toefl.org; a minimum accepted score of 6 on the International English Language Testing System (IELTS) exam; the successful completion of an English as a Second Language (ESL) program at an accredited or internationally recognized institution (ex:ELS Language Centers, Level 112); or by achieving a “C” or better in two semesters of English Composition taught at a US or Canadian college or university. Students who take the SAT exam and score 450 or higher on the Critical Reading section (students must complete the entire SAT) also meet the requirement. Official scores must be sent directly from the administering institute or testing service.

D’Youville has a cooperative partnership with ELS Language Centers. For more information about ELS and English as a Second Language Programs, please visit their website at www.els.com or contact them directly at info@els.com or by phone 609.750.3500.

A decision regarding admission to D’Youville College will be rendered once all documents have been received, reviewed, and evaluated by the office of international admissions. The student will receive a decision via email and post. Once the student is admitted, a signed letter of acceptance will be included as part of the D’Youville College enrollment packet. The packet will contain all the necessary materials to complete the enrollment process. The packet will contain the following:

1. Information regarding international student orientation
2. Health center information letter outlining mandatory insurance and health requirements
3. Health and immunization report
4. International student financial form

All students currently being admitted to D’Youville College from a country other than the United States will need to be issued a Federal form I-20. The I-20 is needed in order to obtain a F-1 student visa from the American embassy in the student’s home country. An I-20 will only be issued by the International Student Office at D’Youville College after:

1. Acceptance into a full course of study
2. Submission of the International Student Financial forms along with the appropriate supporting affidavits and financial documents.

International students are also required to submit a non-refundable $500 deposit to secure enrollment. This deposit will be applied towards the student’s tuition. In the event that a student does not qualify for an F-1 student visa, the $500 deposit will be immediately returned.

INTERNATIONAL STUDENT SCHOLARSHIPS

All international students entering D’Youville as freshmen (high school graduates) MUST submit SAT and/or ACT scores to be considered for the college’s academic scholarship program. Information on the SAT is available at www.collegeboard.com. Information on the ACT is available at www.actstudent.org.

International students who have previously attended a college or university are not required to submit SAT scores to be considered for academic scholarships. Eligibility is based on previous university coursework.
The student accounts office is responsible for the billing and maintenance of all tuition charges, student fees, room and board charges and the posting of financial aid and student loans as well as refunds for overpayments. An important function of the student accounts office is to assist the students with their student financial aid and student loans as well as refunds for overpayments. Students are responsible for checking their student and course information (STAC) accounts for the most current information regarding their student account.

Student fees are based on full- or part-time status and enrollment in particular classes and academic programs. The college does not waive student fees based on an individual student’s particular semester schedule: i.e., if courses are taken on or off campus or by distance learning or if the student is completing clinical, internship or student teaching requirements.

FULL-TIME STATUS (UNDERGRADUATE STUDENTS)
A student is considered full time when they are registered for at least 12 credit hours in a semester.

PART-TIME STATUS (UNDERGRADUATE STUDENTS)
A part-time student is one who is registered for fewer than 12 credit hours in a semester.

SUMMER SESSION
Tuition and fees for the summer sessions are the same as those charged for previous fall and spring semesters. Some financial aid assistance may be available for the summer sessions if a student is matriculated and registered for at least six credit hours. To be considered for financial aid, the student must contact the financial aid office at 716.829.7500 for further information and requirements.

ACCEPTANCE DEPOSIT
All accepted students must pay a non-refundable $150 deposit based upon the program to which they were accepted. The deposit will be applied toward the first semester’s tuition.

ROOM DEPOSITS
All students residing on campus full time, in either Marguerite Hall or The Apartments, are required to pay a $100 room damage deposit. This deposit is refunded (less any damage charges) after the student withdraws from residence or at the end of the academic year.

INSURANCE
Illness and hospitalization insurance (12-month period) is available through the college for approximately $800 (U.S. student cost). Family coverage is available at an additional cost. Students in all health-related programs are required to have liability insurance coverage through the college for each clinical course. This includes registered nurses in the RN/B.S.N program and students in advanced certificate programs. Health insurance coverage is mandatory for international students and for all students in D’Youville study abroad programs.

OTHER EXPENSES
Students are responsible for purchasing textbooks, consumable supplies and equipment for the courses for which they are registered.
TUITION LIABILITY/Withdrawal Policy

Adjustments to tuition liability will only be made in cases of an official leave of absence or withdrawal. A withdrawal form must be filed with retention services. Any adjustment/ refund of tuition will be calculated based on the date of the filing a withdrawal form and the schedule below for the fall and spring semesters.

Summer Liability - Students will be held 100 percent liable after the drop/add deadline, for each session, for which they are registered.

Please note only tuition may be refunded. Students are 100 percent liable for all fees after the drop/add deadline.

The first day of classes constitutes the beginning of the first week. Individual schedules for each semester should be consulted for exact dates of liability.

Tuition, fees and room and board are not refunded in cases of unauthorized or unrecorded withdrawal. Students should consult the academic section of the catalog for the withdrawal and registration cancellation policy.

Withdrawal from either a course or the college may affect a student’s financial aid eligibility. Such a change may result in a balance being owed to the college. A student should consult with their financial aid advisor before completing the withdrawal process.

Advance Program - See program information for liability policy.

Refund Policy

Students who receive excessive financial aid/student loans may be eligible for a refund. Accounts at a credit status are reviewed weekly. D’Youville College’s refund program is administered by Tuition Management (TMS). Refund choices include D’Youville Visa prepaid card, direct deposit, or paper check. In order to receive refunds, students must register to select a refund payment choice through an easy to use online tool.

Book Vouchers: Students with estimated credits on their account may automatically use their excess funds at the college’s bookstore. The charges will be posted to the student’s account and deducted from any estimated credit. If a student’s charges exceed the credit on file then they will need to pay for the difference out of their own funds. A written agreement is required for each purchase to be charged to a student bill.

Payment Policy

Tuition and fees are payable in U.S. dollars by the established due date for each semester (one week prior to the start of the semester). Satisfactory payment arrangements must be established prior to the due date to avoid a $225 late fee. Students who do not have satisfactory arrangements established are subject to having their registration cancelled at the option of the college. Satisfactory payment arrangements include payment in full (D’Youville College accepts payment by cash, check, money order, bank draft in U.S. Funds, MasterCard, Visa, Discover or American Express), completion of financial aid/student loans, enrollment in the monthly payment plan through Tuition Management Systems (TMS) or documentation of employer reimbursement. A combination of payment arrangements may be used. Interest of one percent per month will be charged on any unpaid balances.

Prior semester balances cannot be carried forward into a new semester and will prohibit a student from residing on campus or registering for additional classes. Transcripts, diplomas and certificates for professional examinations or licensures will also be withheld.

Monthly Payment Plan D’Youville College does offer an interest-free monthly payment plan in partnership with TMS. It is an alternative to large annual or term payments, and it helps to limit borrowing. There is a small enrollment fee for the plan. Payments can be made in U.S. funds by check, MasterCard, Visa, Discover or American Express credit cards or by direct debit from a U.S. checking or savings account. Any foreign student, including Canadian, would need to have a U.S. checking or savings account to be eligible to participate in the direct debit plan.

The budget amount for the plan is calculated by deducting any financial aid/student loans from the student’s tuition and fees. The balance is then broken out over a four- or five-month period for a semester-based plan or nine or ten months for an annual-based plan. Please be aware that the annual plan is only for students attending the entire academic year, and budgets need to be calculated accordingly. The term of each plan would be based on registration. It is the student’s responsibility to inform the student accounts office of any changes.
needed to the budget for the plan. For example, if the student added a class or received additional financial aid. Changes to a budget would need to be approved by the student accounts office, and they would notify TMS of the change. The balance of each semester must be paid in full before a student can register for the next semester.

EMPLOYER TUITION ASSISTANCE
A student whose employer offers tuition assistance can defer payment until the end of the semester by complying with the following procedures:
1. The student must pay a $35 deferred tuition fee each semester.
2. The student must submit a letter from his/her employer each semester stating that he or she is eligible for the benefit and a copy of the company’s reimbursement policy.
3. The student must remit payment on any portion of the balance that is not covered by the employer by the college’s established due date for the semester or set up other satisfactory payment arrangements.

D’YOUVILLE COLLEGE FINANCIAL AGREEMENT
I acknowledge that by registering for classes I am agreeing to pay D’Youville College all tuition and fees and any other balances associated with my registration regardless of any expected payments from any third-party resource, including, but not limited to financial aid, family gifts, employer reimbursement or any other external resource. I am, and remain, personally responsible for paying any and all balance due to D’Youville College.

I understand that the amount of financial aid that I may be eligible for will only be an estimate and I agree to pay any amount not covered by financial aid or that is a result of my registration or change in my financial aid eligibility.

Withdrawal Policy
I also understand that failure to attend classes does not absolve me from my financial responsibility. If I intend to withdraw (whether from an individual course or from the college), it is my responsibility to follow the proper withdrawal procedures. I will be held financially responsible for any course, from which I withdraw from based on the date of the withdrawal and the college’s published withdrawal refund schedule. I fully understand that withdrawing from a course or from the college may affect my financial aid eligibility and I would be responsible for any outstanding balance not covered by my financial aid/student loans.

Failure to Pay
I understand that failure to pay any amount due by the payment due date will result in a late fee of $225 being assessed for the semester in which I fail to pay. A 1% per month interest fee will also be assessed on any unpaid balance. I further understand that should my account become delinquent D’Youville College has the right to: withhold further registration privileges, withhold the awarding of any degrees, diplomas, certifications, official or unofficial transcripts, enrollment verifications or any other official college documents. In addition I understand D’Youville College may commence collection and legal proceedings against me resulting in additional costs and fees.

Collections for Non-Payment
I understand that should my account become delinquent, it will then be considered in default and may be referred to an outside agency for further collection efforts. D’Youville College reserves the right to transfer the account to a collection agency or attorney. My delinquent account may be reported to the credit bureaus. I understand that I will be responsible for the payment of all late fees and interest. I also understand that I must reimburse D’Youville College the fees of any collection agency which may be based on a percentage at the maximum of 33 3/4% of the debt, and all costs and expenses including reasonable attorney fees D’Youville College incurs in the collection of the debt.

Authorization
I authorize D’Youville College, their representatives, agencies, vendors and contractors to contact me at any current or future telephone numbers. This includes my cellular phone or other wireless devices using automated telephone dialing equipment or artificial or prerecorded voice or text messaging.

I authorize D’Youville College to use any available financial aid to pay any balance due for tuition, fees, room and board, as well as miscellaneous charges, and residence hall damages for all terms. (I understand that I can rescind this authorization by submitting a written request to the student accounts/bursar’s office. Revocation may result in balance due that I’m required to pay.)

Change of Status
I agree to notify the registrar’s office of D’Youville College of any change in name, address, telephone number, or Social Security Number.
The financial aid office is located on the second floor of the Koessler Administration Building. Normal office hours are Monday through Friday 8:30 a.m. to 4:30 p.m. If a student is unable to meet with a financial aid counselor during these times, he or she can schedule an early evening appointment with permission of the counselor by calling 716.829.7500.

Call the financial aid office for the exact times and locations of these workshops. New students should complete and submit the FAFSA for receipt at the processor by February 15 of the year they will enter D’Youville College. Continuing students should complete and submit the FAFSA for receipt at the processor by April 15 for the following academic year. The FAFSA is to be filed electronically at www.fafsa.ed.gov.

**FINANCIAL AID OFFICE**

**COST OF EDUCATION**

The following are sample budgets used in determining aid eligibility. Items marked with an * are estimated and may vary from student to student.

**D’YOUVILLE COLLEGE SCHOLARSHIPS**

D’Youville College awards certain scholarships to incoming students based on careful review of previous high school and college academic records. No separate scholarship application is required. Each student is reviewed for scholarship eligibility. Recipients will be notified after the college has accepted them. These scholarships apply to fall and spring semester only.

**MERIT SCHOLARSHIPS**

Honors Scholarship: Qualified freshmen who received this scholarship in the past, had a high school GPA of 88 or better and a combined math/critical reading SAT score of 1100 (or a 24 on the ACT). The award is for 50 percent of tuition and 25 percent of the standard double room rate in Marguerite Hall or 25 percent of the standard rate in the apartments for full-time residents. The award is renewable for the standard duration of the specific academic program. *This scholarship does not apply to summer sessions. The student must be enrolled for at least 12 credit hours and maintain a 2.75 grade point average.

Academic Distinction Scholarship: Qualified freshmen who received this scholarship in the past had an approximate high school GPA of 85 or better and a combined math/critical reading SAT score of 1000 (or a 21 on the ACT). The award is for 25 percent of tuition and 50 percent of the standard double room rate in Marguerite Hall or 50 percent of the standard room rate in the apartments for full-time residents. The award is renewable for the standard duration of the specific academic program. *This scholarship does not apply to summer sessions. The student must be enrolled for at least 12 credit hours and maintain a 2.50 grade point average.

D’Youville Achievement Scholarship: Qualified freshmen who have received this grant in the past, have shown strong potential in the classroom and have performed well on the SAT or ACT. The awards range from $1,000 to $3,000. They are
renewable for the standard duration of the specific academic program. *This scholarship does not apply to summer sessions. The student must be enrolled for at least 12 credit hours and maintain a 2.25 grade point average.

Transfer Achievement Scholarship: Eligible transfer students who have received this scholarship performed well at other colleges or universities and had a minimum QPA of 2.75. The award amounts range from $3,500 to $5,000. They are renewable for the standard duration of the specific academic program. *This scholarship does not apply to summer sessions. The student must be enrolled for at least 12 credit hours and maintain a 2.50 grade point average.

All scholarship recipients losing a semester of eligibility due to earning less than the required cumulative average will not recover that semester; for example, an eight-semester scholarship would then be reduced to seven semesters. A student taking an official leave of absence will be allowed up to two semesters of leave without loss of any scholarship.

No student is eligible for more than one of the above D’Youville College academic scholarships. Students should be aware that academic program grade point average requirements may be higher than scholarship requirements.

Scholarships apply to enrollment of at least 12 credit hours per semester and do not apply to summer study. For the complete scholarship policy, see www.dyc.edu/offices/financial_aid/index.asp.

TUITION SPECIFIC AID

Combinations of tuition-specific aid cannot exceed the total cost of tuition. Tuition specific aid includes but may not be limited to:

• State grants, NY state TAP, Aid for Part-time Study
• Veteran tuition benefits
• D’Youville Grants
• D’Youville Out-of-state Grants
• D’Youville Scholarships, undergraduate and graduate: Honors, Merit and Retention Scholarships
• Tuition Waivers, not limited to the following: family waivers, adjunct faculty waivers, DYC veteran waivers, Canadian waivers and RN waivers
• Employer tuition payments or reimbursements

GRANTS

Federal Pell Grant: These grants are available for students without a previous bachelor’s degree who demonstrate high financial need. The Federal Pell Grant Program is the largest federal student grant program. Federal Pell Grants are not repaid. Awards will range up to $5,775 for 2015-2016. Enrollment eligibility begins at less than half-time enrollment. Financial eligibility is based on family income, assets, household size and number of people in the household attending college, among other factors. Students must file a FAFSA. Pell lifetime limits cannot exceed six (6) years of 100% eligibility.

Federal Supplemental Educational Opportunity Grant (SEOG): SEOG is available for students without a previous bachelor’s degree who demonstrate exceptionally high financial need. They are not repaid. Eligibility is based on Pell eligibility, family income, assets, household size, number of people in the household attending college, the amount of funds allocated to the college by the federal government, the number of people applying for the funds and the timeliness of a student’s application for this aid. Those demonstrating a greater financial need will be given priority for federal SEOG awards. New students must file the FAFSA by Feb. 15 and by April 15 each year thereafter.

FEDERAL TEACH Grant: The Teacher Education Assistance for College and Higher Education (TEACH) Grant program provides up to $4,000 per year in grant money for graduate and undergraduate students who intend to teach full-time. To qualify for the grant, you must teach a high-need subject area at a school which helps students from low-income families for a total of at least four years and within eight years of graduating. If you fail to complete the four-year teaching obligation, you will have to repay the grant with interest.

D’Youville Grant: Eligibility for this grant is similar to federal SEOG eligibility. However, the D’Youville Grant is college funded and the allocation from the college may vary from year to year. Applicants must file the FAFSA by Feb. 15 for new students and by April 15 each year thereafter.

D’Youville Out-of-State Grant: This grant is offered to undergraduate students enrolled at least 12 hours and living in the U.S. from states other than New York. It is offered to help offset the state aid that the students cannot receive from their home states.

Tuition Assistance Program (TAP) Grant: This is a grant for New York state residents attending an undergraduate program within New York state. Applicants must be enrolled for at least 12 credit hours, in good academic standing and working toward a degree or certificate. Awards may range from $500 to $5,000 per year. Eligibility is based on New York State net taxable income of less than $80,000. Using standard deductions, this is approximately a $90,000 federal adjusted gross income for a family of four. Students must be enrolled for at least 12 credit hours to qualify for TAP. In addition to filing the FAFSA, the student must also file the TAP application. All students who have received four semesters of TAP (24 points) must have a 2.0 or higher grade point average and declared a major to be eligible for subsequent awards.

Aid for Part-Time Study (APTS): This is a New York state-funded program for its residents. Applicants must be enrolled for 3 to 11 credit hours per semester. A dependent student’s family NYS net taxable income cannot exceed $50,500 and an independent student’s (and spouse’s) income cannot exceed $34,250. Award amounts vary depending upon the allocation from New York state to the college. Students applying for APTS must file a FAFSA and APTS application. APTS applications must be filed once a year by the last day of the drop-add period for the semester for which they are applying. A signed copy of the prior year New York state tax return must also be submitted at the same time.

WORK-STUDY

Federal Work-Study Program (FWS): The purpose of FWS is to promote the part-time employment of students who need earnings to help meet their costs of attendance. Most employment opportunities are on campus and students are paid $8.75 per hour. Community service placements are available in the vicinity of D’Youville College, and are paid per hour. Students must provide their own transportation. Students generally work about 10 hours per week when school is in session although they may work full-time during vacation periods. Student employees are paid every four
weeks. Priority for FWS awards will be given to those demonstrating a greater financial need. New students must file the FAFSA by Feb. 15 and by April 15 each year thereafter.

Student Employment Program (SEP): This is an on-campus employment opportunity similar to Federal Work-Study except the SEP is funded entirely by the college. Students work an average of ten hours per week, earn $8.75 per hour and are paid every four weeks. Students must complete the FAFSA to determine ineligibility for Federal Work-Study before they are eligible for SEP.

LOANS
Federal Perkins Loan: The Federal Perkins Loan is a low-interest (five percent) loan to help both undergraduate and graduate students, matriculated and enrolled for at least six credits, with college expenses. The loan is interest free while the student is enrolled for at least six (6) credit hours. Award amounts vary depending upon the allocations from the federal government and the collections (repayment) from former student borrowers. Students must sign one master promissory note for all loans, promising to repay the loan principal with the five percent interest, beginning nine months after graduation, depending on the date of first disbursement or after ceasing to be enrolled for at least six credit hours. Participation in entrance and exit interviews is required by federal regulation. Priority for the Federal Perkins Loan will be given to those demonstrating a greater financial need. New students must file the FAFSA by Feb. 15 and by April 15 each year thereafter.

Nursing Student Loan (NSL): The NSL is a low-interest (five percent) loan to help undergraduate nursing students, matriculated and enrolled for at least six credits, in a nursing program. The loan is interest free while the student is enrolled for at least six (6) credit hours. Interest will accrue at 5% six months after the student drops below six credit hours or leaves the nursing program. Award amounts vary depending upon the sum of the repayment from former student borrowers. Students must sign promissory notes each year they receive an NSL, promising to repay the loan principal with the five percent interest, beginning nine months after graduation after ceasing to be enrolled in a nursing curriculum or after ceasing to be enrolled for at least six credit hours. Participation in entrance and exit interviews is required by federal regulation.

FEDERAL DIRECT SUBSIDIZED LOANS: The Federal Direct Subsidized Loan is a low-interest loan to help undergraduate students, attending full- or part-time, with college expenses. The interest rate varies for new borrowers on or after Oct. 1, 1992, not to exceed 8.25 percent. The monies are made available to students through the U.S. Department of Education. They are insured by the federal government. Federal Direct Subsidized Loan limits are as follows: $3,500 for the first year of undergraduate study, $4,500 for the second year, $5,500 per year after the first two years have been completed.* The total federal subsidized debt for undergraduates cannot exceed $23,000. Total student aid, inclusive of the Subsidized Federal Stafford Loan, cannot exceed the cost of education at the school. Students must demonstrate financial need for the Subsidized Federal Loan by first completing and filing a FAFSA. Students may pay a one percent origination/insurance fee. The federal government pays the interest on the Federal Direct Subsidized Loan during at least half-time enrollment. Interest and principal payment by the borrower begins six months after graduation or after the student ceases to be enrolled for at least six credit hours. All first-time Federal Direct Loan borrowers at D’Youville must have entrance counseling prior to the release of the first disbursement of the first Federal Direct Loan made to the borrower for attendance at D’Youville.

* These annual loan limits are subject to change by Congress.
Federal Direct Unsubsidized Loan Program: All students, regardless of income, will be able to obtain a student loan. Interest rate and loan limits are the same as the Federal Direct Subsidized Loan. Interest starts to accrue on the day the loan is disbursed. The student is responsible for interest accrued during the in-school and deferment periods. Interest payments may be capitalized and added to the loan principal. Repayment of principal begins six months after the student ceases to be enrolled at least half time. Students may pay a 1 percent origination/insurance fee. Borrowers may be eligible both the subsidized and unsubsidized loans for the same loan period. However, the combined total of both programs cannot exceed the annual limits. The student must first apply for the subsidized loans. The FAFSA is used to apply for both loans. All first-time Federal Direct Loan borrowers at D’Youville must have entrance counseling prior to the release of the first disbursement of the first Federal Direct Loan made to the borrower for attendance at D’Youville.

Additional eligibility for independent students is provided. This program provides for a maximum annual loan of $6,000 for the first two years of undergraduate study, $7,000 for students who have completed two years of undergraduate study and $20,500 for graduate students. Undergraduate dependent students are eligible to borrow a $2,000 Unsubsidized Federal Direct Loan.* Aggregate loan limits are $23,000 for dependent undergraduate students, $57,500 for independent undergraduate students and $138,500 for graduate students. Loan limits do not include amounts borrowed under the Subsidized Federal Loan or Federal Parent Loans for Undergraduate Students programs. Under the Unsubsidized Stafford Loan Program, graduate and professional students and independent undergraduate students are eligible to borrow. Repayment begins within 60 days after disbursement, except that the borrower is entitled to certain deferments of repayment of principal and interest. The Federal Direct Unsubsidized Loan program is also a variable rate loan influenced directly by the 91-day Treasury Bill. Students must submit a FAFSA.

DIRECT Federal Parent Loans for Undergraduate Students (PLUS): Parents may borrow funds for dependent undergraduate students. The maximum amount a parent may borrow on behalf of each eligible student is the cost of education for the academic year, minus all other financial aid (grants and loans). There is no aggregate loan limit. The interest rate for this loan for 2014-2015 is 7.21% with a 4.29% origination fee. Repayment begins within 60 days after disbursement of the Federal PLUS. A request to defer the principal on this loan is possible. Contact the financial aid office for the proper form. Students must submit a FAFSA.

NON-MATRICULATED STUDENTS AND THOSE COMPLETING PREREQUISITES: Aid for students who are non-matriculated or completing prerequisites to be admitted to an undergraduate degree program at D’Youville College may be limited to Federal Direct Loans. The student is also limited to twelve consecutive months of Direct Loan eligibility while working on prerequisites. The pre-undergraduate Direct Loan limits are $3,500 for subsidized and $6,000 for unsubsidized.

D’Youville College’s Federal Direct Loan default rate is currently 8.2 percent. The D’Youville financial aid office has developed a plan to provide even better loan counseling to students and graduates to reduce the already low default rate. Students can access loan repayment information and options at studentaid.ed.gov.

* Annual limits are subject to change.
STUDY ABROAD
Through D’Youville College, D’Youville College offers a study abroad program. D’Youville students enrolled in the Study Abroad program are eligible for Pell, TAP, SEOG or D’Youville Grants, Perkins or Nursing Loans, Federal Direct Loans and Alternative Loans and the Merit Scholarship awarded upon admission to the college.

Study Abroad Through Other Colleges:
D’Youville College students enrolled in a program of study abroad approved for credit by D’Youville College will be considered as enrolled at D’Youville College for the purpose of applying for assistance under the Title IV and Higher Education Assistance Programs. These programs include Federal Pell Grant, TAP, Federal SEOG, Federal Perkins Loan and the Federal Direct Stafford Loan Programs.

VETERANS BENEFITS: D’Youville College is approved by the New York State Division of Veterans Affairs for the training of veterans and other eligible individuals. The college has been designated as a military friendly school by GI Jobs magazine, placing in the top 15 percent of all colleges and universities nationwide. The college also ranks 4th out of 4,000+ colleges and universities nationwide as a “Veterans Friendly Campus.” Veterans, eligible dependents of veterans and the dependents of active duty military personnel may contact the director of the veterans affairs office, 716.829.7836, for an application and more information.

The D’Youville Veterans Advantage:
• A full service office that provides not only educational counseling but also assistance for all other issues affecting the student-veteran.
• A liberal military leave of absence policy
• A Student Veterans’ of America Chapter (SVA) on campus
• A veterans lounge
• The veterans affairs office is run by a Vietnam-era combat veteran.

D’YOUVILLE COLLEGE VETERAN WAIVER PROGRAMS
For the active duty service member, reservist/guardman or veteran, D’Youville College provides a financial incentive in honor of their service to our country. The program for the student-veteran has two separate components, each with its own unique criteria. These two programs are: the Yellow Ribbon Program, and the D’Youville College Veteran Waiver (VW) program.

Yellow Ribbon (Chapter 33 YR)
D’Youville College is a Yellow Ribbon participant. As such, a Memorandum of Understanding (MOU) has been executed between the Veterans Administration (VA) and D’Youville College, wherein both parties agree to share, on a 50-50 basis, any tuition charges that exceed the CAP established under the revised Post 9/11 GI Bill signed into law by the president in January 2011.
To be eligible for the Yellow Ribbon program, the service member, reservist/guardman or veteran must have 100% eligibility under the provisions of Chapter 33 (Post 9/11) GI Education Bill. A 100% eligibility is defined as the service member or veteran having had 36 aggregate months or more of qualifying active duty served on or after 09/11/2001. Veterans eligible under this program are not eligible for the VW or any other D’Youville grant, waiver or scholarship since the veteran’s entire tuition and fees for each semester are paid in full by the VA and/or D’Youville College.

D’Youville College Veterans Waiver (VW)
All other veterans, service members and/or reservists/guardsmen are eligible for the D’Youville College Veterans Waiver. This waiver is up to 50% of the tuition charged for each semester of attendance at the college. This waiver is applicable to all programs at D’Youville College with the exception of the professional phase of Pharmacy (Pharm.D.) and the Ed.D. programs, and for those students transferring into D’Youville for the graduate component of the doctoral program in physical therapy (D.P.T.).

Who is eligible for the D’Youville College Veterans Waiver Program?
Eligibility for the VW is determined by the two following criteria:
• Any active duty service member, reservist/guardman or veteran not eligible for Chapter 33 at 100%
• Those not eligible for the Yellow Ribbon (YR) and those not eligible for Voc/Rehab Chapter 31 are eligible for the D’Youville College Veterans Tuition Waiver;
• The student-veteran must be registered at DYC for a minimum six credits per semester.
Conditions for receiving and maintaining the D’Youville College Veterans Waiver (VW) are:
• be an eligible student-veteran as defined above;
• as a recipient of the VW, the student-veteran understands that he/she is not eligible to receive any other DYC grant, waiver or scholarship;
• the student-veteran must complete a Free Application for Federal Student Aid (FAFSA); and
• the eligible student-veteran maintains his/her eligibility for any and all federal education awards and/or loans (i.e., Title IV monies, Federal Direct student loans, etc.), state education awards (TAP/VTAP, etc.), and private grants, scholarships not to exceed tuition and loans.

The 50% DYC veteran’s waiver will be applied to the student’s tuition and fees after all tuition-specific aid such as, but not limited to, TAP and VTA. The balance of the tuition, once the veteran’s benefit has been applied to the student’s bill, can be paid from the DYC waiver and Title IV aid.

D’Youville College Eligible Veteran’s Dependent Waiver (VDW)
For the eligible dependent(s) of a veteran (defined as an active duty service member, reservist/guardman or honorably discharged veteran) D’Youville College has established a 20% tuition waiver effective beginning fall of 2011.
Eligibility: The individual must be the spouse or child of a veteran as defined above and may meet the criteria for Chapter 33 (Transfer of Benefits) or Chapter 35 (veteran deceased due to service connected injury or classified as 100% disabled due to a service connected injury as determined by the VA).
Each candidate must meet the conditions for receiving the eligible Veteran’s Dependent Tuition Waiver listed below:
• Eligibility as defined above;
• At least six credit hours
• Understand that he/she can receive only one waiver or scholarship from D’Youville and usually selects the higher of those offered to him/her;
• Must complete a Free Application for Federal Student Aid (FAFSA); and
• Retains the right and ability to receive any and all Federal, State and Private (non DYC) grants, benefits, scholarships and loans for which he/she may be eligible for.

The 20% DYC Veteran’s Dependent Tuition Waiver will be applied to the student’s tuition and fees after all tuition-specific aid such as but not limited to TAP and VTA. The balance of the tuition, once the veteran’s benefit has been applied to the student’s bill, can be paid from the DYC waiver and Title IV aid.
ENDOWED, RESTRICTED AND GENERAL SCHOLARSHIPS

D’Youville College administers a number of scholarships donated by alumni, private citizens, foundations or corporations to undergraduate returning students carrying 12 credit hours per semester and masters-level returning students carrying 9 credit hours per semester. Basic criteria for these awards are good academic standing, a grade point average of 2.75 or better after at least one semester at D’Youville College and/or demonstration of financial need. However, each scholarship has eligibility criteria particular to the desires of the donor. The continuing student must submit a FAFSA for receipt at the processor by March 15 and a D’Youville College Endowed and Restricted Scholarship application available in the financial aid office. These scholarships include the following:

- Pauline Alt, Ph.D. Endowed Scholarship
- Alliance to the Medical Society
- Dara Barker Scholarship
- Dr. Charles A. Bauda Award in Health Services
- Philomena V. Bauda Nursing Award
- Norman T. and Rita A. Bauer Memorial Scholarship
- Jennifer Berner Scholarship
- Sally Jean Blotta Scholarship
- Sister Margaret of the Sacred Heart Dooling Scholarship
- Cathleen Dowling Scholarship
- Sister Mary Sheila Oriscoll Scholarship
- Virginia K. Ego Memorial Scholarship
- Faculty and Staff Scholarship
- Beverly Fest Scholarship
- Josephine Goodyear Foundation Scholarship
- Hearst Scholarship
- HSBC Scholarship
- Mother Mary Iita, GNSH, Endowed Scholarship
- Edward J. Johannes, Jr. Scholarship
- Katherine G. Koessler Scholarship
- Patricia J. Loser Scholarship
- Alice M. and Charlotte M. Meagher Scholarship
- Palisano Scholarship
- Joan Robinson Scholarship
- Mary Crehan Roche Scholarship
- Sigma Theta Tau Zeta Nu Chapter Endowed Scholarship
- Gertrude Lander Stein Scholarship
- Gorg Endowed Scholarship
- Irma Thiel Endowed Scholarship
- Tiffany Endowed Scholarship
- Van Dyke Family Endowed Scholarship
- Monica Clark Wallace Scholarship
- Dr. Mark and Beulah Welch Scholarship
- Sister M. Theodore Weppner Scholarship
- Helen H. Zientek Endowed Scholarship

The Endowed and Restricted Scholarship application is available in the financial aid office by Feb. 1, and is due to the financial aid office on March 15 prior to the next academic year. All applicants will be notified of the results in June.

Sr. Mary Charlotte Barton Alumni Kinship Scholarships are available to students who are related to D’Youville College alumni. For further information, see www.dyc.edu/alumni_friends.asp.

TUITION WAIVERS

In addition, the following tuition waivers are available to those students meeting specific eligibility criteria:

Grey Nuns of the Sacred Heart Waiver:
Members of the Congregation of Grey Nuns may attend D’Youville College tuition-free for day, evening or summer sessions. All fees are the responsibility of the student. This policy is applicable to credit or non-credit courses, full- or part-time study and matriculating or non-matriculating student status.

Grey Nun Kinship Waiver:
Nieces, nephews, great nieces and great nephews of a Grey Nun who attend D’Youville College full time are eligible for $6,000 per year tuition waiver. Applicants must complete the FAFSA and the TAP application.

Religious Credit for Members of Orders other than Grey Nuns of the Sacred Heart:
Orders listed in the National Catholic Directory. Tuition is discounted after all other financial aid. All fees are the responsibility of the student. Applicants must complete the FAFSA and the TAP application.

Family Tuition Waiver:
Families with two or more students attending D’Youville College and enrolled for at least 12 credit hours each, as an undergraduate and 9 credit hours as a graduate student in the same year, receive a reduction of $1,000 per year on each student’s tuition. Both students need to be members of the same household. Families with two or more students residing in the residence halls on a full-time basis in the same year receive an additional $500 per year reduction on each student’s room and board. Applicants must complete the TAP application. Each undergraduate student must complete the TAP application. The Family Tuition Waiver does not apply to veterans or pharmacy students, but the other family member is eligible for this waiver, as are veteran dependents.

Special Note: All students who qualify for non-need-based aid (e.g., Presidential Honors, Academic Distinction and Academic Achievement scholarships, tuition and room and board family credit waivers, RN-only waiver, religious tuition waiver, resident assistant or assistant to the director of resident life waiver, GNSH Kinship Award, employee and employee-dependent waivers, Federal Nurse Traineeship Grants or graduate scholarships) must file the FAFSA annually (exceptions: GNSH waiver and Canadian and international student recipients). In this way, students can be considered for all sources of assistance.
OUTSIDE SOURCES OF AID

There are many sources of financial assistance not offered by the college directly or through the principal federal or state student aid programs. Many service organizations, private corporations and foundations offer scholarships or low-interest loans to their employees to aid in career advancement. Financial aid publishes a monthly scholarship newsletter, which is also located on the financial aid website. Also, several government agencies sponsor student assistance programs for special groups. These include:

- New York State Native American Education Unit: New York State Aid to Native Americans
- U.S. Bureau of Indian Affairs, Department of the Interior: U.S. Aid to Native Americans
- New York State Higher Education Services Corporation: Regents Awards for Children of Deceased or Disabled Veterans
- Regents Award for Children of Deceased Fire Fighters or Police Officers
- New York State Office of Vocational and Educational Services for Individuals with Disabilities
- New York State Health Services Scholarship

The students make applications directly to these agencies.

Employer Tuition Assistance: If a student works for an organization that offers a tuition assistance program, he/she must contact the personnel officer at their place of employment. Many local and Canadian employers provide tuition assistance for their employees. Students whose employers offer tuition assistance can defer payment until the end of each semester by complying with the following procedure:

- The student must pay a $35 deferred tuition fee each semester.
- The student must submit a copy of their employer tuition assistance policy and a letter from the employer verifying their eligibility. The policy must include the percentage to be paid by the company and the date of expected payment. This must be turn in each semester.
- The student is required to submit the employer reimbursement contract, signing a promissory note for the full amount due. Any balance not paid by the employer is the responsibility of the student. The student is responsible for making any additional payment arrangements and should contact the student accounts office.
- If the employer requires grades for reimbursement, the deferred payment must be received no later than thirty (30) days after the end of the semester. Failure to remit payment within the allotted time may result in your classes being cancelled.

Reserve Officers’ Training Corps (ROTC): The Army Cadet Command ROTC Scholarship covers full tuition and mandatory fees. D’Youville College provides additional on-campus housing incentives for ROTC scholarship winners. ROTC scholarship students attending D’Youville will be cross-enrolled into the Canisius College ROTC program with the following D’Youville incentives:

- The student must maintain a 2.5 G.P.A.
- The student will be responsible for any costs above $10,800 if he/she chooses to live in more expensive on-campus housing.

Tuition Reduction for Canadian Students

Currently, D’Youville is offering Canadian students a 10 or 20 percent reduction in their net tuition only (no fees) after all grants and scholarships dependent upon the academic program. If a student is a dual U.S./Canadian citizen, the student may choose to take advantage of either U.S. federal aid or the Canadian waiver. Accordingly, if the student will apply for U.S. federal aid, the student must file the FAFSA for receipt at the processor by Feb. 15 as a new student, and by April 15 each year thereafter. The student must commit to either U.S. aid or the Canadian waiver for the duration of the program at the college.

Ontario Student Assistance Program (OSAP): OSAP is available for Canadian students attending D’Youville College. Applications are available at www.osap.gov.on.ca. The D’Youville College financial aid office will process OSAP applications after the student is accepted.

R.N. Waiver for B.S.N. Completion Program: Undergraduate students enrolled in the bachelor of science in nursing (B.S.N.) completion program for R.N.s are eligible to receive a tuition waiver of 50 percent. The R.N. waiver is for 50 percent net tuition only (no fees) after all federal, state and D’Youville grants and scholarships. U.S. citizens and eligible non-citizens must complete the FAFSA each year and must file the FAFSA by Feb. 15 as a new student, and by April 15 each year thereafter.
Students must apply annually for all forms of financial assistance. Continued receipt of aid is not automatic; there is no guarantee of funding from one year to the next.

To ensure maximum consideration for government and college-based aid, these steps should be followed and the information noted:

- To be considered for Federal Pell Grant, Federal Direct Loans and Federal campus-based aid (e.g., Federal Work-Study, Federal Perkins Loan, Federal Supplemental Educational Opportunity Grant, Nursing Student Loan) and college-awarded aid (e.g., D’Youville Grants, all D’Youville scholarships), the FAFSA must be filed. The federal code number for D’Youville College is 002712. Electronic filing of the FAFSA is done at www.fafsa.ed.gov.

- A student whose FAFSA reaches the processor by April 15 receives priority consideration for the aid noted above. Applications received after April 15 are considered late and subject to availability of funds after awards have been made to those students who filed by April 15.

- The processor, upon receipt of a FAFSA, e-mails a student aid report to the student. The processed aid application and analysis are transmitted to the school.

- Aid applicants, who are selected for verification by the U.S. Department of Education will be required to submit to D’Youville a federal IRS tax transcript and supporting documentation or utilize the IRS Data Retrieval Tool on the FAFSA application. This information should be submitted within two weeks only when directly requested by the financial aid office.

- Students new to D’Youville College will not receive notification of eligibility for aid until the admissions office has officially accepted them.

- Undergraduate, independent students born on or after Jan. 1, 1992 are required to submit documentation of their independence to the financial aid office.

- When any aid is offered, a student may accept, reduce or decline it by the date specified in the award letter. The financial aid office will accept all the aid after the date specified in the award letter.

- Federal regulations require that students inform the financial aid office if any financial aid is received from any off-campus agency or organization. Any such aid becomes part of the total aid package and may affect a student’s eligibility for assistance.

- All undergraduate matriculated students without a previous bachelor’s degree who are taking even one credit hour per semester must apply for the Federal Pell Grant. Application for the Federal Pell is made directly on the FAFSA. As a result of filing the FAFSA, a student will be sent a Student Aid Report (SAR) from the Federal Pell processor.

- All matriculated undergraduate New York students attending 12 credit hours or more each semester must apply for the New York State Tuition Assistance Program (TAP) grant at www.hesc.com.

- All matriculated New York resident undergraduate students attending less than full time (three to 11 credit hours) should apply for the New York State Aid for Part-Time Study (APTS) grant. The APTS applications are available in the financial aid office. The deadline is the last day of drop/add period each semester. A signed copy of the previous year’s N.Y.S. tax return must be attached to the signed application.

- Federal Direct Loans are sponsored by the U.S. Department of Education. It lends to student applicants according to federal guidelines. Electronic Federal Direct Loan promissory notes are found at www.studentloans.gov. The financial aid office includes Subsidized and Unsubsidized Direct Loans in aid packages for those students who qualify for those loans. For students interested in Parent PLUS Loans, parents must complete those promissory notes as well as inform the financial aid counselor of an interest in those loans.

- To obtain all forms of financial assistance, a student must be in good academic standing and be making satisfactory academic progress.
Meeting the New York State Requirement

A change in legislation has created a uniform chart used to determine a student’s satisfactory academic process. The following chart must be used by all institutions for first-time undergraduate students beginning with the 2006-2007 academic year.

### CALENDAR: SEMESTER PROGRAM: BACCALAUREATE PROGRAM

For TAP, a grade of “F” is considered to be complete but not earned credit.

Part-time matriculating students are considered to be making New York state satisfactory academic progress for financial aid purposes if they are maintaining a cumulative G.P.A. consistent with full-time study based on the semester of enrollment and if they are earning at least 50 percent of credit hours undertaken during the first year in which an award is received, 75 percent of credit hours undertaken during the second year in which an award is received and 100 percent of credit hours undertaken thereafter.

Freshman and transfer students will be assumed to be in good academic standing and making satisfactory academic progress during their first semester of attendance. If a student fails to meet any of these criteria, further payments of any New York State financial aid awards will be suspended until either the student has regained satisfactory academic progress or has shown evidence of the ability to successfully complete the program.

### Maximum Time Frame

Students are only eligible to receive 48 points (or eight full-time semesters) of TAP. HEOP students may receive ten semesters of TAP.

As mentioned previously, all students who have used 24 TAP points must have at least a 2.0 cumulative average and must have declared a major to maintain TAP eligibility.

### Grace Period and Loss of New York State Aid

There is no grace or probationary period for New York state aid.

### One-Time Waiver

New York State Commissioner of Education regulations permit students to receive a one-time probationary seminar of satisfactory academic progress requirements if a student is determined to be ineligible to receive the state award. A student may receive one probationary semester as an undergraduate student. The probationary semester is to be used only in exceptional cases (e.g., illness, death in the family, etc.) in accordance with the TAP Waiver Policy Guidelines and Procedures as stated on the waiver application.
Waiver of the C-Average Requirement

The C-average requirement may be waived for undue hardship based on:
- death of a student’s relative or
- student’s personal illness or injury

A waiver must be documented and must relate to circumstances that have affected the student’s ability to achieve a cumulative C average as of the end of a particular semester or term.

The C-average waiver is separate from the one-time good academic standing waiver and may be granted more than once if circumstances warrant.

Reinstatement of Good Academic Standing

Students who have lost good academic standing may restore this standing in one of the following ways:
1. Make up past academic deficiencies by completing one or more terms of study without receiving any state grants or scholarships,
2. Be readmitted to school after an absence of at least one year or
3. Transfer to another institution

Incomplete Grades

A probationary semester may not be granted because an incomplete (I) grade is received. If an incomplete is included in the number of hours required to be completed during the previous semester (see chart on previous page), the student will not be eligible to receive the state award for the subsequent semester. If the student can convert the incomplete grade into a complete grade before the start of the third week into the next semester, the grade and credit hours will be counted in determining the student’s academic progress. If the student does not convert the incomplete grade before the start of the third week into the next semester, the student is not making satisfactory progress (even if the student turns in the incomplete at some point after the start of the third week during that next semester).

Satisfactory Academic Progress Regulations Governing Title IV Federal Aid Recipients

Policy Statement

Financial aid is intended to meet the financial needs of the student who otherwise could not or would not consider continuing their education. Students who receive financial aid must not only demonstrate financial need, but must also make satisfactory academic progress.

Federal regulations require D’Youville College to have a satisfactory academic progress policy within the guidelines set by the U.S. Department of Education. To be eligible for Title IV financial assistance, Title IV recipients will be reviewed on both a qualitative requirement (G.P.A.) and a quantitative requirement (number of hours successfully completed) to ensure that they are making progress toward a degree or certificate. Each continuing student (Title IV recipient) must meet the requirements specified herein. Title IV financial aid programs include: Federal Pell Grant, Federal Perkins Loan, Federal Work-Study (FWS), Federal Supplemental Education Opportunity Grant (FSEOG), Federal Stafford Loan and Federal PLUS Loan. Satisfactory academic progress, as described below, is evaluated three times a year, after the summer, fall and spring semesters. Enrollment status will be determined as of the end of the second week of classes. While these requirements govern the student’s eligibility to continue receiving financial aid, each student must also conform to the academic policies established by faculty council. Failure to maintain satisfactory academic progress, as described below, may result in cancellation of financial aid awards and the student may have to repay funds already received.

Permission to enroll in classes for a subsequent semester does not equal financial aid satisfactory academic progress.

Meeting the Quantitative Requirement

The quantitative requirements for undergraduate students are based upon the student’s enrollment status at the end of the drop/add week at the start of each semester. Students must successfully complete a particular percentage of attempted hours for which financial aid was based.

</tbody>
</table>

Meeting the Qualitative Requirement

- A student who has attempted 0-16 D’Youville credit hours must have a minimum cumulative G.P.A. of 1.0.
- A student who has attempted 17-32 D’Youville credit hours must have a minimum cumulative G.P.A. of 1.50.
- A student who has attempted 33-48 D’Youville credit hours must have a minimum cumulative G.P.A. of 1.65.
- A student who has attempted 49-64 D’Youville credit hours must have a minimum cumulative G.P.A. of 1.80.
- A student who has attempted 65-80 D’Youville credit hours must have a minimum cumulative G.P.A. of 1.90.
- A student who has attempted 81 or more D’Youville credit hours must have a minimum cumulative G.P.A. of 2.0.

Maximum Time Frame

Regulations also specify a maximum time frame requirement. For undergraduate students, the maximum time frame in which a student must complete his or her program of study cannot exceed 150 percent of the published length of the program. (e.g., Students in an undergraduate program that requires 120 credits to graduate are eligible
to receive Title IV aid for no more than 180 credits). After a student has exceeded the maximum time frame requirement, he/she will automatically lose Title IV aid. Students will not be granted a grace period. No financial aid will be disbursed for the student during subsequent semesters unless the student has made an appeal to the satisfactory academic progress appeals committee and the appeal has been granted.

Grace Period and Loss of Title IV Aid

The first time a student does not meet the Title IV satisfactory academic progress requirements, the student will be given a one semester warning grace period. During this warning grace period, the student will continue to receive Title IV assistance, but it is the individual’s responsibility to regain good academic standing, whether it is through full-time or part-time study. At the end of this period, the student’s academic performance will be compared to the appropriate standards. If the student has again failed to meet the requirements, the student will lose all eligibility for Title IV aid. When the student has completed an enrollment period without Title IV aid and has achieved the required cumulative G.P.A., the student regains future Title IV aid eligibility. If circumstances so warrant, the student may be given a probationary semester at the discretion of the satisfactory academic progress appeals committee. Application to appeal the criteria for probation is to be initiated through the financial aid office.

Freshman and transfer students are assumed to be in good academic standing and making satisfactory academic progress for the first semester of attendance at D’Youville College.

Students will be notified via DYC e-mail and in writing via U.S. mail if they have been placed on probation. Students who lose Title IV eligibility will be sent a letter to their permanent home address listed with the financial aid office.

Appeals

Students may appeal their satisfactory academic progress status by completing and submitting a written appeal form to the financial aid office. Forms are available at “finaid online.” Appeals must be submitted with appropriate documentation. Appeals may include unusual circumstances that have affected the student’s academic performance. Appeals are reviewed by the satisfactory academic progress appeal committee; its decision and recommendation are final. If the appeal is approved, there may be specific conditions for the student to meet to remain eligible for financial aid. Conditions may include reducing the number of classes enrolled in or requiring working with an academic counselor throughout the semester. If the conditions of the waiver are not met, then the waiver becomes void for the next semester and the student is no longer eligible for federal financial aid. If the initial appeal is denied, the student will remain in an “ineligible” status and must pay for educational costs. If a student is denied aid based on academic progress, that denial takes precedence over any previous award notification that the student may have received.

Students will also be given a date by which the appeal must be submitted in writing to the appeal committee. Supporting documentation is required. This might include a letter from a physician, or counselor, academic advisor or a faculty member.

Students will receive a decision of their appeal via both a phone call and in writing.

SUCCESSFUL COMPLETION OF COURSES

• To be counted as successfully completed or earned hours, the student must receive a grade of A, B, C, D or S.
• Withdrawals (W), incompletes (I) or failures (F) are counted in the attempted hours but are NOT successfully completed or earned hours.

EXAMPLE #1: At the end of the drop/add period, an undergraduate student in his seventh (7th) semester at D’Youville was registered for 12 credit hours. At the end of the semester, the student has failed one three-credit course and withdrew from another three-credit course. The student has successfully completed six (6) credit hours or 50% of the hours that he attempted. The student successfully met the minimum quantitative standards for progress (50%).

INCOMPLETE GRADES

If the student can convert an incomplete grade into a complete grade before the start of the third week of the next semester, the grade and credit hours will be counted in determining the student’s academic progress. The student must submit to the financial aid office proof of the grade upon completion. According to the regulations, if the student does not convert the incomplete grade before the start of the third week into the next semester, the student is not making satisfactory academic progress (even if the student turns in the incomplete at some point after the third week during that next semester). The student is given a one-semester grace period for the duration of the coming semester and allowed to continue receiving Federal Title IV aid. At the end of this probationary semester, the student will once again be monitored for progress. If the student is not up to par, the student will lose Title IV aid.

DEPARTURE FROM D’YOUVILLE COLLEGE

If a student withdraws, takes a leave of absence or graduates from D’Youville, the following should be kept in mind:

• Payment of principal and interest of all Federal Stafford Loans must begin within six months after the last day of at least half-time enrollment.
• Borrowers of Nursing Student Loans, Federal Perkins Loans and Federal Stafford Loans must participate in exit counseling before a withdrawal, leave or degree is granted.
• D’Youville will notify the U.S. Department of Education of a Federal Stafford Loan borrower’s less-than-half-time enrollment, withdrawal or graduation.
• Upon departure from D’Youville, all student borrowers must complete an exit counseling either online, via surface mail or with a financial aid counselor.
FINANCIAL AID REFUND POLICY

Students who have been enrolled, are recipients of Federal Title IV Financial Aid and who completely withdraw from the college or take a leave of absence during a semester will receive a refund in accordance with the federal refund policy based on the number of days the student completed, less unpaid charges for the amount to be retained by the college, repaid to the financial aid programs and refunded to the student.

All refunds will be paid to the financial aid programs in accordance with federal policy in the following order:
1. Federal Direct Unsubsidized Loan
2. Federal Direct Subsidized Loan
3. Federal Perkins Loan
4. Federal Plus Loan
5. Federal Pell Grant
6. Federal SEOG
7. Other Title IV Programs

D’Youville College scholarships and grants will be based on the percentage of time the student was enrolled for the semester, not to exceed the balance due on the student’s account.

Alternative loans will not be prorated for a return to the private lender if it will result in a balance due to the college.

FINANCIAL AID GLOSSARY

Award Package: A list of the financial aid a student has been awarded from the various programs (federal, state and campus).

Budget: An estimate of what it will cost to attend college. A budget includes tuition, fees, room and board, transportation, books and supplies and personal expenses.

Campus-Based Funds: Any federal financial aid that is awarded by the college (e.g., Federal Perkins Loan, Nursing Student Loan, Federal Supplemental Educational Opportunity Grant and Federal Work-Study).

Free Application for Federal Student Aid (FAFSA): The need analysis application that students use to report family income and assets. The FAFSA is transmitted to an approved processor. The college uses the analysis sent by the processor to determine a student’s financial aid eligibility. Electronic application is made at www.fafsa.ed.gov.

Family Contribution: A determination, by an approved federal formula, of how much a student and the family can contribute toward educational costs. The family contribution is reported to the college as part of the analysis of the student’s aid application (FAFSA).

Financial Aid Eligibility: The difference between the budget and the family contribution. The amount of money a student is eligible to receive to assist in meeting the costs of education.

Full-Time: 12 credit hours or more per semester for undergraduate students and 9 credits or more for masters’ students.

Grant: Gift aid that does not have to be repaid. A grant is based on financial need.

Institutional Funds: Any financial aid that is D’Youville College funds and is awarded by the college.

Loan: A type of financial aid that must be repaid, usually at low interest rates and after the student has left school. For subsidized educational loans, the federal government pays the interest while the student is attending at least half time. For unsubsidized loans, the student is responsible for the interest even while in college.

Part-Time: Less than 12 credit hours per semester for undergraduate students. Generally, students must be enrolled at least six credit hours per semester to be eligible for financial assistance (Exception: New York state TAP requires 12 credit hour enrollment).

Priority Deadline/Due Date: New students must file the FAFSA to be received by the processor by Feb. 15. Continuing students must file the FAFSA to be received by the processor by April 15. If a student’s FAFSA is received by the processor by these dates, the application is considered to be on time. The on-time application will be given priority in the distribution of campus-based and institutional funds, as available. The Web site address is www.fafsa.ed.gov.

Scholarship: A type of financial aid usually awarded for outstanding ability (e.g. academic scholarship). Financial need is usually not a criterion. A scholarship does not have to be repaid.

Title IV Aid: Federal student aid programs regulated by the U.S. Department of Education under Title IV, Pell Grant, SEOG, Perkins Loan, Direct Subsidized and Unsubsidized Loans and PLUS Loans.
ACADEMIC POLICIES AND PROCEDURES

POLICY ON ACADEMIC INTEGRITY
Students are expected to conduct themselves with integrity and honesty while completing course requirements and complying with college academic regulations. Violations of academic integrity include, but are not limited to, the following:

(a) Plagiarism: The presentation of another’s writing or another’s ideas as one’s own without citation;

(b) Cheating: The use or provision of any unauthorized assistance when completing an exam or individual assignment;

(c) Falsification: The fabrication of signatures, notes, reports, data or other academic information; the submission of reports, papers or exams prepared by a person other than the student; this includes purchasing or selling term papers or other academic materials;

(d) Procurement: The distribution or acceptance of prior or current lab assignments, exams or other academic matter without the permission of the instructor; and

(e) Co-submission: The submission, without permission of the instructor, of academically required materials previously or contemporaneously submitted in whole or in substantial part in another course.

A breach of academic integrity as determined by the instructor will result in automatic failure of the exam, paper or course, and/or ineligibility to repeat the course, a requirement for additional academic work or other sanctions as stated in the course syllabus. In general, it is expected that most infractions will be handled between the student and the faculty member. Serious or repeated infractions, however, will be reported to the student’s academic major program chair as defined below and to the vice president for academic affairs or dean, as appropriate.

The student may appeal decisions or judgments as outlined in the appeals procedures below. Repeated infractions may result in dismissal from the college.

PROCEDURES FOR ALLEGED VIOLATIONS OF THE D’YOUVILLE COLLEGE POLICY ON ACADEMIC INTEGRITY
An instructor who has knowledge that a student has committed a violation of the policy on academic integrity may respond as outlined above. If the student wishes to appeal the faculty member’s decision, then the faculty member will, upon notification of the initiation of this appeal, notify in writing the chair of the student’s academic major. If the student has no academic major, the department chair in which the student receives academic advisement will be notified.

Appeals from the instructor’s decision will be made first to the instructor’s chair or program head; then to the academic integrity board and then to the appropriate dean, whose decision will be final. An adverse decision may subject the student to additional program specific sanctions. In the event that the appeal is not upheld, a record of the violation and the penalty imposed will be a part of the student’s academic record (department and registrar’s office) while at the college.

If the student’s records show prior offenses of the academic integrity policy, the matter will be reported to the chair of the student’s major and the appropriate dean. The chair will decide upon appropriate sanctions and the matter will be reviewed by the academic integrity board. The decision made by the academic integrity board can be appealed to the appropriate dean, whose decision will be final.

At every step in the appeals process, the student retains the right to review and rebut the accusations of academic misconduct and the evidence that supports them.

The academic integrity board will be comprised of the members of the academic policies committee of the faculty council. Members of the committee who are involved in the alleged violation will recuse themselves from the proceedings. Sanctions for second and subsequent violations of the academic integrity policy require approval by members of this board and are as follows:

a. Dismissal from the student’s academic program with either an opportunity to reapply after one semester or one year or no opportunity to reapply.

b. Mandatory leave of absence from the college for at least one semester and no more than two semesters. The term semester does not include summer sessions or courses. Any credit earned at another institution while a student is on a mandatory leave of absence will not be accepted by D’Youville College for any purpose.

c. Dismissal from the college with no opportunity to reapply.

ACADEMIC YEAR
The regular academic year is comprised of two semesters of approximately 15 weeks each. The fall semester begins on the first day of classes and ends on the last day of final exams, which occur before the Christmas holiday. The spring semester begins on the first day of classes and ends on the last day of final exams, which occur before Memorial Day. D’Youville also offers several sessions of summer study.

ATTENDANCE
Students are expected to attend all regularly scheduled classes. Each instructor may determine the requirements for class attendance within specific courses; the requirements should be clearly stated at the beginning of each semester. Faculty are requested to notify the registrar if a student has never attended or stops attending a class.

...
GRADE POINT AVERAGE

The semester average and the cumulative grade point average (G.P.A.) are derived by dividing the number of grade points earned by the number of semester credit hours attempted. (S/U grades carry no grade points.) Grades for courses transferred from other institutions are not included in the G.P.A. calculation.

* The grade of I becomes an F if the work is not completed by April 20th (for fall courses), August 20th (for spring courses), or December 5th (for summer courses). An IA automatically becomes an F if the student does not complete a deferred examination before the date determined by the professor involved. IS and IP grades will be replaced with the earned grade upon course completion. Students will not be allowed to register for a course for which a prerequisite has been established, if a grade of incomplete (I or IA) has been received in the prerequisite course and has not been replaced by an acceptable grade before the course begins.

** A course may be dropped without academic penalty until the end of the tenth week of the semester. The grade of “F” is given after that time.

CLASSIFICATION OF STUDENTS

Matriculating students are those accepted into a major who are following a prescribed curriculum of study leading to a degree. Matriculating students are eligible for financial aid consideration. Undergraduate matriculants are grouped by class year based on the number of credits completed for registration, financial aid and reporting purposes; however, in certain majors, program requirements determine the graduation year.

- Seniors have earned 86 or more credits
- Juniors have earned 56-85 credits
- Sophomores have earned 26-55 credits
- Freshmen have earned 25 or fewer credits

Non-matriculating students have not been formally accepted into an academic program, whether they are attending undergraduate or graduate classes. Non-matriculating students are subject to the college’s academic policies and procedures. Students dismissed from the college or on a leave of absence may not attend as non-matriculating students.

TRANSFER CREDIT

The registrar’s office determines whether college credits previously earned at other institutions may be transferred to D’Youville College. Evaluation of credit is made only after the student submits an official transcript. Transfer credit may be awarded for each course in which the student has earned a grade of C or better from a regionally accredited institution in courses applicable to the College core or the intended major or program. Certain majors or programs may require higher grades and specific timelines to transfer in specific areas. Departments and schools reserve the right to refuse to accept transfer credit hours in fulfillment of their major requirements. Grades for transfer credits do not appear on the D’Youville College transcript and are not included in the student’s GPA calculation.

Students may transfer up to half of the credits required for their major course or program of study and all of the credits required to meet the college core requirements. Students must complete a minimum of 30 semester credit hours at D’Youville College and meet all of their major/program and core curriculum requirements in order to graduate from the college. No more than 65 credits may be transferred from a two-year college or its equivalent unless transferred under an existing and functioning articulation agreement between D’Youville College and another institution. Transfer credits completed at institutions with other than regional accreditation are evaluated for transfer purposes on a case-by-case basis.
Students entering D'Youville College with a bachelor’s degree from a regionally accredited institution, as determined by the registrar’s office, are not required to meet the core requirements. However, they must make up any prerequisites for the major curriculum, complete at least one-half of the major curriculum requirements at D’Youville and fulfill all other requirements pertaining to the degree.

EDUCATION PROGRAMS IN NON-COLLEGIATE ORGANIZATIONS

In some circumstances, credit may be awarded for education and/or training obtained through certain non-collegiate organizations (e.g., industrial or corporate programs). Guidelines for awarding credit are currently found in the following documents:

- The Directory of The National Program on Non-Collegiate Sponsored Instruction, The University of the State of New York and The State Education Department.

CREDIT BY EXAMINATION FOR ADVANCED STANDING

Advanced Placement Program

D’Youville participates in the Advanced Placement Program administered by the College Entrance Examination Board. Students who receive a rating of three to five on the Advanced Placement Examinations will be considered for college credit, advanced placement or both. Policies vary with the student’s desire to use such credits in a major or in an elective area.

College Level Examination Program (CLEP)

The College Entrance Examination Board has established CLEP to measure academic achievement; it does not set standards or award credit. At D’Youville College, matriculated students are limited to 15 credit hours of credit by standardized examination to count toward D’Youville College credit. CLEP, Excelsior (Regents) College and other standardized college-level examinations taken prior to enrollment at D’Youville College are limited to 15 credit-hours and may be in addition to the limit of 15 credits while enrolled at D’Youville College. For additional information about CLEP, consult the registrar.

Excelsior (Regents) College Examination Program

The New York State Education Department established this program so that individuals who have developed college-level competencies outside the formal classroom can demonstrate these competencies and receive credit. The examinations are now available in more than 30 subjects. D’Youville participates in this program and grants credits to students who pass these examinations and meet D’Youville standards. A maximum of one full year’s work (30 credits) may be accomplished in this way. For further information, write to Excelsior College, Test Administration, 7 Columbia Circle, Albany, NY 12203-5159 or access the ACT PEP website at http://www.excelsior.edu/exams.

ADMISSION TO A MAJOR

Qualified students are admitted to a major when they are accepted into the college. Students who are suitably qualified but undecided about their selection of a major may matriculate in the Career Discovery Program (CDP). A student who has attained 45 credit hours must be accepted into a major program or may be subject to dismissal from the college.

CAREER DISCOVERY PROGRAM

Qualified students who are admitted to the college but have not declared or been directly accepted into a college major will be assigned to the Career Discovery Program (CDP). The CDP provides students with opportunities to sample introductory courses, fulfill core requirements, and take career exploration courses before choosing an academic major. Students who have been dismissed from their academic program may also be served by the CDP given they have earned less than 45 credit hours. Students meeting academic requirements may apply to their intended major at any point throughout their time in the CDP; however, all students must be enrolled in a degree-granting major prior to earning 45 credit hours or risk being dismissed from the college.

DOUBLE MAJOR

Students may major in two academic areas. The student will be required to fulfill degree requirements in both curricula. This may be done within the minimum 120 hours. Students must be formally accepted for admission into each degree program.

SECOND BACHELOR’S DEGREE

To earn a second baccalaureate degree, a student is required to complete at least 30 credit-hours at D’Youville in addition to those required for the original baccalaureate degree. All requirements for the curriculum in which the second degree is earned must also be satisfied.

CHANGE OF MAJOR

Any student who changes majors must complete a change of major form available in the registrar’s office.

When making a formal application for a change of major, the student may request that specified courses required for the first major be excluded from the second major. The following conditions will prevail:

1. Course to be excluded was required in the previous major.
2. Course cannot be applied to core requirements except in the area of free electives.
3. Once approved, both credit(s) and grade points will be excluded from calculation toward the second degree.
4. Student must initiate the request in writing to the registrar.

The student may choose to keep some courses from the previous major and drop others. All courses taken remain on the student’s transcript as part of the complete record, but the courses excluded will not be added to the cumulative GPA.

Students who have applied and been accepted into a new major will be assigned a new academic advisor by the chair of the new academic major.
ACADEMIC ADVISOR

All students at D'Youville College are assigned an academic advisor within their major. Advisors help assess progress, give direction in the program of study and assist in the choice of courses. Students must meet with their advisor before registering to obtain a personal identification number (PIN).

Students are welcome to contact their advisor at any time during the semester. All faculty members post and observe regular office hours and are also available by appointment.

CHANGE OF ADVISOR

Ordinarily a student will retain the advisor assigned by the department chair. An individual wishing to change advisors should obtain a change of advisor form. After completing the form with the required department signatures, the student must return the form to the registrar’s office for processing.

REGISTRATION

Specific online registration dates are assigned for each class year; dates and time of registration are posted on the registrar’s Web page and outside the registrar’s office in KAB, Room 221. Students must obtain their personal identification number (PIN) from their academic advisor to register online.

Prior to registration, students must consult with their academic advisor and ensure their billing accounts are in order. At the time of registration, the student must be in compliance with New York state health laws.

Student schedules are available online at www.dyc.edu under the Student and Course Information link (STACI).

Once officially registered, the individual is responsible for payment of tuition and fees. No one will receive credit for a course unless officially registered for it.

To avoid a late registration fee, continuing students must register no later than one week before classes begin.

PREREQUISITES AND COREQUISITES

Prerequisites are courses that must be successfully completed (as determined by the regulations of the department in which the course is taught) before a specific course is begun. These courses generally are part of a sequence that a department determines must be completed for the integrity of the discipline and the benefit of the student. Individual departments may set higher standards of acceptable completion of prerequisites in order to progress to the next level of the major.

Corequisite courses must be successfully completed either before a specific course is begun or at the same time as a designated course. If a corequisite has not previously been completed successfully, the student must register for both the designated course and the corequisite at the same time. In most cases, withdrawal from the corequisite may result in the need to withdraw from the primary course.

Students may occasionally (after consulting their academic advisor) wish to withdraw from a corequisite course in mid-semester while remaining in the other course. This can only be done with the agreement of the instructor of the course in which the student wishes to remain. It is recommended in such a case that the student continue to audit the corequisite course while attending the other, and that the corequisite be completed during the next semester in which the course is offered.

In some departments, courses are listed as prerequisite and co-requisite to more than one course. In this instance, students may withdraw from a course but must successfully complete it prior to beginning the higher level course for which it is a prerequisite.

CROSS-LISTED COURSES

Several courses are listed in two disciplines. At the time of registration, the student may select the discipline where the credit will be applied and should indicate this on the registration form. Cross-listing is indicated after the course description in the catalog.

CONTINUOUS REGISTRATION

Once accepted into an academic major, students are required to register for classes each semester and to remain in program pursuit. Any student who is unable to register for any semester(s) must contact the registrar’s office and complete the leave of absence/withdrawal form. Students who fail to continuously register and who also fail to file for a leave of absence will be considered as withdrawn from the college and will need to reapply for admission.

Students are required to have an active status the semester they graduate. Specifically, students must be registered for at least one class during their final semester. Any exception to this policy, including off-campus study, must be approved by the registrar and the vice president for academic affairs or dean, as appropriate.

COURSE LOAD

Full-time undergraduate students carry 12 or more credits. Full-time tuition covers from 12 to 18 credit hours.

Students with a G.P.A. of 3.0 or above may elect to carry more than 18 hours a semester. Specific permission for this is obtained from their department chair. Students are charged for any credit hours over 18 at the current rate per credit hour.

CHANGE OF REGISTRATION (DROP/ADD PROCEDURE)

Students may change their course selection by submitting a completed drop/add form to the registrar’s office only before the scheduled drop/add deadline without academic or financial penalty. Students need their advisor’s signature on the drop/add form when adding or deleting a course. If a student merely wishes to change the section but retain the same course, only the student’s own signature is needed on the form. However, in those majors where student schedules are constructed with a pre-determined block of courses and laboratories, the signature of the department chair is necessary to authorize a change of section. Students may not “force register” by appearing in a class.

COURSE AUDIT

Permission to audit a course must be obtained beforehand from the department chair after consultation with the instructor. The request to audit must be made at the time of registration.

Credit is not given for audited courses; a notation of AU appears on the transcript in place of a grade. The classification of audit and accompanying AU grade cannot be changed after the Add/Drop period. The fees for auditing are equivalent to those for regular credited courses, except for alumni as indicated in the fee schedule.
DIRECTED STUDY
In unusual circumstances, a student may be advised and permitted to take a course in the regular curriculum on a directed-study basis. Reasons for giving this permission are commonly related to the student's status and at the discretion of the chair of the department from which the course is taught.

(a) as a candidate for graduation whose program requires the course or
(b) as a transfer into the major for whom the course is unavailable because of the course scheduling rotation.
(c) when a course, which is offered only occasionally and is not necessary for the major, is sought by a student as an elective.

The student must obtain the approvals as indicated on the directed study form available in the registrar's office. No directed studies are permitted in any nursing clinical courses or student teaching assignment.

INDEPENDENT STUDY
A student pursuing an independent study is able to pursue some special area of interest that is beyond the scope of current course offerings at D'Youville. Seniors and juniors who have a cumulative average of at least 3.0 are eligible. Exceptions may be possible through petition if the cumulative average is at least 2.5.

The student undertaking such a project should have an appropriate background preparation in the subject.

Independent study courses will be designated by the discipline code letters, the numerals 479 (fall offering) or 480 (spring offering) and the initials IS (e.g., NUR 479IS). The title will reflect the course content.

The student must complete a written proposal of the study and obtain the approvals as indicated on the independent study form available in the registrar's office.

PASS/FAIL (SATISFACTORY / UNSATISFACTORY) OPTION
All satisfactory/unsatisfactory grades appear on the transcript as S (Satisfactory) or U (Unsatisfactory) with no grade points assigned. Students may choose to receive an S/U grade in free elective courses in the core and in any course outside the major program requirements. Courses used to satisfy the WIP requirement cannot be taken Pass/Fail (S/U). A maximum of eight credit-bearing courses may be chosen for an S/U grade during the college career. WIP courses are not eligible to be taken as an S/U course. Courses may be taken in any semester as long as the total number of courses does not exceed eight.

Students must make application for an S/U grade by mid-semester as specified in the current college calendar. This is usually the eighth week of the semester. Once selected as S/U, a course may not subsequently be taken for a letter grade.

REPEATING A COURSE
1. Students may repeat any course once. In each case, an “R” is placed before the original grade on the transcript, and replaced by the second grade earned, whether higher or lower, when calculating the G.P.A. Students must complete and submit the appropriate form, from the registrar's office, at the time of registration for a second repeat of a course. Students should take note that, if the repetition is not required by the college, New York state will not allow the credit hours for the course to be included in the minimum course load required for financial aid purposes.
2. For any additional repeat of any course, permission must be recommended by the department chair and forwarded to the vice president for academic affairs or dean, as appropriate for final decision.
3. Students who fail a course or do not meet minimum course requirements for a major at D'Youville College may only replace the failure by passing the course at D'Youville College. Only by special permission would a student be allowed to register off campus for a course failed at D'Youville College, according to the following conditions:
   a. Permission must be secured beforehand.
   b. Permission must be recommended by the department chair and forwarded to the vice president for academic affairs or dean, as appropriate for final decision.

CROSS REGISTRATION
Full-time undergraduate students may register for one course at another member college of the Western New York Consortium of Higher Education during the fall and spring semesters. A student must have an approved off-campus study request and may not become full-time by means of the cross-registration course. Cross registration of D'Youville students is subject to approval of their department chair and course availability at the member college. To complete cross registration, students must obtain a cross registration form from the registrar's office and obtain the appropriate signatures.

OFF-CAMPUS STUDY
After formal matriculation at D'Youville College, students are expected to complete all coursework applicable to the degree at D'Youville College.

In certain unusual circumstances, off-campus study may be allowed. Permission must be obtained, including all required signatures on the off-campus study form, prior to registering for the course. Conditions which might facilitate permission for off-campus study include the following:
1. A course is not offered at D'Youville or is being offered at a time when the student would be more than 50 miles from the D'Youville campus. (However, the latter does not apply if the course is being offered as an Internet course.)
2. The course is necessary for the student at that specific time to maintain appropriate progress toward a degree.
3. Students who fail a course or do not meet minimum course requirements for a major at D'Youville College may only replace the failure by passing the course at D'Youville College. Only by special permission would a student be allowed to register off campus for a course failed at D'Youville College, according to the following conditions:
   a. Permission must be secured beforehand.
   b. Permission must be recommended by the department chair and forwarded to the vice president for academic affairs or dean, as appropriate for final decision.
CHALLENGE EXAMINATIONS
Challenge examinations assess prior accomplishment of knowledge in the course to be challenged. Challenge examinations may be taken for those courses that are specifically designated by number in the core or major and have been approved for challenge by the department in which the course is offered. The following limitations will apply:

1. A challenge examination is not a substitute for an independent study.
2. Determination of the student’s prior knowledge and, therefore, eligibility for a challenge examination will be made by the instructor of the challenged course.
3. No course may be challenged in which the student has had prior coursework.
4. A challenge examination must be taken within six weeks of application for the exam.
5. A student may challenge a course only once.

The challenge examination for a laboratory course should include a laboratory component as determined by the department of the challenged course. Credits earned by a challenge examination will be designated “Challenge Exam Credit” in the student’s transcript if the examination is passed at a level acceptable to the requirements of the student’s major course of study. Nothing will be entered in the transcript if the examination is not passed at this level. Challenge exams do not count against the total number of credits a student is allowed to take on an S/U basis. No grade points will be assigned.

Students who need more information on challenge examinations may meet with the chair of the department in which the course is taught.

EXCEPTIONS TO DEGREE REQUIREMENTS
Exceptions to major programs and/or degree requirements must be made in writing. Forms (course substitution/waivers) for this purpose are available in the registrar’s office. Verbal approval is not sufficient.

It should be noted that when a course is waived, the credit requirement is not. Another course must be substituted for the original requirement.

WITHDRAWAL FROM A COURSE
In order to withdraw from a course at any time, a student must complete a course (drop/add) form, obtain the signature of the advisor and return the form to the registrar’s office before the end of the tenth week of the semester.

The student receives the grade of “W” when the student withdraws after the end of the drop/add period but before the end of the tenth week of the semester. Students who withdraw after the tenth week or do not follow this procedure but merely stop attending class will receive a grade of “F” or “FX” for the course.

Students submitting a withdrawal form are encouraged to speak with the director of retention services at 716.829.7625.

EXAMINATIONS
Course examinations are given at the option of the instructor. If midterms are to be given, they are normally scheduled during a regular class period at approximately the eighth week of the semester.

Final examinations are scheduled by the registrar to be held at the end of the semester. The final examination period commences after study days as noted in the college calendar. Normally, final examinations are scheduled for Monday evening and all day Tuesday through Saturday following the end of classes.

A student should not regularly have more than three final examinations in any specific day. In the instance where this occurs, students should bring documentation (i.e., registration record and exam schedule) to the attention of the professors involved, who may make alternative arrangements in individual cases. Professors who find that a substantial number of students have such conflicts may wish to consult with the registrar and reschedule their examinations.

In those cases when the examination schedule must be postponed or interrupted because of external forces (e.g., weather), examinations will be rescheduled as soon as feasible.

GRADING
Grade Reports
Approximately two weeks after the close of the semester, grade reports are available to students on STACI. If a mailed grade report is requested for employment or health insurance verification, it will be sent to the permanent address provided by the student.

I Grade
The grade of I (incomplete) is used when the instructor is not prepared to give a final mark for the semester, either because of the student’s illness or some other justifiable delay in the completion of the course requirements.

Application for an I grade can be made on a form issued by the registrar’s office that must include the instructor’s signature. Alternatively, instructors can submit I grades directly to the registrar. The grade of I becomes an F or U if the work is not completed by April 20th (for fall courses), August 20th (for spring courses), or December 5th (for summer courses). An incomplete grade deadline extension (to the next scheduled deadline) must be approved by the professor and may only be granted by the vice president for academic affairs or dean, as appropriate. If the work is still not completed and another extension is not granted, then the I grade will become an F or U.

Students who complete work for a course in which they have received an “I” grade may request a revised grade report from the registrar’s office.

Grade Change (All Grades Except “I”)
Grades that have been recorded in the registrar’s office can be changed only by the faculty member and with the permission of the department chair and appropriate dean. Forms for this purpose are available to faculty in the registrar’s office.

DEAN’S LIST
Full-time matriculating undergraduate students who have attained a semester average of 3.40 or above are eligible for the dean’s list. Students with grades of incomplete at the end of a semester are ineligible for the dean’s list for that semester. Students not enrolled in at least 12 undergraduate credit hours in a semester are not eligible for the dean’s list.

Students who earned dean’s list status in either the previous spring or fall semesters are acknowledged during the honors convocation held each spring.
RETENTION SERVICES
The office of retention services supports and promotes student goals towards degree completion and develops retention interventions that foster student success. The office serves as a student advocate and assists with any issues and problems brought forward by students and takes a proactive approach to reach out to students at risk of falling behind.

Goals of the office of retention services:
1. Guide and assist students with problem solving and provide awareness of college services available.
2. Encourage successful academic progress and persistence.
3. Provide support to students through the withdrawal/leave of absence process.
4. Provide guidance to those students on academic probation.
5. Utilize student feedback to improve student services.

For assistance or for more information, contact the director of retention services at 716.829.7625.

ACADEMIC PROBATION / MANDATORY LEAVE OF ABSENCE FROM THE COLLEGE*

The academic policies committee reviews each student’s academic standing. Sophomores, juniors and seniors are expected to maintain a minimum cumulative G.P.A. and a semester G.P.A. of 2.0. Freshmen are expected to earn a semester G.P.A. of at least 1.8. A student’s academic standing is determined by the cumulative grade point average (G.P.A.). Students failing to meet these G.P.A. requirements receive a letter of warning from the vice president for academic affairs or dean, as appropriate. The following policies will apply: When a student is dismissed from an academic major by the Academic Policies Committee will be required to meet with a designated contact person in the Learning Center to develop an academic plan constructed to improve their cumulative G.P.A. Juniors and seniors will be subject to policies developed by their department. Failure to make these contacts may result in dismissal or mandatory leave of absence following review by the academic policies committee.

All students on probation are strongly encouraged to speak with the director of retention services at 716.829.7625.

No student who has been placed on a mandatory leave of absence will be permitted to take courses on a non-matriculated basis during the term of the leave.

*Certain academic programs have more restrictive requirements; please refer to specific degree program description.

DISMISSAL FROM MAJOR
A student dismissed from an academic major may transfer into another major before the beginning of the next semester, providing the student is qualified for and accepted by the new major. In the case of immediate transfer into a new major, the student’s departmental file will be forwarded upon acceptance. Otherwise, the following policies will apply: When a student is dismissed from an academic major, the chair of that program will place a statement of explanation in the student’s file detailing conditions under which the student may or may not re-apply to the program. The student’s file will be forwarded to the coordinator of the Career Discovery Program and the student will be advised. The student will be required to take CDP 201, Career Planning (1 credit), in the semester immediately following the dismissal from the original major in order to continue to matriculate. Upon completion of this course, students must choose a major if they have completed 45 credit hours of academic work. If a student is unable to comply with these policies, the student may be dismissed from the college.

LEAVE OF ABSENCE
Leaves of absence forms are located in the registrar’s office. Students who have attended classes and are granted a leave of absence from their studies at D’Youville College (DYC) are permitted to take courses at another institution. Failure to comply with these policies will result in dismissal or mandatory leave of absence.

Ordinarily, a student may not request a leave of absence after the eleventh week of the semester. Special consideration is given for illness or other extenuating circumstances. The vice president for academic affairs or dean, as appropriate may give permission in these cases. In the event that a student does not return at the time stipulated, the leave automatically becomes a withdrawal. The student must then apply for readmission to the college.

MILITARY LEAVE OF ABSENCE

Students who must interrupt their studies for military service due to a call-up for a state/national emergency or deployment in support of military operations should contact the director of the veterans affairs office on campus and supply the director with copies of his/her orders. D’Youville College is a Military Friendly Institute of Higher Learning (IHL) and as such complies with and goes beyond the requirements of all federal regulations governing the readmission requirements for service members (section 608.18). This is accomplished specifically by:

- Reenlisting the service member with the same academic status as when the student was last in attendance/admitted (this requirement also applies to a student who was admitted to the college but did not begin attendance because of service in the uniformed branch of the military).
- All students called to active duty as outlined above will be offered the opportunity to complete the course(s) enrolled in for the semester that their active duty commenced by directed study (DS) or distance learning (DL) as approved by his/her professor(s)
and the appropriate dean and/or department chair. To participate in this component of the military leave policy, the affected student should request and complete the Student Military DS/DL Special Request Form available in the veterans affairs office. The student must take the completed form to each of his/her professors for their approval before returning the form to the veterans affairs office for processing.

• Students called to active duty and/or deployed after drop/add week, unable to complete their course(s) by DS or DL, shall receive a grade of W for the course(s) enrolled in. Tuition/fees will be waived/refunded for those courses. Students called to active duty and/or deployed before or during drop/add week will have their registration deferred for that semester and will be re-registered upon return from active duty (up to 60 months after original admittance as per statute).

• Should the tuition at the college increase during the student’s military leave of absence, the affected student shall be charged, upon his/her return, the tuition rate in effect for the school year, or portion thereof, of which he/she was enrolled for when called to active duty. The tuition rate shall then increase to the new rate upon completion of the affected semester(s).

WITHDRAWAL FROM THE COLLEGE

A student intending to withdraw from D’Youville must contact the department chair in person or in writing and submit the proper withdrawal forms to the registrar’s office.

Withdrawal will be considered effective the date the written intent of withdrawal is received. The procedure is not complete until the written intent is properly filed with the college.

If the withdrawal procedure is completed mid-semester, courses for which the student is currently enrolled will be assigned the grade of W. No tuition refund will be made after the sixth week of the semester (or after dates stated in the liability schedule).

Discontinuance of attendance, notifying instructors or mere telephone contact with college personnel DOES NOT constitute an official withdrawal. Students remain academically and financially responsible for all courses for which they have enrolled until the withdrawal procedure has been finalized with the registrar’s office.

All students withdrawing from the college, are encouraged to participate in an exit interview. Contact the director of retention services at 716.829.7625 for more information.

THE “FRESH START” RULE

1. An undergraduate student who re-enrolls at D’Youville College after an absence of five or more years may petition the registrar to re-evaluate all coursework attempted in the student’s previous residency. If the petition is approved, all courses taken will remain on the permanent record. Those with grades of C- or higher or S (satisfactory) will be counted for credit; all others will not.

2. If the petition is approved, the student resumes his/her academic program with no cumulative grade point average and, therefore, is subject to the conditions of warning, probation and dismissal that govern all students.

3. Under the provisions of this rule a student prior to graduation must be re-enrolled for a minimum of 30 credit hours.

4. All courses ever taken at D’Youville College will be used in the calculation of the cumulative grade point average required for graduation with honors.

CANDIDACY FOR GRADUATION

To be eligible for a baccalaureate degree, a student must fulfill all core curriculum and major requirements, earn an overall grade point average of 2.0 and complete at least 30 undergraduate credit hours at D’Youville. The minimum number of credit hours required for any degree is 120 at the undergraduate level. Individual majors may require a greater number of credits and/or a higher grade point average.

VERIFICATION FOR GRADUATION

Responsibility for fulfilling degree requirements rests with the student. Final verification is done by the registrar.

Each student must submit an application for graduation form to the registrar’s office to verify eligibility for graduation. This should be completed no later than Oct. 30 for students graduating in May or August of the following year. Students who expect to graduate in December should complete the verification process during the preceding spring semester.

The commencement ceremony is held in May. Students are eligible to participate in the commencement ceremony if all degree requirements are completed in December of the preceding year, in May or in August. A student may be eligible for August completion only if there are no more than nine credits to be completed during the summer session.

All financial obligations to D’Youville must be fulfilled before the diploma can be awarded or transcripts issued.

NOTE: For students in programs requiring licensure, registration or certification for entry into practice, please note that graduation from an academic program does not guarantee licensure, registration and/or certification. For additional information, refer to the degree program section of this catalog and/or contact the department chair of a specific program.

GRADUATION HONORS

On the basis of the cumulative undergraduate grade point average, honors at graduation are awarded as follows:

• 3.46 cum laude
• 3.70 magna cum laude
• 3.90 summa cum laude

Transfer students must complete at least 60 credit hours of graded coursework at D’Youville to qualify for honors at graduation. S/U courses and challenge examinations do not count towards honors.

RELIGIOUS HOLIDAYS

D’Youville College complies with state regulations regarding religious holidays. State Education Law S224-a, regarding students unable because of religious beliefs to attend classes on certain days, states the following:

1. No person shall be expelled from or be refused admission as a student to an institution of higher education for the reason that he/she is unable, because of religious beliefs, to attend classes or participate in any examination, study or work requirement on a particular day or days.

2. Any student in an institution of higher education who is unable, because of religious beliefs, to attend classes on a particular day or days shall, because of such absence on the particular day or days, be excused from any examination or any study or work requirements.
3. It shall be the responsibility of the faculty and the administrative officials of each institution of higher education to make available to each student, who is absent from school because of religious beliefs, an equivalent opportunity to make up any examination, study or work requirements the student may have missed because of such absence on any particular day or days. No fees of any kind shall be charged by the institution for making available to the student such equivalent opportunity.

4. If classes, examinations, study or work requirements are held on Friday after 4 p.m. or on Saturday, similar or make-up classes, examinations, study or work requirements shall be made available on other days, where it is possible and practicable to do so. No special fees shall be charged to the student for these classes, examinations, study or work requirements held on other days.

5. In effectuating the provisions of this section, it shall be the duty of the faculty and of the administrative officials of each institution of higher education to exercise the fullest measure of good faith. No adverse or prejudicial efforts shall result to any student who makes use of the provisions of this section.

6. Any student, who is aggrieved by the alleged failure of any faculty or administrative officials to comply in good faith with the provisions of this section, shall be entitled to maintain an action or proceeding in supreme court of the county in which such institution of higher education is located for the enforcement of rights under this section.

FAMILY EDUCATION RIGHTS AND PRIVACY ACT OF 1974 (FERPA)

D’Youville College students or parents, as provided by statute, may review any official records, files and data directly related to themselves that are on file with the registrar’s office or in the career services center. The files available include identifying data, academic work completed, grades, family background information, references, ratings and/or observations. (References, ratings and/or observations completed before Jan. 1, 1975 or that are older than seven years are not available to students.) Requests to see the aforementioned materials should be made in writing to the registrar or the director of the career services center, respectively. The records, files and/or data will be made available no later than 45 days from the time the written request is received.

Student records, files, and data will be made available to other individuals or agencies outside of the college only after the student concerned has authorized the release of the information. However, the following are exceptions:

1. Authorized officials (e.g., officials of other schools in which the student seeks to enroll);
2. Accrediting organizations;
3. In the case of an emergency, if the knowledge of such information is necessary to protect the health and safety of the student or other persons.

The following, however, is considered directory information: the student’s name, address, telephone listing, date and place of birth, major field of study, participation in officially recognized activities and sports, weight and height of members of athletic teams, dates of attendance, degrees and awards received, and the most recent previous educational agency or institution attended by the student. This information may be released by D’Youville without the consent of the student unless the student has specifically requested in writing that his or her consent be obtained beforehand.

Directory information will not be made available to the party requesting it unless the appropriate administrative officer of D’Youville College has considered and approved the request.

A student or parent, as provided by statute, may request in writing a review of information that may be inaccurate and/or misleading. The review will be conducted by an appropriate D’Youville administrative officer who does not have a direct interest in the outcome.

According to FERPA, information contained in the educational records of students who are 18 years of age or enrolled in post-secondary institutions may be sent to the parents without the written consent of the student only if the student is a financial dependent of the parents. (The term dependent is defined in section 152 of the Internal Revenue Code as an individual (son, daughter, stepson or stepdaughter of a taxpayer) who receives over half of his/her support from the taxpayer during the given calendar year.)
degrees

D'Youville's four-year programs, leading to bachelor of arts, bachelor of science and bachelor of science in nursing degrees are registered with the New York State Education Department.

Graduate degree programs are offered in nursing (M.S.), clinical nurse specialty in community health nursing (M.S.), doctor of nursing practice (D.N.P.), education (M.S.), family nurse practitioner (M.S.), health services administration (M.S.), international business (M.S.), occupational therapy (M.S) and in business administration (M.B.A.).

A professional doctorate is offered in chiropractic (D.C.), pharmacy (Pharm.D.), and physical therapy (D.P.T.). Doctoral programs are offered in health policy and health education (Ed.D.) and educational leadership (Ed.D.).

Dual-degree programs are offered in dietetics (B.S./M.S.), international business (B.S./M.S.) and occupational therapy (B.S./M.S.). A sequential-degree program is offered in physical therapy (B.S. + D.P.T.). A two-degree program is offered in chiropractic (B.S. + D.C.).

D'Youville has structured its curriculum in the liberal arts tradition. All professional programs include a solid foundation in liberal education.

To be eligible for a baccalaureate degree, students must fulfill all core curriculum and general program requirements, earn an overall grade point average of at least 2.0 and complete at least 30 credit hours at D'Youville. The required G.P.A. in specific programs is indicated later in this catalog. The minimum number of credit hours required for graduation is 120. One-half of the major credit hours must be earned at D'Youville.

Students who consider themselves eligible for a degree must request a degree audit from the registrar's office no later than Oct. 30 for students graduating in May or August of the following year. Students who expect to graduate in December should complete the verification process during the preceding spring semester.

Final responsibility for fulfilling degree requirements rests with the student. Enrollment in other than registered or otherwise approved programs may jeopardize a student's eligibility for certain financial aid awards.

core curriculum

D'Youville College firmly believes that the liberally educated person is free from a narrowness of interest which results from excessive specialization. Therefore, a central aim is to introduce students to the principal areas of human learning and to enable students to cultivate respect for those areas.

To help achieve this, D'Youville requires that all students take a rounded program of humanistic studies called the core curriculum. The faculty of D'Youville College has adopted the following statement of the goals of the core curriculum:

1. The core seeks to instill intellectual breadth in our students by leading them to a thorough and reflective understanding of the diverse answers to the great social and scientific problems that have confronted humanity throughout history and across cultures. The core also seeks to provide the students with the tools to assess the applicability of emerging as well as already extant answers to these problems. In this way, it prepares them to think critically and render sound decisions in their personal and professional lives.

2. The core seeks to teach students to write well and to speak effectively. But this is only one side of communication. The core also seeks to instill the love of reading and the ability to listen to others. By teaching students to listen as well as to contribute, the core equips them to work effectively as individuals and as members of a group.

3. The core seeks to prepare our students for the future by encouraging them to understand and explore emerging technologies.

4. The core promotes a desire in our students to understand and search for beauty and passion, be it in art, music, literature or other aspects of their lives.

5. The core requires students to re-examine their own lives and their own ethical beliefs by examining how the best thinkers humanity has to offer have grappled with the central questions of human life. While the core cannot compel virtue, it is to be hoped that students will independently accept the obligation and the responsibility of full participation in society; both locally and globally, with honor, magnanimity and civility.

6. The core seeks to instill in students an understanding of their place in history and the vast tapestry of world cultures.

7. The core seeks to produce students who will dedicate themselves to their own lifelong intellectual and spiritual development, and who will foster an atmosphere of intellectual freedom in which others may realize these goals.
CORE CURRICULUM

The core curriculum consists of at least 19 courses distributed as follows:

HUMANITIES: EIGHT COURSES ARE REQUIRED, INCLUDING:
- ENG 111 English Communication
- ENG 112 English Communication
- PHI 201 Ethics in Theory and Action or RS 201 Religion and Social Responsibility

Five courses selected from the following areas, with choices made from at least three of the five areas:

- Literature: Any literature course in English or a foreign language
- Fine Arts: Any course listed under fine arts, music, dance, theatre arts, speech or creative writing
- Philosophy: Any course
- Religious Studies: Any course
- Foreign Language: Any course

SOCIAL SCIENCES: FOUR COURSES ARE REQUIRED, ONE FROM EACH OF THE FOLLOWING AREAS:

- History:
  - HIS 103 Comparing World Civilizations
  - HIS 111 Growth of Western Culture
  - HIS 203 American Economic & Social History to 1865
  - HIS 204 American Economic & Social History Since 1865

- Sociology:
  - SOC 101 Principles of Sociology
  - SOC 102 Social Problems

- Psychology:
  - PSY 101 General Psychology
  - PSY 203 Developmental Psychology

- Political Science/Economics:
  - PSC 201 American Government and Economics
  - ECO 201 Macro Economics
  - ECO 202 Micro Economics

- Mathematics: One 100-level course excluding MAT 101 is required.

- Computer Science: One 100-level course is required.

- Natural Science: Two courses at the 100 or 200 level are required, excluding CHE 105. At least one of the courses must include a laboratory component.

- Electives: Three courses outside the requirements for the major field are also required.

NOTE: If a student is exempt from any one core course, that student’s core curriculum is reduced to 18 courses. If a student is exempt from more than one core course, the core curriculum remains at 18 courses, and the additional free hours are added to the elective area. In all cases, at least 120 credit hours must be earned in order for a baccalaureate degree to be awarded.

WRITING INTENSIVE PROGRAM (WIP)

Designated courses in the Writing Intensive Program have two purposes: to develop expository skills and to teach the use of language as an instrument for thinking across disciplines. Such courses aim to develop student writers’ mastery of language so that they may discover, organize and communicate their knowledge. “WIP” courses are offered in a variety of disciplines. They offer students guided practice in writing in differing fields across the curriculum, teach the skills necessary to write for the course/discipline and offer intensive professor/student interaction.

Requirement: Every candidate for any undergraduate degree (including B.S./M.S. degrees) entering the college in the fall 1999 semester and later must successfully complete two courses designed “Writing Intensive Program.” English 111 is a prerequisite for all WIP courses.

A student may satisfy one-half (one course) of the WIP requirement by transfer credit from another regionally accredited institution for any course designated as writing intensive or satisfying the criteria of a DYC writing intensive course. To receive this credit, the student must present to the registrar and department chair copies of original course descriptions and assignments. Alternatively, a student may satisfy one-half (one course) of the WIP requirement by presenting a portfolio of writing to his or her department chair. A student seeking a waiver for one half (one course) of the WIP requirement through a portfolio evaluation must request that evaluation before the eighth week of the semester preceding the student’s projected final semester. Failure to do so will result in the probability of the portfolio not being evaluated for credit. The portfolio should consist of a minimum of 20 pages of formal writing (excluding drafts) and should reflect the standards of writing for the student’s discipline and the student’s ability to proceed to advanced work in that discipline. To verify authorship, any student presenting a portfolio may need to take an essay examination in the presence of his or her department chair, advisor or WIP director. Courses used to satisfy the WIP requirement cannot be taken Pass/Fail (S/U).
DIETETICS DEPARTMENT

The dietetics program is a five-year combined B.S./M.S. degree program for full-time or part-time students. Upon graduation, students are awarded a dual bachelor of science and master of science degree. This coordinated program (CP) is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) and offers the required courses and practical experiences to be eligible to take the national examination to become a registered dietitian. The program’s concentration in advanced nutrition practice provides higher-level coursework and experiences in:

- Treating patients with complex conditions, such as trauma, pediatric hospitalizations, renal failure with complications and nutrition support
- Planning, developing and implementing nutrition intervention programs
- Developing and managing a private practice
- Planning and conducting research, including communicating findings of the research

EDUCATION DEPARTMENT

The education department offers an integrated five-year combined bachelor of arts in liberal studies for education and master of science in education degree for prospective teachers of youngsters at the childhood level. Options are also available for students who wish to pursue certification in teaching students with disabilities at both the elementary and secondary levels.

The programs in education prepare students to be professional teachers. Structured in a liberal arts tradition, the curriculum introduces the student to the principal areas of human learning, develops an intellectual and social maturity that allows one to realize his or her potential as a responsible individual, and provides each student with the capabilities to meet the challenges and demands of a pluralistic world in an effective, productive manner. Professional education courses and field experiences provide the support necessary for teacher competencies of knowledge, skills, attitudes and understanding, and the degree of necessary expertise to function effectively in an educational classroom setting. A D’Youville College education department graduate has the following qualities:

- The student has acquired a knowledge of the social, philosophical and organizational bases of American education.
- The student is, foremost, a teacher professionally capable of rational classroom decision-making.
- The student demonstrates the ability to make intelligent decisions in working cooperatively with students, staff, parents and the community.
- The student possesses those personal attitudes, social skills, values and habits which are characteristics of a good teacher and which aid in communicating within a pluralistic society.
- The student exhibits written skill in planning for instruction, has a command of subject matter as evidenced by preparation and teaching performance, and shows knowledge of a variety of teaching methods and skilful use of materials related to teaching regular and/or exceptional students.
- The student has the ability to understand the purpose of evaluation and demonstrates the ability to evaluate student progress and growth through techniques specifically related to a given purpose
- The graduate continues to grow professionally and participates through study, research, reading, involvement in community events and membership in professional organizations and activities so that learning becomes a lifelong process.

HEALTH SERVICES ADMINISTRATION DEPARTMENT

The health services administration department offers a bachelor of science degree in health services management, health analytics, public health, as well as a master of science degree in health services administration, a doctorate in health administration, and three advanced certificates in health services administration, long-term care and clinical research associate. The graduate programs and certificates are described in the graduate catalog.

CHIROPRACTIC DEPARTMENT

The chiropractic department offers a doctorate of chiropractic (D.C.) degree along with numerous continuing education classes for licensed doctors of chiropractic.

D’Youville’s seven-year, two-degree bachelor of science and doctor of chiropractic program provides students with an in-depth understanding of the distinctive philosophy, principles, theories and skills of the art and science of chiropractic. All students are firmly grounded in the body of knowledge that support chiropractic practice, become proficient in applied research methods and become committed to evidence-based practice. The doctoral program encompasses classwork, labs and clinical rotations over a period of 11 trimesters. Internship and externship experiences 35 hours per week at a variety of clinical settings including but not limited to: the college’s clinics, externships, placement in community-based institutions, hospital rotations and private practices. The program is approved by the New York Board of Regents and is registered with the New York State Education Department. The Doctor of Chiropractic degree program at D’Youville College is awarded programmatic accreditation by the Council on Chiropractic Education, 8049 North 85th Way, Scottsdale, AZ, 85258-4321, Tel: (480) 433-8877, Website: www.cce-usa.org. Individuals with complaints about compliance of the program with the CCE Standards should be directed to the CCE at the above address. Students who successfully complete the doctor of chiropractic program are eligible to sit for the National Board of Chiropractic Examiners (NBCE) and the Canadian Chiropractic Examining Board (CCEB) licensure examinations.

LIBERAL ARTS DEPARTMENT

A student seeking to become a liberally educated person needs exposure, in breadth and in depth, to the humanities and the social sciences.

These studies, concerned not merely with information but with values, help the student’s development as a total person. This implies not only intellectual and social development, but also maturity in assessing the values essential to a sound philosophy of life. The department of liberal arts offers degrees in English, global studies, history, liberal studies for education, psychology, sociology and philosophy. Requirements for these
programs are listed in the courses of instruction section of this catalog. Courses are also offered in foreign languages, fine arts and religious studies.

Students within the department must maintain a minimum 2.00 grade point average in courses taken at D’Youville in their major subject area.

MATHEMATICS AND NATURAL SCIENCES DEPARTMENT

Knowledge of science and mathematics is essential to the development of a liberally educated person. The student with a special interest in biology, chemistry and mathematics will find a foundation for a wide variety of professional careers. These career opportunities are expanding rapidly in today’s increasingly technological society.

The community of scholars that comprises the faculty of math and natural sciences is committed to excellence in teaching, learning and research. The MNS faculty encourage scholarship, skeptical inquiry and the free exchange of ideas within the department and in the classroom and laboratory, and promote the application of this knowledge beyond those settings. The department seeks to foster these principles in every one of its students, regardless of academic background, in ways that can both be measured and defy measurement.

All D’Youville students take some science and mathematics courses within the department. The department offers two bachelor’s degrees in biology, two in mathematics and one in chemistry. Requirements for these programs are listed in the courses of instruction section of this catalog. The department offers structured minors in analytics, anatomy, bioinformatics, biology, chemistry, environmental science, mathematics and natural sciences. The department also provides the basic science courses for many programs, including nursing, physician assistant, physical therapy, chiropractic, liberal studies in education and occupational therapy.

Students within the department must maintain a minimum 2.0 grade point average in courses taken at D’Youville in their subject area.

SCHOOL OF NURSING

The undergraduate and graduate programs are fully accredited by the Commission on Collegiate Nursing Education (CCNE). The basic professional program leads to the bachelor of science in nursing (B.S.N.) degree in four academic years and prepares the student to sit for state board NCLEX-RN Examinations. The program has a strong liberal arts foundation preparatory to and correlated with professional courses. Students begin clinical coursework in their Sophomore year and complete a variety of clinical experiences before graduation.

A special curriculum (R.N. to B.S.N.) is available for R.N. students with an associate’s degree or diploma in nursing. The curriculum, offered completely online, is designed to capitalize on the knowledge and experience gained from practicing as a professional nurse and from previous college coursework.

Graduate nursing programs are offered leading to a master’s of science in nursing, family nurse practitioner or community health nursing. The community health nursing program includes concurrent preparation in an advanced clinical, teaching or management track. The master of science family nurse practitioner is 40 credit hours and the community health nursing program is 42-54 credit hours. A thesis or project option is available in each of the programs.

All programs include a focus on evidence-based practice, interdisciplinary health care studies and collaboration and partnerships with clients, health care professionals and agencies.

Graduates are prepared for careers in a multitude of health care settings including primary care, community and home health nursing, hospital nursing, long-term care nursing and new independent roles in managed care settings. Employment opportunities vary by specific programs.

PHYSICAL THERAPY DEPARTMENT

The physical therapy department recognizes a choice of pathways for freshman acceptance into the sequential-degree entry-level physical therapy program.

- B.S. in biology offered through the math and natural sciences department + D.P.T. program
- B.S. in exercise and sports studies offered through the exercise and sports studies department + D.P.T. program
- B.S. in health services offered through the health services administration department

In this sequential-degree entry-level P.T. program, entering freshmen matriculate in and complete their B.S. degree through the respective departments. Upon completion of the B.S. degree, students who satisfy all D.P.T. admission requirements are accepted into the three-year doctor of physical therapy (D.P.T.) program.

For a further description of the D.P.T. curriculum and academic requirements, please refer to the D’Youville College Graduate Catalog. Students will graduate with an entry-level doctor of physical therapy (D.P.T.) degree. The three-year graduate D.P.T. program is fully accredited by the Commission on Accreditation of Physical Therapy Education (CAPTE) of the American Physical Therapy Association. [Commission Accreditation in Physical Therapy Education, 1111 North Fairfax Street, Alexandria, Virginia 22314; telephone: 703.756.3245; e-mail: accreditation@apta.org; website: www.capteonline.org] and is registered with the New York State Education Department (NYSED).
PHYSICIAN ASSISTANT DEPARTMENT

The physician assistant department offers a 4 1/2 year combined B.S./M.S. degree. Graduates are eligible for the Physician Assistant National Certification Examination developed and administered by the National Commission on Certification of Physician Assistants.

The physician assistant department has been approved and registered by the New York State Education Department and is accredited by the Accreditation Review Commission on Education for the Physician Assistant, Inc. (ARC-PA). Students in the PA department are trained to serve a variety of patient populations with sensitivity and compassion, with an emphasis on primary care and integrative medicine.

BUSINESS DEPARTMENT

D’Youville College, under the auspices of the department of business, offers bachelor degrees in accounting and business management. An accelerated program, the advance program in management, is also offered to working adults. In addition, the department offers a combined five-year bachelor’s/master’s degree in international business. The bachelor’s/master’s degree in international business combines specialized training in international business with a strong foundation in a foreign language, research, communication, ethics and interpersonal skills. Rapid changes in the global economy and the explosive growth in international trade and investment make it necessary that managers be trained in the following:

- Understanding for business practices,
- Managing cultural differences, and
- Communicating in foreign languages.

Top executives of international business confirm the need for managers with international business training, especially at the master’s level. Graduates of this program will be able to pursue worldwide employment with the following:

- Multinational companies,
- International financial institution,
- Government agencies,
- Management consulting firms,
- Trading or transportation companies, and
- Colleges and universities.

The bachelor of science degree in management provides students with knowledge of the various phases of management. The program creates a total experience in which students develop abilities, knowledge and attitudes which will help them perform as competent and responsible business managers.

The curriculum prepares the student by emphasizing a firm basis of liberal arts and a common body of knowledge about management responsibilities.

The bachelor of science degree in accounting prepares the student to work in the fields of public accounting, private corporate accounting and financial management. The student who selects accounting as the field of concentration is trained in advanced principles in various systems, in cost analysis and in auditing and tax procedures. The program qualifies the student to sit for the Certified Public Accountancy examination in the majority of states, including New York.

The business department also offers an advanced master’s program in international business and a master’s degree in business administration (MBA). Those interested can refer to the graduate catalog for additional information.

CAREER DISCOVERY PROGRAM

Qualified students who are admitted to the college but have not declared or been directly accepted into a college major will be assigned to the Career Discovery Program (CDP). Students enrolled in the CDP are provided with opportunities to discover their interests, sample introductory courses, and fulfill core requirements before choosing a specific area of study. The instructional program of the CDP consists of two exploration courses which, upon passing, count as free elective credits. Students who have been dismissed from their academic program may also be served by the CDP given they have earned less than 45 credit hours. These students will be enrolled in CDP201, a course designed to help them reevaluate their career goals, strengthen study skills, and develop life plans. Students meeting academic requirements may apply to their intended major at any point throughout their time in the CDP; however, all students must be enrolled in a degree-granting major prior to earning 45 credit hours or risk being dismissed from the college.

TECHNOLOGY ON CAMPUS

The office of information services is responsible for the technological services of the college. It includes four divisions: computer network services, administrative computing services, labs and media services and e-learning services.

Computer network services maintains the Internet backbone, wireless and wired data and phone infrastructure of the campus. Its help desk function in the library provides first line of assistance to the students, faculty and staff. The help desk services include removal of viruses, etc. And assistance on hardware and software problems of desktops, laptops, tablets, and smart phones. The evaluation services and minor repairs are provided to the students for free.

Administrative computing services maintains the core software that the college uses for its daily operations. This office is responsible for implementing a newly-purchased software system, Ellucian Colleague, which upon completion will integrate relevant data from all offices so a student can use a web portal to access his or her academic, financial aid and billing information.

Labs and media services coordinates computer classrooms, computer labs and instructional media services. Two general-purpose computer labs are available to the students and they are located in the lower level of the Montante Family Library and the first floor of the D’Youville Academic Center (DAC). The DAC lab is available year-round on a 24/7 basis. The lab in the basement of the library follows the schedule of the library. It is usually open from 7 a.m. to 11 p.m. This office is also responsible for smart classrooms which are available in all academic buildings; the new School of Arts, Sciences and Education building, the library, the Bauer Family Academic Center (BFAC), the Dr. Pauline Aitl Building (ALT), the D’Youville Academic Center (DAC), and the D’Youville Education Center (DEC).

The objective of e-learning services is to support the students and the faculty in the environment of Internet-based distance education. It manages the moodle learning management system and offers a variety of technology training for the students, e.g. how to use MSWord to format course papers, theses and dissertations.

Both labs and media and e-learning services support digital video recording and production and provide post-production video editing for students, faculty and staff.
LEARNING CENTER

The Learning Center includes five components: the office of Disability Services, the Access Program, Student Support Services, the Arthur O. Eve Higher Education Opportunity Program (AOE/HEOP), cosponsored by the New York State Education Department and D’Youville College, and the English as a Second Language/Bridge Program.

The Learning Center staff administers the Skills Assessment Inventory (SAI) in reading, writing, math and chemistry to all entering students who have not completed a bachelor’s degree, including transfers, in order to determine their readiness for required courses. Professional tutorial assistance is provided in reading, writing, math, chemistry and ESL. Peer tutors also assist students in all other courses offered on campus, depending on tutor availability/student needs.

An intensive five-week, pre-college skills program, EXCEL, is offered in the summer to enable incoming students to strengthen their basic skills. In addition to the instructional programs, academic counseling is provided through the Access program to students in the areas of personal development, goal setting and gaining academic knowledge of D’Youville College’s policies and procedures. Academic success workshops, that are open to all students, are offered in both the fall and spring semesters. The workshop dates and topics are listed on the Learning Center website at www.dyc.edu under the “Academics” heading and the “Learning Center” link.

Students with disabilities or physical handicaps are encouraged to contact the coordinator of disability services BEFORE the beginning of the semester to self-identify, discuss and plan support services and accommodations. Students are advised to submit appropriate documentation as early as possible and to follow all procedures outlined by the office of disability services. For more information, call 716.829.7774.

RESERVE OFFICERS’ TRAINING CORPS (ROTC)

D’Youville College has a special cross-enrollment, tuition-free arrangement with Canisius College for students desiring leadership education through the Reserve Officers’ Training Corps (ROTC) Program. For more details on this program, see military science under the courses of instruction section in this catalog and/or contact the Canisius College professor of military science (P.M.S.) at (716) 888.3229.

SERVICE MEMBERS
OPPORTUNITY COLLEGES (SOC)

D’Youville College is an active participant in the Servicemembers Opportunity Colleges consortium (SOC) co-sponsored by the American Association of State Colleges and Universities (AASCU) and the American Association of Community Colleges (AACC). SOC functions in cooperation with 13 other higher education associations including the American Council on Education (ACE), the Department of Defense, the active and reserve components of the military services to expand and improve voluntary postsecondary opportunities for servicemembers worldwide. The SOC consortium is comprised of more than 1900 colleges and universities and enrolls hundreds of thousands of servicemembers, their family members and veterans annually in associate, bachelor and graduate-level degree programs.

All SOC consortium members operate under four general criteria. These criteria stipulate that cooperating institutional policies and practices be fair, equitable and effective in recognizing special and often limiting conditions faced by military students. The four criteria are:

1. Reasonable Transfer of Credit:
   Avoid excessive loss of previously earned credit and avoid coursework duplication.

2. Reduced Academic Residency: Limited to no more than 25% of degree requirements with no final year or semester in residence (may require 30% for undergraduate degrees offered 100% online).

3. Credit for Military Training and Experience: Recognize and use ACE Guide to Evaluation of Educational Experiences in the Armed Services in evaluating and awarding academic credit for military training and experience.

4. Credit for Nationally-Recognized Testing: Award credit for at least one nationally-recognized testing program such as College-Level Examination Program (CLEP), DSST Examinations and Excelsior College Examinations (ECE).

In summation, it is important for the service member, veteran or dependent to have his/her military transcript sent to D’Youville for evaluation during the admission process.

DEGREE PROGRAMS: COURSES OF INSTRUCTION

ACCOUNTING

DEGREE: B.S.

The bachelor of science degree in accounting prepares the student to work in the fields of public accounting, private corporate accounting, financial accounting, or governmental or institutional accounting. The program is accredited by the International Assembly of Collegiate Business Education (IACBE).

Students wishing to major in accounting must have at least three years of high school mathematics.

Students who specialize in accounting must take MGT 304; LAW 303 and 304; ACC 211, 212, 311, 312, 321, 322, 401, 404, 417, 421 and 444; and two electives from ACC 389, 390, 403 WIP, 420; CSC 110 or 151; ECO 201, 202, 207 and 328; MGT 411. All accounting majors take ACC 444 (internship) for a minimum of 3 credit hours. A waiver of this requirement will be given only in exceptional circumstances as determined by the department chair. If a waiver is granted, the student must take another minimum 3-credit course stipulated by the department chairman in consultation with the student’s advisor.

A student must earn at least a C in each course required for the major. A minimum of 15 credits in accounting courses and at least half (30) of the credits in the major must be earned at D’Youville. A student may repeat no more than three major courses in the total program.

ACCOUNTING ARTICULATION AGREEMENTS

D’Youville has formed articulation agreements allowing transfer students from the following institutions and programs to enter the accounting program at the second- or third-year level:

Seneca College, Ontario, Canada:
- Accounting and Finance
- Business Administration

Erie Community College, New York:
- Business Administration
- Business Transfer

Bryant & Stratton, New York:
- Accounting

Trocaire College, New York:
- Accounting
- Transfer Concentration

Agreement details and other information for transfer students are available in the department of business.

ADMISSION REQUIREMENTS

Admission requirements for applicants entering as freshmen are as follows:

1. Combined SAT scores of at least 1,000 (math and verbal) or ACT equivalent
2. A high school average of at least 85 percent
3. High school rank in the upper half of class

Students must also demonstrate successful completion of two years of mathematics. One year of foreign language is recommended, but not mandatory. Although D’Youville does not mandate that letters of recommendation or a letter of intent to study a specific discipline be included with the application, students applying to the international business combined B.S./M.S. program are strongly advised to include these documents with their application.

The admission requirement for transfer students is a minimum G.P.A. of 2.5. Transfer students are also strongly advised to include letters of recommendation and a letter of intent with their application. Students with a G.P.A. of lower than 2.5 may be considered for conditional acceptance on an individual basis. Conditionally accepted students can matriculate after completing four undergraduate or graduate courses, as appropriate, with a grade of B or better.

ACADEMIC REGULATIONS

To be in good standing during the first three years of the program, students must do the following:

1. Maintain semester/summer and cumulative averages of 2.5
2. Maintain a minimum grade of C in all 100- to 400-level courses required in the major and for all other courses required for the major.

Undergraduate program students experiencing academic difficulties may be required to decelerate their progress until an acceptable level of general academic performance is achieved. Permission to decelerate in the program must be obtained from the chair of the department of business.

4. Students at the undergraduate level can be placed on program probation twice. Any academic deficiency beyond the first program academic probation will result in dismissal from the program.
ACADEMIC PROBATION

A student will be placed on program academic probation when there is failure to satisfy specific program academic standards or regulations. A student will be placed on academic probation for the two full-time terms (i.e., semesters and/or summers) which immediately follow the date of probation. All students on program academic probation must meet the academic standards for their classification (undergraduate/graduate). Failure to meet the academic standards during a probationary period will result in dismissal from the program.

Students placed on academic probation are not permitted to advance to subsequent terms of study until the academic deficiency which resulted in the probation status has been remedied. The student will remain on probation for two terms in which full-time coursework, or its equivalent, is satisfactorily completed.

Students may appeal the decision of dismissal from the accounting program to the chair of the department of business. The appeal is initiated with a letter from the student to the department chair that describes the extenuating circumstances that limited academic performance. The department chair then presents the appeal to the business faculty for consideration. If the appeal is accepted, the student will remain on program academic probation for two full-time terms and must satisfy the criteria of probation.

STUDENT CONDUCT

Students enrolled in the D’Youville College business programs are expected to demonstrate high standards of personal behavior and professional conduct in the academic and fieldwork assignments. Academic dishonesty of any form will not be tolerated by the program faculty. College policy regarding academic dishonesty will be followed with the recommendation that the offender be dismissed from the business program.

Major | 63 |
Core Requirements and electives | 57 |
Total | 120 |
The revised section 52.13 (b)(2) of the Accounting Regulations requires that “on or after August 1, 2004, public accountancy programs registered for licensure purposes must be baccalaureate or higher degree programs that, by requisites or prerequisites, consist of at least 150 semester hours or their equivalent.” These 150 hours must include a minimum of 33 semester (or equivalent) hours in the professional accounting content area, a minimum of 36 semester (or equivalent) hours in the general business content area and a minimum of 60 semester (or equivalent) hours in the liberal arts and sciences content area. The accounting program at D’Youville College fulfills these requirements by combining its existing B.S. in accounting program with its M.S. in international business program. The program is accredited by the International Assembly of Collegiate Business Education (IACBE).

ADMISSIONS REQUIREMENTS

Admission requirements for applicants entering as freshmen are as follows:

1. Combined SAT scores of at least 1000 (math and verbal) or ACT equivalent
2. High school average of at least 85 percent
3. High school ranking in the upper half of class

Students must also demonstrate successful completion of two years of mathematics. One year of foreign language is recommended, but not mandatory. Although D’Youville does not mandate that letters of recommendation or a letter of intent to study a specific discipline be included with the application, students applying to the accounting and international business B.S./M.S. program are strongly advised to include these documents with their application.

The admission requirement for transfer students is a minimum G.P.A. of 2.5. Transfer students are also strongly advised to include letters of recommendation and a letter of intent with their application. Students with a G.P.A. of lower than 2.5 may be considered for conditional acceptance on an individual basis. Conditionally accepted students can matriculate after completing four undergraduate or graduate courses, as appropriate, with a grade of B or better.

Applicants holding other baccalaureate degrees at the time of admission are not required to satisfy the college’s core curriculum. However, foreign language (12 credits), economics (ECO 201 and ECO 202) and accounting (ACC courses) requirements must be met prior to advancement to the fifth year of study. In addition, it is highly recommended that transfer students gain competence in word processing and other basic computing skills prior to entering the program. Please note that students are admitted directly into the program and do not have to reapply for admission to the upper division of the program.

ACADEMIC REGULATIONS

To be in good standing during the first three years of the program, students must do the following:

1. Maintain semester/summer and cumulative averages of 2.5
2. Maintain a minimum grade of C in all 100- to 400-level courses required in the major and for all other courses required for the major. Students who fail to obtain a grade of C in a required course for the major at the undergraduate level will not be permitted to enroll in major courses having an IB prefix at the 500 and 600 levels until the course is repeated with a minimum grade of C. If space is available, a course must be repeated with permission of the program faculty the next time it is offered. A course may be repeated only once.
3. Undergraduate program students experiencing academic difficulties may be required to decelerate their progress until an acceptable level of general academic performance is achieved. Permission to decelerate in the program must be obtained from the chair of the department of business.
4. Students at the undergraduate level can be placed on program probation only once. Any academic deficiency beyond the first program academic probation will result in dismissal from the program.

GRADUATE ACADEMIC REQUIREMENTS:

To be in good standing during the fourth and fifth years of the program:

1. A student must maintain a minimum semester/summer and cumulative average of at least 3.0.
2. No more than a total of two courses with grades lower than B are applicable to the graduate level. This policy applies to all 500 and 600 level courses. A grade of C- or lower is not applicable to a degree in international business.
3. Students who fail to achieve a minimum grade of C for any course included in the graduate portion of the program (500 or 600 level courses) will not be permitted to enroll for subsequent semesters/summers of the graduate portion until the course has been successfully repeated with a minimum grade of C. If space is available, the course must be repeated the next time it is offered.
4. Students are required to obtain permission of program faculty prior to registration in fieldwork internships included in the graduate portion of the program. Permission may be denied on the basis of demonstrated weakness or inability to meet the program’s academic or professional standards.
5. All fieldwork assignments must be completed with a satisfactory (S) grade. Students receiving an unsatisfactory (U) grade for a fieldwork assignment must receive formal approval of program faculty to repeat the fieldwork experience. A student will not be permitted to repeat an unsatisfactorily completed fieldwork more than once.

ACCOUNTING/INTERNATIONAL BUSINESS

DEGREE: 5-YEAR B.S. IN ACCOUNTING/M.S. IN INTERNATIONAL BUSINESS
ACADEMIC PROBATION

A student will be placed on program academic probation when there is failure to satisfy specific program academic standards or regulations. A student will be placed on academic probation for the two full-time terms (i.e., semesters and/or summers) which immediately follow the date of probation. All students on program academic probation must meet the academic standards for their classification (undergraduate/graduate). Failure to meet the academic standards during a probationary period will result in dismissal from the program.

Students placed on academic probation are not permitted to advance to subsequent terms of study until the academic deficiency which resulted in the probation status has been remedied. The student will remain on probation for two terms in which full-time coursework, or its equivalent, is satisfactorily completed.

Students may appealed the decision of dismissal from the accounting program to the chair of the department of business. The appeal is initiated with a letter from the student to the department chair that describes the extenuating circumstances that limited academic performance. The department chair then presents the appeal to the business faculty for consideration. If the appeal is accepted, the student will remain on program academic probation for two full-time terms and must satisfy the criteria of probation.

UNDERGRADUATE ACADEMIC REQUIREMENTS:

To be in good standing during the first three years of the program, students are responsible for the following:

1. They must maintain semester/summer and cumulative averages of 2.5.

2. They must maintain a minimum grade of C in all 100- to 400-level courses required in the major and for all other courses required for the major. Students who fail to obtain a grade of C in a required course for the major at the undergraduate level will not be permitted to enroll in major courses having an IB prefix at the 500 and 600 levels until the course is repeated with a minimum grade of C. If space is available, a course must be repeated with permission of the program faculty the next time it is offered. A course may be repeated only once.

3. Undergraduate program students experiencing academic difficulties may be required to decelerate their progress until an acceptable level of general academic performance is achieved. Permission to decelerate in the program must be obtained from the chair of the department of business.

4. Students at the undergraduate level can be placed on program probation only once. Any academic deficiency beyond the first program academic probation will result in dismissal from the program.

GRADUATE ACADEMIC REQUIREMENTS:

To be in good standing during the fourth and fifth years of the program, the following are required:

1. A student must maintain a minimum semester/summer and cumulative average of at least 3.0.

2. No more than a total of two courses with grades lower than B are applicable to the graduate level. This policy applies to all 500- and 600-level courses. A grade of C- or lower is not applicable to the degree in international business.

3. Students who fail to achieve a minimum grade of C for any course included in the graduate portion of the program (500- or 600-level courses) will not be permitted to enroll for subsequent semesters of the graduate portion until the course has been successfully repeated with a minimum grade of C. If space is available, the course must be repeated the next time it is offered.

4. Students are required to obtain permission of program faculty prior to registration in fieldwork internships included in the graduate portion of the program. Permission may be denied on the basis of demonstrated weakness or inability to meet the program's academic or professional standards.

5. All fieldwork assignments must be completed with a satisfactory (S) grade. Students receiving an unsatisfactory (U) grade for a fieldwork assignment must receive formal approval of program faculty to repeat the fieldwork experience. A student will not be permitted to repeat an unsatisfactorily completed fieldwork more than once.

STUDENT CONDUCT

Students enrolled in the D'Youville College business programs are expected to demonstrate high standards of personal behavior and professional conduct in the academic and fieldwork assignments. Academic dishonesty of any form will not be tolerated by the program faculty. College policy regarding academic dishonesty will be followed with the recommendation that the offender be dismissed from the business program.

INTERNATIONAL BUSINESS COURSES

Graduate courses (500 and 600 levels) offered by the international business program are listed below. Undergraduate college-core and business-core courses, such as management, law or foreign language, are described in the appropriate sections for each discipline. Graduate courses with the prefix GRA are described in the graduate catalog.
B.S. PROGRAM: This program has been designed to satisfy the admission requirements of medical, dental, veterinary, physical therapy, pharmacy and chiropractic schools and provides a sound preparation for many graduate programs in the sciences. Students interested in a degree in physical therapy will matriculate in a sequential-degree, entry-level P.T. program (B.S. in biology + D.P.T. program). Entering freshmen matriculate in and complete a B.S. in biology degree under the program administration of the math and natural sciences department. Upon completion of the B.S. in biology, qualified graduate students then move directly into the three-year doctor of physical therapy program (D.P.T.).

A total of 38 hours in biology, including BIO 101-102, 302, 303 and 312 are required. BIO 302 should be taken in the second year, 303 in the junior year and 312 in the senior year. The additional 18 credit hours must be selected from BIO 107, 108, 208, 216, 218, 219, 220, 242, 304, 309, 310, 311, 317, 320, 330, 331, 332, 335, 336, 339, 342, 350, 351, 375, 389-390, 403, 407-410, 479-480 and 659/660. CHE 101-102, 219-220, MAT 125-126 and PHY 101-102 are also required. It is expected that courses that have accompanying laboratory sections will be completed as well.

In addition to the above science courses, many medical schools stress the need for applicants with a broad and humanities-based education. After consulting their advisor, students should select courses in philosophy, ethics, history and literature to contribute to their liberal arts education. A pre-medical advisory committee gives students current information about medical schools. A faculty advisor will advise students interested in graduate school possibilities. The department also offers assistance for the student to prepare for graduate school entrance exams (e.g., GRE, MCAT, DAT and VAT).

B.A. PROGRAM: This program has fewer required courses in mathematics, chemistry and physics and a lesser requirement of biology electives than the B.S. program. It is intended for those who do not wish to pursue an advanced degree in biology or medicine. It is for those who wish to teach high school biology or to combine biology with another concentration, e.g., nursing, business, preparation for physician assistant or with a structured minor. A total of 34 credit hours in biology including BIO 101-102 or its equivalent, 302, 303 and 312, is required. The additional 14 credit hours must be selected from BIO 107, 108, 208, 216, 218, 229, 230, 231, 242, 304, 309, 310, 314, 317, 320, 330, 331, 332, 335, 336, 339, 342, 350, 351, 375, 389-390, 403, 407-410, 479-480 and 659/660. CHE 101-102, 219 and one semester of mathematics chosen from MAT 117, 120, 123 or 125 are also required.

BIOLOGY
ADMISSION REQUIREMENTS

The B.S. in biology is designed for students preparing for graduate school as well as for professional programs in medicine, veterinary medicine, dentistry, physician assistant, physical therapy, podiatry, optometry, chiropractic and pharmacology. It includes the following admission categories: BIOB.S., BIOPT, PREMED, PREDENT, PREVET, CHP, PREPHARMACY and PRECHIROPRACTIC. The B.A./health professions preparation program is designed for students preparing for graduate programs in secondary education, physician assistant and other allied health fields. Admission to the D’Youville graduate physician assistant program will require application directly to the program during the beginning of the final year of undergraduate study. Admission into the B.A. in biology and the B.A. in biology for secondary education requires a minimum SAT score of 900 (Math and Verbal), a high school average of 80 percent and a transfer G.P.A. of 2.0. Admission into the B.S. requires a minimum SAT score of 1000 (Math and Verbal) (or ACT of 21), a high school average of 85 percent or a 2.85 on a four point scale and a rank in the top 50 percent of one’s class. Transfer students are required to have a minimum G.P.A. of 2.5.

Students nearly meeting these requirements will be considered for these programs by the department. Students denied immediate acceptance into the biology B.S. will be accepted into the biology B.A. program if they meet its requirements. These students may be promoted into the biology B.S. program after they have sufficiently demonstrated competence (usually after the completion of two semesters).

PROGRAM REQUIREMENTS

Students within the department must maintain a minimum 2.0 G.P.A. in courses taken at D’Youville in coursework required for their major. Students who fail to earn this G.P.A. will be placed on probation in the major. Probation may continue for a maximum of three consecutive semesters or a total of four consecutive semesters. Students who exceed these limits will be dismissed from the major. If a student is dismissed from the B.S. program on account of poor performance in courses not required for the B.A. program, a student may have his/her record re-evaluated as a major in the B.A. program, and may be declared in good standing if his/her performance in the B.A. requirements justifies this.

Students may appeal these decisions on academic status by submitting, in writing, to the department chairperson, reasons why exceptional consideration may be justified.

PHYSICAL THERAPY (PT) Students choosing the sequential degree entry will complete their B.S. in biology and move directly into the graduate P.T. program provided they complete all P.T. program prerequisites at a grade of B or better with a minimum prerequisite course G.P.A. of 3.20 as well as a cumulative G.P.A. of 3.0 and continue to meet all graduate admissions standards. Refer to the physical therapy department section for further details about graduate P.T. programs.

PREMED/PREDENT: This program offers motivated students the option to register for courses to fulfill the prerequisites for application to most medical and dental schools. The science emphasis includes both semesters of biology, chemistry, organic chemistry, physics and calculus. Students will be able to complete these courses within their first two years, which will give them the requirements needed to apply to the early assurance program at the University at Buffalo Medical School and other medical/dental schools in the spring semester of their sophomore year.

CHEMISTRY
DEGREE: B.S.

The chemistry major at D'Youville prepares students in the traditional foundational areas of chemistry: inorganic, organic, physical, analytical and biochemistry. A degree in chemistry offers a wide variety of career opportunities. You may use your degree to teach high school, enter directly into industry or go to graduate school and become a university professor or a senior researcher in an industrial R&D laboratory.

A chemistry degree can also prepare you for postgraduate work in medicine, dentistry, business or law. Fields such as patent law, international law, environmental law, pharmaceutical sales and management are all accessible to students who begin their education with a chemistry degree.

B.S. PROGRAM:

Students are required to take the following courses with their corresponding laboratories: CHE 101, CHE 102, CHE 219, CHE 220, CHE 303, CHE 311, CHE 312, CHE 313L, CHE 331, CHE 332 and CHE 401. In addition, the student must choose to take either CHE 412 or CHE 421. Other required courses include the following: PHY 101, PHY 101L, PHY 102, PHY 102L, MAT 125, MAT 126, MAT 202 and a CSC course.

A chemistry degree combined with a biology minor is an excellent gateway into the medical profession. Many medical school applicants possess chemistry degrees coupled with key biology courses to enhance their submission. These courses are also available to you at D'Youville (e.g., human gross anatomy). Since the chemistry major is housed within the department of math and natural sciences, chemistry students are provided all of the graduate school and medical school entrance examination support as well as the utilization of the pre-medical advisory committee in the department.

ADMISSION REQUIREMENTS

Admission into the B.S. in chemistry program requires a minimum SAT score of 1000 (or ACT of 21), a high school average of 85 percent and a rank in the top 50 percent of one's class. Transfer students are required to have a minimum G.P.A. of 2.5.

PROGRAM REQUIREMENTS

Students within the department must maintain a minimum of 2.0 G.P.A. in courses taken at D'Youville in coursework required for their major. Students who fail to earn this G.P.A. will be placed on probation in the major. Probation may continue for a maximum of three consecutive semesters or a total of four nonconsecutive semesters. Students who exceed these limits will be dismissed from the major. Students may appeal these decisions on academic status by submitting, in writing to the department chairperson, reasons why exceptional consideration may be justified.

CHIROPRACTIC

The doctor of chiropractic program is comprised of two degrees: a B.S. in biology and a D.C. (doctor of chiropractic) degree. The program provides a strong knowledge base of chiropractic theory, research and clinical practice supported by the liberal arts. The program is integrated with the college’s other health care programs and is built on a rigorous foundation of the sciences, balanced with holistic principles and practices. In the first three years, in addition to the science courses, the curriculum meets the health care professions’ need for broadly educated practitioners by grounding them in the social sciences and humanities through core courses in literature, fine arts, ethics, philosophy, religious studies and foreign language.

ADMISSION REQUIREMENTS

In order to be considered for admission into the pre-professional B.S. in biology program, students must meet or exceed the following criteria:

1. High school average of 85 percent or 2.75 on a scale of 4.0 points
2. Combined SAT scores of 1,000 (Math and Verbal)
3. Composite ACT scores of 21
4. Rank in upper half of graduating class

ACADEMIC REGULATIONS

The following chiropractic academic policies are in addition to college policies:

1. Students must obtain a grade of C or better for all 500+-level courses and maintain a minimum of a 2.50 cumulative G.P.A. at both the undergraduate and graduate levels.
2. Students who meet the admission requirements for the D.C. professional degree program need not reapply and will be admitted automatically into that program.
3. Students in years one through four who are working to achieve an undergraduate degree are classified as undergraduate students and therefore can apply for undergraduate financial aid.

Dietetics

Degree: B.S./M.S.

The dietetics program is a five-year, entry-level master's degree coordinated program with admission at the freshman year. Transfer students will be accepted on a space-available basis.

Students who complete all requirements specified by the five-year course of studies will be awarded both a B.S. and an M.S. degree in dietetics at the time of graduation and are eligible to take the national examination to become a Registered Dietitian (RD). In New York State, graduates who obtain the RD credential are eligible to apply to receive the Certified Dietitian/Nutritionist (CDN) credential.

The program has been approved and registered by the New York State Education Department and is currently granted accreditation by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics. Students admitted into the coordinated program (senior and graduate years) are considered graduates of an accredited program after their successful completion of the program and are eligible to take the registration examination for dietitians after graduation. Each graduate will also be provided a verification statement, which documents completion of all academic, supervised practice and degree requirements for the coordinated program and D’Youville College.

D’Youville College guarantees placement in the coordinated program if the student maintains the college’s and department’s academic standards. The coordinated program combines the classroom instruction and professional practice experiences required to become a registered dietitian.

Students gain practical experience in local facilities that support the development of professional skills in clinical dietetics, community nutrition and food service management. In addition, the program’s concentration in advanced nutrition practice provides higher level coursework and experiences in:

- treating patients with complex conditions, such as trauma, pediatric hospitalizations, renal failure with complications and nutrition support
- planning, developing and implementing nutrition intervention programs
- developing and managing a private practice
- planning and conducting research, including communicating findings of this research

Requirements for program completion include achieving a satisfactory grade in all required courses, completing a thesis and passing a comprehensive examination.

Mission Statement

Recognizing the importance of good nutrition in maintaining health and preventing disease, the dietetics program strives to serve the community by producing dietitians with the knowledge, skills and experience to meet the challenges of the diverse and changing field of dietetics. Our intent is to prepare students to fulfill prominent and varied professional roles and become leaders in their fields.

The program supports the principles of academic excellence, service to others and lifelong learning by fostering the student’s professional and personal growth within a broad range of educational and practical experiences.

Program Goals and Outcome Measures

Goal 1: Prepare graduates who are competent for entry-level practice as registered dietitians and obtain employment in a variety of dietetics-related positions.

Outcome Measures:
- Graduate satisfaction with curriculum
- Employer satisfaction with graduates
- Student completion of program
- Pass rate on RD exam
- Employment of graduates

Goal 2: Prepare graduates who demonstrate a commitment to professional leadership and community service.

Outcome Measure:
- Graduate participation in professional organizations
- Graduate participation in community service

Goal 3: Prepare graduates who are committed to lifelong learning.

Outcome Measures:
- Graduate participation in continuing education activities

Outcome data is available on request.

Admission Requirements

Admission requirements reflect the structure of the program as a five-year bachelor of science and master of science degree. In order to be considered for admission into the pre-professional phase, students must meet the following criteria:

1. Combined SAT scores of at least 1000 or composite ACT score of 21
2. High school average of at least 85 percent or 2.85 on a 4.0 scale;
3. Standing in the upper half of the graduating class.

Transfer students are encouraged to apply and are accepted on a competitive, space-available basis. Most graduates in diet technology or food service can transfer the equivalent of two years credit. Requests for transfer at the B.S. or B.A. level are welcome. A minimum 2.75 G.P.A. is required to be accepted into years one and two. Transfer students entering year three or year four (supervised practice portion) must have a minimum 3.0 G.P.A.

Freshman students must demonstrate successful completion of the following high school courses: two years of math, one year of biology and one year of chemistry. The students will be selected from the pool of applicants on the basis of the above criteria. Decisions will usually be made by March for the fall semester. Late applications will be processed on a space-available basis.

The Coordinated Program in Dietetics is currently granted accreditation by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics. The address and phone number of ACEND are: 210 South Riverside Plaza, Suite 2000, Chicago, IL, 60606-6995, 312.899.0040, ext 5400.
ACADEMIC REGULATIONS

Dietetics academic policies are in addition to college policies and are as follows:

1. To be in good standing in the dietetics program in the first two years, students must maintain a cumulative G.P.A. of 2.5. Students who do not have the minimum average will not be allowed to progress to third-year courses.

2. In the third, fourth, and fifth years (junior, senior, and graduate status), students must maintain a cumulative grade point average of 2.75. In addition, students must have a 3.0 average in dietetics courses.

3. Students must maintain a 3.0 average in 500- and 600-level courses. No more than two 500- and 600-level courses with grades less than a B (3.0) are applicable to the degree. A grade of C- (1.7) or lower is not applicable to any graduate degree.

4. A minimum of a B grade (3.0), which is equivalent to an S grade, is required in the following courses: DTC 410SP, DTC 420SP, DTC 511SP, DTC 512SP, DTC 521SP, DTC 522SP, DTC 601, and DTC 632. Students will be allowed to repeat only one of these courses. A minimum of a B- grade (2.7) is required in all remaining dietetics courses. Students will be allowed to repeat a given course once upon recommendation of the dietetics faculty.

5. A minimum of a C grade (2.0) is required in all prerequisite courses for the dietetics major.

6. Students who receive an unacceptable grade in a course required for the major must repeat the course and receive an acceptable grade within two full-time semesters of initially taking this course. Failure to do so will result in dismissal from the program.

7. Students who do not meet these academic standards will be placed on probation for the two full-time semesters immediately following the date of probation. The student must meet with his/her academic advisor within 30 days of the receipt of his/her letter to establish a written plan of correction. All students on probation must meet the academic standards for the program. Failure to meet academic standards will result in dismissal from the program.

8. DTC 622 must be taken within one year of graduation. Students who have taken this course more than one year before graduation must repeat the course.

9. Students must successfully pass a comprehensive examination within the deadline established by the program in order to be cleared for graduation from the dietetics program. The examination may be repeated one time. A second unsuccessful attempt on the comprehensive examination will result in dismissal from the program.

10. In addition to all college academic integrity policies, students are expected to maintain high standards of personal behavior and professional conduct in the academic and clinical environments. College policy regarding academic dishonesty will be followed. Professional misconduct or unprofessional behavior in the clinical setting will result in failure of the course regardless of course mastery and may result in immediate dismissal from the program.

11. A student who has not registered for consecutive semesters in the dietetic program (i.e., withdrawal, dismissal, leave of absence, failure to re-register) and desires to return, in addition to meeting college requirements, must schedule a personal interview with the dietetic department chair. This interview must be conducted before a decision can be made regarding continuing with the program.

COSTS OF THE PROGRAM

Students should be aware of the costs necessary for their supervised practice education in addition to tuition or class fees*. Program costs are estimates and are subject to change without prior written notice.

EDUCATION
DEGREE: B.A.

PLANS OF STUDY FOR TEACHER PREPARATION
The School of Arts, Sciences and Education offers academic degree programs to prepare students for careers in teaching in a variety of grade levels and subject areas. Students earn a bachelor's degree and then enter a master's degree program that includes practical field experience and student teaching. The program leads to initial teacher certification within five years and meets the master's degree requirement for professional teacher certification by the New York State Education Department (NYSED).

CHILDHOOD EDUCATION (GRADES 1-6)
Students enroll in D'Youville's bachelor of arts degree in liberal studies for education program that requires a carefully sequenced curriculum in the liberal arts and sciences that ensures the necessary knowledge base for teaching to learning standards for childhood education. In addition to undergraduate education courses for the B.A. degree, students may take up to three graduate education courses. These graduate courses are part of the master of science in childhood education program that leads to childhood education (grades 1-6) teacher certification.

Dual Teacher Certification:
Students with Disabilities-Grades 1-6 and Childhood Education-Grades 1-6
A plan of study is available that leads to two teacher certifications: special education (grades 1-6) and childhood education (grades 1-6). Students may elect to complete D'Youville's master of science in special education (childhood) program along with the bachelor of art degree in liberal studies for education. The M.S. in special education (childhood) program leads to the special education and general education certifications for grades 1-6.

ADOLESCENCE EDUCATION: SPECIAL EDUCATION (GRADES 7-12)
Students enroll in a bachelor of arts degree in liberal studies for education or a bachelor's degree program in one of the liberal arts and sciences. Their plan of study must include upper-level coursework to ensure a knowledge base for teaching to learning standards for adolescence education. The plan of study will include:

Two 300-level courses in one of the following subjects:
math, science, history or English

OR

One 300-level course in two of the following subjects:
math, science, history or English

In addition to the content area courses for the bachelor's degree, students may take up to three graduate education courses. These graduate courses are part of the master of science in special education (adolescence) program that leads to special education generalist (grades 7-12) teacher certification.

This certification allows graduates to teach in supportive roles, such as consultant teachers, resource room service providers and integrated co-teachers in grades 7-12. Students may also elect to add an extension to this certification in a subject area to be employed as the special class teacher in that subject. The extension requires the completion of 18 credits in a subject area (English, history/social studies, math, biology, chemistry) and a passing score on the New York State Content Speciality Test (CST) in the subject.

TESOL (Teaching English to Speakers of Other Languages -Grades K-12)
Students completing the bachelor of arts degree in liberal studies for education, biology, chemistry, English, history or mathematics may pursue a plan of study to become certified in TESOL (Teaching English to Speakers of Other Languages) for grades K-12. Some graduate education courses may be taken during a student's undergraduate years. After the bachelor's degree, student complete an M.S.Ed. TESOL program. Twelve credits of foreign language are required.
### ENGLISH

**DEGREE: B.A.**

The English program at D'Youville offers the opportunity to study and enjoy British, American and World literature, to master expository writing and to learn to write and publish creative fiction, poetry and drama. Our courses focus on close reading of both classic and non-canonical works and the study of critical and cultural theories about literature.

D'Youville's English majors develop the highly marketable skills of analytical, critical and creative thinking, problem-solving and effective written and oral communication. Career opportunities for students who earn a B.A. in English exist in the fields of education, media, creative and technical writing, library science, public relations, marketing, non-profit, government and law. The course option of an individually designed internship allows a student to prepare application material to graduate school and/or to explore a career path.

English majors are required to fulfill six credits of a foreign language, which is also required for education certification. Proof of four semesters of a high school foreign language allows a student to replace these courses with English electives.

A minor concentration in English literature of 15-credit hours is also available to all students. Please see the catalog section on minors for requirements.

### ADMISSION REQUIREMENTS

**Freshman Admission**

Applicants must meet the following three criteria:

1. Combined SAT scores of at least 900 (or ACT equivalent score of 18).
2. A high school average of at least 80 percent.
3. A high school rank in the upper one half of the class.

**Transfer Admission**

Students must have a minimum G.P.A. of 2.33. Transfer credits will be determined on a case-by-case basis to assess adaptability to curriculum requirements.

Each student accepted into the program must submit a letter of intent prior to course registration.

### ENGLISH AND STUDY ABROAD AT D'YOUVILLE COLLEGE

The English program encourages its students to complete some portion of their undergraduate study through the college’s Study Abroad program in England, Italy, and many other locations.

English majors can deepen their understanding of British, American, and post-colonial English literature by study in a foreign university. English majors who study abroad come to understand that cultural context is crucial for interpreting literary texts. Seeing Shakespeare performed in the reconstructed London Globe, visiting the Lake District where Wordsworth and Coleridge wrote some of their finest poetry, reading Joyce’s Ulysses in Dublin, discussing American literary texts with British or Australian students are all experiences that foreground the ways in which knowledge is constructed differently in other political and social environments.

Alternatively, through immersion in a foreign language program, English students may gain fluency in another language and acquire a sense of its literature while at the same time studying their own literature. All courses taken through the college’s Study Abroad program are accepted as D’Youville courses. With careful planning, students may spend a semester in a foreign university with no loss of time in completing their degrees. Junior and senior students are also eligible to complete internships abroad. For details on the Study Abroad program, see “Study Abroad Opportunities” on the D’Youville website (www.dyc.edu).

**Major** ........................................................................................................... 45

**Core requirements and electives** ................................................................... 75

**Total** ............................................................................................................... 120

**NOTE:** ENG 111-112 are required of all students and do not count toward the major.

### FOR STUDENTS WISHING TO ENTER THE MASTER’S PROGRAM IN EDUCATION/CERTIFICATION IN EDUCATION:

For students wishing to enter the master’s program in education/ certification in education: The education portion of the program will allow up to three graduate courses to be taken while the student is an undergraduate. If a student wishes to take the entire three courses, two must fall in the senior’s final semester as an undergraduate. Further, it is expected that all juniors and seniors wishing to take graduate courses show substantial evidence of academic progress toward their undergraduate degree. Students may not take graduate courses in lieu of required courses by the program. Students must maintain a 2.75 G.P.A. to take graduate courses.
EXERCISE & SPORTS STUDIES

The exercise and sports studies (ESS) program leads to a bachelor's of science (B.S.) degree of 122-124 credits, and is designed to provide undergraduate students with the knowledge and conceptual tools to understand the various dimensions of the health professions, fitness industry and/or competitive athletics. Students are provided with a major foundation of 18 credits of content-specific coursework and are given the option to select from one of three areas of specialization. An ESS minor also exists to complement other academic areas of study.

THE EXERCISE STUDIES TRACK (TRACK #1) provides students with a focus on the exercise and sports sciences and prepares students for careers in the fitness industry, strength and conditioning, and personal training. This track is designed to prepare students for credentialing examinations through the National Strength and Conditioning Association (NSCA) and the American College of Sports Medicine (ACSM).

THE SPORTS STUDIES TRACK (TRACK #2) focuses on the social, psychological, business, and management aspects of the sports and fitness industries. The emphasis within this concentration is to prepare students for careers in sports and fitness management, athletic administration, and coaching.

THE HEALTH PROFESSIONS TRACK (TRACK #3) is designed for students pursuing an advanced degree in physical therapy. Students interested in physical therapy matriculate into the sequential-degree program (B.S. in exercise and sports studies + doctor of physical therapy [D.P.T.] program). Entering freshmen matriculate into and complete a B.S. in ESS under the administration of the exercise and sports studies department. Students choosing the health professions track intimately study the basic sciences (chemistry, physics, anatomy and physiology) in addition to the exercise sciences in preparation for the D.P.T. graduate program. The track is also designed to prepare students for credentialing examinations through the National Strength and Conditioning Association (NSCA) and the American College of Sports Medicine (ACSM).

The ESS course of study is intimately related to the strong group of health-related programs currently offered at D'Youville College at both the undergraduate and graduate levels, such as physical therapy and dietetics. In addition, the undergraduate ESS major can be combined with elements of the undergraduate business management program for students interested in pursuing sports and fitness management. As such, this path of study is consistent with the educational mission and capabilities of the ESS program and provides students a new and attractive pathway for undergraduate studies in an area related to exercise and sport studies.

ADMISSIONS REQUIREMENTS

Applicant will meet these criteria for entrance into ESS program (TRACK #1 AND TRACK #2):
1. Combined SAT score of 900 (or ACT of 19)
2. High school average of at least 80 percent
3. High school rank in the upper one half of the class
4. Transfers: must have a minimum of 2.0 GPA

Applicants for entrance into the ESS D.P.T. program (TRACK #3):
Refer to physical therapy section of the catalog for admission requirements.

Students who do not meet admission requirements for track #3 may be given the option of being accepted into either track #1 or track #2 dependent upon past academic performance. After two semesters in good academic standing that includes successful completion of two semesters of science required for the major, students can apply for a change of major into the seven-year ESS + D.P.T. program.
PROGRAM CONTENTS AND REQUIREMENTS:
The B.S. in exercise and sports studies (ESS) requires 122 to 124 credits, depending on the area of specialization (track) chosen. The program offers three tracks, each of which includes 17 courses that meet the D’Youville College core requirements along with five ESS foundation courses. Each track also includes additional coursework from a variety of disciplines that round out a students’ educational experience.

GOOD ACADEMIC STANDING
To be in good academic standing for exercise studies (track #1) and sports studies (track #2), students must:
  a. Maintain a cumulative GPA of 2.00, and
  b. Earn minimum grades of C in all courses required for students major.*

To be in good academic standing for health professions (track #3), students must:
  a. Maintain a cumulative GPA of 3.00, and
  b. Maintain a cumulative GPA of 3.20 in all D.P.T. prerequisite courses, and
  c. Earn minimum grades of C in all courses required for students major and D.P.T. prerequisite courses.*
  d. Student may earn only two grades of C, C+ or B- for D.P.T. prerequisite courses.

*Courses with a grade below B must be repeated, but may only be repeated once. However, students with a cumulative G.P.A. of 3.50 may be permitted to repeat one course a third time.

ACADEMIC PROBATION
Students who are not in good academic standing will be placed on academic probation. Student on academic probation will be limited to 13 credit hours during the semester they are on academic probation.

DISMISSAL
Students will be dismissed from the ESS program** if they:
  a. Fail to remain in good academic standing while on academic probation or after having been on academic probation during a previous (non-summer) semester, or
  b. Fail to earn a minimum grade of C in a repeated course.

**Students dismissed from track #3 (ESDPT program) may be permitted to continue in either track #1 or #2 if they otherwise meet all academic requirements of those tracks.

---

**GLOBAL STUDIES
DEGREE: B.A.**

The global studies major is an interdisciplinary program drawing on the diverse offerings of liberal arts at the college. The program prepares students to understand cultural differences from a broad interdisciplinary perspective and to examine more deeply a particular region of the world.

During their course of studies, students will be offered a study-abroad opportunity. The global studies faculty strongly recommend that students enter language-intensive programs abroad during a summer semester or regular semester, thus possibly satisfying the language requirement of the program and the expectation of foreign study at the same time.

The program will provide students with a strong interdisciplinary background, global awareness and hands-on regional knowledge sufficient to provide a working knowledge of the issues that face a particular region of the world. With globalization resettling the boundaries of commerce, and culture and politics in the world, a global studies degree will be highly prized by international and nongovernmental organizations.

To fulfill the requirements for a bachelor of arts degree in global studies, students must complete the following courses: GLS 101, GLS 102, GLS 444, BIO 215, ENG 215, ENG 216, HIS 211, PHI 306, PSC 250, SOC 203 and GLS 344 or four semesters of a foreign language.

In addition, students choose from one of three regional concentration areas, and complete a minimum of 12 credit hours in that area, with no more than nine hours from any one academic discipline. The areas and possible courses to choose from are as follows: Europe: ENG 300, 301, 308, 309, 310, 318, 344, FA 327, HIS 113, 319, 343, PHI 280, 305, 404, RS 209 or SOC 211. The Americas: ENG 218, 323, 342, 343, 344, 409, HIS 231, 341, 313 or SOC 211. The Non-Western World: ENG 344, 340, 341, HIS 103, 309, 350, HIS/SOC 420, PHI 308 or SOC 211.

All courses are offered during a two-year sequence or more frequently. Unless otherwise indicated, odd-numbered courses are offered in the fall and even-numbered courses are offered in the spring. Students in the major must maintain a minimum 2.0 G.P.A. in courses taken at D’Youville in their major subject area.

For further information, contact the chair of the liberal arts department at 716.829.7608.
ADMISSION REQUIREMENTS

Freshman Admission
Applicants must meet the following three criteria:
1. Combined SAT scores of at least 900 (or ACT equivalent score of 18)
2. A high school average of at least 80 percent
3. A high school rank in the upper one half of the class

Transfer Admission
Students must have a minimum G.P.A. of 2.33. Transfer credits will be determined on a case-by-case basis to assess adaptability to curriculum requirements.
Each student accepted into the program must submit a letter of intent prior to course registration.

HEALTH ANALYTICS
DEGREE: B.S.

PROGRAM CONTENTS AND REQUIREMENTS
Analytics is the new frontier for health care organizations. Analytics offers the opportunity to identify areas of performance that can be improved, both in terms of the quality and cost of care. The mission of the health analytics program is to prepare students with the skills, knowledge and ethics necessary to work in a variety of health service organizations. The program prepares students to analyze large sets of health-related data from a variety of sources, and to effectively communicate those findings to diverse audiences.

Health analytics helps healthcare organizations convert massive amounts of information into usable, data driven intelligence. Qualified professionals in this field must work well as individuals and as members of a team. They must possess excellent written and verbal communication skills, as well as analytic ability. They must also understand healthcare systems and their management.

ACADEMIC REQUIREMENTS FOR THE HEALTH ANALYTICS PROGRAM

Admission
Applicants must meet these criteria for entrance into the health analytics program:
1. A combined SAT score of 1100 (or ACT 24), and
2. High school average of at least 87%, and
3. High school rank in the upper one half of the class, and
4. Transfer students must have a minimum cumulative GPA of 2.75

Good Academic Standing
To be in good academic standing in the health analytics program students must:
- Achieve a semester GPA of 2.50, and
- Maintain a cumulative GPA of 2.50, and
- Earn minimum grades of C in all courses required for the student’s major.

*Courses with a grade below C must be repeated, but may only be repeated once.

Academic Probation
Students who are not in good academic standing will be placed on academic probation for their next (non-summer) semester. Students on academic probation will be limited to 13 credit hours during the semester they are on academic probation. Students will come off probation if they meet the requirements for good academic standing listed above.

Dismissal
Students will be dismissed from the health analytics program if they:
- Fail to remain in good academic standing after having been on academic probation during a previous (non-summer) semester, or
- Fail to earn a minimum grade of C in a repeated course.

HEALTH SERVICES MANAGEMENT

DEGREE: B.S.

PROGRAM CONTENTS AND REQUIREMENTS

The health services management program is designed to provide a strong liberal arts and science background for students at the undergraduate level who wish to enter the health services job market directly after graduation. It is also designed to prepare students to continue graduate work in health services administration and other health-related fields. The program provides application to the clinical management sides of health care.

The program’s first two years are devoted primarily to the study of the arts, humanities and sciences, which satisfy general education core requirements of the college’s baccalaureate degree and other prerequisite requirements specified by the program curriculum. The remaining time is designed to provide a common body of health-related knowledge and concepts which serve as a foundation for integrating the clinical and administrative sides of healthcare. Courses in business management, operations management, and health literacy round out the liberal arts based education.

Within the program there are two tracks: health education and operations and health sciences. The health science track is required for students who are pursuing the doctorate in physical therapy. (See the physical therapy section of the catalog.)

HEALTH EDUCATION AND OPERATIONS TRACK

Students will be conferred a bachelor of science in health services management. Students in the education and operations track may enter the workforce as entry-level health care employees in hospitals, HMOs, long term care facilities, home care agencies and community care organizations. They may coordinate activities and communicate with diverse groups within the organizations and communities, and focus on achieving specific group, organizational and community health goals.

Two internships highlight the program. Internships introduce students to diverse professionals in a variety of healthcare settings. Examples of student placements are The Community Health Center of Buffalo, The March of Dimes, the American Red Cross, Erie County Medical Center, and Roswell Park Cancer Institute, the Veterans Administration to name a few.

ACADEMIC REQUIREMENTS FOR THE HEALTH SERVICES MANAGEMENT PROGRAM

Admission * (Health Sciences Track-see physical therapy section of the catalog)

Applicants must meet these criteria for entrance into the health services management program:
1. A combined SAT score of 1000 (or ACT 21), and
2. High school average of at least 85%, and
3. High school rank in the upper one half of the class, and
4. Minimum of two years of high school math and three years of science
5. Transfer students must have a minimum cumulative GPA of 2.50

Good Academic Standing

To be in good academic standing for health operations and education track students must:

a. Achieve a semester GPA of 2.50, and
b. Maintain a cumulative GPA of 2.50, and

c. Earn minimum grades of C in all courses required for the student’s major.*

To be in good academic standing for health sciences track students must refer to the section on physical therapy admissions requirements:

*Health Sciences Track (See the physical therapy section of the catalog.)

Academic Probation

Students who are not in good academic standing will be placed on academic probation for their next (non-summer) semester. Students on academic probation will be limited to 13 credit hours during the semester they are on academic probation.

Dismissal

Students will be dismissed from the HSM program** if they:

a. Fail to remain in good academic standing while on academic probation or after having been on academic probation during a previous (non-summer) semester, or
b. Fail to earn a minimum grade of C in a repeated course.

**Students dismissed from HSMDPT program may be permitted to continue in health education and operations if they otherwise meet all academic requirements of those tracks.

To fulfill the requirements for a bachelor of arts in history, students must complete the following history courses: 103 or 111, 203, 204, 211, 223, 226, 227, 228, 450 and a three-credit hour senior research project; three courses selected from 309, 313, 325, 329, 343, 344, 350 or another non-North American history course; two courses from 320, 330, 336, 341 or another North-American history course; and a minimum three-credit hour internship is also required.

Twelve credits must be completed in a related field or structured minor. Related fields include social sciences (political science, sociology, psychology) and Spanish. Structured minors include accounting, English, management, computer science, philosophy and psychology.

Students within the department must maintain a minimum 2.0 G.P.A. in courses taken at D’Youville in their major subject area.

A core requirement history course must be taken before any 300-level history course, unless the individual has a B average in high school social science.

ADMISSION REQUIREMENTS

Freshman Admission

Applicants must meet the following three criteria:

1. Combined SAT scores of at least 900 
   (or ACT equivalent score of 18)
2. A high school average of at least 80 percent
3. A high school rank in the upper one half of the class

Transfer Admission

Students must have a minimum G.P.A. of 2.33. Transfer credits will be determined on a case-by-case basis to assess adaptability to curriculum requirements.

Each student accepted into the program must submit a letter of intent prior to course registration.

- Courses may also be transferred in/or taken in the consortia.

For students wishing to enter the master’s program in education/certification in education: The education program will allow up to three graduate courses to be taken while the student is an undergraduate. If a student wishes to take the entire three courses, two must fall in the senior’s final semester as an undergraduate. Further, it is expected that all juniors and seniors wishing to take graduate courses show substantial evidence of academic progress toward their undergraduate degree. Students may not take graduate courses in lieu of required courses by the program. Students must maintain a 2.75 G.P.A. to take graduate courses.
The bachelor's/master's degree in international business combines specialized training in international business with a strong foundation in a foreign language, quantitative research, finance and accounting, communication, ethics, and interpersonal skills. Rapid changes in the global economy and the explosive growth in international trade and investment make it necessary that managers be trained in the following:

- Understanding and managing strategic and functional areas of business,
- Managing cultural differences in the global environment and
- Communicating in foreign languages.

Top executives of international business confirm the need for managers with international business training, especially at the master's level. Graduates of this program will be able to pursue worldwide employment with the following:

- Multinational companies as well as small exporting firms
- International financial institutions
- Government agencies such as U.S. Commerce Department and Ex-Im Bank
- Management consulting firms and export management companies
- Logistics and transportation companies
- Colleges and universities

Students combine theoretical concepts learned in the classroom with practical training gained through fieldwork experiences. Fieldwork options include business internship opportunities with U.S. offices of multinational corporations as well as opportunities to combine work and study abroad. D'Youville admits high school and transfer students directly into the combined B.S./M.S. program in international business and guarantees a place in the class as long as all of the academic requirements are met.

The international business program at D'Youville College has been approved and registered by the New York State Department of Education. Students who successfully complete all requirements specified by the five-year course of study will be awarded B.S. and M.S. degrees in international business at the time of graduation. The program is accredited by the International Assembly of Collegiate Business Education.

The program's first two years are devoted primarily to studying arts, humanities, and science to satisfy the general education core requirements of the college's baccalaureate degree and certain prerequisite requirements specified by the program curriculum (such as macroeconomics, microeconomics, and four semesters of foreign language). The third year is dedicated to the business core curriculum. Graduate courses in international business begin in the fourth year and contain relevant research, analytical, and communications components.

Required international fieldwork begins in the summer session between the fourth and fifth years of study. Fieldwork assignments are arranged on an individual student basis. Assignments may involve developing exporting or importing strategies, performing advertising or marketing research, developing international financing proposals or developing international policies for organizations interested in internationalizing operations. Students have an opportunity to extend fieldwork into the fifth year of study.

**INTERNATIONAL BUSINESS ARTICULATION AGREEMENT WITH SENECA COLLEGE, ONTARIO, CANADA**

Students who complete the two-year general arts and science or two- and three-years international business diplomas at Seneca College with a G.P.A. of 3.0 or better will be eligible for acceptance into the third year of D'Youville's B.S./M.S. combined international business program. Specific details for each agreement are available in the department of business or the undergraduate admissions office.

**STUDENT RESPONSIBILITIES**

The international business program is a demanding program in coursework and time commitment. Students enrolled in the program must complete two summer sessions in addition to the ten full semesters of coursework in order to complete the program in five years. Fieldwork assignments, scheduled in the fourth and fifth years of study, may be completed at home or abroad and may require an additional expense for travel and room and board.

**ADMISSION REQUIREMENTS**

Admission requirements for applicants entering as freshmen are as follows:

1. Combined SAT scores of at least 1,000 (math and verbal) or ACT equivalent
2. A high school average of at least 85 percent
3. High school rank in the upper half of class

Students must also demonstrate successful completion of two years of mathematics. One year of foreign language is recommended, but not mandatory. Although D'Youville does not mandate that letters of recommendation or a letter of intent to study a specific discipline be included with the application, students applying to the international business combined B.S./M.S. program are strongly advised to include these documents with their application.

The admission requirement for transfer students is a minimum G.P.A. of 2.5. Transfer students are also strongly advised to include letters of recommendation and a letter of intent with their application. Students with a G.P.A. of lower than 2.5 may be considered for conditional acceptance on an individual basis. Conditionally accepted students can matriculate after completing four undergraduate or graduate courses, as appropriate, with a grade of B or better.
Applicants holding other baccalaureate degrees at the time of admission are not required to satisfy the college’s core curriculum. However, foreign language and economics requirements must be met prior to advancement to the fourth year of study. In addition, it is highly recommended that transfer students gain competence in word processing and other basic computing skills prior to entering the program.

Please note that students are admitted directly into the program and do not have to re-apply for admission to the graduate portion of the program.

**ACADEMIC REGULATIONS**

The academic regulations listed below must be met by full-time and part-time students.

**UNDERGRADUATE ACADEMIC REQUIREMENTS:**

To be in good standing during the first three years of the program, students are responsible for the following:

1. They must maintain semester/summer and cumulative averages of 2.5.
2. They must maintain a minimum grade of C in all 100- to 400-level courses required in the major and for all other courses required for the major. Students who fail to obtain a grade of C in a required course for the major at the undergraduate level will not be permitted to enroll in major courses having an IB prefix at the 500 and 600 levels until the course is repeated with a minimum grade of C. If space is available, a course must be repeated with permission of the program faculty the next time it is offered. A course may be repeated only once.
3. Undergraduate program students experiencing academic difficulties may be required to decelerate their progress until an acceptable level of general academic performance is achieved. Permission to decelerate in the program must be obtained from the chair of the department of business.
4. Students at the undergraduate level can be placed on academic probation only once. Any academic deficiency beyond the first program academic probation will result in dismissal from the program.

**GRADUATE ACADEMIC REQUIREMENTS:**

To be in good standing during the fourth and fifth years of the program, the following are required:

1. A student must maintain a minimum semester/summer and cumulative average of at least 3.0.
2. No more than a total of two courses with grades lower than B are applicable to the graduate level. This policy applies to all 500- and 600-level courses. A grade of C- or lower is not applicable to the degree in international business.
3. Students who fail to achieve a minimum grade of C for any course included in the graduate portion of the program (500- or 600-level courses) will not be permitted to enroll for subsequent semesters of the graduate portion until the course has been successfully repeated with a minimum grade of C. If space is available, the course must be repeated the next time it is offered.
4. Students are required to obtain permission of program faculty prior to registration in fieldwork internships included in the graduate portion of the program. Permission may be denied on the basis of demonstrated weakness or inability to meet the program’s academic or professional standards.

5. All fieldwork assignments must be completed with a satisfactory (S) grade. Students receiving an unsatisfactory (U) grade for a fieldwork assignment must receive formal approval of program faculty to repeat the fieldwork experience. A student will not be permitted to repeat an unsatisfactorily completed fieldwork more than once.

**ACADEMIC PROBATION**

A student will be placed on program academic probation when there is failure to satisfy specific program academic standards or regulations. A student will be placed on academic probation for the two full-time terms (i.e., semesters and/or summers) which immediately follow the date of probation. All students on program academic probation must meet the academic standards for their classification (undergraduate/graduate). Failure to meet the academic standards during a probationary period will result in dismissal from the program.

Students placed on academic probation are not permitted to advance to subsequent terms of study until the academic deficiency which resulted in the probation status has been remedied. The student will remain on probation for two terms in which full-time coursework, or its equivalent, is satisfactorily completed.

Students may appeal the decision of dismissal from the international business program to the chair of the department of business. The appeal is initiated with a letter from the student to the department chair that describes the extenuating circumstances that limited academic performance. The department chair then presents the appeal to the business faculty for consideration. If the appeal is accepted, the student will remain on program academic probation for two full-time terms and must satisfy the criteria of probation.

**STUDENT CONDUCT**

Students enrolled in the D’Youville College international business program are expected to demonstrate high standards of personal behavior and professional conduct in the academic and fieldwork assignments. Academic dishonesty of any form will not be tolerated by the program faculty. College policy regarding academic dishonesty will be followed with the recommendation that the offender be dismissed from the international business program.

**INTERNATIONAL BUSINESS COURSES**

Graduate courses (500 and 600 levels) offered by the international business program are listed below. Undergraduate college-core and business-core courses, such as management, law or foreign language, are described in the appropriate sections for each discipline. Graduate courses with the prefix GRA are described in the graduate catalog.

Core requirements: 57

100- and 400-level requirements specified by the program: 40

500- and 600-level requirements specified by the program: 54

TOTAL: 151
Liberal studies for education is a bachelor of arts degree which prepares applicants interested in childhood- and special-levels education. The program is designed to lead applicants toward a master of science in education. Special education and TESOL options are also available. It is also a terminal B.A. degree.

Students who maintain a cumulative average of 2.75 or better in their first two years of the program may begin taking graduate courses in the junior year. They can earn their master’s degree in education and be eligible for initial certification by the end of their fifth year of study. Not only does this permit early entry into teaching, but it results in considerable savings in tuition costs.

Applicants who enter the program follow a carefully sequenced curriculum in the liberal arts and sciences to ensure they have the necessary knowledge base for teaching. Required courses include study in English literature and writing, philosophy, foreign language, fine arts, math and natural sciences, and history, sociology and psychology. These courses are taught by faculty from the departments of liberal arts, and math and natural sciences. During their undergraduate years, students are guided by advisors in the education department.

ADMISSION REQUIREMENTS

The program accepts applicants for full-time study from the freshman year. Students are admitted directly into the program. Qualified transfer students who have comparable preparation in the liberal arts and sciences are accepted on a space-available basis. A minimum G.P.A. of 2.5 is required for admission.

ACADEMIC REGULATIONS

Academic regulations for students accepted into the program are in addition to general college policies for all part-time and full-time students. The program is divided into three stages as follows:

1. Students are admitted into the program based on the criteria outlined in the D’Youville College Undergraduate Catalog.
2. All undergraduate students’ transcripts will be reviewed by the education department when students have completed 45 credits of coursework. Students will need to have a 2.5 or better G.P.A. overall and a 2.75 or better in the core courses. Candidates who do not meet these criteria will receive written notification that they are on academic probation for a semester and limited to no more than 13 credits for that semester.
3. More than half the grades in each LSE category (education, literature, philosophy and religious students, fine arts and foreign languages, social sciences, mathematics, natural sciences, and other core requirements) need to be a C or higher.
4. To be in good standing, students must maintain a minimum G.P.A. of 2.5. Students with less that a 2.5 G.P.A. may be dismissed from the program. (Note: A G.P.A. of 2.75 is required to begin taking graduate courses in the junior year.)
5. Students who have maintained a G.P.A. of 2.75 or better begin taking graduate courses in education in the junior year.
6. Before registering for graduate coursework, students must meet with an education advisor.
7. No more than six credits of grades below a B (B-, C+, etc.) are applicable to the graduate degree.
8. Any grade below C in the education department is considered failing. The course may be repeated.
9. A course may be repeated only once.
10. A student with two or more graduate grades below a C or with a cumulative graduate GPA less than 2.75 at any time will no longer be permitted to take graduate-level courses and will not be automatically admitted into the graduate programs in education.
11. Students who have completed the bachelor of arts degree in liberal studies for education or in a major field, and have an overall G.P.A. of 2.75 or higher apply for admission into the master’s degree programs in the education department.
12. All rules and regulations pertaining to graduate students at D’Youville College are applicable to graduate students in the education department. Students are also subject to specific rules and regulations in the education department.
13. Students should refer to the D’Youville College graduate catalog for additional regulations which might be applicable.

</table>

The education program will allow up to three graduate courses to be taken while the student is an undergraduate. If a student wishes to take the entire three courses, two must fall in the senior’s final semester as an undergraduate. Further, it is expected that all juniors and seniors wishing to take graduate courses show substantial evidence of academic progress toward their undergraduate degree. Students in the liberal studies in education program must be juniors with a minimum of 56 credit hours accepted in the LSE program before taking any graduate education courses. Students may not take graduate courses in lieu of program-required courses.

Students who are making good progress towards their undergraduate degree may take three of the following courses:

Students should consult with an education advisor before registering for graduate coursework.
The management program provides students with the knowledge and skills necessary to become competent and responsible managers.

The degree conferred is the bachelor of science in business management. The curriculum prepares the student by emphasizing a firm base of liberal arts and a common body of knowledge about management responsibilities. Students graduate from the program having developed a coherent and dynamic personal philosophy about managing, an understanding of the ever-changing technological world, and a strong sense of social responsibility. The management curriculum serves students wishing to obtain professional degrees. It prepares students for careers as executives and specialists in business and other complex organizations.

Along with the traditional B.S. in management, D’Youville College also offers the management degree for working adults with some college credits. The ADVANCE program, an accelerated degree completion program taught over 21 months, is taught in a cohort modular format. Students complete one course at a time every five weeks by attending classes one night per week.

All management majors take MGT 316. All accounting majors take ACC 417. All management majors must take MGT 444 (Internship) for a minimum of three credit-hours. However, this course can also be taken for six credit hours or the student may take MGT 445 for 6 to 12 credit hours. A waiver of this requirement will be given only in exceptional circumstances as determined by the department chair. If a waiver is granted, the student must take another minimum three-credit course stipulated by the department chair in consultation with the student’s advisor. The above stipulations also apply for accounting students who must take ACC 444 Internship for a minimum of three-credit hours. MGT 316 or ACC 417 will NOT satisfy the computer requirement in the core.

Student must earn a grade of C or better in each course in the major. One half of the major (30 credits) must be earned at D’Youville. Students may repeat a major course once. Students may repeat no more than three major courses in their total program.

ADVANCE PROGRAM IN MANAGEMENT

Along with the traditional B.S. in management, the department of business also offers a management degree specifically designed for working adults who want to get ahead in their careers, broaden their credentials to have more career choices or want to earn a baccalaureate degree.

Department cohorts or class groups begin several times during the academic year. Courses are scheduled in the evenings to fit busy lifestyles. The program places particular emphasis on self development, communication, problem-solving competence, supervision, human resource management and ethical leadership. It also emphasizes critical thinking and written communication skills.

In addition to the following courses in the ADVANCE modular program, students complete or transfer six additional business courses, as well as meet the requirements for the college core curriculum. Many of these college core courses are offered in modular format.

ADMISSION REQUIREMENTS

Admission requirements for applicants entering as freshmen are as follows:
1. Combined SAT scores of at least 1,000 (math and verbal) or ACT equivalent
2. A high school average of at least 85 percent
3. High school rank in the upper half of class

Students must also demonstrate successful completion of two years of mathematics. One year of foreign language is recommended, but not mandatory. Although D’Youville does not mandate that letters of recommendation or a letter of intent to study a specific discipline be included with the application, students applying to the international business combined B.S./M.S. program are strongly advised to include these documents with their application.

The admission requirement for transfer students is a minimum G.P.A. of 2.5. Transfer students are also strongly advised to include letters of recommendation and a letter of intent with their application. Students with a G.P.A. of lower than 2.5 may be considered for conditional acceptance on an individual basis. Conditionally accepted students can matriculate after completing four undergraduate or graduate courses, as appropriate, with a grade of B or better.

ACADEMIC REGULATIONS

To be in good standing during the first three years of the program, students must do the following:
1. Maintain semester/summer and cumulative averages of 2.0 / 1.8 for freshmen.
2. Maintain a minimum grade of C in all 100- to 400-level courses required in the major and for all other courses required for the major.
3. Undergraduate program students experiencing academic difficulties may be required to decelerate their progress until an acceptable level of general academic performance is achieved. Permission to decelerate in the program must be obtained from the chair of the department of business.
4. Students at the undergraduate level can be placed on program probation twice. Any academic deficiency beyond the first program academic probation will result in dismissal from the program.

ACADEMIC PROBATION

A student will be placed on program academic probation when there is failure to satisfy specific program academic standards or regulations. A student will be placed on academic probation for the two full-time terms (i.e., semesters and/or summers) which immediately follow the date of probation. All students on program academic probation must meet the academic standards for their classification (undergraduate/graduate). Failure to meet the academic standards during a probationary period will result in dismissal from the program.

Students placed on academic probation are not permitted to advance to subsequent terms of study until the academic deficiency which resulted in the probation status has been remedied. The student will remain on probation for two terms in which full-time coursework, or its equivalent, is satisfactorily completed.
Students may appeal the decision of dismissal from the accounting program to the chair of the department of business. The appeal is initiated with a letter from the student to the department chair that describes the extenuating circumstances that limited academic performance. The department chair then presents the appeal to the business faculty for consideration. If the appeal is accepted, the student will remain on program academic probation for two full-time terms and must satisfy the criteria of probation.

**STUDENT CONDUCT**

Students enrolled in the D’Youville College business programs are expected to demonstrate high standards of personal behavior and professional conduct in the academic and fieldwork assignments. Academic dishonesty of any form will not be tolerated by the program faculty. College policy regarding academic dishonesty will be followed with the recommendation that the offender be dismissed from the business program.
MANAGEMENT ARTICULATION AGREEMENTS

D’Youville has formed articulation agreements allowing transfer students from the following institutions and programs to enter the management program at the second- or third-year level:

- Seneca College, Ontario, Canada
  Business Administration
- Erie Community College, New York
  Business Administration
  Business Transfer
- Bryant & Stratton College, New York
  Business Management
  Marketing and Sales
- Trocaire College
  Transfer Concentration
  Hotel Management
  Sales and Marketing
  Health Information Technology
  Health Care Office Management
- Villa Maria College
  Business Management

Agreement details and other information for transfer students are available in the department of business.

| Major                                              | 63 |
| Core requirements and electives                   | 57 |
| Total                                              | 120 |

Students must earn a grade of C or better in each course in the major. One half of the major (30 hours) must be earned at D’Youville. A student may repeat a major course once. A student may repeat no more than three major courses in the total program.

To qualify for an internship, students must have achieved a G.P.A. of 2.5 and receive the recommendation of a faculty member in their major field. Students who do not meet these requirements may apply for a waiver. A waiver of the requirement will be granted only in exceptional circumstances as determined by the department chair. If a waiver is granted, the student must take another minimum three-credit course stipulated by the department chair in consultation with the student’s advisor.
MATHEMATICS

DEGREE: B.S. OR B.A.

B.S. PROGRAM: This program is designed to offer a broad exposure to the rich field of mathematics. There are three tracks in the B.S. program: general track, statistics track and applied concentration track. All three tracks are suited for students interested in pursuing graduate work or careers in the mathematical sciences. The general track requires 15 mathematics courses (48 credit hours), consisting of 9 required courses (30 hours) and 6 electives (18 hours). The statistics track, which could lead to further study or careers in statistics or actuarial science, also requires 15 mathematics courses (48 credit hours) with at least 5 of these courses (15 hours) statistically oriented. The applied concentration track requires 11 mathematics courses (36 hours) and 4 courses (12-16 hours) in an area of concentration (e.g. physics, chemistry, biology, or computer science). The concentration courses must be pre-approved by the Mathematics Curriculum Committee and the Department Chair. Additionally, all three tracks require two semesters of physics with lab (8 credit hours) – either PHY 101, 101L, 102, 102L or PHY 103, 103L, 104, 104L – these courses are in addition to the seven credits of core science.

B.A. PROGRAM: This program has fewer required courses in mathematics so students have more free credits to explore other disciplines or further expand their mathematical experience. This program is particularly suited for students who wish to combine mathematics with another major. The college has a strong history in education, and this degree would complement the education department, allowing students who wish to become secondary school teachers of mathematics to complete their master’s degree in education at D'Youville College. A total of 11 mathematics courses (36 hours) are required, consisting of 8 required courses (27 hours) and 3 electives (9 hours). In addition, two semesters of physics with lab (8 credit hours) are required – either PHY 101, 101L, 102, 102L or PHY 103, 103L, 104, 104L – these courses are in addition to the seven credits of core science.

ADMISSION REQUIREMENTS

The B.S. in mathematics requires a minimum SAT score of 1100 (Math and Verbal) (or ACT of 24), a high school average of 85 percent and a rank in the top 25 percent of one's class. Transfer students are required to have a minimum G.P.A. of 3.0.

The B.A. in mathematics requires a minimum SAT score of 1000 (Math and Verbal) (or ACT of 21), a high school average of 85 percent and a rank in the top 50 percent of one’s class. Transfer students are required to have a minimum G.P.A. of 2.5.

Students nearly meeting these requirements will be considered for these programs by the department. Students denied immediate acceptance into the mathematics B.S. will be accepted into the mathematics B.A. program if they meet its requirements. These students may be promoted into the mathematics B.S. program after they have sufficiently demonstrated competence (usually after the completion of two semesters).

PROGRAM REQUIREMENTS

Students within the department must maintain a minimum 2.0 G.P.A. in coursework required for their major and taken at D'Youville College. Students must have a minimum grade of B- in MAT 125 and MAT 126. Students who fail to earn this G.P.A. will be placed on probation in the major. Probation may continue for a maximum of three consecutive semesters or a total of four non-consecutive semesters. Students who exceed these limits will be dismissed from the major. Students may appeal these decisions on academic status by submitting, in writing to the department chairperson, reasons why exceptional consideration may be justified.

For students wishing to enter the master's program in education/ certification in education: The education program will allow up to three graduate courses to be taken while the student is an undergraduate. If a student wishes to take the entire three courses, two must fall in the senior’s final semester as an undergraduate. Further, it is expected that all juniors and seniors wishing to take graduate courses show substantial evidence of academic progress toward their undergraduate degree. Students may not take graduate courses in lieu of required courses by the program. Students must maintain a 2.75 G.P.A. to take graduate courses.

**Four courses in area of concentration (200+ level)**: 12-16

Concentration courses must be pre-approved by the Mathematics Curriculum Committee and the chair of the mathematics and natural sciences department (Suggested concentrations: analytics, biology, chemistry, computer science or physics).

**Major requirements**: 56-60

**Core requirements**: 46

**Free Electives (including core electives)**: 18-14

**TOTAL**: 120

* Minimum grade of B- required
Students from D’Youville College wishing to pursue a career in the U.S. military are able to follow a course of study in military science as cross-registered students at Canisius College. The military science program at Canisius College is designed to augment the college learning experience. Its primary goals are to identify, instruct and commission men and women for service as officers in the active United States Army, the Army Reserve or the Army National Guard. D’Youville students interested in learning more about the possibility of military service in this form should contact the Canisius College professor of military science at 716.888.3229.

Courses taken at Canisius on a cross-registration (no fee) basis include the following:

**Freshman and Sophomore Years:**
- MLS 101 Introduction to ROTC ................................................................. 1
- MLS 102 Introduction to Leadership ................................................................. 1
- MLS 111L Basic Leadership Lab ............................................................................. 1
- MLS 112L Basic Leadership Lab ............................................................................. 1
- MLS 201 Self/Team Development ........................................................................ 1
- MLS 202 Individual/Team Military Tactics ................................................... 1
- MLS 211 Leadership Laboratory ....................................................................... 2
- MLS 212 Leadership Laboratory ....................................................................... 2

**Junior and Senior Years:**
- MLS 301 Unit Organization and Operations I ............................................. 3
- MLS 302 Unit Organization and Operations II ............................................. 3
- MLS 401 Advanced Leadership Studies .................................................. 3
- MLS 402 Military Law, Ethics and the Military Profession ................. 3

These courses, when completed, may be applied to D’Youville degree requirements as general electives in the core curriculum.

*Detailed information is available in the Canisius College catalog.*
MINORS (STRUCTURED)

Structured minors are sets of courses designed to give the student marketable skills which could enhance a competency gained in any major. To take a structured minor which will be recorded on the transcript, the student must do the following:

1. Students should complete a statement of intent. Forms are available in the registrar’s office.
2. Students must maintain a G.P.A. of 2.0 in the required courses.
3. Students should complete a minimum of 12 credits as indicated in the chosen area of study.
4. Students should take at least nine of the needed credits at D’Youville.
5. Students may not minor in an area within their major discipline. However, in some instances courses taken for a minor may also be used to satisfy the core.

ACCOUNTING MINOR (12 CREDIT HOURS)
The accounting minor is a useful complement to a major in management or general business. Like the other structured minors, it offers greater employment potential. It is particularly useful to someone working in or operating a small business.

Required courses:

- ACC 211 Principles of Accounting I ................................................................. 3
- ACC 212 Principles of Accounting II ................................................................ 3
- ACC 311 Intermediate Accounting I ................................................................ 3
- One of the following:
  - ACC 312 Intermediate Accounting II ............................................................... 3
  - ACC 321 Tax Accounting ................................................................................. 3

ANALYTICS MINOR (23 CREDIT HOURS)
The analytics minor is a useful complement to majors in health or natural sciences. Like other structured minors, it offers greater employment potential.

Required courses:

- MAT 123 Introduction to Applied Statistics.............................................. 4
- MAT 124 Intermediate Applied Statistics.................................................... 4
- MAT 220 Applied Regression Analysis ....................................................... 3
- MAT 222 Statistical Computing ................................................................. 3
- MAT 224 Applied Biostatistics ................................................................. 3
- MAT 228 Applied Statistical Inquiry ......................................................... 3
- CSC XXX Any Computer Science Course .............................................. 3
  (CSC 151 recommended)

BIOINFORMATICS MINOR (MINIMUM OF 21 CREDIT HOURS)
The bioinformatics minor will provide students with an interest in computation and biology the opportunity to explore this rapidly developing field while simultaneously exposing these students to additional coursework in math and computing. Due to the pre-requisite coursework required for these courses, it is expected that most students will simultaneously seek a bachelor of science degree in biology, mathematics or chemistry.

Required courses:

- CSC 151 Introduction to Computer Programming I .......................... 3
- CSC 152 Introduction to Computer Programming II ........................ 3
- MAT 124 Intermediate Applied Statistics.................................................... 4
- BIO/MAT 375 Math Modeling in Biology .................................................. 3
- BIO 350 Fundamentals of Genomics, Proteomics and Bioinformatics .... 3
- BIO 351/L Computational Biology/Lab ................................................... 4
- BIO/MNS 499 Capstone Experience ........................................................ 0-2

One elective chosen from the following:

- BIO 304/L Microscopic Anatomy/Lab ......................................................... 4
- BIO 389 Special Topics in Biology (permission of the chair).............. 3

ANATOMY MINOR (MINIMUM OF 21 CREDIT HOURS)
The anatomy minor is designed for those who want an in-depth knowledge of the human body. A more thorough knowledge of anatomy will give students that plan a career in the health sciences, research or education a solid background in the anatomical sciences.

Two introductory courses:

- BIO 101/L Introductory Biology I/Lab .......................................................... 4
- BIO 102/L Introductory Biology II/Lab ........................................................... 4
- OR
- BIO 107/L Human Anatomy and Physiology I/Lab ..................................... 4
- AND
- BIO 108/L Human Anatomy and Physiology II/Lab .................................... 4

Required courses:

- BIO 317/L Comparative Anatomy/Lab ....................................................... 4
- BIO 339/L Human Gross Anatomy/Lab ..................................................... 6
- BIO/MNS 499 Capstone Experience ........................................................ 0-2

One elective chosen from the following:

- BIO 304/L Microscopic Anatomy/Lab ......................................................... 4
- BIO 389 Special Topics in Biology (permission of the chair).............. 3
BIOLOGY MINOR (MINIMUM OF 18 CREDIT HOURS)

Any D’Youville student not seeking a degree in biology could complete this minor. It could be used by those who wish to feature a biology foundation in their resumes.

Two introductory courses:

BIO 101/L Introductory Biology I/Lab .............................................................. 4
AND
BIO 102/L Introductory Biology II/Lab ............................................................. 4
OR
BIO 107/L Human Anatomy and Physiology I/Lab ........................................ 4
AND
BIO 108/L Human Anatomy and Physiology II/Lab ...................................... 4

Three courses (encompassing a minimum of 10 credits) from:

BIO 107/L Human Anatomy and Physiology I/Lab ................................. 4
BIO 108/L Human Anatomy and Physiology II/Lab ................................. 4
BIO 208/L Microbiology/Lab ........................................................................ 4
BIO 216 Marine Biology ................................................................................ 3
BIO 218/L Invertebrate Zoology/Lab ......................................................... 4
BIO 229/L Ecology/Lab .................................................................................. 4
BIO 230/L Foundations of Environmental Science/Lab .......................... 4
BIO 231/L Environmental Geology/Lab ...................................................... 4
BIO 242 Evolution ........................................................................................... 3
Any 300-level BIO course ............................................................................... 3
Any 400-level BIO course ............................................................................... 3

CHEMISTRY MINOR (23 CREDIT HOURS)

A structured minor in chemistry may be taken by students who are interested in enhancement of their credentials (especially students enrolled in majors already carrying chemistry requirements, e.g., biology).

Required courses:

CHE 101/101L General Chemistry I ................................................................. 4
CHE 102/102L General Chemistry II .............................................................. 4
CHE 219/219L Organic Chemistry I ................................................................. 4
CHE 220/220L Organic Chemistry II ............................................................... 4
CHE/BIO303/303L Biochemistry .................................................................... 4

One chemistry elective chosen from the following:

CHE 311 Physical Chemistry I ......................................................................... 3
CHE 412 Spectroscopy ..................................................................................... 3
CHE 421 Organometallic Chemistry ............................................................... 3

Other courses may be taken with departmental approval.

BUSINESS MINOR (18 CREDIT HOURS)

The minor in general business provides courses in accounting, management and economics. Liberal arts majors and those working with small businesses will find this minor helpful. This minor is available only to students who are not accounting and/or management majors.

Required courses:

ACC 211 Principles of Accounting I .............................................................. 3
ACC 212 Principles of Accounting II ............................................................ 3
ECO 201 Principles of Economics Macro ..................................................... 3
ECO 202 Principles of Economics Micro ....................................................... 3
ECO 207 Business Statistics .......................................................................... 3
MGT 305 Principles of Management .............................................................. 3
OR
MKT 304 Principles of Marketing ................................................................. 3

ENGLISH MINOR IN LITERATURE (15 CREDIT HOURS)

A minor in English literature offers students in other majors the opportunity to broaden their knowledge of literature and its diverse genres, perspectives, and historical and political contexts. The distribution of course work enables students to enrich their experience of literature by engaging with diverse works of cultural and aesthetic value, contending with important philosophical questions, reimagining histories of past times and places, and fostering their own critical and creative voices. Minors are encouraged to participate in the larger culture of the English program—e.g., scholarly lectures, readings, roundtables—and to work for the college’s literary magazine, Sketch.

Course requirements for the minor in English literature:

ENG 237 Introduction to Literary Criticism ..................................................... 3

One 200-level course

Three 300 or 400 level literature courses
ENGLISH MINOR IN WRITING AND NEW MEDIA (15 CREDIT HOURS)

A minor in writing and new media helps students establish the communication skills and visual, information, and media literacies required in professional and academic environments. The writing and new media minor consists of 12 course credits (4 courses) and a required internship (3-12 credits) with a writing or media-based focus. The internship will require a portfolio of work completed for the minor and/or a public performance/presentation.

Course requirements for the minor in writing and new media:

ENG 232  Introduction to Creative Writing ..............................................3
or ENG 231  The Art of the Essay ..................................................................3
ENG 235  Writing for New Media .................................................................3
or ENG 236  Writing for Social Justice .........................................................3

One of:
Advanced Creative Writing Workshop:
ENG 303  Fiction Workshop..................................................................................3
ENG 304  Poetry Workshop ..................................................................................3
ENG 305  Screen/Playwriting Workshop ..........................................................3
ENG 331  Advanced Media Studies .....................................................................3

An internship with a writing- or media-based focus (3-12 credits)

ENTREPRENEURSHIP MINOR (12 CREDIT HOURS)

The purpose of the minor in entrepreneurship is to enable students to expand their skills and knowledge in small business/practice management. The structured minor is designed to teach students managerial, financial and marketing concepts related to small business ownership. The minor is geared toward students who may want to gain expertise in entrepreneurship/small business management or want to own or manage a practice in the future. NOTE: The entrepreneurship structured minor is available only to non-management majors.

Required courses:

ACC 211  Principles of Accounting I ..............................................................3
MGT 305  Principles of Management ..............................................................3
MGT 321  Entrepreneurship I: Small Business Planning ................................3
MGT 322  Entrepreneurship II: Small Business Operations ..........................3
Total ...........................................................................................................12

ENVIRONMENTAL SCIENCES MINOR (MINIMUM OF 23 CREDIT HOURS)

This minor prepares students for continued graduate study in environmental science or to enter the workforce in government, industry, education, regulatory and consulting firms. Although this minor is not limited to chemistry and biology majors, they are likely the students that would take advantage of this opportunity. This minor will allow them to build on their interest in the environment without sacrificing the multitude of educational and career opportunities that their fundamental degrees provide.

Required courses:

BIO 101/L & 102/L  Introductory Biology I & II/Lab ......................................8
OR
BIO 303/CHE 303/L Biochemistry/Lab .......................................................4

BIO 230/L  Foundations of Environmental Science/Lab ...........................4
BIO 231/L  Environmental Geology/Lab .......................................................4
CHE 333/L  Analytical Chemistry/Lab .........................................................4
MNS 499  Capstone Experience ..................................................................0-2

One of the following:

BIO 216  Marine Biology ...............................................................................3
BIO 218/L  Invertebrate Zoology/Lab ............................................................4
BIO 229/L  Ecology/Lab .....................................................................................4
BIO 242  Evolution .........................................................................................3
BIO 314/L  Botany/Lab .....................................................................................4
BIO 330/L  Environmental Microbiolog/Lab ................................................4
BIO 331/L  Conservation Biology/Lab ............................................................4
BIO 332  Environmental Health .....................................................................3
BIO 389/390  Special Topics Course (permission of the chair) ..................3
CHE 389/390  Special Topics Courses (permission of the chair) ...............3

EXERCISE AND SPORTS STUDIES MINOR (17 CREDIT HOURS)

The exercise and sports studies minor is designed to assist students in developing necessary knowledge, skills and abilities in the ever-growing field of health and fitness, as well as the burgeoning field of sport and competitive athletics. For students hoping to extend a career in the allied health professions to sports and athletics, this program provides the fundamental dynamics of how sport impacts individuals and society, through both a biomedical approach and a critical examination of the psychological and sociological dimensions of sport and physical activity.

Required courses:

ESS 101  Introduction to Exercise & Sports Studies ....................................3
ESS 201  Principles of First Aid, Safety & Athletic Injury ..........................3
ESS 301  Fitness Evaluation & Exercise Prescription ..................................3
ESS 270  Exercise & Sports Studies Practicum ............................................3
DTC 328  Nutrition for Fitness & Athletics ..................................................2
SOC 312  Sociology of Sport & Physical Activity .........................................3
OR
ESS 410  Special Topics in Ex/Sports Studies ..............................................3
Total ...........................................................................................................17
FINE ARTS MINOR (18 CREDIT HOURS)

The fine arts minor is designed to provide an interdisciplinary approach to creative human expression for students interested in artistic performance, process and inquiry. Students have flexibility in designing their course of study within the minor, and may choose to acquire either an in-depth understanding of a particular art—visual arts, dance, theater, music—or a broader, critical awareness of the visual and performing arts.

Students wishing to earn a fine arts minor will submit a portfolio documenting their creative and/or critical activities at D’Youville College at the end of their program to a committee of three faculty members for evaluation. This personal archive will generally consist of written programs, lists of repertoire studied and performed, samples of creative and/or critical work, and other evidence of creative achievements, including participation in public performances and/or exhibitions, as part of study toward the minor. The portfolio will be integrated into PHI 423 Philosophy of Art.

Five courses (encompassing a minimum of 15 credits), two of which must be at the 300-400 level:

- DAN 101 Introduction to Dance .................................................................3
- DAN 210 Introduction to Ballet ..................................................................3
- DAN 300 Elements of Dance Composition ..................................................3
- DAN 305 Dance Technique and Performance .............................................3
- FA 105 Introduction to Photography ............................................................3
- FA 205 Drawing ............................................................................................3
- FA 210 Design ...............................................................................................3
- FA 218 History of Western Art ......................................................................3
- FA 305 Painting ............................................................................................3
- FA 314 Art of the Film ..................................................................................3
- FA 320 History of Visual Arts in America ....................................................3
- FA 327 Modern Art ......................................................................................3
- FA 328 Art and the Everyday ......................................................................3
- FA 330 Frank Lloyd Wright and American Architecture ..........................3
- FA 380 Art: Special Topics ...........................................................................3
- MUS 100 Appreciation of Music .................................................................1
- MUS 103 Chorus .........................................................................................3
- MUS 200 Appreciation of Music 2 .............................................................3
- MUS 209 Introduction to the American Musical Theater .........................3
- THE 104 Theatre Production ......................................................................3
- THE 202 Introduction to Acting ..................................................................3
- THE 444 Theatre as Outreach ...................................................................3
- ENG 213 Drama ..........................................................................................3
- ENG 302 Shakespeare ..................................................................................3

All FA minors are required to take the following course:

PHI 423 Philosophy of Art ..............................................................................3

HEALTH SERVICES ADMINISTRATION MINOR

(15 CREDIT HOURS)

This minor provides an opportunity for the development of specialized knowledge in the area of health services administration. A variety of students might seize this opportunity—e.g., nursing majors interested in administrative career tracks, sociology majors interested in doing graduate work in social and preventive medicine, business and/or management students interested in health services administration.

Required courses:

- MGT 305 Principles of Management .........................................................3
- MGT 435 Health Care Management ..........................................................3
- HRM 309 Human Resource Management ................................................3

Two of the following:

- HSM 220 Community Health ...................................................................3
- HSM 406 Information Technology in Health Care ....................................3
- HSM 410 Health Care Law .........................................................................3

HISTORY MINOR (15 CREDIT HOURS)

This minor requires any two courses at the 100 or 200 level including the required course for the core (6 credit hours). An additional three courses at the 300-400 level (9 credit hours) is also required.

INFORMATION TECHNOLOGY MINOR (16 CREDIT HOURS)

A minor in information technology would serve students majoring in other fields, like education or business, who want to combine their degree with more advanced skills in computer technology.

Required courses:

- IT 101 Introduction to Information Technology ......................................1
- IT 111 Java Programming I .......................................................................3

Four of the following:

- IT 112 Java Programming II ....................................................................3
- IT 231 Computer Organization & Architecture ......................................4
- IT 304 Object Oriented Programming ......................................................3
- IT 323 Database Design & Development ................................................3
- IT 331 Internet Working & Communication .........................................3
- IT 338 Modern Operating System .........................................................3
- OR Any I.T. professional elective
MANAGEMENT MINOR (15 CREDIT HOURS)

The management minor provides a foundation in management skills—a “plus” for career advancement. Management skills are extremely useful in any interpersonal job or in a job with advancement potential based on management ability. Many jobs, such as administrative assistant and social worker, require skills in management. Not only does this minor aid in career advancement, but it also provides a broader background for admission to graduate programs in different management areas.

**Required courses:**
- MGT 305 Principles of Management .......................... 3
- MKT 304 Principles of Marketing ............................. 3
- Three courses from the areas of: Management/Marketing/Human Resource Management

MATHEMATICS MINOR (18 CREDIT HOURS)

This minor is available to students who wish to feature a mathematical foundation on their resumes. The requirements for the minor are 18 credits of mathematics courses: Calculus I, Calculus II, Calculus III, (MAT 125, MAT 126 and MAT 202) and two other mathematics courses which are acceptable for credit in the mathematics major.

NATURAL SCIENCES MINOR (21 CREDIT HOURS)

Although any D’Youville student not seeking a degree in biology or chemistry can achieve this minor, it could easily be used by liberal studies in education (pre-elementary education) students to highlight their interest in the sciences since they already currently take 18 of these credits. The minor requires 21 hours, including at least one physics, one chemistry, one biology and three laboratory courses, chosen from this list. Additional courses may be applied with departmental approval.

**Courses**
- BIO 101/L  Introductory Biology I/Lab ............................................ 4
- BIO 102/L  Introductory Biology II/Lab ........................................... 4
- BIO 105/L  Human Biology/Lab .................................................. 4
- OR BIO 107/L Human Anatomy and Physiology I/Lab ................. 4
- BIO 108/L  Human Anatomy and Physiology II/Lab ..................... 4
- BIO 117  Drugs and Disease ....................................................... 3
- BIO 145  The Process of Scientific Discovery .............................. 3
- BIO 210  Modern Topics in Biology ............................................. 3
- BIO 215/215L Environmental Science with or without lab ............ 3-4
- BIO 223  Evolution and Human Heredity .................................... 3
- CHE 101/101L General Chemistry I with Lab .............................. 4
- CHE 102/102L General Chemistry II with Lab .............................. 4
- CHE 131L Measurement Laboratory ............................................ 1
- CHE 142  Molecules with Lab ..................................................... 4
- CHE 145  The Process of Scientific Discovery .............................. 3
- PHY 101/101L General Physics I with Lab ................................. 4
- OR PHY 111/111L Introduction to Physics I with Lab ................... 4
- PHY 102/102L General Physics II with Lab ................................. 4
- OR PHY 112/112L Introduction to Physics II with Lab ................... 4
- PHY 142/142L Astronomy with or without lab ............................ 3-4
- PHY 145  The Process of Scientific Discovery .............................. 3
- PHY 151  Physics for Poets ......................................................... 3
- BIO, CHE, PHY 389-390 Special Topics ..................................... 3

NUTRITION MINOR (12 CREDIT HOURS)

This minor provides an opportunity for the student to develop proficiency in the highly popular field of nutrition. Intended for students of all majors, this minor can be used for personal or professional development. Health professions majors will find this minor particularly beneficial as the health care field continues its focus on an integrated approach to treating the whole person.

**Required courses:**
- DTC 306  Principles of Nutrition .......................... 3
- OR NTR 325  Nutrition and Health .......................... 3
- DTC 210  Food and Culture ................................................. 2
- DTC 327  Nutrition Throughout the Lifecycle ....................... 3
- DTC 328  Nutrition for Fitness and Athletic Performance .......... 2
- DTC 425  Diet Therapy ......................................................... 2

PHILOSOPHY MINOR (15 CREDIT HOURS)

The minor in philosophy requires a total of five courses for 15 credit hours. It is designed to provide an acquaintance with critical analysis and an appreciation for the philosophical foundation of other disciplines.

The courses selected for the minor are regularly available so that there is ample opportunity for students to complete the required number of hours. Advisors should be made aware of a student’s interest in declaring a minor.

**Required courses:**
- PHI 201  Ethics in Theory and Action .......................... 3
- PHI 204  Logic and Practical Reasoning .......................... 3
- Two 300-level courses
- One 400-level course

PRE-LAW MINOR (15 CREDIT HOURS)

This minor provides the pre-law student with a range of courses that introduce legal thinking, acquaints the student with areas where a law background is often used and prepares the student for successful entry into and completion of law school.

**Required courses:**
- ECO 201  Principles of Economics-Macro ................................ 3
- PSC 201  American Government & Economics ....................... 3
- PHI 204  Logic-LSAT Preparation Course (NC) ....................... 3

**One of the following groups:**
- MGT 305  Principles of Management .......................... 3
- OR ACC 211 Principles of Accounting .......................... 3
- LAW 303  Business Law I .................................................... 3
- OR LAW 304 Business Law II .............................................. 3
- OR HIS 330  History of Constitutional Law ......................... 3

Some of the above courses will be designated as writing intensive. The pre-law minor is expected to take four writing intensive courses, from the above or in the general curriculum. The minor also includes an LSAT (Legal Scholastic Aptitude Test) preparation course offered through continuing education. Students would have pre-law advisor with access to information on law schools and the LSAT examination.
PSYCHOLOGY MINOR (15 CREDIT HOURS)

The psychology minor is designed to enhance a student's academic experience and to provide background for those planning to pursue careers in any field that involves dealing with people. Students wishing to minor in psychology must complete 15 credits.

Required courses:
- PSY 101 General Psychology ................................................................. 3

Two of the following:
- PSY 203 Developmental Psychology ...................................................... 3
- PSY 204 Physiological Psychology .......................................................... 3
- PSY 205 Social Psychology ....................................................................... 3
- PSY 206 Abnormal Psychology .................................................................. 3
- PSY 207 Cognitive Psychology .................................................................. 3
- PSY 208 Personality .................................................................................. 3

Two additional three-credit courses at any level (see course listings in psychology)

PUBLIC HEALTH MINOR (18 CREDIT HOURS)

The minor consists of six courses (18 credits). The first five courses are foundational courses for public health majors. For the sixth course, students may select one elective from a list of courses approved for the public health major. Public health focuses on the health of populations rather than individuals and is an excellent complement to many clinical degrees.

Required courses:
- HSM 110 Introduction to Public Health ................................................ 3
- SOC 400 Epidemiology ............................................................................. 3
- PH 301 Health Behavior ........................................................................... 3
- PH 302 Global Health ............................................................................... 3
- HSM 312 Program Planning and Evaluation ........................................... 3

One elective from the following approved electives for the major:
- BIO 117 Drugs and Diseases ................................................................. 3
- BIO 208/L Microbiology .................................................................... 4
- BIO 322 Environmental Health .......................................................... 3
- PSY 353 Social Psychology of Aging .................................................... 3
- SOC 322 Health, Illness and Society ...................................................... 3
- SOC 323 Sociology of the City ............................................................... 3
- HIS 336 American Environmental History ......................................... 3
- HSM 210 Delivering Health Services .................................................. 3
- HSM 220 Community Health .............................................................. 3
- HSM 406 Health Information Technology ............................................ 3
- PSC 250 International Relations ........................................................... 3

RELIGIOUS STUDIES MINOR (15 CREDIT HOURS)

The religious studies minor requires a total of 5 courses for 15 credit hours. It is designed to provide foundational knowledge of religious beliefs from various religious perspectives and across academic disciplines.

Students are required to take RS 102 Belief and Unbelief and one course from the following list:
- RS 101 Introduction to the Bible
- RS 202 Life of Christ
- RS 309 Letters of Paul
- RS/PHI 410 Philosophy of Religion

Students may select the remaining three courses from the following:
- RS 209 Major Western Faiths
- RS 211 Catholicism Today
- PHI/RS 411 Mysticism
- RS/HIS 351 Religion in American History
- RS 315 Spirituality in Human Experience
- RS 201 Religion and Social Responsibility
- RS 214 Challenges of Death
- RS 316 Catholic Social Teaching
- PHI/RS 312 Bioethics
- RS/PSY 369 Psychology of Religion

SOCIOLOGY MINOR (15 CREDIT HOURS)

The minor in sociology is designed for students who are interested in gaining a greater understanding of social and cultural organization and patterns of human interaction. It is open to students in any field other than sociology.

Required courses:
- SOC 101 Principles of Sociology ......................................................... 3
  OR
- SOC 102 Social Problems ................................................................... 3

Additional courses:
Four additional sociology courses at any level, only two of which can be cross-listed with the student’s major.
SPANISH MINOR (12 CREDIT HOURS)
The minor in Spanish is designed to give students the opportunity to acquire an intermediate or higher level of proficiency. Students who begin Spanish at D’Youville will be required to take the first two years of Spanish. Students exempt from elementary courses (Spanish 101, 102) will be required to take more advanced courses at the 200-level.

Required courses:
- SPA 101-102 Spanish Level I and II
- SPA 201-202 Spanish Level III and IV

A. Students exempt from SPA 101 will take the following courses:
- SPA 102 Spanish Level II
- SPA 201-202 Spanish Level III and IV
- SPA 211 Conversation & Composition

B. Students exempt from SPA 101-102 will take the following courses:
- SPA 201-202 Spanish Level III and IV
- SPA 211 Conversation & Composition
  AND
  any 200 or higher-level course taught in Spanish

SPANISH FOR HEALTH PROFESSIONS MINOR (12 CREDIT HOURS)
Several major fields of study are enhanced by a minor in second language professional studies. Nursing, social work and business fields have a need for professionals who are able to communicate in Spanish. A minor in Spanish for the Health Professions makes a graduate more employable in many areas of the country where Spanish is spoken by a significant number of persons. This minor will provide not only linguistic competence, but an understanding of sociocultural aspects of these ethnic groups, which is essential to a professional’s ability to work with Spanish-speaking persons.

A. Students not exempt from SPA 101-102 will take the following courses:
- SPA 101-102 Spanish Level I and II
- SPA 225-226 Spanish for Health Professions

B. Students exempt from SPA 101 will take the following courses:
- SPA 102 Spanish Level II
- SPA 225-226 Spanish for Health Professions
- SPA 211 Conversation & Composition

C. Students exempt from SPA 101-102 will take the following courses:
- SPA 225-226 Spanish for Health Professions
- SPA 211 Conversation & Composition
  AND
  any 200 or higher-level course taught in Spanish.
NURSING
DEGREES: B.S.N, R.N. TO B.S.N.

Programs offered in the School of Nursing for undergraduate students include:
• A four-year bachelor of science in nursing program
• A bachelor of science in nursing program for registered nurses with an associate degree or diploma and a current, unrestricted license.

All programs are registered by the New York State Education Department and accredited by the Commission on Collegiate Nursing Education (CCNE). Clinical affiliations are conducted with a majority of the health care institutions in Western New York. Additional information on graduate level programs is available in the D’Youville College Graduate and Professional Degree Programs Academic Catalog.

BACHELOR OF SCIENCE IN NURSING—B.S.N.
This four-year bachelor of science in nursing program prepares graduates for the NCLEX Professional Nursing Licensing Examination. A minimum of 121 credits in nursing is required for the B.S.N. degree. The community-based curriculum focuses on the knowledge and skills needed for the 21st century. The clinical experience emphasizes evidence based practice and interprofessional collaboration. Clinical nursing courses begin in the second year while students are completing the prerequisite science courses and core liberal arts courses. The strong clinical preparation is acquired through a variety of clinical experiences.

PROGRAM FOR LICENSED R.N.s TO B.S.N
This curriculum is offered for licensed RNs desiring to earn a bachelor of science degree in nursing. Credit will be transferred from the students’ associate’s degree following an evaluation of transfer credits. Transcripts are evaluated individually for total number of exempted/transferred credits or coursework. RNs with an AAS degree are able to complete the program in two years of full-time study in a convenient fully online program. 130 credits (including transfer credits) are required for BSN completion with a minimum of 30 credits from D’Youville College. A 50 percent tuition savings is available for RN students after financial assistance (if appropriate) is applied. The office of admissions and financial aid must have all requested financial data to process the special tuition rate.

ADMISSION REQUIREMENTS

BASIC STUDENTS IN B.S.N. PROGRAM*

Freshmen:

B.S.N. Program:
• Combined SAT of at least 900 (Math and Verbal) or 19 ACT score
• 80 percent high school average
• Upper half of class

Transfer:
• 2.5 G.P.A.

* Entry course requirements for admission are as follows:
Successful completion of three years of high school science, including one year of high school biology and one year of high school chemistry or equivalent, and two years of high school math, other than business math.

Pre-licensure students who have not taken a high school chemistry course will be accepted on the condition that they complete a required course in chemistry.

Transfer students from outside or within the college must meet these same requirements, or their equivalent, and have a cumulative G.P.A. of 2.5.

Transfer students who have been dismissed from other nursing programs are not eligible for admission.

Applicants holding other baccalaureate degrees at the time of admission are not required to meet the college core requirements. In order to register for nursing coursework, students must be formally accepted into the program.
ASSOCIATE’S DEGREE R.N. STUDENTS OR DIPLOMA PREPARED PROFESSIONAL R.N.s – B.S.N. PROGRAM:

• 2.5 G.P.A.
• Current unrestricted R.N. license in New York State or in Ontario if Canadian.
• Students are required to meet transfer requirements for the School of Nursing undergraduate program including all academic regulations and student conduct requirements.

ACADEMIC REGULATIONS*

*Students admitted to the nursing program should refer to the current School of Nursing Undergraduate Student Handbook Academic Policies section for policies in effect at the time of admission to the nursing program

A. Grade and G.P.A. Requirements:
1. To be in good standing in the BSN program, students must:
   i. Maintain a cumulative G.P.A. of 2.5.
   ii. Maintain a minimum grade of C in all 100-400 level courses required in the major and for all other courses required for the major as outlined in progression requirements.
2. A student who takes an incomplete grade in a prerequisite to a required nursing course will not be permitted to begin that nursing course until the pre-requisite course is completed with an acceptable grade. An incomplete grade in a pre-requisite course must be satisfied one week prior to the start of the course for which that course is a pre-requisite.
3. For any NUR course with a lab/clinical component, both the theory component and the lab/clinical component must be satisfactorily completed. A student who does not satisfactorily complete the clinical component of the NUR course will receive a grade of F.
4. A minimum average grade of 73% for course examinations is required prior to consideration of any other graded components of NUR courses. If a student’s exam average is less than 73% the letter grade for the course will be based on that exam average only. A student who does not satisfactorily complete the clinical component of the NUR course will receive a grade of F.

B. Progression Requirements:
1. A minimum grade of C is required for any course in the major. This includes BIO 107/L, BIO 108/L, CHE 114/L, BIO 208/L, PSY 203, PSY 206, MAT 123, MGT 305, MGT 435 or HRM 309 and all required NUR courses.
2. Students who fail to obtain a grade of C in a course required for the major will not be permitted to enroll in any course for which that course is a pre-requisite, until the C grade requirement for the pre-requisite course has been met.
3. Students are permitted to repeat a course required for the major only once. The procedures for repeating a course are explained in the college catalog.
4. Students accepted into the RN/BS program must be licensed at the time of admission to the program. Loss of licensure will result in dismissal from program.

C. Probationary Standing:
Students who do not achieve a cumulative G.P.A. of 2.5, and/or earn a required course grade below C, are placed on probation, and are limited to 13 credits in the next semester in which they are registered.

D. Dismissal:
1. A student may remain on probation for no more than two successive semesters. Failure to meet standards after two successive semesters on probation will result in dismissal from the program.
2. Students who have achieved less than a C in two courses required for the major will be dismissed from the program regardless of GPA. Two lab grades of less than a C will be considered one course failure.
3. Students who fail to achieve a grade of C on a second attempt when repeating a course required for the major will be dismissed from the program.
4. Any student who is required in more than one instance to withdraw from a clinical course due to inability to demonstrate a required clinical competency will be dismissed.
5. Students demonstrating inability to deliver safe patient care or unprofessional conduct at any time are subject to course failure and dismissal from the program.

E. Readmission:
The School of Nursing undergraduate student handbook outlines the policies and procedures related to readmission. The criteria necessary for readmission will be defined in the letter of dismissal.

F. Clinical Course Requirements
(Health/Immunization, CPR, Health Insurance, and Professional Liability):
1. All students enrolled in clinical nursing courses must have professional liability insurance. Students are automatically billed for this insurance when they register for a clinical course.
2. It is strongly recommended that all students carry health insurance coverage for the duration of the program. Students are responsible for any health care costs, even those that arise from clinical or laboratory assignments. The college assumes no responsibility for a student’s medical care. Information regarding a basic injury and illness insurance plan is available through the college health center. By federal law, all International Students must carry health insurance coverage. International students will be billed directly by the college. Limited services are available through the student health service.
3. A complete pre-entrance physical examination, which includes the New York state immunization requirement, is required by the college for all students. Information about these requirements can be found here: www.health.ny.gov/prevention/immunization/recommended_vaccinations.htm under “Vaccines for School Entrance”.
   All the necessary forms (student health form, meningitis vaccination form, clinical rotation physical form, health records release form, etc.) and information can be found online at: http://www.dyc.edu/campus_life/services/health_center.aspx Additional questions regarding the college health record requirements may be addressed by calling the health center at 716.829.8777

In addition, sophomore, junior, and senior nursing courses require students to participate in a variety of clinical experiences, necessitating additional student health requirements to protect the health of the students as well.
as the patients with whom they interact. These health requirements also fulfill contractual agreements between the College and various clinical agencies to meet state, federal, and agency-specific requirements.

Prior to the first off-campus clinical nursing course, students will be provided with specific instructions and a school-specific code in order to establish a medical document management account at www.certifiedprofile.com. Student payment of a one-time fee directly to CertifiedProfile will be required in order to establish the account. It is the student’s responsibility to establish the CertifiedProfile account and to upload all required health documentation for approval and storage by the specified deadline. Health requirements requiring documentation upload include but are not limited to the following:

- Annual physical assessment by physician or nurse practitioner
- 2 MMR vaccinations, or titer demonstrating immunity
- 2 varicella vaccinations OR documentation by healthcare provider of chickenpox infection with month and year OR titer demonstrating immunity
- Tetanus vaccination (Td booster) updated every 10 years
- Proof of one dose of Tdap (with pertussis)—if unable to provide, must receive one dose of Tdap to replace one Td booster dose—should wait at least 2 years since last Td
- Completed meningitis vaccination response form (date of vaccination or signature indicating vaccination declined)
- Hepatitis B series or titer demonstrating immunity
- Tuberculin screening—2 step screening initially, single step repeated annually
- Annual influenza vaccine or signed form indicating vaccine declined.

Students must meet all health requirements as identified above for all clinical nursing courses (200 level and above). Failure to meet health requirements will result in inability to attend clinical experience and may necessitate course withdrawal.

If a student experiences a change in physical or psychological health status while enrolled in a Nursing course with an off-campus clinical component, it is the responsibility of the student to provide documentation indicating clearance for participation in patient care activities in the clinical setting without restrictions or limitations. Such documentation must be submitted to the School of Nursing in order to continue or resume attendance in off-campus clinical experiences. Note that the required documentation is not intended to disclose the nature of the health issue, but should simply state that the student is or has been managed by the healthcare provider, and that the student has full clearance for clinical participation. Documentation must include healthcare facility letterhead and must be signed by a healthcare provider. Documentation that simply indicates that the student “may return to school” is not adequate.

4. Current certification in adult and child Cardiopulmonary Resuscitation (CPR) for the professional healthcare provider is a requirement of all clinical courses starting with NUR 200 level courses. Completion of exclusively on-line CPR courses in not acceptable. Acceptable courses must include a hands-on practice and testing component.

5. Students must meet HIPAA requirements as indicated in specific course syllabi.

6. Students may be required to provide personally identifiable information to meet the requirement of clinical agencies. Failure to supply such information will result in student's ineligibility to complete the nursing program.

7. Students are responsible for transportation to and from clinical sites.

8. Students may not register for on-campus courses on their scheduled clinical day. Clinical days and times will vary based on clinical site availability. Students may be required to attend clinical experiences at days/times for which they are not registered based on clinical site availability.

9. Any student enrolled in a clinical course who is absent from a clinical experience will be required to complete a make-up for the missed experience. The maximum amount of clinical absence time which may be made up is specified in the course syllabus for each clinical nursing course. Absences beyond the specified maximum will necessitate course withdrawal. Students should refer to the School of Nursing undergraduate student handbook for the complete clinical attendance policy.

10. Clinical attire must be consistent with uniform guidelines as outlined in School of Nursing Undergraduate Student Handbook and in specific course syllabi.

11. Any student re-entering the clinical nursing course sequence (NUR courses with lab component) after having not been enrolled in a NUR course with a Lab (L) component for a period of time longer than one semester will be required to demonstrate competency in previously learned clinical nursing skills in the on-campus skills lab prior to participating in clinical experiences in patient care settings.

**STUDENT CONDUCT**

Students enrolled in the nursing program are expected to exhibit professional behavior, demonstrating responsible and mature conduct in both the academic and clinical environments. Unprofessional conduct will not be tolerated. Regardless of previous grades earned, unprofessional conduct may result in failure in and/or dismissal from the course and/or program. Disciplinary action will be at the discretion of the course and/or the School of Nursing faculty. Policies specific to the School of Nursing regarding grading, progression, retention, dismissal and unprofessional conduct are available to students in the School of Nursing undergraduate student handbook.

**NCLEX EXAM PREPARATION**

Pre-licensure students must complete all steps in conjunction with each of the required nursing courses in preparation for the NCLEX-RN exam. This includes, but is not limited to, all testing, remediation, workshops and self-study sessions. A testing fee will be charged to each student per semester.

**Total** ........................................................................................................ 84

---

* Credits are already counted as college core requirements.

** Course was counted as three-credit math requirement, but is a four-credit course.

+ Courses marked with a “+” will likely be transferred in. R.N. students may transfer in up to 67 credits with grades of C or better.
The educational experience is a five-year entry-level master’s program with direct admission at the freshman level. Both the bachelor of science and master of science degrees are conferred at the end of the fifth year. In addition, each student is required to fulfill the requirements for a structured minor offered in the college.

Throughout the curriculum, studies of the arts, humanities and sciences are combined with professional studies of occupational therapy. This combination is essential to promote the knowledge, skills and attitudes necessary for occupational therapy practice.

Courses numbered at the 400-level and higher represent a combination of professional (undergraduate) and advanced (graduate) course material. Emphasis is placed on critical thinking and theoretical analysis of various assessments and intervention techniques throughout these courses.

Level I fieldwork experiences are included in the intervention courses, although prior clinical and community visits will be made in several other courses.

The Level II fieldwork experience includes two three-month placements in clinics/sites. Students are assigned to sites located throughout the United States and are responsible for all travel and living arrangements while on clinical placements. Placements are based on availability, student preference, interests and formal agreement with the site. International placements, although few, may be pursued.

The occupational therapy program has been fully approved and registered by the New York State Education Department. In addition, the program has been accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), located at 4720 Montgomery Lane, Suite 200, Bethesda, MD 20814-3449. ACOTE’s telephone number c/o AOTA is (301) 652-AOTA and its web address is www.acoteonline.org.

Once all requirements are completed, graduates are eligible to sit for the National Certification Examination for Occupational Therapists, administered by the National Board for the Certification of Occupational Therapists (NBCOT). A felony conviction may affect a student’s ability to sit for the NBCOT certification exam. After successful completion of this exam, the individual is an occupational therapist, registered (OTR). Most states, including New York, require licensure in order to practice. State licenses are usually based on the results of the NBCOT certification exam, as well as the completion of at least six months of supervised fieldwork and graduation from an accredited occupational therapy program, but must be applied for separately in each individual state.

ADMISSION REQUIREMENTS

The program accepts applicants for full-time study from the freshman year. Students are admitted directly into the program and do not have to reapply for admission to the upper division. Admission requirements reflect the structure of the program as a five-year bachelor of science and master of science degree program.

In order to be eligible for direct acceptance into this program, students must submit proof of the following minimum criteria:

1. Combined SAT scores of at least 1,000 (or ACT score of 21).
2. A high school average of at least 85 percent.
3. High school rank in the upper half of the class.

Students who do not meet these criteria are encouraged to apply to the Career Discovery Program and apply to O.T. after successfully completing two full-time semesters.

Although D’Youville does not mandate that letters of recommendation or a letter of intent to study a specific discipline be included with the application, students applying to O.T. are strongly advised to include these documents with their application.

Students must also demonstrate successful completion of the following high school courses: two years of math, one year of biology, and one year of chemistry. Physics is strongly recommended. Students who have not taken high school chemistry will be considered for admission with the understanding that a college preparatory chemistry course must be taken before beginning the curriculum. Students are strongly encouraged to gain competence in word processing before entering the program.

Thirty-six students are admitted to the program in the freshman year. These students are selected from the pool of applicants on the basis of the above criteria. Late applications are processed on a space-available basis. Students who have been out of high school for more than five years need not submit SAT scores. Selection is based on high school average and class rank.

Transfer students are accepted on a competitive, space-available basis. A minimum G.P.A. of 2.5 (on a 4.0 scale) is required to apply. Point of entry depends on the number of transfer credits accepted by the registrar, including major course requirements.

In order to register for any O.T. courses, students must have been formally accepted into the program.
ACADEMIC REGULATIONS

Academic regulations for occupational therapy are in addition to general college policies for all part-time and full-time students. Full-time and part-time students must meet all the academic regulations listed below:

A. Occupational Therapy Department Good Academic Standing:

1. To be in good standing while enrolled in undergraduate courses, 100- to 400- level a student must:
   a. Maintain semester and cumulative averages of at least 2.5.
   b. Obtain a minimum grade of “C” in all 100- to 300- level OT courses required in the major and for all other undergraduate course requirements for the major.
   c. Obtain a minimum grade of “B” in all credit-bearing 400-level OT courses. Students receiving a “B-,” “C+” or a “C” in these courses will be placed on academic probation.
   d. Have no more than a total of six credits or two courses (whichever option better advances academic progress) with grades lower than B (B-, C+, C) in courses applicable to the occupational therapy degree. This policy applies to all 500- and 600- level courses. A grade of C- or lower is not applicable to the occupational therapy degree.

2. To be in good standing while enrolled in graduate courses, 500- & 600- level, a student must:
   a. Maintain semester and cumulative averages of at least 3.0.
   b. Obtain a minimum grade of “B” in all graduate-level work.
   c. Have no more than a total of six credits or two courses (whichever option better advances academic progress) with grades lower than B (B-, C+, C) in courses applicable to the occupational therapy degree. An Unsatisfactory grade in any of these courses constitutes a failure to meet academic regulations and will require the student to repeat the course.

At various points in the curriculum, students may be enrolled in undergraduate and graduate courses concurrently. The grade report distinguishes between undergraduate and graduate semester and cumulative averages.

B. Occupational Therapy Department Academic Probation

Students, whether full-time or part-time, who are not in good standing in the department are placed on academic probation, where they will remain until they meet the conditions of good academic standing for two full-time semesters. The conditions for good academic standing must be met in each successive semester but probationary status is not removed until conditions are fulfilled during two full-time semesters (see grade and GPA requirements).

C. Conditions of Occupational Therapy Department Academic Probation

1. While on probation, failure to meet the following conditions will result in dismissal from the program. A student placed on probation must:
   a. For all 100- to 300-level courses over the next two full-time semesters:
      i.) Receive no less than a “C” in all courses;
      ii.) Achieve semester averages of at least 2.5;
      iii.) Achieve a cumulative averages of at least 2.5 by completion of the second full-time semester of occupational therapy department academic probation.

   b. For all 400- to 600-level courses over the next two full-time semesters:
      i.) Receive no less than a “B” in all courses;
      ii.) Achieve semester averages of at least 3.0;
      iii.) Achieve a cumulative average of at least 3.0 by completion of the second full-time semester of occupational therapy department academic probation.

   c. For the S/U graded OT courses listed in A.3. of the occupational therapy department academic regulations section, over the next two full-time semesters, receive grades of S.

D. Dismissal from the Occupational Therapy Department

1. A student that is occupational therapy department probation and does not meet the conditions of occupational therapy department academic probation will be dismissed from the occupational therapy department, but not necessarily dismissed from the college. The dismissed student encouraged to contact the director of retention services at 716.829.7625.

2. A student who is dismissed from the occupational therapy department program has the option to appeal this dismissal. In order to appeal, the student must write a letter to the chair of the occupational therapy department. The time frame for submitting the letter will be indicated in the student’s written notification of dismissal from the occupational therapy department. The letter to the chair must include: a.) a description of verifiable extenuating circumstances that prevents/hindered achievement of the conditions of the occupational therapy department academic probation, b.) a plan to maximize future academic success.

E. Requirements for Level II Fieldwork

1. Students must have the permission of the instructor before registering for Level II fieldwork courses (OT 640, OT 641). In order to obtain this permission, students must demonstrate the ability to meet academic and professional standards of the program and participate in faculty-led professional development interviews in the third and fourth years of study.

2. Receipt of a U grade in either OT 321 (Fieldwork Seminar I) or OT 432 (Fieldwork Seminar II) may alter the student’s choices or plans for Level II Fieldwork.

3. Students who receive a U in a Level II fieldwork course, or who voluntarily withdraw from the course, must receive approval from the faculty in the occupational therapy major before repeating the course. Students will not be allowed to repeat more than one Level II fieldwork course.
Occupational therapy students may be required to sign up for occupational therapy courses at the departmental level in prearranged blocks.

Occupational therapy courses are described following the curriculum sequence. It should be noted that a student's curriculum sequence may vary based on point of entry, transfer credits, and individual circumstances. Each student will meet with a faculty advisor who will work with the student to develop his/her curriculum plan. The following sequence is based on typical entry into the first year of the program. Refer to the graduate section of this catalog for descriptions of GRA prefix courses.

Occupational therapy students are expected to participate in distance learning coursework throughout the occupational therapy curriculum.

**Policy for completion of occupational therapy program in a timely manner**

Full- and part-time students in the occupational therapy (O.T.) programs must complete all academic requirements within three semesters or one 12-month calendar year following successful completion of both OT 640 and OT 641, Clinical Fieldwork I and II. This includes the semester following Level II clinical fieldwork, when students return to campus to complete Professional Issues, Community Practice and either thesis or research project courses and two additional semesters. In addition to other academic requirements, clinical Level II fieldwork must be successfully completed within 12 months of completing all other coursework or repetition of academic courses may be required.

A student who does not complete clinical fieldwork level II within the required 12-month period may need to repeat one or more of the following courses:

- OT 429 Child and Adolescent Intervention
- OT 434 Adult and Geriatric Intervention
- OT 427 OT Methods of Evaluation and Documentation I
- OT 433 OT Methods of Evaluation and Documentation II

Students who do not complete their program within the time frame specified in this policy must petition for an extension of the time limit by submitting a completed request for extension of time to complete the master of science program form, available in the graduate studies office. The form will be completed by the student and forwarded to the chair of occupational therapy, who will sign and forward this to the graduate studies office on the student’s behalf. [Refer to “Extension to Complete Graduate Degree” in the academic policies and procedures section of the catalog for the remaining steps in the procedure.]

PHILOSOPHY
DEGREE: B.A.

The philosophy program leads to the bachelor of arts degree in philosophy. Of the 33 credit hours in philosophy required for the major, six serve as the basic core: PHI 201, 204, 280, 305, 310, 450, and 600. Twelve additional credit hours in philosophy must be taken, along with four support courses in a related field (e.g., business, accounting, management, computer science or any other area which supports a student’s goals). A student may develop the philosophy major by completing 12 hours beyond the basic philosophy core. The 12 hours must include two courses at the 300 level and two courses at the 400 level. A minimum three credit hour internship is also required.

ADMISSION REQUIREMENTS

Freshman Admission

Applicants must meet the following three criteria:
1. Combined SAT scores of at least 900 (or ACT equivalent score of 18)
2. A high school average of at least 80 percent
3. A high school rank in the upper one half of the class

Transfer Admission

Students must have a minimum G.P.A. of 2.33. Transfer credits will be determined on a case-by-case basis to assess adaptability to curriculum requirements.

Each student accepted into the program must submit a letter of intent prior to course registration.

PHILOSOPHY MINOR

Students may take a philosophy focus majoring while in another subject by completing 15 credit hours in philosophy. This set of philosophical courses requires registration in PHI 201 and 204, with the remaining nine credits coming from any two 300-level and one 400-level philosophy course.

Students within the program must maintain a minimum G.P.A. of 2.0 in philosophy courses taken at D’Youville. Courses are available during a two-year cycle unless noted otherwise.

PHYSICAL THERAPY
SEQUENTIAL DEGREE: SIX-YEAR B.S. + D.P.T.

The physical therapy department recognizes a choice of pathways for freshmen acceptance into the sequential degree entry-level physical therapy program.

- B.S. in biology offered through the math and natural sciences department + D.P.T. program
- B.S. in exercise and sports studies offered through the exercise and sports studies department + D.P.T.
- B.S. in health services offered through the health services administration department + D.P.T.

In this sequential-degree entry-level D.P.T. program, entering freshmen matriculate in and complete their B.S. degree through the respective department. The undergraduate degree can be accomplished in either three or four years dependent on eligible transfer credit and time commitment. Upon completion of the B.S. degree, students who satisfy all D.P.T. admission requirements (see below) are accepted into the three-year doctor of physical therapy (D.P.T.) program.

The student will graduate with an entry-level doctor of physical therapy (D.P.T.) degree. The three-year graduate program is fully accredited by the Commission on Accreditation of Physical Therapy Education (CAPTE) of the American Physical Therapy Association, [Commission Accreditation in Physical Therapy Education, 1111 North Fairfax Street, Alexandria, Virginia 22314; telephone: 703.716.3245; e-mail: accreditation@apta.org; website: www.capteonline.org] and is registered with the New York State Education Department (NYSED).

STUDENT RESPONSIBILITIES

The physical therapy program is a demanding program in coursework, time commitment and financial obligations. Students enrolled in the professional program must complete three full-time summer sessions in addition to the six full semesters of coursework in the three-year doctoral program. Clinical fieldwork, which is scheduled throughout the curriculum, may require an additional expense for travel and room and board. Physical therapy students also incur an additional expense for laboratory fees. Successful performance on a comprehensive exam is required for graduation from this program. A few students in the physical therapy program may seek employment as work-study students on campus. Due to the time commitment to the program, part-time off-campus work during the program is not recommended.

SEQUENTIAL B.S. + D.P.T. DEGREE ADMISSION REQUIREMENTS
(undergraduate acceptance into sequential degree pathway)

Freshmen or undergraduate transfer students accepted into any of the three sequential-degree B.S. + D.P.T. programs must satisfy the following admission criteria:

Freshmen admission requires:
1. Combined SAT scores of at least 1,100 (Math and Verbal) or composite ACT score of 24, and
2. High school average of at least 85 percent or 2.85 on a four-point scale, and
3. Successful completion of two years of math and three years of science; physics is strongly recommended

Transfer student admission requires:
1. Satisfaction of all freshman admission requirements above, and
2. Minimum cumulative G.P.A. of 2.75 (after a minimum of 2 full-time semesters of study), and

Note: For transfers, when calculating both overall G.P.A. and D.P.T. prerequisite GPA, grades from other colleges or universities will be included. Grades for any D.P.T. prerequisite course lower than a B will not be accepted from any other college or university, and the course will need to be repeated at D’Youville College.

D.P.T. ADMISSION REQUIREMENTS
(graduate acceptance into D.P.T. program)

1. Conferral of B.S. degree, and
2. Evidence of capability to succeed in D.P.T. program as demonstrated by a cumulative undergraduate G.P.A. of at least 3.00 (on a 4.00 system), and
3. Evidence of completion of all prerequisite courses completed with a grade of B or better with the exception that a maximum of two undergraduate course grades may be a C or better (C, C+, B-). The applicant must also have a pre-requisite G.P.A. of 3.20. Pre-requisite courses are equivalent to:
   • Two semesters of human anatomy & physiology with lab
   • Two semesters of chemistry with lab
   • Two semesters of physics with lab
   • Introduction to Psychology
   • Developmental Psychology
   • Introduction to Sociology or Anthropology
   • One semester of statistics
   • Medical Terminology, and
4. Evidence of the completion of 60 or more hours of volunteer, work or internship with a vulnerable population (e.g., children, individuals who are socioeconomically disadvantaged, clinical populations, individuals with disabilities), and
5. Two letters of recommendation addressing leadership potential and ability to work with others, and
6. Willingness to conform to published college and program policies and procedures.
TECHNICAL STANDARDS

Because of the number of essential psychomotor competencies and level of communication and clinical decision-making requirements of clinical fieldwork, the following technical standards are applied to all applicants:

- A student must be able to move over a community-level, three city-block area with or without accommodation of ambulation or mobility aid.
- From a seated position, the student must have the ability to lift a ten-pound block a vertical height of 16 inches and replace it with precision to its initial resting position without accommodation.
- Students must possess the ability to turn over five small disks equivalent to the size of five quarters with hand precision and efficiency without vision of the disks and without accommodation.
- Students must be able to orally communicate a grammatically correct and cogent interpretation of a common proverb within a time period of three minutes.
  - Interpretation should describe the general meaning of the proverb rather than the literal meaning.
  - Students should be able to fluently and sequentially describe and efficiently demonstrate the motor planning required to perform a familiar task such as tying one’s shoe or wrapping a package.

The physical therapy department seeks to provide equal access to its educational offerings and programsponsored events for individuals with disabilities. Reasonable prior notice is needed to arrange accommodations. Students and event participants are required to self-identify their needs to the director of disability services.

CLASSIFICATION OF STUDENTS

Undergraduate students receiving an early admission guarantee into the physical therapy major are classified by their undergraduate major of choice while completing the bachelor’s degree.

STUDENT CONDUCT

Students enrolled in the D’Youville College physical therapy program are expected to demonstrate high standards of personal behavior and professional conduct in the academic and clinical environments. Throughout progress through the curriculum, students are assessed on their student conduct related to a set of generic abilities adopted by the profession. Areas of generic professional behaviors include interpersonal communication, problem-solving skills and responsibility. Personal integrity is considered an essential of practice; as such, this program has a policy of zero tolerance for academic dishonesty. The program student progress committee will review any student with documented areas of conduct deficiency. Actions related to improper student conduct may include a committee request for a student-initiated contract of conduct remediation, program probation or dismissal from the program. Failure to meet student conduct standards during a probationary period or a serious breach of student conduct standards will result in dismissal from the program.

NOTE: Course descriptions of graduate course requirements are published in the graduate catalog.
COMBINED B.S./M.S. P.A. CURRICULUM

The physician assistant department offers a 4 ½ year combined B.S./M.S. degree. All students admitted to the department are expected to complete at least the last three years of the curriculum through full-time studies at D’Youville College. Students who successfully complete all curriculum requirements will be awarded a B.S./M.S. in physician assistant, and will be eligible to sit for the Physician Assistant National Certification Examination, developed and administered by the National Commission on Certification of Physician Assistants.

The physician assistant department has been approved and registered by the New York State Education Department, and is accredited by the Accreditation Review Commission on Education for the Physician Assistant, Inc. (ARC-PA).

Within the B.S./M.S. curriculum, the first two years (Phase I) are devoted to the study of the arts, humanities and sciences, which satisfy general education core requirements of the college’s baccalaureate degree and other prerequisite requirements specified by the departmental curriculum. The third year, begins the professional phase of study (Phase II), and prepares students with a broad, comprehensive base in clinical medicine, pharmacology, physical diagnosis, clinical laboratory medicine, behavioral and preventive medicine. The professional phase also allows students to develop interpersonal, communication and critical thinking skills, which are essential to facilitate effective and empathetic relationships with patients and effective collaboration with other health care professionals. The fourth year of the curriculum allows the student to apply and refine his/her critical thinking and clinical skills while working under the guidance and supervision of clinical preceptors. Over the course of 38 weeks, students rotate through nine mandatory medical and surgical disciplines. During the fifth year (Phase III), students enroll in graduate-level applied research courses, advanced clinical science courses and advanced clinical rotations. The students also complete a research project during this phase.

STUDENT RESPONSIBILITIES

The physician assistant department is a demanding program in coursework, time commitment and financial obligations. Students enrolled in the B.S./M.S. department must complete four summer sessions in addition to the nine regular full-time semesters, for a total of 175-credit hours. Clinical rotations will require additional expenses for travel and room and board. All students are responsible for their own transportation to and from clinical rotations, and extended daily travel distances may be required. It is required that each student have a valid driver’s license and his or her own vehicle. Due to the time commitment to the program, particularly in Phase II and III, off-campus work is not recommended.

Students are required to be a member of the D’Youville College Student Physician Assistant Association.

ADMISSIONS CRITERIA B.S./M.S.

For the 4 ½-year B.S./M.S. track, traditional freshmen will be admitted directly into the freshman year, and transfer students may be admitted directly into the program at any point in Phase I of the curriculum. Class placement for transfer students will be dependent on successful completion of prerequisites and competitive availability of class seats. Once accepted into the department, students are expected to complete all pre-professional requirements at D’Youville. The following pre-professional courses must be taken at D’Youville College: BIO 303 Biochemistry, BIO 339 Human Gross Anatomy, and BIO 307 Pathophysiology. If a transfer student has satisfactorily completed these specific courses with an earned grade of B- or better at another institution within 18 months prior to program entry, the course content will be reviewed by the math and natural sciences faculty to determine transferability. Qualified applicants are determined, via written application materials and personal interview, on the basis of several criteria: ability to master the rigorous academic content of the program, verbal and written communication skills, emotional maturity, and understanding of and motivation to enter the profession. *All students (general and transfer) must show evidence of a minimum of 80 hours of direct patient care to be considered for admission.

MINIMUM ADMISSION ACADEMIC REQUIREMENTS

Traditional freshman students applying for admission to the 4 ½-year B.S./M.S. department, must meet or exceed each of the following criteria:

- A combined SAT score of at least 1,100
- Rank in at least the upper fourth of his/her graduating class
- A class average of at least 85 percent
- Three years of math, one year of chemistry and one year of biology. A grade of at least 83 percent must have been achieved in each course.

Transfer students applying to the B.S./M.S. program must meet or exceed each of the following:

- An overall G.P.A. of at least 3.0 on a 4.0 scale; 3.0 science G.P.A. required;
- A grade of at least B- in all college science courses and other college courses required by the department;
- Students will be required to repeat science courses taken six or more years prior to acceptance into the department.

DIRECT PATIENT INTERACTION

To be considered for an interview, all applicants must accrue and provide official documentation of at least 80 hours of direct patient interaction either through volunteer or employment activities. Applications without this documentation will not be considered for an interview.

All students are accepted on a competitive space-available basis, based upon the above criteria. Maximum enrollment in years three, four and five of the program is 40 students.

Following review of the written application materials, a pool of applicants are selected for a formal interview. Not all applicants satisfying minimum admission requirements will be selected for an interview. Interviews are scheduled between October and January. All materials must be received by the office of admissions by November 1. Placements are made on a competitive, space-available basis. Incomplete applications will not be reviewed. Candidates must also submit an essay and three references, as specified in the PA department application.
ACADEMIC REGULATIONS

The 4 ½-year B.S./M.S. curriculum is composed of three phases, which extend across five years. Phase I, the pre-professional phase, includes the first two years of study, which comprises the prerequisites and core curriculum. Phase II is the third and fourth year, which is the professional phase, and includes the didactic preparation for practice and clinical rotations. Phase III is the graduate level curriculum. Each phase of the program is considered a prerequisite to the next phase and must be satisfactorily completed prior to advancement.

In addition to general college policies and regulations, which apply to all students, academic regulations of the physician assistant department are applicable to both full- and part-time students. They include the following:

PROGRAM CONTENTS AND REQUIREMENTS 4 ½-YEAR B.S./M.S.

1. The physician assistant curriculum is demanding in coursework, time, commitment and financial obligations. Students enrolled in the 4 ½-year B.S./M.S. department must complete four summer sessions in addition to the nine regular full-time semesters. Clinical rotations will require additional expenses for travel and room and board. Due to the time commitment to the program, particularly in Phase II and Phase III of the curriculum, off-campus work is not recommended.

2. As noted above, the physician assistant curriculum is composed of three distinct academic phases. Each phase of the program is considered a prerequisite to the next phase and must be satisfactorily completed prior to advancement.

3. Student Conduct: Students enrolled in the D'Youville College physician assistant department are expected to demonstrate high standards of personal behavior and professional conduct in all academic and clinical environments. Dishonesty or misconduct, whether academic or professional, in any form will not be tolerated. College policy regarding academic dishonesty will be followed with the recommendation that the offender be dismissed from the physician assistant department. Professional misconduct will be reviewed by the progress committee and may result in dismissal from the department. Unprofessional behavior in the clinical setting will result in failure of the practicum regardless of course mastery and may result in immediate dismissal from the department.

Other specific requirements include the following:

Phase I: Good Academic Standing

1. Once students are matriculated and enrolled in the first two years of the curriculum, they must maintain a semester, cumulative and science grade point average (G.P.A.) of at least 3.00. Achievement of the specific minimum G.P.A. is required for advancement from Phase I to Phase II of the program curriculum.

2. A minimum grade of a B- for all science courses (C for all other coursework) specified as a Phase I prerequisite in the curriculum plan is required. However, students must be aware of the 3.0 minimum semester, cumulative and science G.P.A. requirement. As stated, these minimum grades must be achieved in all Phase I prerequisites prior to advancement to Phase II of the program.

Phase I: Academic Probation

1. If the student fails to achieve a 3.00 overall and science G.P.A. (semester and cumulative), they will be placed on probation, will be required to retake courses in which they did not meet the minimum, and may also be decelerated. These are the minimum grade standards of all PA department curricular requirements.

2. If a student fails to achieve these standards in any department-required course, they will be placed on probation.

3. Students who do not meet academic requirements for two science course requirements in the same semester will be automatically decelerated into the next graduating class, and at the very least, placed on probation.

4. A student will be placed on academic probation when there is a failure to satisfy specific departmental academic standards or regulations. A student placed on academic probation will remain on probation for the two full-time semesters that immediately follow the date of the probation. All students on departmental academic probation must meet the academic standards for their degree.

5. Academic deficiencies that result in departmental academic probation must be corrected within the two semesters that immediately follow the date of probation.

6. Probationary students on a decelerated or part-time schedule must continue to meet all conditions of the probation while on a part-time schedule and will remain on probation until the completion of their next two full-time semesters.

Phase I: Dismissal

1. Failure to meet the conditions of probation will result in dismissal from the department.

2. Students may appeal the decision of dismissal from the physician assistant department to the chair. The appeal is initiated with a letter from the student to the department chair describing the circumstances that limited academic performance. The department chair presents the appeal to the physician assistant progress committee for consideration. If the appeal is accepted, the student will remain on probation for two full-time semesters and must satisfy the criteria of probation. For information on the appeal process, students should consult the college resource guide/planner or the Connections office.

3. Dishonesty or misconduct, whether academic or professional in any form, will not be tolerated. College policy regarding academic dishonesty will be followed with the recommendation that the offender be dismissed from the physician assistant department.

Phase II: Good Academic Standing

1. A minimum grade of B- (80 percent) is required for all courses included during the didactic year of curriculum (Phase II) with the exceptions of PA 311 Clinical Skills, and PA 305 Behavioral Medicine in which the minimum passing grade is 73 percent.

2. Students are required to obtain permission of the department faculty prior to registration in clinical rotations included in Phase II of the program.
3. All 400-level clinical rotations must be completed with a minimum grade of C (73 percent). All 500-level clinical rotations must be completed with a minimum grade of B (83 percent). Formal or informal remediation may be required prior to returning to the clinical experiences. All clinical rotations must be completed within 18 months of completion of didactic academic coursework, or repetition of academic courses may be required.

4. A student must possess current certification in Cardiopulmonary Resuscitation (CPR), child abuse recognition certification, HIPAA and New York state in-service training on blood-borne pathogens prior to matriculation into the clinical phase of the program. All students in the clinical and graduate phase will be provided professional liability insurance specified by the program. Students must also have evidence of vaccinations/immunizations and annual history and physical examinations in compliance with CDC recommendations for health care professionals.

Phase II: Academic Probation

1. Students who fail to obtain the required grades in any Phase II course during the didactic year will not be permitted to progress in the professional curriculum without review by the progress committee, which may entail probation, deceleration and possible remediation. Students may be permitted to decelerate and repeat 300-level courses on a case-by-case basis, depending on their past academic history. Any department-required course may be repeated only once. Students who must repeat a 300-level course will be required to repeat and demonstrate continued proficiency in any or all other 300-level courses prior to enrollment in 400-level courses.

2. Despite meeting minimum academic standards, permission to progress into the clinical year may be denied on the basis of demonstrated weakness or inability to meet the program academic and/or professional standards.

3. Students who do not meet these minimum criteria in any 400- or 500-level clinical rotation course, or who voluntarily withdraw from the clinical rotation, must receive formal approval by the faculty to repeat that course or to continue with subsequent rotations. A student will not be allowed to repeat more than one 400- or 500-level clinical course required in the major.

Phase II: Dismissal

1. Second failure of the same 300-level course will result in automatic dismissal from the physician assistant department. Any student who fails more than one 300-level course in the same semester will be automatically dismissed from the department.

2. Failure of a second 400- or 500-level course will result in dismissal from the department.

3. Students may appeal the decision of dismissal from the physician assistant department to the chair. The appeal is initiated with a letter from the student to the department chair describing the circumstances that limited academic performance. The department chair presents the appeal to the physician assistant progress committee for consideration. If the appeal is accepted, the student will remain on probation for two full-time semesters and must satisfy the criteria of probation. For information on the appeal process, students should consult the college resource guide/planner or the Connections office.

4. Dishonesty or misconduct, whether academic or professional in any form, will not be tolerated. College policy regarding academic dishonesty will be followed with the recommendation that the offender be dismissed from the physician assistant department.

Phase III: Good Academic Standing

1. During the graduate year of study in the 4 ½-year B.S./M.S. degree program, as a requirement of the primary care rotation, all senior level students must satisfactorily complete a community service project with a corresponding poster presentation as outlined in the clinical phase student manual.

2. A minimum passing grade for all graduate-level courses will be a B (83 percent). Achieving and maintaining a minimum G.P.A. of 3.0 is a requirement for completion of the graduate year.

3. All master’s degree candidates must satisfactorily complete a research project with a corresponding presentation. This project must have prior approval of the department and be overseen by a faculty advisor.

Phase III: Academic Probation

1. Failure of a student to obtain the minimum passing grade for any graduate course will be addressed by the graduate faculty on an individual basis. Permission to repeat a department-required course will be at the discretion of the graduate faculty, and will be based on previous academic standing. Failure of a student to meet minimum academic standards will place the student on academic probation, at the very least.

Part II: Dismissal:

1. Failure to meet the conditions of probation will result in dismissal from the department.

2. Students may appeal the decision of dismissal from the physician assistant department to the chair. The appeal is initiated with a letter from the student to the department chair describing the circumstances that limited academic performance. The department chair presents the appeal to the physician assistant progress committee for consideration. If the appeal is accepted, the student will remain on probation for two full-time semesters and must satisfy the criteria of probation. For information on the appeal process, students should consult the college resource guide/planner or the Connections office.

3. Dishonesty or misconduct, whether academic or professional in any form, will not be tolerated. College policy regarding academic dishonesty will be followed with the recommendation that the offender be dismissed from the physician assistant department.

Phase III: Dismissal

1. Failure to meet the academic standards during a probationary period will result in dismissal from the department.

2. Failure to meet the conditions of probation will result in dismissal from the department.

3. Professional misconduct will be reviewed by the progress committee and may result in dismissal from the department.
Unprofessional behavior in the clinical setting will result in failure of the practicum regardless of course mastery and may result in immediate dismissal from the department.

4. Students may appeal the decision of dismissal from the physician assistant department to the chair. The appeal is initiated with a letter from the student to the department chair describing the circumstances that limited academic performance. The department chair presents the appeal to the physician assistant program committee for consideration. If the appeal is accepted, the student will remain on probation for two full-time semesters and must satisfy the criteria of probation. For information on the appeal process, students should consult the college resource guide/planner or the Connections office.

4. Dishonesty or misconduct, whether academic or professional in any form, will not be tolerated. College policy regarding academic dishonesty will be followed with the recommendation that the offender be dismissed from the physician assistant department.

**Major** 86

**Major requirements in other academic areas** 50

**Remaining core requirements** 39

**TOTAL (B.S./M.S.)** 175

* These courses must be taken at D’Youville College. No transfer credit will be given for courses completed over 18 months prior to beginning the professional phase courses.
D'Youville College has offered a B.A. in psychology since the fall of 2000. This program provides students with a strong foundation of psychological knowledge that is valuable in any career requiring critical thinking and thoughtful understanding. In addition, the curriculum is designed to provide the student with ongoing guidance in the establishment and attainment of professional goals. The student will be well prepared to gain employment or admission to graduate programs in psychology or related fields.

During the first two years of the program, students complete general education core courses in the arts, humanities and sciences, and program core courses in the foundation areas of psychology. These core courses prepare the student for advanced study.

In the last two years of the program, students are required to complete seven upper-level psychology electives within content areas including developmental, physiological, social, abnormal, cognitive or personality psychology. Students are required to complete a minimum of two electives at the 400-level to provide familiarity with peer-reviewed sources, but may choose electives in any content areas that are in keeping with their academic or professional interests. Students are also required to complete two semesters of internship and its corequisite senior seminar during their senior year. Students may choose internships in human or social service, forensic/legal, research, medical, school or other placements that are consistent with their goals and interests and approved by the college. All students will spend a minimum of approximately 15 hours per week in internship-related activities. In the senior seminar, students discuss issues pertaining to their internship experiences and professional development (e.g., ethics, supervision, cultural diversity, applying to graduate school) that culminates in the development of a senior paper. The senior experience is designed to enhance the student’s studies in psychology, career development and preparation for graduate study or vocational placement.

ADMISSION REQUIREMENTS

Freshman Admission
Applicants must meet the following three criteria:

1. Combined SAT scores of at least 900 (or ACT equivalent score of 18)
2. A high school average of at least 80 percent
3. A high school rank in the upper half of the class

Transfer Admission
Students must have a minimum G.P.A. of 2.33. Transfer credits will be determined on a case-by-case basis to assess adaptability to curriculum requirements.

ACADEMIC STANDARDS

Academic regulations for psychology are in addition to general college policies for all part-time and full-time students. Part-time and full-time students must meet all the academic regulations listed below.

A. Grade and G.P.A. requirements

1. Freshman academic requirements:
   a. Students must maintain a semester and cumulative average of a minimum of 2.0.
   b. Students must maintain a minimum grade of C in courses required for the major.
   c. Students who fail to meet these requirements are placed on program probation where they will remain for two semesters (see B.1 and B.2 Probationary Standing).
   d. Students are permitted to repeat a course once. Permission to repeat a course must be obtained from the faculty in that course on a space-available basis.

2. Sophomore, junior and senior academic requirements:
   a. Students must maintain a semester and cumulative average of a minimum of 2.33.
   b. Students must maintain a minimum grade of C in all courses required for the major.
   c. Students who fail to meet these requirements are placed on program probation where they will remain for two full-time semesters (see B.1 and B.2, Probationary Standing).
   d. Students are permitted to repeat a course once. Permission to repeat a course must be obtained from the faculty in that course on a space-available basis.

3. Psychology elective academic requirements
   a. Students must achieve a C or better in seven psychology electives covering at least four areas and with at least two at the 400 level.
   b. Students earning less than a C in any psychology elective may:
      1. Choose to repeat the course when it is next offered
      2. Choose to take a different elective to apply towards the major (in which case, the student cannot apply the elective graded below a C towards the psychology major)

B. Probationary standing:

1. Students who are placed on program probation have the following limitations:
   a. Students who are placed on probation will be limited to no more than 13 credit hours per semester.
   b. Students will remain on probation for two full-time semesters, during which time they must fulfill the conditions of probation or be dismissed from the program.
   c. Students with probationary status must have the permission of the internship supervisor before registering for PSY 469/PSY 489 or PSY 470/PSY 490. In order to obtain this permission, students must demonstrate the ability to meet academic and professional standards of the program required for the internship experience.
2. Students on program probation are required to meet the following conditions in two full-time semesters or be dismissed from the program:
   a. Freshmen must maintain a semester and cumulative average of a minimum of 2.0
   b. Sophomores, juniors, and seniors must maintain a semester and cumulative average of a minimum of 2.33
   c. All students must meet with their academic advisor at least three times during the probationary semester; it is the responsibility of the student to coordinate these meetings
   d. All students must maintain a minimum grade of C in all courses required in the major.
3. Previously dismissed students who reapply and are re-accepted into the program will be on program probation for two full-time semesters.

PSYCHOLOGY MINOR
The psychology minor is designed to enhance a student’s academic experience and to provide background for those planning to pursue careers in any field that involves dealing with people. Students wishing to minor in psychology must complete 15 credits. Students are required to complete PSY 101, two of the following courses: PSY 203, 204, 205, 206, 207, 208; and two additional three-credit psychology electives at any level.

PUBLIC HEALTH

DEGREE: B.S.

PROGRAM CONTENTS AND REQUIREMENTS

The program introduces the student to a broad spectrum of public health courses in a number of disciplines that broadly reflect the field including epidemiology, natural sciences, math, philosophy/religion, sociology, research, and health services.

The mission of the program is to prepare students to enter a diverse public health workforce in a variety of job placements, as well as to provide a solid foundation for students who wish to pursue graduate studies in related fields.

ACADEMIC REQUIREMENTS FOR THE PUBLIC HEALTH PROGRAM

1. A combined SAT score of 1000 (or ACT 21), and
2. High school average of at least 85%, and
3. High school rank in the upper one half of the class
4. Transfer students must have a minimum cumulative GPA of 2.5

GOOD ACADEMIC STANDING

To be in good academic standing in the public health program students must:

1. Achieve a semester GPA of 2.50, and
2. Maintain a cumulative GPA of 2.50, and
3. Earn minimum grades of C in all courses required for the major

*Courses with a grade below a C must be repeated, but may be repeated only once.

ACADEMIC PROBATION

Students who are not in good academic standing will be placed on academic probation for their next (non-summer) semester. Students on academic probation will be limited to 13 credits hours during the semester they are on academic probation. Students will come off probation if they meet the requirements for good academic standing listed above.

DISMISSAL

Students will be dismissed from the public health program if they:

a. Fail to remain in good academic standing while on academic probation or after having been on academic probation during a previous (non-summer) semester, or
b. Fail to earn a minimum grade of C in a repeated course.

Core requirements and electives: 61-67

Minimum total credits required: 121
SOCIOMETRY

The mission of the sociology program is to consider the notion of power and the complex ways in which humans make meaning. Sociology students explore the relationships between individuals and social institutions, with a focus on societal diversity. At the core of the program is the emphasis on human rights, and the belief that all individuals deserve a life of dignity and equality. From the investigation of daily interactions to the study of broad-based global social movements, the program accentuates a concern for social justice along lines of social class, race, ethnicity, gender and so forth. The program stresses the importance of devising solutions to social problems. Students are exposed to the substantive areas within the discipline, and within courses they develop skills in critical thinking, data collection and interpretation, policy analysis and oral and written communication. They graduate from the program with a deeper sense of self and a richer and more meaningful sense of one’s place in society.

Students pursue careers and graduate school in areas in which they can be of service to others. Graduates pursue a wide range of careers, for example, in government, public policy, criminal justice, social activism, law, human services, health care administration, counseling and human resources. A degree in sociology also provides excellent preparation for graduate study in sociology and a variety of applied or related areas including law, public policy, urban and community planning, health care administration, social work, social research, health research, market research and education.

The sociology major is organized to provide a firm grounding in the discipline. The sociology courses at the 100-level introduce students to the basic concepts and analytical tools used in sociology. Courses at the 200-level provide exposure to theory, methods of research and concentration upon particular social processes. The upper-level courses present opportunities for in-depth investigation of particular social problems, institutions or sub-fields. The Special Topics 420 course is always changing in terms of focus to reflect current issues. Every student must complete an internship in either their junior or senior year. Students have worked on internships for instance in public health policy, human rights, education, government, public service and in medical institutions. Unique to the program, at the upper course level, the major offers an applied urban case study opportunity in which students undertake an in-depth investigation of particular social problems, institutions or sub-fields within the discipline, and within courses they devise solutions to social problems. Students are exposed to the belief that all individuals deserve a life of dignity and equality.

ACC 211  PRINCIPLES OF ACCOUNTING I (3)
This is a foundation course dealing with accounting principles and procedures with emphasis on the entire accounting cycle, special journals, control accounts and subsidiary ledgers.

ACC 212  PRINCIPLES OF ACCOUNTING II (3)
This course explores theory and applies accounting principles mastered in ACC 211 and accounting for general partnerships and corporations. It also deals with managerial accounting, including accounting cycles, cost analysis, and budgeting. Prerequisite: ACC 211.

ACC 311  INTERMEDIATE ACCOUNTING I (3)
This is a detailed study of financial statement items and special corporation problems. Problems emphasize analytical approaches to typical accounting situations and approved methods for full disclosure of financial information. Prerequisite: ACC 212.

ACC 312  INTERMEDIATE ACCOUNTING II (3)
This course explores applications of the current standards of theory and policy to areas of earnings per share, income taxes, liabilities, investments, statement analysis and comparisons. Prerequisite: ACC 212.

ACC 321  TAX ACCOUNTING (3)
This course studies the various individual income tax laws with special emphasis on current regulations. Students practice in the preparation of tax returns. Prerequisite: ACC 212.

ACC 322  COST ACCOUNTING (3)
This course explores major cost systems in depth, including job, process and operations costing systems, standard cost systems and flexible budgets, and the income effects of alternative product costing methods. Special topics also covered include cost allocation techniques; spoilage, waste and scrap treatment; and the role of cost accounting in professional CPA and CMA exams. Prerequisite: ACC 212; Offered in the fall semester.

ACC 389-90  SPECIAL TOPICS IN ACCOUNTING (3)
This is a seminar in a topic related to the field of accounting. A subtitle indicates the specific content of the course. Prerequisite: ACC 311 or permission of the instructor; Offered as needed.

ACC 401  AUDITING (3)
This introduction to the theory, practice and ethics of independent auditors includes discussion and application of the standards on auditing standards of the American Institute of Certified Public Accountants. Prerequisite: ACC 312; Offered in the spring semester.

ACC 402  MANAGERIAL ACCOUNTING (3)
The course is designed for non-accounting majors to acquaint the student with the kinds of accounting information managers need, the source and availability of this information, and the interpretation and utilization of this information in carrying out the managerial functions in an organization. Prerequisite: Senior-level or permission of the instructor; not open to accounting majors.

ACC 403  ACCOUNTING THEORY AND APPLICATION (3)
Students study via the case method of specialized areas of accounting. Accounting theory and tax questions are an integral part of this course. Although the course is not designed specifically as review for the CPA exam, instructors utilize selected problems and cases from previous exams for study, thereby benefiting students who wish to sit for the exam. Prerequisites: ACC 321, 322, LAW 303, 304; Offered as needed.

ACC 404  ADVANCED ACCOUNTING (3)
This course is an advanced approach to accounting principles in the areas of partnership, liquidations, government accounting, nonprofit accounting and consolidations. Prerequisite: ACC 312; Offered as needed.

ACC 407  FUND ACCOUNTING (3)
This is an elective course designed to introduce accounting students to governmental and not-for-profit accounting. It includes discussion and application of principles of local government accounting, typical entries in a fund accounting system and financial statements for a fund accounting system. It also deals with accounting principles for colleges, universities and hospitals. Prerequisite: ACC 312; Offered every other year.

ACC 410  TAXATION OF CORPORATIONS AND PARTNERSHIPS (3)
This course is an in-depth approach to a variety of tax issues associated with the corporation, regular and subchapter S, and the partnership. Prerequisite: ACC 321; Offered every other year.

ACC 417  PERSONAL COMPUTERS FOR ACCOUNTANTS (3)
This course introduces students to computerized business and accounting applications, word processing, databases, spreadsheets and presentation software. Students are given thorough, hands-on familiarization with the personal computer and various business and accounting applications on the computer.

ACC 420  CPA PROBLEMS (3)
This course conducts a theoretical and practical analysis of issues dealing with the Certified Public Accountants license exam, and the problems facing CPAs in the corporate, nonprofit and public sector environments.

ACC 421  CORPORATE FINANCE (3)
This course deals with corporate financial statements and financial analysis of business firms, tax considerations, inventory analysis, capital budgeting and investment, and financing decisions. Prerequisite: ACC 212, ECO 207 or permission of instructor.

ACC 444  ACCOUNTING INTERNSHIP (3)
This course provides accounting students with the opportunity to gain practical, hands-on experience in their areas of specialization by working for businesses, nonprofit organizations and government agencies. Open only to senior accounting majors with prior permission of instructor; Offered in the fall and spring semesters.

ANT 101  INTRODUCTION TO ANTHROPOLOGY (3)
An overview of the discipline of anthropology, a social science that focuses on human evolution and organization across time and on the study of non-Western societies and cultures. The course will explore anthropological theory and research, including the main sub-fields of the discipline, with a particular emphasis on cultural anthropology. Offered as needed.
ARA 101 INTRODUCTION TO ARABIC I (3)
Designed to develop students’ proficiency and communication in Modern Standard Arabic – which is the one language that is written, read and spoken in the Arab world – in the four basic skills: listening, speaking, reading and writing. At this beginning level, students will be exposed to authentic reading and listening material. Offered as needed.

ARA 102 INTRODUCTION TO ARABIC II (3)
Designed to develop students’ proficiency and communication in Modern Standard Arabic – which is the one language that is written, read and spoken in the Arab world – in the four basic skills: listening, speaking, reading and writing. Students will continue to be exposed to authentic reading and listening material. Prerequisite: ARA 101. Offered as needed.

BIO 101 INTRODUCTORY BIOLOGY I (4)
BIO 101L INTRODUCTORY BIOLOGY I LAB (0)
The lecture topics include origins of life, prebiotic chemistry, and surveys of the major plant, invertebrate and vertebrate phyla. The course also includes evolutionary principles governing taxonomic criteria and the physiology of movement of food and water in plants. A three-hour lab accompanies the above lecture. Intended for biology majors and minors.

BIO 102 INTRODUCTORY BIOLOGY II (4)
BIO 102L INTRODUCTORY BIOLOGY II LAB (0)
The lecture topics include a survey of the cell, its chemical constituents and its organelles, energy metabolism and photosynthesis. Introductory classic and molecular genetics is also covered. A three-hour lab accompanies the above lecture. Intended for biology majors and minors. Prerequisite: CPC 022.

BIO 105 HUMAN BIOLOGY (4)
BIO 105L HUMAN BIOLOGY LAB (0)
This course surveys the function of the human body systems in health and disease and includes topics of current interest, which may include diet and nutrition, treatments for infertility, infectious diseases and vaccines, and the affect of drugs on the nervous system. This course consists of three hours of lecture and three hours of laboratory per week. The lab exercises are designed to complement the lecture topics, and concurrent registration in both lecture and three-hour laboratory are required. This course is not eligible for elective credit in the major but is a required course in the psychology major. Offered fall and spring semester as needed.

BIO 107 HUMAN ANATOMY AND PHYSIOLOGY I (3)
This is a study of the structural and functional relationships of the human organism, emphasizing cells and tissues, the integument, skeletal system, muscular system, nervous system and sense organs. This course consists of three lectures a week. Prerequisite: CPC 022; Offered both semesters and summer.

BIO 107L LABORATORY (1)
This course accompanies BIO 107. This course consists of three hours of laboratory a week.

BIO 108 HUMAN ANATOMY AND PHYSIOLOGY II (3)
The continuation of BIO 107 emphasizes the digestive system, respiratory system, blood, cardiovascular system, urinary system, reproductive systems, endocrine system, human genetics and development. This course consists of three lectures a week. Prerequisite: CPC 022; Offered both semesters and summer.

BIO 108L LABORATORY (1)
This course accompanies BIO 108. This course consists of three hours of laboratory a week.

BIO 117 DRUGS AND DISEASE (3)
What exactly is a heart attack? Why does aspirin health prevent strokes? Why are anti-depressants associated with suicide? This basic course will answer these questions while providing an overview of common disease states and the drugs used to treat them. Disease states of the major organ systems will be covered as well as the most commonly prescribed drugs in America. Prerequisite: None; however, basic knowledge in biology is recommended; not eligible for elective credit in the biology major.

BIO 121 INTRODUCTION TO WINES (3)
This course is designed for anyone wishing to learn about wines. Topics include biology of grapes, yeasts and sensory perception. Chemistry of fermentation and metabolism of wine, surveys of different types of wines and the history of wine making with emphasis on regional and cultural influences is explored. The course will be team taught to exploit a diversity of faculty expertise, and guest speakers will be featured. The course consists of three lecture hours per week and one or more field trips to local wineries in Ontario and New York. Prerequisites: High school Chemistry, and students must be of legal drinking age in Canada; Not eligible for elective credit in the biology major; Offered in the fall semester.

BIO 123 ART OF ANATOMY (3)
CROSS LISTED AS FA 123
Figure drawing is taught with special attention to underlying anatomy. Nuances of surface anatomy, human proportion and anatomical terminology are considered in the artistic context. Historical paintings and sculpture are used for identifying the subtleties of the human figure. Foundational drawing techniques are demonstrated using anatomical models, prospected cadavers, live models and special dissections as subjects. This course could serve as a general science or humanities elective for the core.

BIO 145 / CHE 145 / PHY 145
THE PROCESS OF SCIENTIFIC DISCOVERY (3)
This is an introductory science course where students will be introduced to the major elements of science and technology including the basic insights of chemistry, physics, biology and geology in the context of the social and historical development of technology. Special attention will be paid to the impact of the sciences on cultural and human endeavors, and on the role of social change and serendipity in the process of scientific discovery. This course could count as a non-major science core course, an IDS science elective or as a free elective for science majors. There are no prerequisite course requirements. Course may be offered with an emphasis on the field of biology (BIO 145), chemistry (CHE 145) or physics (PHY 145). Prerequisites: Permission of academic advisor and the chair of the math and natural sciences department.

BIO 208 MICROBIOLOGY (4)
BIO 208L MICROBIOLOGY LAB (0)
This course is an introduction to the morphology, physiology, ecology and replication modes of bacterial and eukaryote microorganisms as well as viruses. Pathogens associated with human disease are used to illustrate these general concepts. Methods used by microbes to resist antimicrobial drugs, transfer antimicrobial resistance and methods used to control the growth of microorganisms are also discussed. Emphasis is given to mechanisms of pathogenesis used by bacteria and viruses. The means used by humans to prevent or rid the body of microbial agents are also discussed. In the laboratory, students gain skills in sterile technique, stain procedures and biochemical tests used to characterize bacteria. Methods used to control microbial growths are also studied. The course consists of three hours of...
BIO 210  MODERN TOPICS IN BIOLOGY (3)
This is an introduction to biological topics of general interest and practical value. Topics are drawn from areas such as basic biological principles, functioning of the human body, health problems and environmental issues. Students have a role in choosing topics and are actively involved in class presentations and discussions. This course consists of three lectures per week and is not eligible for elective credit in the biology major.

BIO 215  ENVIRONMENTAL SCIENCE (3)
This is an introduction to the principles of environmental science and considers how those principles can be applied to our understanding and solution of current environmental problems. The course consists of three lectures per week and is not eligible for elective credit in the biology major. Offered as needed.

BIO 215L  ENVIRONMENTAL SCIENCE LABORATORY (1)
This is field and laboratory work designed to provide direct experience while investigating the basis for environmental principles. Students are exposed to the monitoring of environmental problems. The course is three laboratory hours per week and is not eligible for elective credit in the biology major. Optional; Corequisite: BIO 215; Offered as needed.

BIO 216  MARINE BIOLOGY (3)
This is an introduction to the life of the seas. It begins with basic information about the chemical, physical and geological nature of the oceans. All major marine communities are surveyed, including coastal zones and estuaries, coral reefs, the open ocean and the exotic communities of the deep sea. Extra attention is given to special topics of particular importance or interest. The final section concerns human interactions with the marine world and threats that they pose to it. Prerequisites: BIO 101/102 or permission of instructor.

BIO 218  INVERTEBRATE ZOOLOGY (4)
BIO 218L  INVERTEBRATE ZOOLOGY LAB (0)
This is a survey of the major invertebrate groups with emphasis on their diverse patterns of form and function. Coverage of each group includes its distinguishing characteristics and patterns of adaptations for coping with the needs of life by following examples of selected species. Basic biological principles and special impacts on humans are discussed when appropriate. In the laboratory, live and preserved specimens from marine, freshwater and terrestrial habitats are used to explore aspects of anatomy, physiology and behavior. The course consists of three lectures and three hours of laboratory a week. Prerequisites: BIO 101/102 or permission of instructor; Offered as needed.

BIO 222  EVOLUTION AND HUMAN HEREDITY (3)
This is a study of the principles of evolution with an emphasis on biological patterns of adaptations. The history of natural selection is traced through the lives of Darwin and Wallace and the geological influence of Charles Lyell is emphasized. The impact of Darwin in Victorian society, as well as modern impacts in American society, are explored. The chromosomal basis of evolution is presented and the genetic syndromes of several diseases are presented. The overall emphasis is on preparing educated citizens to understand what biologists mean by evolution with a hope of enabling them to make better judgments on evolution themselves. The course consists of three lectures a week and is not eligible for elective credit in the biology major.

BIO 223  EVOLUTION AND HUMAN HEREDITY (3)
This is an introduction to evolution at the gene level is discussed. Historical perspectives and current evidences of evolution are given and explained and evolution at the gene level is discussed. The emphasis of the course is on understanding what biologists mean by evolution in the biological sciences. Evolution is the single most unifying theory in the biological sciences. This course traces the beginnings of Darwinian-Wallace evolution by natural selection and places this theory in historical perspective. Current evidences of evolution are given and explained and evolution at the gene level is discussed. The emphasis of the course is on understanding what biologists mean by evolution in the biological sciences.

BIO 229  ECOLOGY (4)
BIO 229L  ECOLOGY LAB (0)
This is a broad introduction to the basic concepts of ecology as they pertain to population, evolutionary processes, communities and ecosystems. Several current environmental problems are explored in the light of these concepts. Laboratory includes a mix of lab and field exercises designed to put lecture topics into practice. The course consists of three lectures and three laboratory hours a week. Prerequisite: BIO 101/102 or permission of instructor; Offered in the fall semester; This course is intended for biology majors.

BIO 230  FOUNDATIONS OF ENVIRONMENTAL SCIENCE (4)
BIO 230L  FOUNDATIONS OF ENVIRONMENTAL SCIENCE LAB (0)
This course examines the interactions between the physical, chemical, and biological components of the environment and human populations. Topics to be included but not limited to the course are: 1) the impact of human activities on air and water quality, 2) the use of natural resources including renewable and nonrenewable energy sources, minerals, and biological resources, 3) conservation and biodiversity, and 4) land use including wildlife, fisheries, and forest management, recreational uses and agriculture. This course requires a weekly 3 hour lecture and a 3 hour laboratory. The laboratory portion of the course will examine present practices and problems associated with environmental issues through field trips and laboratory / field experiments. Prerequisites: Completion of BIO 101 and (BIO102 or BIO 303/L) or permission of instructor. Offered each fall semester as needed.

BIO 231  ENVIRONMENTAL GEOLOGY (4)
BIO 231L  ENVIRONMENTAL GEOLOGY LAB (0)
This course and required laboratory is designed to be an introduction to Environmental Geology through a broad survey of topics which are interconnected by society and geologic processes. These topics include Earth systems, geosphere materials, plate tectonics, Earth quakes, volcanoes, rivers and flooding, land stability, coastal change, water, soil, mineral and energy resources, climate change and human environmental impact. Laboratory experiences will be related to the course objectives and will include off-site experiences. Prerequisite: BIO 101/L and (BIO 102/L or BIO 303/L). Offered each spring semester as needed.

BIO 242  EVOLUTION (3)
Evolution is the single most unifying theory in the biological sciences. This course traces the beginnings of Darwinian-Wallace evolution by natural selection and places this theory in historical perspective. Current evidences of evolution are given and explained and evolution at the gene level is discussed. The emphasis of the course is on understanding what biologists mean by evolution in the biological sciences. This course traces the beginnings of Darwinian-Wallace evolution by natural selection and places this theory in historical perspective. Current evidences of evolution are given and explained and evolution at the gene level is discussed. The emphasis of the course is on understanding what biologists mean by evolution in the biological sciences.

BIO 302  GENETICS (4)
BIO 302L  GENETICS LAB (0)
This is an examination of the principles of classic and molecular genetics. Topics discussed include Mendel's contribution, linkage, gene mapping, structure and function of DNA and RNA; bacterial and viral genetics, gene function, mutation, regulation of gene activity, recombinant DNA technology and quantitative and population genetics. Laboratory experiments with Drosophila, bacteria and
fungi demonstrate principles discussed in the lecture. The course consists of three lectures and three hours of laboratory a week. Prerequisite: BIO 101/102 and 2.2 G.P.A. or permission of instructor; Offered in the spring semester.

BIO 303/CHE 303  BIOCHEMISTRY (3)
This one-semester course emphasizes structure/function relationships among the components responsible for the biochemical functions of life. Topics include proteins, enzymes, carbohydrates, bioenergetics, metabolism (catabolism and anabolism), lipids, membranes, nucleic acids, biotechnology, biochemical methods, vitamins and nutrition. This course is cross-listed with CHE 303. Prerequisite: CHE 219 and BIO 101-102 or 107-108, or chemistry majors who have taken CHE 219 and CHE 220 or by permission of instructor; Offered both semesters and often in the first summer session.

BIO 303L/CHE 303L  BIOCHEMISTRY LABORATORY (1)
This laboratory supports BIO 303 lecture course. Students required to take BIO 303 are also required to take BIO 303L (except for physician assisting students). Offered both semesters; Corequisite: BIO 303

BIO 304  MICROSCOPIC ANATOMY (4)
BIO 304L  MICROSCOPIC ANATOMY LAB (0)
This course examines the organs systems of the body microscopically. The development, histology, histophysiology and histopathology of the tissues and organs of the body will be presented in lecture. The lab incorporates microscopic examination of the organ systems and training in processing of tissue for imaging and instruction in the use of imaging equipment. The course consists of two lectures and four hours of laboratory a week. Prerequisite: BIO 101/102, or BIO 107/108; Offered in the spring semester.

BIO 307  PATHOPHYSIOLOGY (3)
This is a study of disease processes as disturbances of the body’s homeostasis. The body’s defense mechanisms and their breakdown are emphasized. Various clinical assessment methods are discussed. The course consists of three lectures a week. Prerequisite: BIO 107/108 and CHE 111/112 or equivalent; The course is offered both semesters and is not eligible for elective credit in the biology major.

BIO 309  VIROLOGY (3)
This course is the study of structure and activity of animal, plant and bacterial viruses. This course is three lectures. Prerequisite: BIO 303

BIO 310  IMMUNOLOGY (3)
Individuals are continually exposed to foreign substances (antigens) and respond to them in ways that are both harmful and beneficial. Many areas of biology use the in vitro techniques of immunology. Thus, immunology integrates such diverse fields as genetics, biochemistry, physiology and medicine and is relevant for biology and health science students alike. The purpose of this course is therefore to introduce the student to the chemistry of antigens and antibodies, the biology of the immune response, including both harmful and beneficial aspects in the function of the cells, organs and molecules of the immune system. Immunologic techniques and their applications will also be examined. Prerequisites: BIO 101/102 or BIO 107/108 and CHE 101/102; Offered in the fall and spring semester.

BIO 312  MOLECULAR CELL BIOLOGY (4)
This is a detailed analysis of cellular organelles in relation to active transport, endocytosis, cell-to-cell communications, cell development and protein synthesis. Chromosome organization, gene structure, RNA synthesis and regulation of gene expression are also considered. Discussions will emphasize techniques and key experiments that have helped in the development and formulation of contemporary concepts. This course consists of three hours of lectures and one discussion hour a week. Prerequisite: BIO 102 or 108 and BIO 303; Offered in the spring semester.

BIO 314  BOTANY (4)
BIO 314L  BOTANY LAB (0)
This course is a survey of biology of plants with emphasis on taxonomy, morphology, physiology and the importance to man. This course is three lectures and three hours of lab. Prerequisite: BIO 101 and BIO 102 or permission of the instructor.

BIO 317  COMPARATIVE ANATOMY (4)
BIO 317L  COMPARATIVE ANATOMY LAB (0)
This is a study of vertebrates and their chordate origins, including an overview emphasizing their historical relationships. The major systems, such as integument, muscular, nervous, endocrine, circulatory, and skeletal, are presented with examples from the major vertebrate groups. The course consists of three lectures and three hours of laboratory a week. Prerequisite: BIO 101/102 or BIO 107/108

BIO 320  DEVELOPMENTAL BIOLOGY (4)
BIO 320L  DEVELOPMENTAL BIOLOGY LAB (4)
This is a study of the principles of development and their application to animal and plant embryos, regeneration, metamorphosis, cancer and related processes. The laboratory includes observation and experimentation with living animal and plant material, plant tissue culture, and examination of prepared slides. The course consists of three lectures and three hours of laboratory a week. Prerequisite: BIO 101/102 or permission of instructor; BIO 302 recommended; Offered in the spring semester.

BIO 330  ENVIRONMENTAL MICROBIOLOGY (4)
BIO 330L  ENVIRONMENTAL MICROBIOLOGY LAB (4)
This course and required laboratory will focus on microbes, their biochemistry and their interactions with higher animals in specific ecologies. Microbes play a primary, and often overlooked, role in every ecosystem on Earth. The unique biochemistries of these microbes are responsible for a wealth of activities critical to human and planetary health, including: oxygen generation, carbon and nitrogen bioavailability, bioremediation of pollutants, decomposition of organic matter, nutrient cycling and human sanitation. This course is not intended as the required course a health sciences major as it eschews medical microbes in favor of environmentally or commercially important microorganisms. This course requires a weekly 3 hour lecture and a 3 hour laboratory. Prerequisite: BIO 102/L or BIO 108/L and CHE 101/L, other chemistry courses may be substituted with the instructor’s permission. Offered each fall semester as needed.

BIO 331  CONSERVATION BIOLOGY (4)
BIO 331L  CONSERVATION BIOLOGY LAB (4)
Conservation biology combines ecology, physiology, molecular biology, genetics, and evolutionary biology in order to conserve biological diversity. It is the aim of conservation biology to understand the human threats to biodiversity and prevent any further loss. Topics covered will include, defining, measuring, and patterns of biodiversity, the negative effect of habitat loss, invasive species, pollution, over population, and over harvesting on biodiversity, strategies used to combat threats and sustain biodiversity and consideration of economic and ethical tradeoffs in the conservation of threatened species. Special attention will be paid to current issues related to biodiversity. This course requires a weekly 3 hour lecture and a 3 hour laboratory,
BIO 332 ENVIRONMENTAL HEALTH
This course examines the impact of the environment on human health. This includes: 1) the effect of environmental components such as pollutants, pathogens and toxins, 2) energy resource uses and its effect on human health, 3) food safety, 4) environmental hazards found in the workplace, and 5) environmental degradation as it relates to human health and wellbeing. This course will also examine the methods of environmental assessment and the role of public policy related to environmental health. Prerequisites: CHEM 101/L, CHEM 102/L (or CHEM 111, 112, 113), BIO 107/L, BIO 108/L

BIO 335 PHARMACOLOGY I (3)
This course explores the basis of pharmacology, including pharmacokinetics, pharmacodynamics, with special emphasis on drug mechanism of action. The course also includes a survey of the most commonly used medications in the United States and the associated pathophysiology of the disease states they are used to treat. Prerequisite: BIO 101/102 or BIO 107/108 or BIO 659/660

BIO 336 PHARMACOLOGY II (3)
This course follows in sequence with Pharmacology I, expanding upon the principles of drug pharmacokinetics and dynamics. Special emphasis is placed upon neuropharmacology, drugs of abuse, allopathic and natural remedies. Prerequisite: BIO 335

BIO 339 HUMAN GROSS ANATOMY (6)
BIO 339L HUMAN GROSS ANATOMY LAB (0)
This is a lecture and laboratory course in human gross anatomy, which uses cadaver dissection and other materials illustrative of human anatomy. Emphasis will be placed upon the anatomy of skeletal muscles, including their bony attachments, nerve and blood supply and their functions in movements. Additional dissections will involve a survey of abdominal and thoracic organs, anatomy of the head and contents of the cranial cavity. The course consists of two lecture hours and eight lab hours a week. Prerequisites: BIO 107/108 or BIO 317 or equivalent and/or permission of instructor

BIO 342 ENDOCRINOLOGY (3)
This is a study of the function of the endocrine system in regulating and maintaining biological processes. The course consists of three lectures a week. Prerequisite: BIO 101/102 or BIO 108; Offered in alternate years.

BIO 350 FUNDAMENTALS OF GEONOMICS, PROTEOMICS AND BIOINFORMATICS (3)
This course will offer an introduction into the novel disciplines of genomics, proteomics and bioinformatics, providing students with a solid intellectual framework for understanding biological pathways, networks and molecular systems in an integrated, multidisciplinary fashion. The course will follow an interactive, problem-based instructional approach, using several mathematics exercises that utilize statistical and probability calculations to add quantitative rigor to the interpretation of biological data sets. The course will be based on case studies taken from scientific publications and Internet-based bioinformatics tools will be used for data analysis. The content will include major areas of biology, including DNA and protein sequences, microarrays, and systems biology. Prerequisite: BIO 102/L or BIO/CHE 303L; MAT 125, a CSC course

BIO 351 COMPUTATIONAL BIOLOGY (4)
BIO 351L COMPUTATIONAL BIOLOGY LAB (0)
This course and required lab are intended to serve as an introduction to the problems encountered in modern biology research, with a special focus on the usage of modern computer-dependent techniques to explain biological phenomena. Many modern biological studies are hindered by the sheer volume of experimental data produced. These data often cannot be efficiently or accurately interpreted without computer assistance, yet many scientists lack the necessary skill set to do so. This course will instruct students in the challenges of designing, implementing and analyzing in vivo or in vitro generated experimental results using in silico techniques. This will be accomplished through a project-based learning format. This course requires three hours of lecture a week and a weekly three hour laboratory. Prerequisite: BIO/CHE 303/L; or permission of the instructor

BIO 369-370 MCAT, DAT, GRE REVIEW (0)
This is a non-credit course designed to guide and assist students in reviewing for entrance examinations for health professional schools and graduate schools. The entrance exams covered include: the Medical College Admission Test, Dental Admission Test, Pharmacy College Admission Test, GRE General Test and GRE Biology Test. The course provides an introduction to the exams, diagnostic testing, assistance in reviewing the appropriate subject areas, and the administration of practice exams. Prerequisites: D’Youville student with junior or senior standing

BIO 375 MATH MODELING IN BIOLOGY (3)
CROSS-LISTED AS MAT 375
This course is an introduction to the wide area of mathematics serving other sciences, more specifically biology. This course will explore the basics of analysis of numerical data, structure of mathematical modeling, consider several biological models such as population model, predator-prey model, molecular evolution and genetics models, and some other models. The course will extensively use computer programming, basic codes will be provided. This course requires a weekly three-hour lecture/computer lab. Prerequisites: BIO 102/L or BIO/CHE 303L; MAT 125, a CSC course

BIO 389-90 SPECIAL TOPICS IN BIOLOGY (3)
This course presents an opportunity to study a selected topic in the biological sciences. Topics can originate with faculty or students. Offered as needed.

BIO 403 COMPARATIVE ANIMAL PHYSIOLOGY (3)
This is a study of function in animals including neural and sensory, endocrine, circulatory, and physiological strategies for gas exchange and water balance. The course consists of three lectures a week. Prerequisite: BIO 101/102, CHE 101/102, or equivalent, or permission of instructor; Offered as needed.

BIO 407/408 RESEARCH AT D’YOUVILLE (2,3)
Library or laboratory research problems are carried out under the direction of staff members on campus. Prerequisite: Junior or senior status in biology and permission of instructor

BIO 409/410 RESEARCH AT ROSWELL PARK C.I. (2-3)
Library research is carried out at Roswell Park Cancer Institute under the direction of its staff. Requires permission of the department chairperson and approval by R.P.C.I. Prerequisite: Senior standing in biology and a 3.0 G.P.A. in mathematics and science courses

BIO 479 / 480 INDEPENDENT STUDY (1, 2, 3)
Qualified students may investigate selected topics with permission of the instructor.

BIO 499 CAPSTONE EXPERIENCE (1, 2)
SEE MNS 499

BIO 659 INTERMEDIATE PHYSIOLOGY I (3)
BIO 660 INTERMEDIATE PHYSIOLOGY II (3)
These courses are comprised of discussions of the molecular attributes of cytological features that represent the underpinnings of such functions as nerve impulse and neurotransmission; skeletal muscle contraction, muscle excitation and coordination of contraction, processes of electrolyte and water balance, actions of chemical messengers such as hormones and drugs, gas transport and cellular respiration, nutrition, metabolism and excretion. Prerequisites for BIO 659: graduate-level standing; Prerequisites for BIO 660: BIO 659.

CDP 101 PERSPECTIVES ON PROFESSIONS I (2)
This course is based on the premise that choosing an appropriate major depends on self-knowledge and a knowledge of the changing world of work. It seeks to provide the student with the necessary flexibility, tools and skills to survive in a changing work environment. The course’s philosophy is that student-centered courses that provide experience in self-evaluation and discovery of career options, are integral components of the process of choosing a major. Experience and opportunities for interviewing, researching career options and academic planning are provided as part of the program in order to develop the skills necessary for selection of an appropriate career pathway. Participants meet in small groups (10 to 15), individually with their instructor and in large groups to hear professionals from selected career fields. Offered in the fall and spring semesters.

CDP 102 PERSPECTIVES ON PROFESSIONS II (1)
The focus is on individual work and academic planning with a CDP instructor in this tutorial. There are three one-day workplace visits or an equivalent amount of career work determined by the student’s areas of career interest and based on work during the first semester coursework. Contacts for these job shadowing assignments are arranged by the coordinator of the Career Discovery Program. Prerequisite: CDP 101; Offered in the fall and spring semesters as needed.

CDP 201 CAREER LIFE PLANNING (1)
A course designed for students who are dismissed from an academic major. The course will provide them with the tools and research skills in self-evaluation as well as the career options that are necessary components of selecting an appropriate academic major. This course will support the student in the discovery of personal work values, personality traits, working and thinking styles and research methods necessary for the discovery of career options. At the completion of this course, the student is expected to choose and be accepted into a new academic major. Offered in the fall and spring semesters as needed.

CHE 101 GENERAL CHEMISTRY I (3)
This introduction to fundamental chemical principles includes topics such as atomic structure, bonding and properties of gases, liquids, solids and solutions. The course consists of three lectures and three hours of laboratory a week. Prerequisite: high school chemistry and CPC 022 or waiver and three years high school mathematics or MAT 117 or 122; Corequisite: CHE 101L; Offered in the fall, spring and summer semesters.

CHE 101L GENERAL CHEMISTRY I LAB (1)
Three hours of laboratory. Corequisite: CHE 101.

CHE 102 GENERAL CHEMISTRY II (3)
This course is a continuation of Chemistry 101. Topics include chemical equilibria, kinetics and oxidation reduction systems. Prerequisite: CHE 101 and CHE 101L; Corequisite: CHE 102L; Offered in the fall, spring and summer semesters.

CHE 102L GENERAL CHEMISTRY II LAB (1)
Three hours of laboratory. Corequisite: CHE 102.

CHE 105A PROBLEM SOLVING FOR CHE 101 (3)
This three-credit course focuses on the mathematical applications of general chemistry. This is a companion course to be taken in conjunction with CHE 101 as recommended by placement testing and cannot be taken as a freestanding elective. Corequisite: CHE 101.

CHE 105B PROBLEM SOLVING FOR CHE 111 (3)
This three-credit course focuses on the mathematical applications of general chemistry. This is a companion course to be taken in conjunction with CHE 111 as recommended by placement testing and cannot be taken as a freestanding elective. Corequisite: CHE 111.

CHE 111 CHEMISTRY FOR THE HEALTH SCIENCES I (3)
This is a survey of general and organic chemistry that emphasizes fundamental principles and the properties and characteristics of important groups of chemicals. This course consists of three lectures per week. Prerequisite: One year of high school chemistry, college prep chemistry (CPC 022) or permission of instructor; Offered both semesters.

CHE 112 CHEMISTRY FOR THE HEALTH SCIENCES II (2)
This survey of metabolism in the cell includes the instruction of compounds and other components involved in metabolism and regulation of metabolism. The course consists of two lectures per week. Prerequisite: CHE 111 or permission of instructor; Offered both semesters.

CHE 113L CHEMISTRY FOR THE HEALTH SCIENCES LABORATORY (1)
The laboratory exercises illustrate principles, techniques and practices of general chemistry, organic chemistry and biochemistry. The lab consists of three hours of laboratory a week. Prerequisite: CHE 111; Prerequisite or corequisite: CHE 112; Offered both semesters.

CHE 114 APPLIED CHEMISTRY FOR THE HEALTH SCIENCES (4)
This is a one-semester introductory course emphasizing those areas in chemistry where biochemistry, the physical sciences and human health intersect. Interactive, student-centered learning is emphasized, as is the process of scientific inquiry. The scientific content is chosen with special emphasis on its applicability to medical issues and includes topics drawn from general, organic and physical chemistry as well as biochemistry, including the basics of atomic structure and chemical reactivity, pH, energy, force, pressure, fluid flow, organic reactions and compounds, biochemical molecules and the cycles of life. Prerequisites: Passing grade in chemistry SAI test or a college level chemistry course; Corequisite: CHE 114L.

CHE 114L APPLIED CHEMISTRY FOR THE HEALTH SCIENCES LAB (0)
This laboratory accompanies CHE 114. Emphasis is on integrative coverage of material contained in its companion course and is conducted in an active learning environment. Corequisite: CHE 114.

CHE 131L MEASUREMENT LABORATORY (1)
This is a free standing laboratory course that introduces students to scientific methods of measurement by taking a problem-based, cooperative learning approach. Students engage in a set of guided discovery experiences pertaining to how to acquire data using real-world problems based in the sciences. Computers will be used to record and measure sound, temperature, acidity, pressure and speed, among other things. Students will prepare presentations and web-based reports on their experiments.
CHE 142 MOLECULES (4)
This is an introductory course in chemistry, which addresses the key concepts of chemistry by studying the structures and workings of the molecules that people encounter in everyday life. Material will be presented in a conceptual manner, with minimal mathematics, and, to the extent possible, in a manner which connects chemistry to the everyday experiences of 21st century human beings. Topics will include atoms, molecules, intermolecular forces, bonding, molecular structure, chemical reactions, heat and energy, rates and equilibrium, acids and bases, light, electrochemistry, polymers and biochemistry. Lab must be taken concurrently. Corequisite: CHE 142L. Offered both semesters.

CHE 142L MOLECULES LABORATORY (0)
This course is the laboratory to accompany CHE 142. Corequisite: CHE 142. Offered both semesters.

CHE 145 THE PROCESS OF SCIENTIFIC DISCOVERY (3)
SEE BIO 145

CHE 211 QUANTITATIVE ANALYSIS (3)
This course explores the theory and practice of volumetric, gravimetric and instrumental methods of analysis. Prerequisite: CHE 101/102 and one semester of college mathematics except MAT 101; Corequisite: CHE 211L

CHE 211L LABORATORY (2)
This course involves six hours of laboratory. Corequisite: CHE 211

CHE 219 ORGANIC CHEMISTRY I (3)
This course is a survey of the functional groups germane to organic chemistry. In particular, emphasis is placed on the physical properties, nomenclature, conformation, synthesis and reactions of alkanes, alkenes, alkynes, aromatic rings, alcohols, aldehydes and ketones. Additionally, the recognition of isomers from constitutional stereoisomers such as enantiomers and diastereomers is also stressed. Prerequisite: CHE 101-102 or permission of instructor; Corequisite: CHE 219L.

CHE 219L ORGANIC CHEMISTRY I LAB (1)
This lab emphasizes purification techniques central to organic chemistry such as recrystallization, distillation (simple and fractional), extraction, and chemical modification. Also, several syntheses are chosen to illustrate lecture material such as, but not limited to, ester synthesis, electrohilic substitution of an aromatic ring, saponification, and reduction of carbonyl compounds. It consists of three hours of lab a week. Corequisite: CHE 219

CHE 220 ORGANIC CHEMISTRY II (3)
This course is a continuation of CHE 219. The physical properties, nomenclature, synthesis and reactions of amines, carboxylic acids and its derivatives, ethers, epoxides, sulfides, conjugated systems, aromaticity and enols are studied. The theory and application of a variety of spectroscopic (infrared, nuclear magnetic resonance and mass spec) methods are also covered. Prerequisite: CHE 219; Corequisite: CHE 220L

CHE 220L ORGANIC CHEMISTRY II LAB (1)
This lab emphasizes the reactions that are covered in lecture and places an importance on mastering spectroscopic methods such as IR and NMR. It consists of three hours of lab a week. Corequisite: CHE 220

CHE 303/BIO 303 BIOCHEMISTRY (3)
This one-semester course emphasizes structure/function relationships among the components responsible for the biochemical functions of life. Topics include proteins, enzymes, carbohydrates, bioenergetics, metabolism (catabolism and anabolism), lipids, membranes, nucleic acids, biotechnology, biochemical methods, vitamins and nutrition. Prerequisite: BIO 101/102 and CHE 219 or chemistry majors that have completed CHE 220; Offered both semesters and often in the first summer session.

CHE 303L/BIO 303L BIOCHEMISTRY LABORATORY (1)
This laboratory supports the CHE 303 lecture course. Students required to take CHE 303 are also required to take CHE 303L (except for physician assistant students). Corequisite: CHE 303; Offered both semesters.

CHE 311 PHYSICAL CHEMISTRY I (3)
This is the first semester of the introductory course in physical chemistry. Areas of study include quantum mechanics: history, Bohr atom, Schrödinger Equation, particle in a box, rigid rotor, simple harmonic oscillator, hydrogen atom, MO theory; classical thermodynamics: Gibbs chemical potential, phase equilibria, electrochemistry, irreversible processes. Prerequisites: CHE 102, MAT 125-126, PHY 101-102 (preferred) or PHY 111-112; MAT 202 strongly recommended

CHE 312 PHYSICAL CHEMISTRY II (3)
This is the second semester of the introductory course in physical chemistry. Areas of study include statistical thermodynamics: Maxwell-Boltzmann distribution, partition function, thermodynamics functions, ideal gas. Einstein solid; spectroscopy: interaction of light with matter, Einstein coefficients, selection rules, atomic and molecular spectra, lasers; kinetics: rates, microscopic reversibility, steady state, collision theory. Prerequisite: CHE 311

CHE 313L PHYSICAL CHEMISTRY LAB (2)
This is the laboratory course which complements the offering in physical chemistry. Students perform experiments illustrating the major areas of physical chemistry: quantum mechanics, classical thermodynamics, statistical thermodynamics, spectroscopy and chemical kinetics. Prerequisite: CHE 311; Prerequisite or corequisite: CHE 312

CHE 331 ANALYTICAL CHEMISTRY (4)
This is a first course in analytical chemistry emphasizing the basic concepts and laboratory techniques underlying quantitative analysis including analysis of quantitative measurements, simple and complex solution equilibria, volumetric and gravimetric techniques, electrochemistry, redox and potentiometric titrations, separations, and elementary photometric techniques. Prerequisites: MAT 122 or equivalent pre-calculus preparation; Prerequisite or corequisite: CHE 219/219L.

CHE 332 INSTRUMENTAL ANALYSIS (4)
This course will examine the basic tenets and applications of modern analytical instrumentation and their use in determining a wide variety of pertinent analytical data. Topics such as UV/Vis spectrometric methods, atomic absorption and emission spectrometry, gas chromatography, mass spectroscopy, luminescence and fluorescence spectrometry, HPLC, capillary electrophoresis, surface analysis and electrochemistry will be covered. Prerequisites: CHE 220/220L and CHE 331
CHE 389/390 SPECIAL TOPICS IN CHEMISTRY (3)
This course presents an opportunity to study a selected topic in chemistry. Topics can originate with faculty or students. Offered as needed.

CHE 401 INORGANIC CHEMISTRY (3)
This is an intermediate course in inorganic chemistry suitable for the junior or senior level student. The course contains a detailed review of atomic structure and bonding, as well as a discussion of group and molecular orbital theories. This course also provides a brief synopsis of organometallic chemistry and catalysis. Prerequisite: CHE 220/CHE 220L and its prerequisite courses

CHE 407/408 (1, 2 OR 3) (407 FOR THE FALL SEMESTER, 408 FOR THE SPRING)
This course provides an introduction to research. While it is expected that most participants will be students majoring in chemistry, sufficiently motivated and prepared students from all majors can be admitted. Students will work on experimental projects under the individual supervision of a faculty member. Prerequisites: Third- or fourth-year chemistry major students or by permission of instructor

CHE 412 SPECTROSCOPY (3)
This is a one-semester course in the fundamentals of spectroscopy. This course will cover ultra-violet spectrometry, mass spectrometry, infrared spectrometry, proton (H) magnetic resonance (NMR) spectrometry, 13C NMR spectrometry, correlation spectrometry (1H-J1 COSY AND 1-13C COSTY) and spectrometry of other important nuclei (e.g., 19F and 31P) to aid in the elucidation and structural confirmation of a wide variety of organic molecules and/or biologically relevant molecules. Prerequisites: CHE 101/102/102L, CHE 219/219L, 220/220L and CHE 303/303L

CHE 421 ORGANOMETALLIC CHEMISTRY (3)
This is an introductory survey course in organometallic chemistry, which combines organic chemistry with inorganic chemistry. The course will include a general overview of the basics of inorganic and organometallic chemistry with an emphasis on current research and industrial processes. Prerequisite: CHE 219/219L and CHE 220/220L as a pre- or corequisite.

CHE 450 RESEARCH (2 OR MORE CREDITS)
Research is conducted in an area selected in consultation with the staff members. Prerequisite: Senior standing; May be taken in either or both semesters; Offered as needed.

CHE 479/480 INDEPENDENT STUDY (1, 2, 3)
Qualified students may investigate selected topics with permission of the instructor.

CHE 499 CAPSTONE EXPERIENCE (1,2)
SEE MNS 499

CHI 101 CHINESE LEVEL I (3)
This is a foundation course aimed at enabling students to communicate in modern Mandarin Chinese for everyday purposes. Basic skills of listening, speaking, reading and writing will be developed with a focus on modern Chinese characters and basic sentence patterns. Students will be exposed to authentic language environments and provided with opportunities to practice their language skills. Though designed for students with no previous formal training in Chinese, this course can also be taken by students with some Chinese language backgrounds to further their communication skills.

CPC 022 COLLEGE PREP CHEMISTRY (NON CREDIT)
This is a course which prepares students who lack adequate chemistry background (either no high school chemistry or demonstrated need based on Learning Center testing and consultation with the instructor) to undertake the chemistry required by their major program. The course may be taken by any student with permission of instructor. Offered in late summer, fall and spring semesters.

CSC 110 COMPUTERS AND COMPUTING (3)
This is an introduction to the fundamental ideas of computers and their implementation: office applications (word processor, spreadsheet, presentation and database), elementary website design, blogging, Internet use for research (hardware, software, early pioneers of the computing industry, common terminology, etc.) and some elementary programming. Instructors may include other appropriate topics. Both Windows and MAC OS will be utilized. Prerequisite: MAT 101, a placement test score indicating mastery of the MAT 101 material or permission of instructor; Offered as needed.

CSC 149 ROBOTICS (3)
This is an interdisciplinary course which examines the physical and computer scientific underpinnings of robots as well as the history and humanistic implications of this relatively new technology. Students build and program their own robots and make them do things, and learn the science and computer skills that underlie what they are doing. This is an introductory course, which carries credit in computer science for the core computer science requirement or credit in physics for the core science requirement. Prerequisite: MAT 101, a placement test score indicating mastery of the MAT 101 material, or permission of instructor; Offered as needed.

CSC 151 INTRODUCTION TO COMPUTER PROGRAMMING I (3)
This is an introduction to computer programming using a modern language: program structure, procedures, functions, loops, if-then-else, arrays and records. Prerequisite: MAT 101, a placement test score indicating mastery of the MAT 101 material, or permission of instructor; Offered as needed.

CSC 152 INTRODUCTION TO COMPUTER PROGRAMMING II (3)
This course is a continuation of CSC 151. Prerequisite: CSC 151

CSC 161 INTRODUCTION TO MULTIMEDIA (3)
DAN 241  DATA STRUCTURES (3)
This course is a study of the manipulation of data structures, stacks, queues, lists, linked lists and trees. Other topics covered are integration of data structures and efficient algorithms of sorting, merging and searching in a data base or file management system. Prerequisite: CSC 110 or equivalent or permission of instructor; Offered as needed.

DSC 389/390  SPECIAL TOPICS IN COMPUTER SCIENCE (3)
This course presents an opportunity to study a selected topic in computer science. Topics originate with faculty or students. Offered as needed.

DSC 499  CAPSTONE EXPERIENCE (1,2)
SEE MNS 499

DAN 101  INTRODUCTION TO DANCE (3)
The student is acquainted with the principles and historical aspects of the world of classical and theatrical dance and their implications for developmental movement, creative expression and educational activities.

DAN 210  INTRODUCTION TO BALLET (3)
Students are acquainted with two basic methods of classical ballet, Cecchetti and Vaganova. Students learn theories of movement of the body in dance, French terminology, barre, centre floor, adage, allegro and enchainements. This course follows a graded syllabus for participation.

DAN 300  ELEMENTS OF DANCE COMPOSITION (3)
Brief lectures on historical figures in dance combined with video presentations of significant choreographic works set the stage for each class topic. Exploring the basic elements of time, space and energy with structured exercises that will challenge the student to explore new directions in movement. Sharing and discussing choreographic studies will provide a stimulating experience. Offered as needed.

DAN 305  DANCE PERFORMANCE AND TECHNIQUE (3)
This course offers students an opportunity to develop an appreciation for choreography and dance ability through practice. Emphasis will be given to refining traditional movement exercises and choreographic endeavors in ballet, modern and jazz techniques. Prerequisite: DAN 300 or permission of instructor.

DTC 101  ORIENTATION TO DIETETICS (1)
This seminar course will introduce the student to the educational and professional requirements within the field of dietetics. Students will be introduced to and understand the dietetics program curriculum standards and opportunities for personal and professional development within the college and community. An overview of the evolution of the field as well as current and future trends of dietetics will be provided. The course will explore career opportunities, career planning and professional roles and responsibilities of the registered dietitian. Students will be introduced to and understand the governance of dietetics practice including the Academy of Nutrition and Dietetics’ Code of Ethics and the Standards of Professional Performance. This course is one hour per week. Offered in the fall semester.

DTC 105  INTRODUCTION TO CULINARY SKILLS (3)
This introductory course provides hands-on instruction in the dietetics lab (kitchen) on food preparation and culinary techniques. The course is designed for students of all majors who would like to enhance their food preparation skills. Food selection and preparation will focus on healthy food choices. An introduction to basic nutrition will be provided with a concentration on the public health effect of poor nutrition choices. Open to all students; Offered in the fall and spring semesters.

DTC 205  FOOD SCIENCE (3)
This is a fundamental course in the basic principles of food preparation. Emphasis is on food chemistry, the function of ingredients and food preparation skills. The course consists of two lecture hours and two lab hours. Open to all students. Prerequisites: BIO 108, CHE 102, or by permission of instructor. Offered in fall and spring semesters.

DTC 306  PRINCIPLES OF NUTRITION (3)
The course will introduce the student to nutrition science and public health issues related to nutrition. The fundamentals of carbohydrates, protein, lipids, vitamins, minerals and metabolism will be explored. Emphasis will be placed on diet planning and analysis, energy balance and the role of diet and physical activity in a healthy lifestyle and disease prevention. Highlights of current topics in nutrition, such as eating disorders, vegetarian lifestyles, and fad diets will also be addressed. Open to all students. Prerequisites: BIO 108, CHE 102, or by permission of instructor. Offered in fall and spring semesters.

DTC 319  NUTRITIONAL BIOCHEMISTRY (3)
This advanced course provides an in-depth study and discussion of the biochemistry and physiology of macronutrients and micronutrients. Applied topics, including regulation of metabolism, fluid and electrolyte balance, and energy balance/body composition, are presented and explained in terms of related biochemistry and physiology. This course consists of three lecture hours. Prerequisites: BIO 303, BIO 108, DTC 306. Offered in the spring semester.

DTC 327  NUTRITION THROUGHOUT THE LIFE CYCLE (3)
This three-credit course will examine nutritional needs and issues throughout the life span with special emphasis on preconception, pregnancy, lactation, infancy, childhood, adolescence and aging. Normal nutrition topics and nutrition-related conditions and interventions will be studied for each stage of the life cycle. Nutrient needs and recommendations will be addressed as well as age-related physiological changes. Specific attention will be given to current public health issues and model public food and nutrition programs. Current evidence-based practice recommendations will be covered with use of position papers by the Academy of Nutrition and Dietetics and American Academy of Pediatrics. This course consists of three lecture hours.
hours. Prerequisite: DTC 306 or NTR 325 or permission of the instructor. Open to all majors, required course for dietetics majors. Offered in the fall semester.

DTC 328 NUTRITION FOR FITNESS AND ATHLETIC PERFORMANCE (2)
This two-credit course will introduce the student to the integrated science of nutrition and exercise physiology. The course will explore macro- and micronutrient needs as related to energy demands, cellular function, and growth, maintenance, and repair. Students will explore how optimal nutrition is essential for optimal performance. The course will focus on scientifically sound, evidence-based practice and examine sources of unsound sport nutrition recommendations. Assignments will allow students to gain a greater understanding of the energy requirements of exercise as well as the barriers to increased physical activity. This course consists of two lecture hours. Prerequisite: DTC 306 or NTR 325 or permission of the instructor. Open to all majors, required course for dietetics majors. Offered in the spring semester.

DTC 409 FOOD SERVICE MANAGEMENT I (2)
This course provides an introduction to the structure and function of a food service department. Food service subsystems are discussed from an organizational and leadership perspective. This course will introduce the following operational areas: menu planning; procurement including purchasing, receiving and storage; food production and service. As needed, discussion will include food safety, sanitation and the management of human resources related to these topics. This course consists of two lecture hours. Prerequisite: MGT 305, DTC 205; Corequisite: DTC 409L. Offered in the fall semester.

DTC 409L QUANTITY FOOD PREPARATION (2)
This course provides the application of the concepts and principles of quantity food preparation and service including planning and coordinating food production, recipe standardization and modification, and the application of food safety principles. Students develop the technical skills required for the preparation and service of meals to large groups, including cooking methods and terms and evaluating food for quality for the various recipe categories, including, but not limited to sauces, vegetables, meats, cheese, eggs and baked goods. Students are introduced to the use and maintenance of institutional food service equipment. This course consists of one lecture and two lab hours. Corequisite: DTC 409. Open to dietetics majors only. Offered in the fall semester.

DTC 410 FOOD SERVICE MANAGEMENT II (3)
This course studies food service subsystems from an organizational and leadership perspective. This course will introduce the following operational areas: principles of financial control of food and labor, techniques for analyzing and managing costs, development of a business plan executive summary, and management of human resources including personnel recruitment, selection, training, evaluation and labor relations. This course will introduce information on kitchen layout and design, sanitation, security, safety, infection control and emergency preparedness applicable to food service operations. This course consists of three lecture hours. Prerequisites: DTC 409, DTC 409L. Corequisite: DTC 410SP. Open to dietetics majors only. Offered in the spring semester.

DTC 410SP FOOD SERVICE MANAGEMENT SUPERVISED PRACTICE (1)
This course provides practice in food service management including: food service subsystems (purchasing, receiving and inventory control, production and service), marketing, quality management, financial control, human resources (personnel and labor issues), and facility layout and design. Students develop management skills through projects and/or field experiences, case studies, computer applications, and as required, quantity food preparation experiences. Students will be introduced to the behaviors, traits and skills that characterize effective leaders and learn to apply these traits in various personnel and food service management scenarios. This course consists of three supervised practice hours weekly. Prerequisites: DTC 409, DTC 409L. Corequisite: DTC 410. Open to dietetics majors only. Offered in the spring semester.

DTC 418 INTRODUCTION TO PROFESSIONAL PRACTICE (1)
This is the first course in the Coordinated Program (CP). It provides an introduction to dietetic practice, including standards that guide practice and professional performance, nutrition care process, medical terminology, and quality standards governing patient care in hospitals. Introductory didactic knowledge is presented, which prepares the student for development of clinical knowledge and skills in subsequent clinical courses. This course consists of one lecture hour. Prerequisite: DTC 319 or equivalent. Open to dietetics majors in CP only. Offered in the summer semester.

DTC 420 INTRODUCTION TO NUTRITION CARE (3)
This course is an introduction to the professional practice of dietetics. Using the nutrition care process as a framework, students learn how to provide nutrition services to patients, including assessing, writing nutrition diagnoses, developing appropriate interventions, and monitoring response to care. This course consists of three lecture hours. Prerequisite: DTC 418. Corequisite: DTC 420SP. Open to dietetics majors in CP only. Offered in the summer semester.

DTC 420SP INTRODUCTION TO NUTRITION CARE SUPERVISED PRACTICE (1)
This course is an introduction to the professional practice of dietetics. Using the nutrition care process as a framework, students provide nutrition services to patients, including assessing, writing nutrition diagnoses, developing appropriate interventions, and monitoring response to care. This course consists of twelve supervised practice hours per week. Prerequisite: DTC 418. Corequisite: DTC 420. Open to dietetics majors in CP only. Offered in the summer semester.

DTC 425 DIET THERAPY (3)
This course examines nutrition and diet therapy, including nutrition assessment, the physiological and biochemical bases of nutrition care, therapeutic diets, medications and herbal supplements. Topics include nutrition intervention for diabetes, cardiovascular diseases, obesity, eating disorders, GI diseases and promoting healthy eating. The emphasis of this course is the practical application of subject matter in the clinical setting. Prerequisite: DTC 306 or NTR 325 or permission of the instructor. Open to non-dietetic majors. Offered in the fall semester.

DTC 426 NUTRITION EDUCATION AND COUNSELING METHODS (3)
This course presents the development, use, and evaluation of methods and materials for teaching nutrition to different audiences. Emphasis is given to both group and individual instruction in school, community, worksite, employee, and patient education settings. Communication skills essential for professional practice will include patient counseling, lesson plan development, evaluation and publication of educational
UNDERGRADUATE CATALOG 2015-2016
D’YOUVILLE COLLEGE • 1.800.777.3921 • WWW.DYC.EDU

DTC 511  MEDICAL NUTRITION THERAPY I (2)
The study of the biochemical and physiological basis for nutrition care in treating disease, including malnutrition, anemia, obesity, diabetes, and cardiovascular disease. Theory and practice in nutritional assessment, diagnosis, intervention, and monitoring is provided. This is the first semester of a two-semester course. This course consists of two lecture hours. Prerequisites: DTC 420 and DTC 420SP. Corequisite: DTC 511SP. Open to dietetics majors in CP only. Offered in the spring semester.

DTC 511SP  MEDICAL NUTRITION THERAPY I SUPERVISED PRACTICE (3)
The clinical application of the biochemical and physiological basis for nutrition care for those with nutrition-related diagnoses and conditions discussed in DTC 511, including GI disorders, hepatic disorders, cancer, AIDS, renal disease, and cardiovascular disease. Practice in nutritional assessment, diagnosis, intervention, and monitoring is provided. This course consists of nine supervised practice hours weekly. Prerequisites: DTC 420, DTC 420SP. Corequisite: DTC 511. Open to dietetics majors in CP only. Offered in the fall semester.

DTC 512  MEDICAL NUTRITION THERAPY II (2)
The study of the biochemical and physiological basis for nutrition care in treating disease, including GI disorders, hepatic disorders, cancer, HIV, renal disease, and nutrition support. Practice in nutritional assessment, diagnosis, intervention, and monitoring is provided. This is the second semester of a two-semester course. This course consists of two lecture hours. Prerequisites: DTC 511 and DTC 511SP. Corequisite: DTC 512SP. Open to dietetics majors in CP only. Offered in the spring semester.

DTC 512SP  MEDICAL NUTRITION THERAPY II SUPERVISED PRACTICE (3)
The clinical application of the biochemical and physiological basis for nutrition care for those with nutrition-related diagnoses and conditions discussed in DTC 512, including GI disorders, hepatic disorders, cancer, HIV, renal disease, and nutrition support. Practice in nutritional assessment, diagnosis, intervention, and monitoring is provided. This course consists of nine supervised practice hours weekly. Prerequisites: DTC 511, DTC 511SP. Corequisites: DTC 512. Open to dietetics majors in CP only. Offered in the spring semester.

DTC 521 WIP COMMUNITY NUTRITION (3)
The course offers a study of community nutrition needs and problems. The goals, organization, and history of selected government and private programs are investigated. This course is designated as a writing-intensive course and meets the college requirement as a WIP course. This course consists of three lecture hours. Prerequisites: DTC 420. Corequisite: DTC 521SP. Open to dietetics majors only. Offered in the fall semester.

DTC 521SP COMMUNITY NUTRITION SUPERVISED PRACTICE I (2)
This course provides supervised practice in community nutrition at area agencies, organizations, and programs. Students receive experiences in food insecurity/food assistance, maternal and child health, elderly nutrition, and adult nutrition. This course consists of six supervised practice hours per week. Prerequisites: DTC 420, DTC 420SP. Corequisite: DTC 521WIP. Open to dietetics majors in CP only. Offered in the fall semester.

DTC 522SP COMMUNITY NUTRITION SUPERVISED PRACTICE II (1)
Students develop, implement, and evaluate a community nutrition intervention in this course. This course consists of two lecture hours. Prerequisites: DTC 420, DTC 420SP. Corequisite: DTC 524. Open to dietetics majors in CP only. Offered in the spring semester.

DTC 524 THE NUTRITION ENTREPRENEUR (3)
This course applies business principles and entrepreneurship to the nutrition profession. Students learn how to plan, implement, and evaluate nutrition intervention programs. In addition, the knowledge, skills, and resources needed to establish and maintain a private practice are presented. This course consists of three lecture hours. Prerequisites: MGT 305, DTC 426, and DTC 521 or equivalent. Offered in the spring semester.

DTC 560 NUTRITION THEORY AND PRACTICE (3)
The major theories that guide nutrition research and practice are presented and applied in this course. The scientific basis of nutrition research and practice are discussed, including evidence-based practice, clinical practice guidelines, the Nutrition Care Process and Model, and the theories and conceptual frameworks that guide research and practice. The interrelationship of theory, research, and practice is a major focus of this course. This course consists of three lecture hours. Prerequisite: Graduate status or permission of instructor. Offered in the summer semester.

DTC 601 RESEARCH METHODS IN DIETETICS (3)
This course reviews dietetic and nutrition research methods, general research designs (both qualitative and quantitative), evaluation and assessment methods, application of statistical analysis in nutrition, and the presentation of research data. The course focuses on guiding the dietetic student in becoming a consumer and producer of nutrition-related research. This course consists of three lecture hours. Prerequisites: DTC 600, DTC 420, and a four-credit Applied Statistics course or equivalent, or competency test. Open to dietetics majors only. Offered in the fall semester.

DTC 610 DIETETICS THESIS SEMINAR (3)
This course involves discussion of current research in the profession. Students will identify and delineate a research problem and develop a thesis proposal. This course consists of three lecture hours. Prerequisites: DTC 601; Open to dietetics majors only. Offered in the spring semester.

DTC 622 PROFESSIONAL SEMINAR (2)
This two-credit course provides the B.S./M.S. students the opportunity to practically apply their knowledge in the field of nutrition and dietetics and gain hands-on practice with the credentialing examination for the dietetics profession. This course consists of two lecture hours. Prerequisite: fifth-year student. Open to dietetics majors in CP only. Offered in the spring semester.

DTC 631 ADVANCED NUTRITION PRACTICE I (8)
This course is the first part of a two-course sequence. In conjunction with DTC 632 (Advanced Nutrition Practice II), this course provides advanced supervised practice experiences in clinical nutrition, community nutrition, and food service management at area hospitals, long term care facilities, food service establishments, community settings, and special rotation facilities. This course consists of 24 supervised practice
hours weekly. Prerequisites: DTC 512, DTC 512SP. Open to dietetics majors in CP only. Offered in the fall semester.

**DTC 632 ADVANCED NUTRITION PRACTICE II (8)**
This course is the second part of a two-course sequence. In conjunction with DTC 631 (Advanced Nutrition Practice I), this course provides advanced supervised practice experiences in clinical nutrition, community nutrition, and food service management at area hospitals, long term care facilities, food service establishments, community settings, and special rotation facilities. This course consists of 24 supervised practice hours weekly. Prerequisite: DTC 631. Open to dietetics majors in CP only. Offered in the spring semester.

**ECO 201 PRINCIPLES OF ECONOMICS—MACRO (3)**
This course explores the price system, public and private sectors, national income accounting, unemployment and inflation, fiscal policy, budget deficits and the public debt, money and banking and the Federal Reserve and monetary policy. This course meets the social sciences requirement in the core.

**ECO 202 PRINCIPLES OF ECONOMICS—MICRO (3)**
This course explores supply and demand and the elasticity of supply and demand. It analyzes the degree and nature of competition in various market structures, the economic benefits derived from and the problems presented by big business conglomerates and multinationals and international trade and finance. The course meets the social sciences requirement in the core.

**ECO 207 STATISTICS (3)**
This is a general course to acquaint students with the elements and procedures of statistics. It includes the basic concept of statistical methods and analysis, and functional use of descriptive and inferential statistical tools.

**ECO 212 PERSONAL FINANCIAL MANAGEMENT (3)**
This is a comprehensive examination of personal financial management including insurance coverage of all types, investing, major purchases, retirement and estate planning.

**ECO 328 MONEY AND BANKING (3)**
This course explores the monetary and banking theory. It covers the nature of money, the functions of bank reserves, currency and banking history. The Federal Reserve System and its interrelationships with the commercial banking systems as well as foreign exchange transactions are explored. Prerequisites: ECO 201, 202. Offered in the fall semester.

**EDU 101 SEMINAR IN EDUCATION (3)**
This course provides students in the liberal studies for education program with an introduction to problems, issues and concerns in the field of education. A field experience component is part of this three credit hour seminar course. Students considering a career in teaching meet with education faculty, teachers and other professionals to discuss best practices, issues and concerns in education and plan and implement field experiences. The INTASC Standards are introduced as a framework.

**EDU 201 HISTORICAL FOUNDATIONS OF EDUCATION IN THE UNITED STATES (3)**
This course is designed to provide the undergraduate liberal studies for education students with an in-depth study of the historical foundations of education. Emphasis is placed on key historical movements, eras and thinkers from education in the United States.

**EDU 335 CLASSROOM MANAGEMENT AND STUDENT MOTIVATION (3)**
This course is designed to provide teacher candidates with models and practices that will assist them in the development of a wide repertoire of management techniques that can be effectively used in schools. Theories of human development, particularly with respect to the interrelations among social, emotional, psychological and intellectual development, will be explored in conjunction with inquiry regarding the foundations of educational research. Emphasis will be placed upon a teacher's ability to enhance the teaching and learning environment by developing effective instructional activities that engage students and enrich the classroom community.

**EDU 375 TECHNOLOGY IN EDUCATION (3)**
This course is designed to provide the undergraduate teacher education student with an in-depth study of emerging technologies and their use in an educational setting.

**EDU 450 ASSESSMENT AND EVALUATION IN EDUCATION (3)**
Teacher candidates will learn how to develop and use a variety of evaluation methods to monitor student academic achievement and teaching effectiveness. Special emphasis will be placed on relating evaluations to curriculum and instruction. Students will learn about standardized tests and other diagnostic tools frequently encountered and/or used by classroom teachers. Particular attention will be given to adapting assessments to meet the needs of all students. Students will plan, construct, administer and analyze data for formative and summative evaluation of achievement for a content unit. Contemporary issues related to testing, grading, evaluation and accountability will be addressed.

**ENG 091 ENGLISH AS A SECOND LANGUAGE (3)**
This is a two-semester course designed for students whose native language is one other than English and who have some previous knowledge of English. Instruction is given in order to understand, speak, read and write English. Individual conferences are part of this course. Credit is not applied to academic concentration or related field. Offered as needed.

**ENG 092 ENGLISH AS A SECOND LANGUAGE (3)**
This course is a continuation of ENG 091. Prerequisite: ENG 091.

**ENG 101 READING, WRITING & REASONING (3)**
This course is designed for incoming freshmen who demonstrate a need for improving their reading, writing and reasoning skills necessary for college success. Offered in spring and fall semesters.

**ENG 111 INTRODUCTION TO LITERATURE I: ACADEMIC WRITING (3)**
Introduces the art of short fiction and teaches academic writing. Students learn the skills essential to college success: critical reading and analytical thinking, interpretation, scholarly discussion and collaboration, effective oral presentation, composition of writing for both readers and listeners. Offered both semesters.

**ENG 112 INTRODUCTION TO LITERATURE II: RESEARCH WRITING (3)**
Introduces the art of poetry and drama and teaches academic research skills. Students strengthen skills essential to college success: critical reading and analytical thinking, interpretation, productive discussion and collaboration, scholarly research, and effective academic writing. Offered both semesters.

**ENG 201 ENGLISH LITERATURE: BEGINNINGS TO 1798 (3)**
This survey course focuses on dominant literary trends and major authors, such as
ENG 202 NINETEENTH AND TWENTIETH CENTURY ENGLISH LITERATURE (3)
This survey course focuses on dominant literary trends and major authors, including the Romantics, the Victorians and modern authors such as Yeats, Eliot, Joyce and Lawrence. Offered as needed.

ENG 203 SHORT STORY (3)
This course is a systematic presentation of the ways of understanding and appreciating fiction. Students analyze, step-by-step, the meaning and techniques of a rich and varied selection of short stories. Offered as needed.

ENG 210 SCIENCE FICTION (3)
This course is an exploration of science fiction as a form of social critique, with an emphasis on themes such as ecology, time travel, mythology, responsibility of the scientist, social relationships, utopias, the alien encounter, and the human and inhuman. Offered as needed.

ENG 211 AMERICAN LITERATURE: BEGINNINGS TO 1865 (3)
This is a survey course in American literature from its beginnings through the Civil War. Representative authors include Franklin, Irving, Emerson, Thoreau, Hawthorne, Poe, Melville and Whitman. Offered as needed.

ENG 212 AMERICAN LITERATURE: 1865–PRESENT (3)
This is a survey course in American literature from the Civil War to the present day. Representative authors include Twain, James, Chopin, Eliot, Pound, Fitzgerald, Hemingway, Faulkner, Hughes, Bellow, Baldwin, Oates and Morrison. Offered as needed.

ENG 213 STUDIES IN DRAMA (3)
This course examines the expression of human concerns in dramatic form. It is designed to make play-giving and play-reading enjoyable and enriching experiences. Selected plays are examined with emphasis on 20th century playwrights. Offered as needed.

ENG 215 WORLD LITERATURE I (3)
This survey course in literary classics offers a variety of genres from non-English speaking cultures, from the ancient Greeks and Romans to continental European literature before 1800. A representative sampling of pre-19th century literature from the Far East will also be included.

ENG 216 WORLD LITERATURE II (3)
This is a survey of recent literature, drawn from outside the English-speaking world, which both contributes to and critiques the dominant 20th century Anglo-American tradition. Offered as needed.

ENG 217 STUDIES IN POETRY (3)
This course explores the nature, variety and values as well as the enriching experience and understanding of poetry. A study of selected poems principally by modern poets. Offered as needed.

ENG 218 MINORITY VOICES IN AMERICAN LITERATURE (3)
This is a survey of American literature that is written by and about ethnic minorities, including African Americans, Native Americans and others. Offered as needed.

ENG 219 THE NOVEL (3)
This genre course in the novel focuses on the enduring human themes and concerns expressed in the dominant literary form of this age. Offered as needed.

ENG 221 THE ART OF THE ESSAY (3)
Through reading assignments, writing exercises, and peer review, students will become familiar with a wide range of models and formal strategies for constructing and critiquing various experiments with the essay form. Assignments may include the personal essay, the journalistic essay, the travel essay, the poetic essay, the science essay, the reflective essay, nature writing, multi-genre writing, experimental autobiography, literary memoir, literary journalism, imaginative non-fiction, op-ed and social justice writing, etc. As students develop and expand their reading, writing, and critical thinking practices, the content and form of the class will foster investigations into the nature of truth, the ethics of representing others, the transformative power of memory, and the politics of literary genre. Prerequisite: ENG 112. Offered every year in the spring semester.

ENG 222 INTRODUCTION TO CREATIVE WRITING (3)
This course provides a foundation for creative writing across a variety of genres, including poetry, fiction, drama, and creative nonfiction writing. Students will become familiar, through readings, writing projects, peer critique, and in-class writing, with the fundamental elements of each genre. Students will develop a practical and critical knowledge of the construction of contemporary creative writing in terms of language, genre, form, metrics, narrative, character, and description, and of representative examples of published writers. This fulfills the humanities core requirement as a fine arts course. Prerequisite: ENG 112 or permission of instructor. Offered in even years in the spring semester.

ENG 230 WRITING FOR SOCIAL JUSTICE (3)
This course explores writing as a powerful tool for community activism and political action. Students will read, discuss, and write a variety of genres explicitly connected to social and political progressivism, including: personal narratives, letters to the editor, op-ed columns, videos, debate arguments, interviews, blogs, Twitter feed, Facebook pages, online petitions, interactive media projects, etc. The course will also focus on helping students to develop critical media literacy skills; students will learn to apply rigorous critical analysis of the media that they consume. Prerequisite: ENG 112 Offered in even years in the fall semester.

ENG 232/ SOC 236 WRITING FOR NEW MEDIA (3)
This course will explore the new frontiers of writing and the range of cultural competencies necessary to fully participate in the global digital future. Students will develop digital and information literacies as well as the foundational elements of strong, clear, precise writing while becoming fluent in emerging communication practices. Students will learn to produce texts in multimedia digital environments, producing new media writing projects such as blogs, wikis, websites, social networking sites, audio, video, and other converged and hybrid media. The course will also focus on helping students to develop critical media literacy skills; students will learn to apply rigorous critical analysis of the media that they consume. Prerequisite: ENG 112. Offered in odd years in the fall semester.

ENG 236/ SOC 236 WRITING FOR SOCIAL JUSTICE (3)
This course will explore the new frontiers of writing and the range of cultural competencies necessary to fully participate in the global digital future. Students will develop digital and information literacies as well as the foundational elements of strong, clear, precise writing while becoming fluent in emerging communication practices. Students will learn to produce texts in multimedia digital environments, producing new media writing projects such as blogs, wikis, websites, social networking sites, audio, video, and other converged and hybrid media. The course will also focus on helping students to develop critical media literacy skills; students will learn to apply rigorous critical analysis of the media that they consume. Prerequisite: ENG 112 Offered in even years in the fall semester.
literary terms; understanding of basic critical and theoretical terms, concepts and methodologies; and understanding of genres. Offered in fall semester.

**ENG 300 WOMEN WRITERS (3)**
This course brings together the artistic vision and contributions of outstanding women writers. The focus is on how women writers view women and the concerns of their time. Possible authors include Gwendolyn Brooks, Virginia Woolf, Katherine Mansfield, Joyce Carol Oates, Flannery O'Connor, Katherine Anne Porter, Eudora Welty and Sylvia Plath. Offered as needed.

**ENG 301 ROMANTIC AND VICTORIAN LITERATURE (3)**
This course explores the fiction, prose, and poetry of the Romantic and Victorian period (1785-1900). Readings will vary to highlight the crucial historical events of the nineteenth century, including the rise of the British Empire, the effects of the Industrial Revolution, the emergence of the middle and working classes, and women's changing social roles. Prerequisite: ENG 112; Offered as needed.

**ENG 302 SHAKESPEARE (3)**
This course explores Shakespeare's dramatic and poetic presentation of human experience in all its ambiguities and contradictions. The course will investigate language, sources, historical context, staging and performance history. Prerequisite: ENG 112; Offered each spring semester.

**ENG 303 POETRY WORKSHOP (3)**
This course will focus on honing the poetry writing skills of students and to help them develop a greater creative, critical, and aesthetic understanding of this genre. A variety of poetic forms and forms will be investigated, with an emphasis on the formal elements of plot, character, dialogue, setting, point of view, tone, imagery, figurative language, etc. Through reading assignments, writing exercises, and critique of student work, students will become familiar with a wide range of models and formal strategies for constructing and analyzing short fiction. This fulfills the humanities core requirement as a fine arts course. Prerequisite: ENG 232 Introduction to Creative Writing or ENG 231 The Art of the Essay. Offered in odd years in the spring semester.

**ENG 304 FICTION WORKSHOP (3)**
This course will focus on honing the fiction writing skills of students and to help them develop a greater creative, critical, and aesthetic understanding of this genre. A variety of short fiction formats and forms will be investigated, with an emphasis on the formal elements of plot, character, dialogue, setting, point of view, tone, imagery, figurative language, etc. Through reading assignments, writing exercises, and critique of student work, students will become familiar with a wide range of models and formal strategies for constructing and analyzing short fiction. This fulfills the humanities core requirement as a fine arts course. Prerequisite: ENG 232 Introduction to Creative Writing or ENG 231 The Art of the Essay. Offered in odd years in the spring semester.

**ENG 305 SCREENWRITING/PLAYWRITING WORKSHOP (3)**
This course will focus on honing the screen and/or playwriting skills of students to help them develop a greater creative, critical, and aesthetic understanding of these genres. A variety of dramatic forms will be investigated, with an emphasis on the formal elements of plot, character, dialogue, setting, figurative language, etc. Through reading assignments, writing exercises, and critique of student work, students will hone the techniques of storytelling for film and/or theater and become familiar with a wide range of models and formal strategies for constructing and analyzing scripts. This fulfills the humanities core requirement as a fine arts course. Prerequisite: ENG 232 Introduction to Creative Writing or ENG 231 The Art of the Essay. Offered in even years in the fall semester.

**ENG 306 MEDIEVAL LITERATURE (3)**
This course explores the language, themes and context of Old English and Middle English literature. Old English texts, read in modern translation, often include the prose of King Alfred, Beowulf, and shorter poems such as The Wanderer and The Dream of the Rood. Selections from Chaucer's The Canterbury Tales are read in their original Middle English, while texts such as the Book of Margery Kempe, the Chester Play of Noah's Flood and Sir Gawain and the Green Knight are modernized. Prerequisites: ENG 112; Offered as needed.

**ENG 307 RENAISSANCE LITERATURE (3)**
This course examines the writings of one of the richest periods of English literature. The emergence of humanism, the rediscovery of classical texts and the exploration of new lands inspired eminent writers, such as, Spenser, Sidney, Malolow, Jonson, Donne, Herbert, Marvell and Milton. The background of the Protestant Reformation, Tudor politics and the Civil Wars informs our close reading of a variety of texts, from love sonnets to the epic, from the demonic to the utopian. Prerequisites: ENG 112; Offered as needed.

**ENG 308 CONTEMPORARY WRITERS (3)**
This course explores the fiction, non-fiction, poetry and drama of modern and contemporary writers. Possible authors include John Updike, Flannery O'Connor, Eudora Welty, Richard Ford, Richard Ford, Cormac McCarthy, Aleksandar Hemon, John Hersey, and Michael Ondaatje. Prerequisites: ENG 112; Offered as needed.

**ENG 309 MODERNISM AND POST-MODERN LITERATURES (3)**
This course examines modernist and postmodernist poetry and theory. Students will read key works of significant modern and postmodern poets and explore the movements, and their key historical and cultural events, such as urbanism, Freudian psychoanalysis and art. Prerequisite: ENG 112; Offered as needed.

**ENG 310 EIGHTEENTH CENTURY LITERATURE (3)**
This course explores the prose and poetry of the neoclassical period from its rise to prominence in the Restoration Period through the 18th century. Prerequisites: ENG 112; Offered as needed.

**ENG 311 THEMES IN AMERICAN LITERATURE (3)**
This course is an in-depth reading of several major American writers who explore a common literary theme. Prerequisites: ENG 112; Offered as needed.

**ENG 312 TOPICS IN BRITISH LITERATURE (3)**
This course explores a particular theme, topic or genre in the literature of British writers. Contact instructor for details.

**ENG 313 CONTEMPORARY WRITERS (3)**
This course is an in-depth reading of several major American writers who explore a common literary theme. Prerequisites: Sophomore, junior or senior status; Offered as needed.

**ENG 314 ART OF THE FILM (3)**
This course introduces students to the elements of filmmaking such as screenwriting, camera and lighting, performance, music and sound, editing and the role of the director. Feature films are used to study these elements. This fulfills the humanities core requirement as a fine arts course. Prerequisite: Sophomore, junior or senior status; Offered as needed.

**ENG 315 MODERNISM AND POST-MODERN LITERATURES (3)**
This course examines modernist and postmodernist poetry and theory. Students will read key works of significant modern and postmodern poets and explore the movements, and their key historical and cultural events, such as urbanism, Freudian psychoanalysis and art. Prerequisite: ENG 112; Offered as needed.

**ENG 317 MYTH AND LITERATURE (3)**
This course examines connections between myth and literature across genres and historical periods. Prerequisites: ENG 112; Offered as needed.

**ENG 318 MODERN CONTINENTAL LITERATURE (3)**
This course is designed for students who are interested in European literature, but who want to elect a course given
American literature from the earliest colonial settlements to the present. The course will cover oral story telling traditions, vestiges of African culture in slave folktales, the relevance of music in African-American literary art, the affects of emancipation and the struggle for civil rights on African American literature, and look at how that literature both represents and affects pertinent issues, such as power, race and gender within the African-American literary community. Prerequisite: ENG 112; Offered as needed.

ENG 347 SPIRITUALITY IN AMERICAN LITERATURE (3)
This course will be a survey of authors exploring personal spirituality as national identity and vice versa. This is not a course about conventional religious history, nor will we study religious writers of any religious denomination per se. The readings will be primarily a survey of Transcendentalist writers and their spiritual/intellectual descendents with focus on how American writers have sought to integrate individualism with spirituality. Prerequisite: ENG 112; Offered as needed.

ENG 349 THEMES IN FILM (3) CROSS-LISTED AS FA 349
This course will focus on a particular movement, style, genre, or cultural, political, or aesthetic theme within the medium of film. A careful study of films and filmmakers within a particular movement or theme will emphasize the relationship of cinematic form and content with special attention to the techniques, expressive strategies, and historical, cultural, and socio-political context of the films and their makers. Prerequisite: Sophomore, junior or senior status; Offered as needed.

ENG 406 CRITICAL THEORY (3)
Students practice the application of the principles of literary criticism and of the norms of aesthetic values in literature. Prerequisite: Minimum of two semesters of literature; Offered as needed.

ENG 432 STUDIES IN THE NOVEL (3)
This course is an in-depth examination of selected novels within their historical and theoretical contexts, and focuses on dominant thematic or formal concerns. Prerequisite: ENG 112; Offered as needed.

ENG 329 MAJOR AUTHORS (3)
This course covers the career and works of a single significant author in the English literary tradition, such as Milton, Chaucer, Melville and Austin. Authors will vary by instructor. It provides a study of the author’s literary period and contemporaries. Offered as needed.

ENG 331 ADVANCED MEDIA STUDIES (3)
Technologies from the invention of writing to the inception of social media have influenced politics, journalism, and cultural production. As they explore aesthetic strategies and techniques in various media, students will engage with the material through both scholarship and practice. Selected readings from scholars, artists, and media activists will provide background and analysis of the history, theory, politics, and methods of participatory media. Students will critically analyze the relationships between media, audience, information, and power and consider the relationship between a participatory democracy and alternative media sources. Students will investigate the politics of representation and will learn to identify bias and manipulation and to recognize and analyze visual and textual systems of cultural codes at work in mass media. In their own projects, they will make use of this knowledge to create their own media messages to work most effectively within the visual and cultural codes they are challenging. Prerequisite: ENG 235 Writing for New Media or ENG 236 Writing for Social Justice, or permission of instructor. Offered in even years in the spring semester.

ENG 342 MAGICAL REALISM (3)
This course will trace the development of the Latin American fiction style known as “magical realism” from the early 1920s to contemporary novels. Writers may include Carpentier, Arlt, Lispector, Bombal, Borges, Garcia-Marquez and Allende.

ENG 346 AFRICAN AMERICAN LITERATURE (3)
This course is a survey of African American literature from the earliest
care for both major and minor injuries and illnesses. The present course will also stress issues pertaining to professional certification, medical liability and other legal issues regarding the health, fitness and competitive sports industries. Prerequisite: ESS 101 or permission of the instructor.

ESS 206 COACHING THEORY AND METHODOLOGY (3)
This course is designed to analyze the fundamentals theories and practices of coaching sports and/or athletics, and to familiarize students with the inherent differences of coaching theory at various levels of competitive and recreational athletics. It includes a study of the psychological and sociological aspects of coaching, the use and implementation of coaching strategies, the organization of practices and games, communication with athletes, fans, schools, parents and the media, as well as the ethics of coaching.

ESS 220: HUMAN BIOMECHANICS (3)
This course is designed to apply principles of human anatomy that will develop into an understanding of human movement as it corresponds to athletic performance and injury prevention. Forces that act on various joints at rest and during physical activity will be discussed, with principles underlying human movement, muscle physiology and muscular contraction being emphasized. Prerequisite: ESS 101 or permission of instructor.

ESS 232 EXERCISE AND SPORT PSYCHOLOGY (3)
This course is designed to explore the relationship between sport, fitness, and behaviors unique to the sport and fitness industries. Sport and fitness in contemporary society is a complex and intriguing socio-cultural phenomenon. The application of psychological theory, research, and practice to sport and fitness settings can contribute immensely to an individual’s athletic performance and level of participation. This course seeks to provide a solid scientific foundation to further study the practice of sport and exercise psychology. Furthermore, possessing an understanding of the psychological/mental factors that affect athletic performance in sport, physical activity and exercise is an important skill to possess for the individual practitioners in the exercise and sports studies field. Prerequisites: ESS 101

ESS 270 EXERCISE AND SPORTS STUDIES PRACTICUM (3)
This course gives students the opportunity to gain practical experience in the health and fitness industry and to explore the career option available in the field of exercise and sports studies. Students will research the various career pathways open in the exercise and sports field through both secondary sources and documented first-hand observation within various educational settings, community-based athletic programs, fitness centers, sports medicine clinics, athletic teams or corporate settings. Prerequisite: ESS 101 or permission of the instructor.

ESS 301 FITNESS EVALUATION AND EXERCISE PRESCRIPTION (3)
This course is designed to familiarize students with the theoretical background and practical applications needed to competently assess levels of physical fitness and wellness. Course content is highly focused toward the knowledge and skills required for ACSM Health Fitness Instructor (HFI) and NSCA Certified Strength and Conditioning Specialist (CSCS) certification exams. Prerequisite: ESS 201

ESS 306 PHYSIOLOGY OF EXERCISE (3)
This course serves to develop in students an intimate understanding of systemic and metabolic physiology within the physically active individual. Students will gain a thorough understanding of various body systems and the acute responses and chronic adaptations that occur as a result of exercise stress. Overall, students will develop a basic knowledge and understanding of the functional limitations of the human organism during exercise as it relates to the many sub-disciplines of exercise physiology, including respiratory physiology, skeletal muscle physiology, cardiovascular physiology, neuromuscular physiology and exercise endocrinology. Prerequisite: ESS 101 or permission of the instructor.

ESS 307 SPORTS AND FITNESS MANAGEMENT (3)
Sports and fitness management serves as an examination of the principles, topics and theory pertaining to the administration and management of sports and fitness organizations. This will include, but not be limited to, the objectives, structures, philosophy, history and legal aspects of sports and fitness organizations. Current issues and trends pertaining to management of sports organizations and/or fitness facilities are analyzed. Prerequisite: ESS 101

ESS 351 THE BUSINESS OF INTERNATIONAL SPORT (3)
This course is designed to explore the relationship between sport, the health and fitness industry, and management across the globe. Basic concepts and theories of the legal, political, economic, and cultural aspects of international business will be reviewed. A review of management exercises, cultural differences, marketing techniques and related applications and techniques as they relate to the international sports industry will be conducted. Topics such as cross-cultural communication and negotiations, and leading a diverse global workforce in international sport and business will also be investigated. Prerequisites: ESS 101 or permission of instructor.

ESS 361 THE ECONOMICS OF SPORT AND FITNESS (3)
The present course is designed to provide students with and analysis of economic principles, as they pertain to the sports and fitness industries. Furthermore, this course will provide a much needed and up-to-date analysis of fitness and sports contribution to the global economy. Prerequisites: None

ESS 389 / 390 SPECIAL TOPICS IN EXERCISE & SPORT STUDIES (3)
This course will highlight current and emerging trends relative to the exercise and sports studies field. At the time of offering, a subtitle will indicate the specific content of the course.

ESS 410 STRENGTH AND CONDITIONING SEMINAR (3)
This course will address current and emerging issues in ESS.

ESS 470 EXERCISE AND SPORTS STUDIES INTERNSHIP (3)
This course provides students with the opportunity to gain hands-on experience within an exercise and sports studies facility. By agreement of the instructor, student and community internship site supervisor, the student will volunteer for a total of 200 hours at a designated internship site. Prerequisite: ESS 101 or permission of the instructor.

ESS 490 EXERCISE AND SPORTS STUDIES SEMINAR (0)
This course provides the student with extensive faculty and peer guidance and feedback throughout a research or community-based internship experience.
FA 210 DESIGN (3)
This introduction to the study and application of design in the visual arts: focuses on problem solving and using principles of two- and three-dimensional design. Offered fall semester.

FA 218 HISTORY OF WESTERN ART (3)
This course studies the major trends in the visual arts of Europe from antiquity to the present. Forms, symbols and images of the artistic styles will be illustrated on selected works of each historical period. Offered as needed.

FA 205 DRAWING (3)
This basic course emphasizes the elements and principles of design and composition as applied to a variety of drawing techniques. It is a studio course that uses a variety of media including still life, nature and the human figure. Offered fall semester.

FA 123 ART OF ANATOMY (3)
CROSS-LISTED AS BIO 123
Figure drawing is taught with special attention to underlying anatomy. Nuances of surface anatomy, human proportion and anatomical terminology are considered in the artistic context. Historical paintings and sculpture are used for identifying the subtleties of the human figure. Foundational drawing techniques are demonstrated using anatomical models, prospected cadavers, live models and special dissections as subjects. This course could serve as a general science or humanities elective for the core.

FA 105 INTRODUCTION TO PHOTOGRAPHY (3)
Intended for the beginner, this course teaches principles of design in composition, printing and display. Topics include camera handling, lighting, film and film development. Ownership of a camera is required. Offered both semesters.

FA 305 PAINTING (3)
This course is an introduction to oil painting, with emphasis on understanding color, paint handling and observation. Attention is given to the approach of painters, both past and present, through periodic slide presentations. Prerequisites: FA 105, 205, 210, or equivalent/porfolio; Offered as needed.

FA 314 THE ART OF THE FILM (3)
See ENG 314
This introduction to the elements of filmmaking includes screenwriting, camera and lighting, performance, music and sound, editing and the role of the director. Feature films are used to study these elements. Prerequisite: Sophomore, junior or senior status; Offered as needed.

FA 320 HISTORY OF VISUAL ARTS IN AMERICA (3)
This is a survey of painting, sculpture and architecture of the United States from the colonial period to the present with emphasis on the evolution of styles of the 19th and 20th centuries. Offered as needed. PREREQUISITES: Sophomore, junior or senior status.

FA 327 MODERN ART (3)
The development of major European and American styles in architecture, painting and sculpture in the last two centuries, from neoclassicism to contemporary trends, is studied. Offered as needed.

FA 328 ART AND THE EVERYDAY (3)
This course combines an art-historical overview of contemporary artists using performance, happenings, action-based art, with influential critics, writers and photography with hands-on studio art-making. Offered every semester.

FA 330 FRANK LLOYD WRIGHT AND AMERICAN ARCHITECTURE (3)
The architecture of Wright in the historical context of modern American architecture is examined. The course explores his precursors and his impact on and debate with future tendencies. Offered as needed.

FA 348 VISIONARIES OF FILM (3)
CROSS-LISTED AS ENG 348
This course examines the art of influential creators of film by offering an in-depth study of the work of one major director, cinematographer, editor, screenwriter or of a group or movement of filmmakers. While examining the individual's, group's or movement's style and technique, we will investigate her/his/their philosophical approach to the cinematic representation of human experience. The historical and sociopolitical context of the films, along with their reception by viewers, are also considered in our study of the filmmaker's creative vision. This course fulfills the humanities core requirement as a fine arts course. Prerequisite: Sophomore, junior or senior status; Offered as needed.

FRE 101 FRENCH LEVEL I (3)
This course is for beginners or those with one year or less of high school French, who need to strengthen basic understanding, speaking, reading and writing skills. Offered as needed.

FRE 201 FRENCH LEVEL III (3)
This course further develops basic concepts and provides more intensive drills in basic skills. Prerequisite: FRE 102 or three years high school French; Offered as needed.

FRE 202 FRENCH LEVEL IV (3)
This course is a continuation of FRE 201. Prerequisite: FRE 201 or four years high school French or permission of instructor; Offered as needed.

GLS 101 GLOBAL CULTURE: GOVERNMENT, TECHNOLOGY, AND SOCIAL THOUGHT (3)
This course offers analysis of political philosophies and governments in the modern world and promotes cross-cultural understanding: reviews racial, ethnic and sexual issues from a minority-majority perspective; and deals with issues of discrimination and oppression. The course will cover world history leading up to the current diffusion of population and the emergence of modern forms of communication and transportation that provide the possibilities for transnational cultures and also provide the target for local ethnic and religious responses against these globalizing cultural trends.
Satisfies upper-level history course (non-North American)

GLS 102  GLOBAL CULTURE: LITERATURE, PHILOSOPHY AND THE ARTS (3)
Multiple perspectives and modes of representation of global issues are examined using a variety of sources in order to equip students with the skills to analyze and evaluate different artistic representations and interpretations. This course explores topics in literature and the arts that are international in scope, whether through specific influences or in response to historical, philosophical, political and aesthetic developments.

GLS 344  STUDY ABROAD (1-12)
An independent research project is conducted in a foreign country. Students will work individually with a program faculty advisor to devise a suitable course of study. This may involve participation in coursework at a foreign institution, subject to approval by the global studies advisory committee. Prerequisites: Junior or senior status and minimum 2.0 G.P.A.

GLS 444  INTERNSHIP (3-12)
The global studies internship is a variable credit (3-12 hours) required course that encourages juniors/seniors to investigate a career through a placement in a professional setting or in development of future projects (graduate study). This allows students to work under guidance of an immediate supervisor and/or a college faculty sponsor. Offered as needed.

GRA 600  THEORY DEVELOPMENT (3)
This course is a critical analysis of the processes involved in the development of theory. It includes a perspective of the underlying philosophical and historical trends in the development of theory. Emphasis is placed on the processes of concept analysis, components of theories, relationships and the relationships between research, practice and theory. Social, ethical and value problems related to the development of knowledge are examined. Prerequisite: Graduate standing; Offered in the fall, spring and summer semesters.

GRA 601  RESEARCH METHODOLOGY AND DESIGN (3)
This course reviews and critically analyzes components of research design, including collection of data. Emphasis is placed on the professional as producer and consumer of research. Prerequisite: GRA 600, and Applied Statistics or equivalent or competency test; Offered in the fall, spring and summer semesters.

GRA 602  STATISTICS SEMINAR (1)
This specialized course is designed to provide students with the intermediate level statistics information needed to enroll in GRA 601. It includes two hours of computer laboratory per week. Prerequisite: Graduate standing and previous statistics course; Offered in the fall, spring and summer semesters.

GRA 606  CURRICULUM DEVELOPMENT (3)
This course is an overview of past and present curricular trends and development processes. Principles and techniques of curriculum design, development, implementation and evaluation in baccalaureate programs are explored. Prerequisite or corequisite: GRA 600; Offered in fall seminar.

GRA 607  TEACHING STRATEGIES (3)
This course is a synthesis of learning acquired in clinical, field experience, education and research courses. The art, principles and strategies of teaching in higher education programs are explored. Emphasis is placed on class and clinical/field learning experiences and evaluation of students, courses, and programs. Prerequisite: GRA 606; Offered in spring semester.

GRA 608  TEACHING PRACTICUM (3)
Students will observe, participate in and practice teaching. Nursing and related allied health professions students are placed in appropriate discipline-specific college and/or clinical laboratory teaching situations. Weekly seminars enable students to synthesize previous learning and to discuss teaching strategies, clinical/field evaluation and problems associated with college teaching. Teaching practicum requires approximately six to eight hours a week during the day (some limited evening placements) for ten weeks. Prerequisite: GRA 606, GRA 607; Offered in the fall and spring semesters.

GRA 610  THESIS SEMINAR (3)
This course involves a discussion of current research in the profession. Students will identify and delineate a research problem and develop a thesis proposal. Prerequisites: GRA 601 and NUR 603 (nursing majors); Offered in the fall, spring and summer semesters.

GRA 617  FINANCIAL MANAGEMENT OF HEALTH CARE SYSTEMS (1)
This course explores financial management techniques for health care administration such as budgeting, auditing, cost analysis, statistical reporting and fiscal control. Special emphasis is placed on long-term care areas. Prerequisite: GRA 615; Offered in the fall semester

GRA 618  EFFECTIVE PLANNING IN HEALTH CARE SERVICES (1)
In this course, students plan for the delivery of health care services, both at the systems level (area, community, region, state and national) and at the organizational level (institutional program). Emphasis is placed on analytical techniques and the dynamics of the planning process. Prerequisite: GRA 615. Offered in the fall semester.

GRA 619  FUNDING OF HEALTH CARE FACILITIES (1)
This course identifies funding sources available for support of health care facilities. Private and public funding sources are explored with a special focus on grant writing styles and strategies. Prerequisite: GRA 615; Offered in the fall semester.

GRA 620  MANAGEMENT INTERNSHIP IN HEALTH CARE (3)
Students will gain practical experience in an on-the-job situation at the management level in a health care facility or service area. The internship will require 90 hours during the semester. Prerequisites: GRA 616 and NUR 603 (nursing majors); Offered in the fall and spring semesters.

GRA 621  APPLIED RESEARCH METHODS (3)
This course includes the relationships between theory, research and practice. Its perspective is on the utilization of theory to frame research questions for applied research problems. The review and critical analysis of components of applied research designs are to prepare the student to be a producer and consumer of applied research. Prerequisites: Graduate standing; undergraduate computer course or equivalent; applied statistics competency (written exam); Offered in the spring semester.

GRA 622  APPLIED RESEARCH PROJECT SEMINAR (2)
This course prepares the student to complete an applied research project. Current research is examined to identify appropriate areas of inquiry for students
in a professional program. Prerequisite: GRA 621; Offered in the spring semester.

**GRA 629  THESIS ADVISEMENT (1-6)**
This course provides for a systematic investigation of a research problem selected by the student as an independent learning situation with faculty guidance. A student thesis will be completed according to the guidelines in the D’Youville College thesis handbook. Students must register for their thesis director’s section. Prerequisite: GRA 610; Offered in the summer semester.

**GRA 630  ADVANCED STATISTICAL METHODS IN APPLIED RESEARCH (3)**
This course explores statistical design and data analysis in the areas of descriptive and inferential statistics. Students are expected to bring their own set of data to the course and learn the process of computerized data entry and data analysis using SPSS/PC+ or MINITAB for advanced statistical computing. Students analyze their own thesis data, produce advanced statistical results and write interpretations of their work. This course consists of two hours of lecture and two hours of lab. Prerequisite: GRA 610, MAT 123 or equivalent to statistics; Offered in the spring semester.

**GRM 101  GERMAN LEVEL I**
This course is for beginners or those with one year or less of high school German, who need to strengthen basic understanding, speaking, reading and writing skills. The culture and history of German-speaking peoples is also introduced. Offered as needed.

**GRM 102  GERMAN LEVEL II**
This course is a continuation of GRM 101. Prerequisite: GRM 101 or two years of high school German.

**HIS 103  COMPARING WORLD CIVILIZATIONS (3)**
This course surveys the origins and growth of the Confucian, Islamic and Western worlds, and examines how a concentration of political and economic ideas and technologies allowed temporary Western dominance. This course meets the core requirement in history. Offered both semesters.

**HIS 111  GROWTH OF WESTERN CULTURE (3)**
This course is a survey of the development of Western culture as divided into seven major epochs: Greece, Rome, the Middle Ages, the Renaissance, the Enlightenment, the 19th century and the 20th century. This course meets the core requirement in history. Offered both semesters.

**HIS 203  AMERICAN ECONOMIC AND SOCIAL HISTORY TO 1865 (3)**
This is a course that examines the economic, social and cultural events that shaped American history from colonial times to 1865. Attention is given to race relations and problems of minority groups. This course meets the core requirement in history. Offered in the fall semester.

**HIS 204  AMERICAN ECONOMIC AND SOCIAL HISTORY SINCE 1865 (3)**
This is a course that examines the economic, social and cultural events that have shaped American history from 1865 to the present. Attention is given to race relations and problems of minority groups. (This course meets the core requirement in history.) Offered in the spring semester.

**HIS 211  HISTORY OF CONTEMPORARY FOREIGN POLICY (3)**
The basis of American foreign policy in the 20th century is examined in this course. It focuses on recent relations with other major industrial powers and on relations with a selected area of the developing world. Offered in the fall semester of even-numbered years.

**HIS 309  HISTORY OF THE FAR EAST: SELECTED TOPICS (3)**
This course studies Far Eastern civilization and focuses on the 19th and 20th centuries. Emphasis is placed on China and Japan. Offered in the spring semester, every three years, beginning in 2010.

**HIS 312  HISTORY OF LATIN AMERICA: SELECTED TOPICS (3)**
A study of the Hispanic American civilization from earliest times to the present including such topics as the age of conquest, the colonial period, the ways of independence and the national period. Focus placed on current problems as well as Latin American relations with the United States. Offered as needed.

**HIS 320  HISTORY OF NEW YORK STATE: SELECTED TOPICS (3)**
This course is a study of the historical development of New York from 1609 to the present. Special note is made of the role of Western New York in the state’s history. Offered in the fall semester of odd-numbered years.

**HIS 323  FOUNDING THE AMERICAN REPUBLIC 1763-1800 (3)**
This course is a study of events leading to the American Revolution and independence and a consideration of the implementation of the Constitution and the evolution of the two-party system. Offered in the fall semester of even-numbered years.

**HIS 325  MODERN WORLD REVOLUTIONS: A COMPARATIVE STUDY (3)**
This course comparatively studies the great revolutions of modern times in 18th century England, 18th century America and France, and 20th century Russia and China. Offered in the spring semester, every three years beginning in 2003.

**HIS 326  CIVIL WAR AND RECONSTRUCTION (3)**
This course is a study of the forces shaping American life through the outbreak of the Civil War through the Reconstruction and the development of the postwar period. Emphasis is placed on the problems of slavery and race relations. Offered in the fall semester of odd-numbered years.

**HIS 327  TWENTIETH CENTURY AMERICA (3)**
This study of the United States in the 20th century considers such topics as the Progressive Era, Imperialism, World War I, the “Roaring Twenties,” the Great Depression and World War II. A focus is placed on the problems of urbanization and of African Americans. Offered in the spring semester of even-numbered years.

**HIS 328  TWENTIETH CENTURY EUROPE (3)**
This study of the United States in the twentieth century considers such topics as the 1950s, the revolution of the 1960s, the Vietnam War, and the presidency from Truman to Clinton. It focuses on the problems of American involvement in the world, the challenge of the urban crisis and the struggle of African Americans. Offered in the spring semester of odd-numbered years.

**HIS 329  TWENTIETH CENTURY EUROPE (3)**
This course is designed to deepen knowledge of the political developments of the period by a systematic study of the major events affecting 20th century Europe. Offered in the fall semester, every three years, beginning in 2001.

**HIS 330  HISTORY OF CONSTITUTIONAL LAW (3)**
This course will develop an understanding of the legal system of the United States through the study constitutional history and the U.S. court system. Offered in the spring semester of odd-numbered years.
HIS 339  AMERICAN ENVIRONMENTAL HISTORY (3)
This course examines the major themes and issues in American environmental history, focusing on the changing attitudes and behavior towards nature in the transition from rural agricultural to an urban industrial society that profoundly transformed the physical and cultural landscapes. Offered every third semester.

HIS 341  CANADA IN TRANSITION (3)
This course provides students with a thematic approach to the historical, cultural, political, social and economic development of America’s closest foreign ally and major trading partner. Through the examination of Canadian colonial development, political evolution, cultural formation and economic diversification, students analyze a nation that is similar to the U.S. and yet quite unique. By studying Canadian policy toward native North Americans, students see how and why such a policy took a radically different approach from that followed in the U.S. This approach of comparison and contrast will be utilized throughout the course. Offered in the fall semester every three years.

HIS 343  RUSSIA, THE WEST AND CHANGE (3)
Beginning with Peter the Great, the course examines how Russia has attempted to keep up with Western technological and social development. Particular attention is given to the way communism structured this attempt since the Russian Revolution. Offered in the fall semester, every three years, beginning in 2002.

HIS 344  HISTORY OF IRELAND (3)
A broad introduction to Irish history from the Stone Age to the late 20th century, economic boom. Included is a two-week extensive historical tour of Ireland. Offered in spring/summer semester of odd-numbered years.

HIS 350  ISLAM AND AFRICA (3)
This course examines the basic social and cultural implications of Islam, traces the initial impact in northern and tropical Africa and examines how Islamic factors have reasserted themselves after Western intervention in these areas. Offered in the spring semester, every three years, beginning in 2009.

HIS 351  RELIGION IN AMERICAN HISTORY (3)
SEE RS 351
This course will explore the many important issues in American religious history over the past 400 years. Offered as needed.

HIS 420  VARIABLE TOPICS IN HISTORY (1, 2, 3)
This variable topic seminar deals with selected themes or topics that are announced when the course is offered. Offered as needed.

HIS 441  CASE STUDY IN URBAN SOCIOLOGY (3)
SEE SOC 441
This course combines on-campus lectures about the geography, history, culture and society of a designated urban center with a one-week service learning experience in that city. Campus lectures will take place in the fall semester and the one week of service learning is held between semesters, in January.

HIS 444  INTERNSHIP (3-12)
The history internship is a variable credit (3-12 hours) required course that encourages juniors/seniors to investigate a career through a placement in a professional setting or in the development of future projects (graduate study). This allows students to work under the guidance of an immediate supervisor and/or a college faculty sponsor. Offered as needed.

HIS 450  SENIOR RESEARCH PROJECT (3)
This course requires students to investigate and write a significant historical paper on a topic of their choice (usually in local history). The research for the paper must include original or archival sources. Prerequisite: Completion of 24 credit hours; Offered in the spring semester.

HIS 479/480  INDEPENDENT STUDY (1, 2, 3)
Qualified students may investigate selected topics with permission of the instructor.

HSM 100  ORIENTATION TO HEALTH CARE PROFESSIONS (3)
This course was developed in collaboration with the Career Discovery Program to offer information to students who have little or no experience in health care prior to selecting a major at D’Youville. This course offers students opportunities to learn about health care careers by hearing from and interacting with health care professionals working in a variety of organizations within a variety of settings. Classes will be held off campus at multiple community locations to expose students to the many careers within health care.

HSM 110  INTRODUCTION TO PUBLIC HEALTH (3)
Public health aims to prevent and treat disease and to promote and protect health through strategies that engage the community. This course will examine the history of public health and core areas of public health including assessment, assurance, and policy development. Students will learn about health promotion and disease prevention of communicable and non-communicable disease, social and behavioral aspects of health, epidemiology, environmental health, and health policy.

HSM 203  MEDICAL TERMINOLOGY (1)
cross listed with RSC 203
This course applies medical terminology including word components (root word, prefix and suffix), medical abbreviations, pathologies and diagnostic tests. Students also learn how to conduct a chart review, interpret admission notes, surgical reports, discharge summaries, and understand the components of a SOAP note.

HSM 210  DELIVERING HEALTH SERVICES (3)
This course presents an overview of the history, structures and operations of health care systems. The course examines resources, processes and outcomes of health systems.

HSM 220  COMMUNITY HEALTH (3)
This course presents an overview of public health agencies, but focuses on methods for creating and maintaining healthy communities. Students will learn how to function in the role of facilitating partnerships between communities, business and government.

HSM 300  HEALTH BEHAVIOR (3)
This course will review the determinants of health-related behavior and important
and evaluate the use of resources in health care delivery and to the methods used to analyze health care cost containment and to the need for partnership with clinical providers to achieve success in providing effective and efficient care. Students will develop and understand the relationship between care and management. This course introduces students to the principles of clinical quality management and examines the phases of project planning and management. Students will learn how to set reasonable goals and determine a time line and budget. They will also learn how to lead and facilitate teams through the work plan. Prerequisite: HSM 320

HSM 410 HEALTH CARE LAW (3) This course introduces students to the major legal issues and principles in the health care field and in the administration of health care services and examines the phases of project planning and management. Students will learn how to set reasonable goals and determine a time line and budget. They will also learn how to lead and facilitate teams through the work plan. Prerequisite: HSM 210

HSM 413 PERFORMANCE IMPROVEMENT IN HEALTH SERVICES (3) This course is designed to introduce the health analytics student to principals of clinical quality management and performance improvements in the healthcare setting. The course will focus on the definition and implementation of quality standards, as well as the methods used by health care delivery systems to better meet evidence-based and measurable standards. The course will also cover the relationship between health care quality, utilization and risk management. Prerequisite: MAT 224

HSM 414 PROJECT PLANNING AND MANAGEMENT (3) This course examines the phases of project and management in health care organizations. Students will learn how to use a systems approach to integrate local, state and federal health care mandates and professional standards in setting reasonable goals, determine a time line and budget. They will learn how to lead and facilitate teams of support staff, professionals and allied health professionals through the work plan. They will learn to present the project verbally and in writing using a variety of presentation formats. Prerequisite: HSM 406

IB 501 THEORETICAL CONCEPTS IN GLOBAL ECONOMICS (3) This course introduces the fundamental theoretical concepts in international economics, including international trade and investment, industrial and economic restructuring, and technological change and innovation. Other topics include economic geography, spatial economics and the principles of locational choice for multinational firms. Prerequisite: Satisfactory completion of previously designated coursework

IB 503 INTERNATIONAL ECONOMICS, FINANCE AND ACCOUNTING (3) This course studies the economic
principles in trade and investment among nations. More specifically, topics such as the international exchange and balance of payments, the scope and significance of international investment and capital movements, and the basics of international financial accounting and reporting are explored. Prerequisite: Satisfactory completion of previously designated coursework

IB 505 INTERNATIONAL NEGOTIATION AND COMMUNICATION (3)
This course is designed to provide an understanding of the aspects of cultural differences among peoples of different countries that significantly affect managing businesses, communicating and marketing products or services in the global economy through the study of major economic regions of the world. Emphasis is placed on the role of managers as leaders, negotiators and facilitators in the international business environment. Prerequisite: Satisfactory completion of previously designated coursework

IB 506 INTERNATIONAL MANAGEMENT (3)
The course covers various areas of knowledge, theories and applications of organizational behavior and human resource management in the global arena. Topics include leadership and organizational styles in different cultures, motivational techniques, managing human resources and cross-cultural training, preparing expatriates for foreign deployment, compensation and related problems in international business, and country-specific factors affecting foreign placement of company personnel. Prerequisite: Satisfactory completion of previously designated coursework

IB 602 MULTINATIONAL CORPORATE FINANCE (3)
This course emphasizes the financial issues that multinational enterprises face. Topics include risk management, financing and investment decisions. Prerequisite: Satisfactory completion of previously designated coursework

IB 604 INTERNATIONAL MARKETING AND RESEARCH (3)
This course is a study of how international business variables affect the marketing process. Emphasis is placed on the mechanics and strategies of international marketing including export and non-export entry modes. The course focuses on product, pricing, promotion and distribution decisions in a global marketplace. Prerequisite: Satisfactory completion of previously designated coursework

IB 605 LEGAL ENVIRONMENT IN INTERNATIONAL BUSINESS (3)
The course investigates international trade organizations, conferences, treaties, export regulations, antitrust laws, securities regulations in the international environment, the Foreign Corrupt Practices Act, laws that provide protection against unfair competition from foreign goods, and laws that provide economic relief to those affected by import competition. Prerequisite: Satisfactory completion of previously designated coursework

IB 607 GLOBAL SUPPLY CHAIN AND LOGISTICS MANAGEMENT (3)
This course examines the escalating importance of international logistics and transportation in world commerce. It emphasizes the importance of increasingly complex global supply chain and product distribution management. Transportation and logistics issues such as export management and documentation, distribution and traffic management are also discussed. Prerequisite: Satisfactory completion of previously designated coursework

IB 608 MULTINATIONAL STRATEGIC MANAGEMENT (3)
This course is an advanced study in global strategic management that allows students to apply and extend skills learned in earlier international business theoretical and functional courses. Students relate recent innovations in international operations management and information technology to business strategy, and integrate core management courses in organization, leadership, strategy, marketing, accounting, finance and cross-cultural concepts from the perspective of a business executive. Prerequisite: Satisfactory completion of previously designated coursework

IB 610 MULTINATIONAL FINANCIAL REPORTING (3)
This course is a study of the accounting aspects of international business. Topics include comparative international accounting systems, practices, reporting and taxation. This course also includes a discussion of the need for and uses of relevant accounting information by managers for planning, forecasting, budgeting and decision making in a global competitive business environment. Prerequisite: Satisfactory completion of previously designated coursework

IB 612 INTERNATIONAL BUSINESS ELECTIVE (3)
Elective courses such as International Banking, Canadian Economic and Business Structures, Economic Integration, or Profiles of World Financial Centers will be offered in the fifth year of the course of study.

IB 614 CURRENT ISSUES IN INTERNATIONAL BUSINESS (3)
This course provides an in-depth knowledge of current work issues, selected topics, specific problems and issues, or analysis of geographical areas of prominence in international trade and investment. Prerequisite: IB 602, IB 604, IB 605, IB 607 or permission of instructor

IB 620 INTERNATIONAL BUSINESS FIELDWORK (9)
This course allows students the opportunity to apply international business knowledge and skills in real-world settings. Assignments include positions in multinational corporations, government agencies and other institutions in the U.S. or abroad. Fieldwork assignments will be arranged on an individual basis. Prerequisite: Satisfactory completion of all fourth-year coursework and good academic standing.

IB/GRA 621 INTERNATIONAL BUSINESS PROJECT SEMINAR I (3)
This course will provide the fundamental framework and support system needed to allow students to formulate a proposal for a viable research study or an applied project of equivalent scholarly rigor in the field of international business. The course perspective is the utilization of theory to frame research questions for applied research problems in international business. The review and critical analysis of components of applied research designs prepare the student to be a producer and consumer of research as a manager. Students will work closely with the instructor to investigate, formulate and describe, in the proper format, a research study or project. Prerequisite: GRA 601

IB/GRA 622 INTERNATIONAL BUSINESS PROJECT SEMINAR II (3)
This course prepares the international business student to complete a graduate research project. Current research is examined to identify appropriate areas of inquiry for students entering the international business field. Prerequisite: GRA 621
IB 630 INTERNATIONAL BUSINESS FIELDWORK (9)
This course is a continuation of IB 620. Prerequisite: IB 620.

IT 101 INTRODUCTION TO INFORMATION TECHNOLOGY (1)
This course provides first-year students an introduction to information technology including social implications and the creation, organization, analysis, storage, retrieval and communication of information. Through interactions in a small group environment, students will become more familiar with the information technology curriculum, career options and ethical issues. Students will learn about the history of information technology. A broad spectrum of information technologies and their impacts will be examined.

IT 111 JAVA PROGRAMMING I (3)
This course is an introduction to computer programming designed to provide the fundamentals for information technology students. The students will learn how to write programs in a modern high-level programming language (JAVA). Lecture and laboratory topics focus on the use of data types, variables, operators, expressions, programming constructs and input/output. Students will also have an introduction to the basics of abstract data types and object-oriented design. Good programming practices such as top-down planning, modularity, debugging strategies and documentation are also introduced and emphasized throughout the course. Prerequisite: IT 101 or working knowledge of computers.

IT 112 JAVA PROGRAMMING II (3)
Designed as a second course in Java programming, this course explores advanced JAVA features such as applets, exception handling, internationalization, multithreading, multimedia and networking. Together with Programming I, the two courses form a comprehensive introductory on JAVA programming. Good programming practices such as top-down planning, modularity, debugging strategies and documentation are reinforced throughout the course. The associated lab component enables students to translate theory into practice. Prerequisite: IT 111.

IT 231 COMPUTER ORGANIZATION AND ARCHITECTURE (4)
This course is an introduction to computer architecture and implementation. Topics include CPU organization, memory, registers, addressing modes, busses, instruction sets, multiprocessor versus single processor, peripheral devices and input/output. Basic digital system concepts such as number systems, Boolean algebra, flip-flops, decoder, encoder, multiplexer, ROM and adder will also be covered. The laboratory provides more insight into the physical aspects of the design and implementation of modern computer systems. Prerequisite: IT 112.

IT 241 DATA STRUCTURES AND ALGORITHMS (3)
This course is a study of the manipulation of data structures, stacks, queues, lists, linked lists and trees. Other topics covered are integration of data structures and efficient algorithms of sorting, merging and searching in a database or file management system. Prerequisite: IT 112; Offered as needed.

IT 251 LINUX SYSTEM ADMINISTRATION AND NETWORKING (3)
This course provides an introduction to the use of Linux, the bash shell environment, X windows and GUIs, managing users and groups, and networking. Additional topics may include installation of NFS services, printer services, e-mail (SMTP and POP3) services, SSH services, Web (HTTP and HTTPS) services, installing MySQL and PHP. Prerequisite: IT 112, or permission of instructor.

IT 252 MICROSOFT WINDOWS SYSTEM ADMINISTRATION AND NETWORKING (3)
This course provides a survey of the Windows Server operating system with the installation and administration of networked workstations and servers as its primary focus. Topics may vary, but will include installation of Linux, Windows, and servers as its primary focus. Topics may vary, but will include installation of Linux, the bash shell environment, X windows and GUIs, managing users and groups, and networking. Additional topics may include installation of NFS services, printer services, e-mail (SMTP and POP3) services, SSH services, Web (HTTP and HTTPS) services, installing MySQL and PHP. Prerequisite: IT 112, or permission of instructor.

IT 261 INTRODUCTION TO BIOINFORMATICS (3)
This course provides an introduction to the concepts and basics of Bioinformatics. Topics may vary, but will include the database and networking components of Bioinformatics, statistical techniques and methodology used in the field, and search techniques applicable to the discipline. Additional topics may include data mining, modeling and simulation, and pattern matching. Prerequisite: IT 101 or permission of instructor.

IT 304 OBJECT-ORIENTED COMPUTING (3)
This course focuses on techniques in problem solving, principles of object-oriented design and modeling, and structured programming using C++. It introduces the fundamental concepts of object-oriented computing: objects, classes, inheritance, abstraction, encapsulation, polymorphism and visibility. The course emphasizes high-level front-end conceptual processes of analysis and design, rather than back-end implementation. By the end of the course, students will gain an appreciation for the object-oriented approach for reusability, extensibility, and easy maintenance, and avoid common software design errors. The C++ programming language is used to link the concepts to real-life software implementation. Prerequisites: Junior standing and IT 112.

IT 315 INTERACTIVE INTERFACE DESIGN (3)
This course is a study of the fundamental design theories of an interactive system. The topic covers the human user, the computer system and the nature of the interactive process. Theory and research along with practical applications are discussed within the context of organizational impact. Programming projects that apply the design principles are required. Prerequisites: Junior standing and IT 112.

IT 323 DATABASE DESIGN AND DEVELOPMENT (3)
This course is an introduction to the state of practices in modern database systems. Topics include database design, database architecture, SQL, normalization, storage structures, query processing, concurrency control, security, recovery, object-oriented and distributed database systems. Programming projects with commercial database systems and tools are required. Prerequisite: IT 241.

IT 331 INTERNET WORKING AND COMMUNICATION (3)
This course introduces basic elements of modern computer and telecommunication networks. The popular Internet, TCP/IP five-layer model as well as OSI seven-layer model will be discussed. In each layer, the state-of-the-art hardware and software technologies are introduced. These include, for example, fiber-optic and mobile/cellular communications, ATM and World Wide...
Web. Technologies and architectures that have been developed for networking over short (LAN) and long (WAN) distances will also be explored. Prerequisites: Junior standing, IT 231 and MAT 120

**IT 338 MODERN OPERATING SYSTEMS (3)**

This course provides an overview of architecture, goals and structure of an operating system. Topics include process management, memory and file system management, scheduling, security and distributed operating systems. Concepts will be illustrated with examples from existing operating systems. Prerequisite: IT 231

**IT 415 SYSTEMS DEVELOPMENT CONCEPTS AND METHODS (3)**

This course is an introduction to information systems development process and methodologies. Topics include product development life cycle and standards, requirements acquisition and analysis, systems design methodologies, implementation techniques, configuration management and quality assurance. Prerequisites: Senior standing, IT 315 and IT 304

**IT 444 INFORMATION TECHNOLOGY INTERNSHIP (3)**

This course encourages juniors/seniors to investigate a career through a placement in a professional setting or in development of future projects (graduate study). This allows students to work under guidance of an immediate supervisor and/or a college faculty sponsor. Offered as needed.

**ITA 101 ITALIAN LEVEL I (3)**

This course is for beginners or those with one year or less of high school Italian, who need to strengthen basic understanding, speaking, reading and writing skills. Offered as needed.

**ITA 102 ITALIAN LEVEL II (3)**

This course is a continuation of ITA 101. Prerequisite: ITA 101 or two years of high school Italian or permission of the instructor. Offered as needed.

**LAT 101 LATIN LEVEL I (3)**

This introduction to Latin teaches basic vocabulary, grammar and reading. Prerequisite: One year or less of high school Latin. Offered as needed.

**LAT 102 LATIN LEVEL II (3)**

This course is a continuation of LAT 101. Prerequisite: Latin 101 or two years of high school Latin. Offered as needed.

**LAT 303 BUSINESS LAW I (3)**

An analysis of the legal principles underlying law of contracts, sales, and torts is the subject matter of this course. Case studies are utilized to help students understand the business legal environment.

**LAT 304 BUSINESS LAW II (3)**

This course is an analysis of the legal principles underlying the law of negotiable instruments, insurance and risk management, agency, partnerships, corporations, real property and wills.

**LSK 065 WRITING SKILLS I (NC)**

This course is designed to introduce students to the process of academic writing, emphasizing organization, clarity and grammar. The instructor guides students through the drafting and editing process, stressing a variety of strategies to initiate, develop and refine written work. This course is three hours per week. Pre/post-test evaluation. Offered in the fall and spring semesters.

**LSK 067 PROFESSIONAL TUTORIAL ASSISTANCE IN WRITING (NC)**

Professional tutors provide support designed to meet the student’s writing needs in their individual coursework via weekly conferences. Specific skills (for example, sentence structure, thesis development, documentation, etc.) are developed during tutorial sessions as needed. This course is 30 minutes to one hour per week. Pre/post-test evaluation. Offered in the fall and spring semesters.

**LSK 068 COLLEGE WRITING FOR TRANSFERS (NC)**

Professional tutors provide support designed to meet the student’s writing needs in their individual coursework via weekly conferences. Specific skills (for example, sentence structure, thesis development, documentation, etc.) are developed during tutorial sessions as needed. This course is 30 minutes to one hour per week. Pre/post-test evaluation. Offered in the fall and spring semesters.

**LSK 078 VOCABULARY ENRICHMENT (NC)**

This course is designed to assist students in developing vocabulary needed in college coursework. Prefixes, suffixes and root words commonly used in the student’s major are also covered. This course is one hour per week and includes a pre/post-test evaluation. Offered in the fall and spring semesters.

**MAT 101 ELEMENTARY ALGEBRA (3)**

The subject matter includes arithmetic and algebraic operations, linear equations and inequalities, quadratic equations, two equations and two unknowns, elementary coordinate geometry and word problems. It does not fulfill the core requirement for math and is not open to those with credit in any other math courses unless recommended by the Learning Center. Prerequisite: LSK 086, a placement test score indicating mastery of the LSK 086 material or permission of instructor; Offered in the fall and spring semesters.

**MAT 102 ELEMENTARY PRACTICAL STATISTICS (3)**

This is an introduction to the theory and application of statistics: sampling, frequency distributions, probability, confidence intervals, hypothesis testing and analysis of variance. Prerequisite: MAT 101, a placement test score indicating mastery of the MAT 101 material or permission of instructor; Offered as needed

**MAT 104 BUSINESS LAW I (3)**

An analysis of the legal principles underlying law of contracts, sales, and torts is the subject matter of this course. Case studies are utilized to help students understand the business legal environment.

**MAT 105 BUSINESS LAW II (3)**

This course is an analysis of the legal principles underlying the law of negotiable instruments, insurance and risk management, agency, partnerships, corporations, real property and wills.

**MAT 1067 PROFESSIONAL TUTORIAL ASSISTANCE IN WRITING (NC)**

Professional tutors provide support designed to meet the student’s writing needs in their individual coursework via weekly conferences. Specific skills (for example, sentence structure, thesis development, documentation, etc.) are developed during tutorial sessions as needed. This course is 30 minutes to one hour per week. Pre/post-test evaluation. Offered in the fall and spring semesters.

**MAT 1068 COLLEGE WRITING FOR TRANSFERS (NC)**

Professional tutors provide support designed to meet the student’s writing needs in their individual coursework via weekly conferences. Specific skills (for example, sentence structure, thesis development, documentation, etc.) are developed during tutorial sessions as needed. This course is 30 minutes to one hour per week. Pre/post-test evaluation. Offered in the fall and spring semesters.

**MAT 1077 PROFESSIONAL TUTORIAL ASSISTANCE IN READING (NC)**

Reading instructors provide support designed according to a student’s needs (for example, reinforcing concepts, comprehension strategies, annotating and study and test-taking skills). This course is 30 minutes to one hour per session and includes a pre/post-test evaluation. Offered in the fall and spring semesters.

**MAT 120 ELEMENTARY PRACTICAL STATISTICS (3)**

This is an introduction to the theory and application of statistics: sampling, frequency distributions, probability, confidence intervals, hypothesis testing and analysis of variance. Prerequisite: MAT 101, a placement test score indicating mastery of the MAT 101 material or permission of instructor; Students who pass MAT 120 cannot subsequently take MAT 123 for credit; Offered in the fall and spring semesters.

**MAT 122 ALGEBRA AND TRIGONOMETRY (3)**

This course explores concepts and graphs of basic functions, including polynomial, rational, radical, logarithmic, exponential
and trigonometric functions. Prerequisite: MAT 101, a placement test score indicating mastery of the MAT 101 material or permission of instructor; Not open to those who have taken MAT 125.

MAT 123  INTRODUCTION TO APPLIED STATISTICS (4)
This course includes the underlying fundamental mathematical principles and their application to a wide range of statistical methods and tests. Included are the following: sampling, frequency distributions, probability, regression, confidence intervals, hypothesis testing, t-test, analysis of variance, chi-square and correlation. Existent computer software such as MiniTab is utilized by students to aid and facilitate the analysis of results. Prerequisites: CSC 110 or CSC 151 or PHY 101L or PHY 103L or PHY 111L, and MAT 101 or a placement test score indicating mastery of the MAT 101 material, or permission of instructor; Not open to those who have taken MAT 120.

MAT 124  INTERMEDIATE APPLIED STATISTICS (4)
This course continues and expands the material present in MAT 123. The course will cover hypothesis testing for variances, symmetric versus asymmetric distributions, non-parametric methods for one, two or multiple samples, measures of association, multifactor analysis of variance, and analysis of covariance. The material focuses on the application of known methods. Large data sets will be employed to explore the methods presented in class. The course will employ one of SPSS, MINITAB or SAS. Prerequisite: Completion of MAT 123 will a grade of C or better, or permission of instructor; Offered fall semester.

MAT 202  CALCULUS III (4)
The course explores the basic techniques for integration as well as elementary transcendental functions and the applications of differential and integral calculus. Prerequisite: MAT 125

MAT 203  CALCULUS III (4)
The subject matter includes multivariate calculus, infinite series, differential equations and matrix algebra. Prerequisite: MAT 126; offered in the fall semester

MAT 220  APPLIED REGRESSION ANALYSIS (3)
The course covers the ideas behind, application of, and evaluation of regression processes, which are used to explore the relationships between variables. This course will cover simple linear regression, multiple linear regression, regression diagnostics, use of qualitative variables as predictors, transformations of variables, collinear data, and logistical regression. The material focuses on the application of known methods. Large data sets will be employed to explore the methods presented in class. The course will employ one of SPSS, MINITAB, or SAS. Prerequisite: Completion of MAT 123 with a grade of C or better, or permission of instructor; Offered fall semester.

MAT 222  STATISTICAL COMPUTING (3)
Students will learn about various types of relational database programs and understand the fundamental aspects of SQL (Structured Query Language). This course covers database concepts, design concepts, database administration, and web-based databases. Students will receive an introduction to the SAS programming language with a focus on manipulation, summarizing, and basic statistical analysis of large data sets. Prerequisite: Completion of one CSC course (CSC 151 preferred) and MAT 123 with a grade of C or better, or permission of instructor; Offered spring semester.

MAT 224  BIOSSTATISTICS (3)
This course provides an introduction to common experimental designs in the health sciences, such as clinical trials, case-control studies, and cohort studies, and the statistical methods used in those studies, including odds ratios, relative risk, logistic regression, longitudinal analysis, and survival analysis. Emphasis is placed on practical data analysis in biology and medicine. The course will employ one of SPSS, MINITAB or SAS. Prerequisite: Completion of MAT 220 with a grade of C or better, or permission of instructor; Offered spring semester.

MAT 228  APPLIED STATISTICAL INQUIRY (3)
The course will cover the process of statistical inquiry, including defining the problem, hypotheses development, selection of appropriate variables, test selection, interpretation of results, and reporting of conclusions. Large data sets will be employed to explore the methods presented in class. Group projects and oral presentations will simulate real life job experiences in the analytics industry. This course will employ one of SPSS, MINITAB or SAS. Prerequisite: Completion of MAT 220, 222, and 224 with a grade of C or better, or permission of instructor; Offered fall semester.

MAT 300  INTRODUCTION TO MATHEMATICAL REASONING (3)
This course introduces the student to abstract mathematics and proofs. Topics covered in the course include logic, sets, relations, functions, proofing methods (including proof by induction, contrapositive and contradiction) and cardinality. Prerequisite: MAT 126

MAT 301  REAL ANALYSIS I (3)
The study of real-valued functions of one variable properties include continuity, uniform continuity and differentiation. Prerequisites: MAT 202 and MAT 300; offered in the fall semester in odd years or as needed.

MAT 302  REAL ANALYSIS II (3)
This course studies Riemann-Stieltjes integration and selected topics. Prerequisite: MAT 301; offered in the spring semester in even years or as needed.

MAT 303  FOUNDATIONS OF GEOMETRY I (3)
This course is a study of symmetry and isometry in two- and three-dimensional space from both the Euclidean and Cartesian viewpoints. Inversion geometries will also be covered as well as group of transformations. Prerequisites: MAT 202 and MAT 300

MAT 304  FOUNDATIONS OF GEOMETRY II (3)
This course covers affine, projective, absolute and hyperbolic geometries as well as vectors and differential geometries. Students will cover some topological problems. Prerequisite: MAT 303

MAT 310  FOUNDATIONS OF MATHEMATICS (3)
This course is a survey of the development of mathematical thought. Prerequisites: MAT 126 and MAT 300

MAT 315  LINEAR ALGEBRA (3)
An introduction to linear systems including matrices, determinants, linear transformations, vector spaces and linear independence. The student will perform most of the computation on a computer, so that familiarity with at least one higher-level programming language is presupposed. Applications include linear programming, graph theory, least squares, Markov chains and differential equations. Prerequisites: MAT 126, MAT 300 and either CSC 151 or IT 111
MAT 318 DISCRETE MATHEMATICS (3)
Discrete mathematics includes topics that are particularly important in computer science. This course provides the student with an introduction to elementary combinatorics (counting methods and graph theory), elementary Boolean algebra and automata theory. Prerequisites: MAT 126 and MAT 300

MAT 321 DIFFERENTIAL EQUATIONS (3)
This course will describe the classical methods for solving first order differential equations, systems of first order differential equations and equations of higher degree. Prerequisites: MAT 126 and MAT 300

MAT 375 MATH MODELING IN BIOLOGY (3) CROSS-LISTED AS BIO 375
This course is an introduction to the wide area of mathematics serving other sciences, more specifically biology. This course will explore the basics of analysis of numerical data, structure of mathematical modeling, consider several biological models such as population model, predator-prey model, molecular evolution and genetics models, and some other models. The course will extensively use computer programming, basic codes will be provided. This course requires a weekly three-hour lecture/computer lab. Prerequisites: BIO 102/L or BIO/CHE 303L; MAT 125; a CSC course

MAT 389/390 SPECIAL TOPICS IN MATHEMATICS (3) Offered as needed.
Topics originate with faculty or students. This course represents an opportunity to study a selected topic in mathematics. Topics originate with faculty or students. Offered as needed.

MAT 401 ABSTRACT ALGEBRA I (3) Offered as needed.
In this course, you will cover groups, quotient groups, homomorphisms, rings and fields. Prerequisites: MAT 126 and MAT 300; offered in the fall semester in even years or as needed.

MAT 402 ABSTRACT ALGEBRA II (3) Offered as needed.
This course covers vector spaces, extension fields, elements of Galois theory. Prerequisite: MAT 401; offered in spring semester in odd years or as needed.

MAT 403 PROBABILITY (3) Offered as needed.
This course is an introduction to probability and basic distribution theory, mathematical expectation, discrete and continuous functions, and generating function. Prerequisites: MAT 126 and MAT 300

MAT 404 MATHEMATICAL STATISTICS (3) Offered as needed.
The theory of the mathematics of statistics; sampling distributions; point and interval estimation; theory and application of testing hypotheses, regression and correlation will all be covered in this course. Prerequisite: MAT 403

MAT 407-408 SENIOR SEMINAR I-II (2-2) Offered as needed.
This course provides an opportunity for dialogue between the senior mathematics major and faculty and peers on mathematical questions. A research paper of a theoretical nature is developed by the student and presented in the group. Prerequisites: Senior status in major or permission of the instructor; Offered as needed.

MAT 410 NUMBER THEORY (3) Offered as needed.
Number Theory is an introductory course in number theory, divisibility, congruences, Diophantine equations, continued fractions and Gaussian Integers. Prerequisites: MAT 126 and MAT 300

MAT 412 GENERAL TOPOLOGY (3) Offered as needed.
This course covers metric spaces, compactness, separation and continuous mappings, topological spaces, compactness, separation and connectedness. Prerequisite: MAT 301

MAT 414 COMPLEX ANALYSIS (3) Offered as needed.
This course studies analytic functions, complex integration and infinite series. Prerequisites: MAT 202 and MAT 300

MAT 417 INTRODUCTION TO GRAPH THEORY (3) Offered as needed.
This course will provide a first introduction to the theories and applications of graphs. Topics covered in the course include basic definitions and examples, paths, cycles, trees, planarity, graph colorings, digraphs and matching. Prerequisites: MAT 126 and MAT 300

MAT 420 INTRODUCTION TO LINEAR MODELS (3) Offered as needed.
Method of least squares, correlation, residual analysis, multiple linear regression, and introduction to generalized linear models. Prerequisite: MAT 404 or permission of instructor.

MAT 421 DESIGN OF EXPERIMENTS (3) Offered as needed.
Method of designing, conducting, and analyzing experiments, overview of sampling methods, sampling distributions, ANOVA, sample size calculations, nonparametric methods, randomized blocks, Latin squares, factorial designs, and the random effects model. Prerequisite: MAT 404 or permission of instructor.

MAT 424 NUMERICAL ANALYSIS (3) Offered as needed.
Numerical solutions to the applications of calculus and linear algebra are covered in this course. Economic and scientific interpretations of functions are stressed. Prerequisites: MAT 126 and either CSC 151 or IT 111

MAT 426 METHODS OF TEACHING MATHEMATICS (3) Offered as needed.
This course covers current issues in mathematics education, secondary school mathematics curriculum and contemporary approaches to the teaching of mathematics. Prerequisites: MAT 126 and MAT 300

MAT 479 DATA ANALYSIS METHODS (3) Offered as needed.
Topics will be chosen by the instructor. Prerequisites: MAT 126 and MAT 300

MAT 480 STATISTICAL APPLICATIONS (3) Offered as needed.
Topics will be chosen by the instructor. Prerequisites: MAT 126 and MAT 300

MAT 499 CAPSTONE EXPERIENCE (1,2) Offered as needed.
This course is designed for students in their final semester. It may be used to focus on an area of study or project in the discipline in which the student has earned the major. Topics will be chosen by the instructor. Prerequisites: MAT 403 or IT 111

MGT 303 PROBLEMS IN MANAGEMENT (3) Offered as needed.
Topical seminars are devoted to issues of interest to those involved in or aspiring to management positions. Special topics include women in management, supervisory strategies, changing roles and the work environment, assertive communicating, time management, conflict resolution, tools for planning and decision making. Prerequisite: MGT 305 or permission of instructor; Offered as needed.

MGT 304 COMMUNICATING IN ORGANIZATIONS (3) Offered as needed.
The course deals with the relation of interpersonal communication to communications strategies in organizations. Students analyze communication networks and the relationship to group characteristics and productivity, leadership and conflict as they relate to communication in the organization. Prerequisite: MGT 305 or permission of instructor; Offered in the fall semester.

MGT 305 PRINCIPLES OF MANAGEMENT (3) Offered as needed.
This course focuses on the nature and theory of management. It emphasizes the functional application of the basic principles of management to realistic business situations. Offered in the fall and spring semesters.

MGT 311 OPERATIONS AND PRODUCTION MANAGEMENT (3) Offered as needed.
This course is an introduction to operations research and business. Topics
include productivity improvement, automation, materials management and facilities management. Prerequisite: MGT 305 or permission of instructor; Offered as needed.

MGT 315  FINANCIAL MANAGEMENT (3)
This course deals with financial statements and financial analysis of business firms, tax considerations, net present value and internal rate of return, budgeting, investments and cost of capital. Prerequisites: ACC 212 and MGT 305 or permission of the instructor; Offered in the spring semester.

MGT 316  PERSONAL COMPUTERS AND E-COMMERCE FOR MANAGERS (3)
The course introduces students to computerized business applications, word processing, spreadsheets, databases, presentation software and e-commerce concepts. Students are given thorough hands-on familiarization of the personal computer and the completion of various business applications on the computer. Prerequisite: Junior standing; Offered in the spring semester.

MGT 318  INFORMATION AND COMMUNICATION TECHNOLOGY MANAGEMENT (3)
The course explores the role, meaning, background and theory of MIS in the organization and focuses on planning, implementation, effect and challenges of management information and communication technologies. Prerequisites: MGT 305, CSC 110 and/or CSC 151 or permission of instructor.

MGT 321  ENTREPRENEURSHIP I (3)
The course is a study of entrepreneurship in today's small business or private practice environment. The student will be brought through the processes of starting and developing one's own business or practice, from the original product or service concept through the birth and growth of the organization. The course will be presented in the context of applicable New York state law. Prerequisite: Junior standing or permission of instructor; Offered as needed.

MGT 323  ENTREPRENEURSHIP II (3)
Using skills acquired in MGT 321, students develop a formal business plan which includes marketing, management, financial and operational components of a business. Prerequisite: MGT 321.

MGT 325  ETHICAL DECISION-MAKING IN BUSINESS (3)
CROSS-LISTED AS PHI 325
This is an applied ethics course that examines policy decisions made in business and their ethical implications in society. Emphasis is placed on the theories of ethics and economic justice in relation to decisions made in business. Prerequisite: PHI 201 or RS 201; Offered as needed.

MGT 389-90 SPECIAL TOPICS IN MANAGEMENT (3)
This is a seminar course in a topic related to the field of management. At the time of offering, a subtitle will indicate the specific content of the course. Prerequisite: MGT 305 or permission of instructor.

MGT 401  ORGANIZATIONAL BEHAVIOR (3)
This course is a study of people as they behave in organizations, motivation, attitudes, personality patterns and their relation to behavior in business and other organizations. Prerequisite: MGT 305 or permission of instructor.

MGT 407  QUANTITATIVE MANAGEMENT DECISION MAKING (3)
The course is a study of decision making as a managerial function. It relates models of decision making to their effectiveness in changing situations. Emphasis is placed on the planning and control in the context of decision-making strategies. Prerequisite: MGT 305 or permission of instructor; Offered in the fall semester.

MGT 410  LABOR RELATIONS (3)
This course deals with the history, legal aspects and issues of management labor relations. Prerequisite: MGT 305 or permission of instructor; Offered as needed.

MGT 411  INTERNATIONAL BUSINESS (3)
This course focuses on the legal, economic, historical, sociological, political and philosophical concepts operative in multinational business. Prerequisite: MGT 305 or permission of instructor; Offered in the fall semester.

MGT 412  MANAGEMENT STRATEGY AND POLICY (3)
This course is designed to demonstrate ways in which various functions and subsystems of the management process are related to and interact with each other. Prerequisites: MGT 401 and 315 or permission of the instructor; Offered in the fall semester.

MGT 425  HEALTH CARE MANAGEMENT (3)
This course deals with working with staff, understanding dynamics of human behavior, goal setting and problem-solving techniques. Prerequisite: MGT 305 or permission of the instructor; Offered as needed.

MGT 440  INTRODUCTION TO MANAGEMENT, MARKETING AND BUSINESS LAW (3)
This is an overview of the principles of management, marketing, organizational behavior and business law with an emphasis on the application of such principles to real-world situations. Prerequisite: Course for international business master's students; Offered as needed.

MGT 441  INTRODUCTION TO ECONOMIC CONCEPTS, STATISTICS AND FINANCIAL ANALYSIS (3)
This is an overview of economic principles, statistical techniques and financial concepts as applied to management. Prerequisite: Course for international business master's students; Offered as needed.

MGT 444  MANAGEMENT INTERNSHIP (3)
This course provides specially selected, highly motivated students with the opportunity for experience in their area of specialization prior to graduation. Offered in the fall and spring semesters.

MGT 445  INTERNSHIP (9-12)
Students receive on-the-job experience in an area of their specialty. Students work 20-35 hours per week for ten to 15 weeks, dependent on desired credit. Prerequisites: 2.5 overall G.P.A., 3.0 major and senior status (86 credits).

MGT 479/480  INDEPENDENT STUDY (1, 2, 3)
Qualified students may investigate selected topics with the permission of the instructor.

MKT 304  PRINCIPLES OF MARKETING (3)
The course focuses on the fundamental concepts of marketing, such as analyses of buyer behavior, product development and distribution, and marketing research, planning and forecasting. Offered in the spring semester.

MKT 306  ADVERTISING/SALES PROMOTION (3)
Advertising is surveyed as a communications system that presents brand information and spurs consumer behavior. Emphasis is placed on the various institutions of advertising. All forms of promotional activities are examined. Prerequisite: MKT 304 or permission of instructor; Offered as needed.

MKT 408  MARKETING RESEARCH (3)
This course examines various research procedures including survey design, sampling, data collection techniques and analysis and reports. Emphasis is given to selected application of marketing research to specific problems. Prerequisite: MKT 304 or permission of instructor.
MNS 499 CAPSTONE EXPERIENCE (1,2)
This course is designed to be a capstone experience in the form of a research experience, internship/practical experience, or service learning experience. Through this course, the student will bring together knowledge and skills learned in coursework into an integrated project that will conclude in a paper and presentation of the student work. Prerequisites: Completion of 80% of the major/minor course requirements.

MUS 100 APPRECIATION OF MUSIC (3)
This is a basic introduction to music with emphasis on elements of music and musical styles. The course seeks to develop an understanding of music as well as the levels and spheres in which music is appreciated. Offered in the fall semester.

MUS 103 CHORUS (1)
Students participate in choral singing on the college level. The course may be taken more than once. Does not fulfill humanities core requirements. Offered as needed.

MUS 200 APPRECIATION OF MUSIC 2 (3)
This course studies music elements, style, form and history through readings and in-depth listening. Students are taught how to listen to music and identify musical period, composer and composition style, orchestration and elements of music. A study of music in the Middle Ages, Renaissance, Post-Romantic era and 20th-century jazz, rock and blues will be included in this course. Prerequisite: MUS 100 recommended but not required; Offered in the spring semester.

MUS 209 INTRODUCTION TO THE AMERICAN MUSICAL THEATER (3)
This course surveys the elements of musical theater, e.g., lyrics, score, dance and design. The historical development of musical theater from opera to American stage musicals is covered. Offered as needed.

NTR 325 NUTRITION AND HEALTH (3)
The course will introduce the student to nutrition science and public health issues related to nutrition. The fundamentals of carbohydrates, protein, lipids, vitamins, minerals and metabolism will be explored. Emphasis will be placed on diet planning and analysis, energy balance and the role of diet and physical activity in a healthy lifestyle and disease prevention. Highlights of current topics in nutrition, such as eating disorders, vegetarian lifestyles and fad diets will also be addressed. Prerequisites: CHE 112, BIO 101/102 or BIO 107/108 or permission of the instructor; Offered in the fall and spring semesters.

NUR 110 POPULATION-BASED NURSING (3)
The history, scope of practice and role of nursing as it relates to preventive health practices and health promotion are introduced. A broad population focused perspective on factors that affect the health of the public, including systems thinking, health and safety, and cultural sensitivity concepts is presented. Epidemiologic factors, health surveillance, and the health-illness continuum are explored. Healthy People National Goals and Objectives are introduced through a service learning component. Prerequisites: Nursing Program Standing.

NUR 210 / NUR 210L HEALTH ASSESSMENT ACROSS THE LIFESPAN (4)
This course focuses on the role of the professional nurse as a direct care provider in terms of assessing the health status of individuals from socially and culturally diverse backgrounds across the life span. Strong emphasis is placed on the application of communication techniques to establish a nurse-patient relationship and to elicit a health history. The course also focuses on the use of physical assessment techniques, namely inspection, palpation, percussion, and auscultation. Assessment findings will be analyzed to identify the health needs of individuals in relation to health promotion. Students are introduced to the role of the nurse as consumer of research as it applies to health assessment and health promotion. Strategies to facilitate patient empowerment and self-responsibility are presented. The outcomes of this course will reflect not only students’ level of skill in performing health assessments, but also in communicating assessment findings using professional documentation standards. Prerequisites: BIO 107, BIO 107L, BIO 108, BIO 108L, PSY 203, CHE 114, CHE 114 L; Pre- or co-requisites: NUR 110, NUR 280, BIO 208, BIO 208L.

NUR 215 WOMEN’S HEALTH ISSUES (3)
This course focuses on health issues unique to women. Current approaches and research are discussed in the light of emotional and sociological needs of this group. The responsibility of women for self-examination and monitoring of their health and the impact of being a woman in today’s world are stressed. The role of the professional nurse as a health care provider, advocate and health teacher in collaboration with other members of the health care team (social workers, teachers, etc.) will be explored. Open to all students.

NUR 216 TRANSCULTURAL NURSING (3)
This course will focus on developing cultural awareness in individuals who practice in the health-related professions. Ethnocentrism, ethnic practices, cultural diversity, workplace cultural behavior and intercultural problems as they relate to health care are presented.

NUR 225 CARE OF PERSONS WITH HIV/AIDS (3)
This course will focus on preparing health care workers to provide holistic care to persons living with HIV/AIDS, their families and significant others, in community or institutional settings. By increasing the student’s knowledge and awareness of the complex related epidemiological, pathological, social and political issues, students will be challenged to an increased awareness of their own values and beliefs that could interfere with giving optimal care to this population. Perspectives of persons living with the illness, health needs of persons living with HIV/AIDS and appropriate nursing interventions will be discussed. Open to all students.

NUR 240 / NUR 240L FUNDAMENTALS OF NURSING (4)
This course focuses on the role of the professional nurse as the direct care provider utilizing the nursing process when planning care for individuals across the lifespan. Strong emphasis is placed on the understanding of the theory required to safely perform technical nursing skills. Students will analyze patient scenarios to identify the nursing skills necessary to provide quality nursing care. Focus is on the patient-centered approach, which considers physiological, developmental, cultural, and spiritual needs, and preferences of the patient. Prerequisites: BIO 107, BIO 107L, BIO 108, BIO 108L, PSY 203, CHE 114, CHE 114 L; Pre- or co-requisites: NUR 110, BIO 208/ BIO 208L, NUR 210, NUR 210L and NUR 280.

NUR 260/NUR 260L NURSING CARE OF THE OLDER ADULT WITH CHRONIC CONDITIONS (5)
This course introduces the student to major concepts related to the care of the older adult patient with chronic illness in a variety of settings. The course will explore theories and concepts related to the aging process in health and illness based upon Maslow’s Hierarchy of Needs. Students will utilize evidence-based practice in the prevention of complications related to chronic disease. Students will employ a wide variety of leading health indicators via assessment tools, evidence-based protocols and standards. Patient safety and prevention of complications related
to chronicity will be emphasized. Students will be provided clinical experiences in a variety of settings. Students will develop the ability to work collaboratively with other healthcare disciplines in providing safe, competent and ethical patient care.

Pre-requisites: BIO 20B, BIO 208L, NUR 110, NUR 210, NUR 210 L, NUR 240, NUR 240L and NUR 280; Pre or corequisite: NUR 285

NUR 280 PATHOPHYSIOLOGY FOR NURSING (3)
This course provides an in-depth study of abnormal physiology with emphasis on nursing implications related to pathologic processes affecting patients across the lifespan. The major body systems and related pathology are explored. Focus is on etiology, manifestation, diagnosis, and treatment of disease from a patient-centered nursing perspective. Prerequisites: BIO 107, BIO 107L, BIO 108, BIO 108L, CHE 114. Pre- or Co-requisite: NUR 110

NUR 285 PHARMACOLOGY FOR NURSING PRACTICE (3)
This course focuses on the role of the nurse as a member of the interdisciplinary healthcare team responsible for the management of health problems using pharmacologic and nonpharmacologic interventions. Major classifications of pharmacologic agents are presented. Emphasis is on patient response across the lifespan, with the goal of preparing students to administer these agents in a knowledgeable, safe, and therapeutic manner. Prerequisites: NUR 280, BIO 208, BIO 208L

NUR 310 HUMAN SEXUALITY (3)
SEE PSY 310
This course is designed to provide students with a multidimensional overview of human sexuality and opportunity to clarify their own sexual value systems. Human sexuality will be considered from biological, cultural, psychosocial, developmental, behavioral and clinical perspectives. Prerequisite: Core course in psychology

NUR 360/ NUR 360L NURSING CARE OF THE ADULT WITH ACUTE AND CHRONIC HEALTH CONDITIONS (7)
This course builds on concepts learned in previous courses and emphasizes care of the adult with acute medical/surgical health conditions utilizing Maslow’s Hierarchy of needs. Students will provide quality care for acute care patients from admission through discharge with emphasis on patient education and health promotion. Students will practice in a variety of clinical settings and laboratory simulations. Students will enhance their ability to work collaboratively with other healthcare disciplines in providing safe, competent and ethical patient care.

Pre-requisites: NUR 260, NUR 260 L, NUR 285; Pre-/Co-requisite: NUR 380

NUR 380 EVIDENCE-BASED PRACTICE (3)
This course is an introduction to the nursing role related to evidence-based practice. Content includes how evidence-based practice contributes to the development of nursing knowledge, improves nursing practice, supports design of nursing systems, and enhances education and professional accountability. The historical evolution of nursing research and evidence-based practice is examined and current issues are analyzed. Ethical considerations and rights of human subjects are explored. As a consumer of evidence-based practice, the student develops the ability to integrate best current evidence with clinical expertise and patient/family preferences and values for delivery of optimal health care.

Pre-requisite: NUR 210, NUR 210 L, NUR 240, NUR 240L or RN to BSN program standing.

NUR 389 SPECIAL TOPICS IN NURSING (1-3)
This course provides students an opportunity to study a selected topic in nursing with a small group of students; topics may evolve from either student or faculty interest. Offerings include a one credit summer clinical experience available to eligible students between their junior and senior years; this option is subject to availability of placements in affiliating health care facilities. Offered as needed.

NUR 440 RN WIP PROFESSIONAL NURSING V RN (6)
This course is the first of two courses for students who are already registered nurses. The focus is on enhancing the students’ knowledge and skills in using nursing theory, utilizing information technology, applying health education theories, and working with interdisciplinary managed care in the health care system when planning care for individuals across the lifespan, families and groups. The roles of the nurse in health promotion, restoration, and maintenance, and as a manager who collaborates with members of the multidisciplinary team, are examined. Emphasis is placed on identifying problems, which need to be addressed through research, and on examining cultural, environmental, political, and economical factors influencing the health care system. The course also includes work on writing skills and, together with the clinical course NUR 440 RNL, meets the requirements for one of the two required courses for the Writing Intensive Program (WIP). Prerequisite: RN license and CPR Certification required for entry; Corequisite: NUR 440 RNL; Distance learning format available based on enrollment; Offered in the spring semester.

NUR 440 RNL CLINICAL NURSING V RN (1)
This course is the first of two clinical courses for students who are already registered nurses. The focus is on providing students opportunities to practice using nursing theories, utilizing information technology, applying health educational theories, and understanding the concept of interdisciplinary managed care when promoting partnerships to enhance the health of individuals across the lifespan, families and groups. Clinical assignments will include a variety of independent experiences where students will develop materials within their portfolio to validate their accomplishment of the course outcomes. Along with NUR 440 RNL, students successfully completing this clinical will meet the requirements for one of the two required courses for the Writing Intensive Program. Prerequisite: RN license and CPR Certification required for entry; Co-requisite: NUR 440 RN; Distance learning format available based on enrollment; Offered in the spring semester.

NUR 460RN -PROFESSIONAL NURSING VI RN (6)
This course is the second of two courses for students who are already registered nurses. The course will focus on the health needs of individuals, families and groups with a major focus on population-based care of communities. These needs are primarily addressed by studying community health issues related to addictions, violence, trauma and complex mental issues; management and leadership; and nursing care of the older adult. These topics are addressed through three learning modules. The roles of professional nurse as a manager, primary care provider, gatekeeper and collaborator within the interdisciplinary health team are emphasized. Research findings are analyzed to evaluate health care in relation to outcomes and cost effectiveness. Included is a focus on developing solutions to problems identified in the analysis of the impact of changes on health care systems or department’s strengths and weaknesses in improving quality, cost effective care. Prerequisite: RN license and CPR Certification required for entry; Co-requisite: NUR 460 RNL; Distance learning format available based on enrollment; Offered in the fall semester.
NUR 460 RNL CLINICAL NURSING VI RN (1)
This course is the second of two clinical courses for students who are already registered nurses. Clinical experiences are in a variety of settings to provide students with the opportunity to develop their knowledge and skill in practicing population focused nursing care. Students will be responsible for obtaining experiences that incorporates community health nursing. Clinical assignments will include a variety of independent experiences as validated by the student’s portfolio. Prerequisite: RN license and CPR Certification required for entry; Co-requisite: NUR 460 RN. Distance learning format available based on enrollment; Offered in the fall semester.

NUR 470/NUR 470L CONCEPTS IN COMMUNITY AND MENTAL HEALTH NURSING CARE (6)
This course focuses on community and population-based care and mental health needs of developmentally, culturally, and spiritually diverse individuals, families, and groups. Emphasis is on utilization of critical thinking, nursing interventions, effective communication, and patient education within mental health and community health settings. Physical and behavioral adaptation is emphasized in the context of a community/mental health continuum and a social systems framework. Prerequisites: NUR 380, NUR 360, NUR 360L.

NUR 471/NUR 471L NURSING CARE OF CHILDBEARING AND CHILDMUCARING FAMILIES (6)
The focus of this course is the role of the professional nurse as a direct care provider, advocate, and collaborative partner in the promotion, maintenance, and restoration of health for childbearing and childrearing families. Learning activities emphasize identification of health-related needs and planning, implementation, and evaluation of evidence-based, patient-centered care. The nurse’s role as a member of the interdisciplinary health care team in a variety of settings is explored. Utilization of informatics and recognition of system effectiveness are incorporated in order to facilitate safe, quality care and optimum health outcomes. Prerequisite: NUR 380, NUR 360.

NUR 480/NUR 480L NURSING CARE OF PATIENTS WITH COMPLEX HEALTH NEEDS (6)
This course focuses on concepts related to the knowledge, skills, and professional behaviors for the patient requiring complex nursing care. These concepts are built from previous courses and applied to the care of patients experiencing advanced or complicated health alterations. The course integrates evidence-based practice, informatics, interdisciplinary teamwork, safety and patient-centered care. Prerequisites: NUR 360/NUR 360L, NUR 380, NUR 470/NUR 470L, NUR 471/NUR 471L, NUR 485; Corequisites: NUR 495.

NUR 485 SYSTEMS LEADERSHIP FOR QUALITY CARE AND PATIENT SAFETY (3)
This course explores organizational and systems leadership, quality improvement and safety measures critical to implementing high quality nursing care. Leadership theory and skills exploring delegation, conflict resolution, ethical decision-making, working relationships and leadership are emphasized. Interprofessional collaboration based on professional nursing standards are explored within the broad context of cultural, economic, organizational and political backdrops. Prerequisites: NUR 360/NUR 360L, NUR 470/470L or NUR 471/471L.

OT 101 OCCUPATIONAL THERAPY PROCESS AND THEORETICAL FOUNDATIONS I (2)
This course is an introduction to the profession of occupational therapy and the occupational therapy process. An historical perspective of the OT profession’s development and the theoretical bases, its professional ethics and regulations, and the role of the OT in society are covered. An introduction to the roles of occupational therapy personnel and how, as professionals, the code of ethics and professional credentials relate to practice is presented. Students will be introduced to the theory, philosophy, and research that guide practice. Current and potential environments for OT practice will be discussed. (2 hour lecture). Prerequisite: OT major.

OT 106 HYB OCCUPATIONAL DEVELOPMENT I (4)
This course consists of a study of normal occupational, neuromotor, sensory, perceptual, cognitive and psychosocial development from prenatal through adolescence. It includes analysis of occupation as a facilitator and marker of human development. An in-depth exploration of the occupational therapy practice framework, domain and process is provided. The lab includes observation of developmental markers and task analysis of developmentally appropriate occupations. (3 hour lecture, 2 hour lab). Prerequisite: OT major.

OT 109 MEDICAL & SOCIAL CONDITIONS I (2)
This course provides an overview of selected medical and social conditions that affect engagement in occupation in childhood and adolescence. Topics include selected developmental, musculoskeletal, mental health conditions and disabilities, and social conditions that affect development, such as child abuse/neglect, poverty and educational level. (2 hour lecture). Prerequisite: OT major.

OT 210 MEDICAL AND SOCIAL CONDITIONS II (2)
This course provides an overview of selected medical and social conditions that affect engagement in occupation for adults and older adults. Topics include selected neurological, cardiopulmonary, medical, and psychosocial conditions and disabilities. End-of-life issues are addressed. Social conditions such as unemployment, family structure and elder abuse are discussed. The impact of environmental conditions on health is also addressed. (2 hour lecture). Prerequisite: OT major.

OT 212 HYB OCCUPATIONAL DEVELOPMENT II (4)
This course includes a study of normal occupational, physical, cognitive, psychosocial and neuromuscular development from young adulthood to senescence. It emphasizes occupational choice, role performance and analysis of occupation as a facilitator and marker of human development. The lab includes analysis of developmentally appropriate occupations, application of teaching learning principles, and general safety and wellness promoting behaviors. (3 hour lecture, 2 hour lab). Prerequisite: OT 106.

OT 214 INTERPERSONAL SKILLS (2)
This course is a study of selected interpersonal communication theories and skills that are the foundation of effective professional relationships and therapeutic use of self. It includes discussion, skill building and role playing with critiquing. (1 hour lecture, 2 hour lab). Prerequisite: OT major.

OT 215 HYB OT DELIVERY SYSTEMS (2)
This course is an examination of delivery models in which occupational therapists function. The health care system will be included, as will the educational system, the social system and the community. Examples of OT programs will be presented within each system of delivery and delivery model that affects OT practice. Traditional and non-traditional models of delivery of OT services will be described. (2 hour lecture). Prerequisite: OT major.
OT 217 GROUP PROCESS (2)
This course is a study of selected group process theories and skills that are the foundation of effective group relationships, therapeutic use of self, and group leadership. This course includes discussion, skill building, and role playing with critiquing. [1 hour lecture, 2 hour lab]. Prerequisite: OT major.

OT 218 INTERPERSONAL DYNAMICS IN OCCUPATIONAL THERAPY (3)
This course is a study of the human factors in the therapy process including self and others, communication, conflict, and group interaction. [2 hour lab, 1 hour lecture]. Prerequisite: OT major.

OT 319 FUNCTIONAL ANATOMY (5)
This course includes a study of human anatomy with emphasis on the musculoskeletal and nervous systems. It integrates human anatomy with analysis of movement including measurement of action, movement within a task and biomechanics. The course includes lab and lecture. The lab includes gross anatomy prosections, CD-ROM and experiential kinesiology. [3 hour lecture, 4 hour lab]. Prerequisite: BIO 107 and BIO 108.

OT 320 NEUROSCIENCE FOR REHABILITATION (5)
This course is a study of the anatomy and physiology of the nervous system, neurological factors underlying dysfunction, and occupational therapy approaches to treatment. It integrates neuroanatomy and physiology with movement, sensation, cognition, perception, and psychological function. Selected practice models addressing psychosocial, pediatric and adult physical disabilities will be studied. Course includes lecture and lab. Lab and recitation include neuroanatomy models, neuropsychology CD-ROM, recitation, guided practice on selected therapy techniques and treatment planning based on case studies. [4 hour lecture, 4 hour lab, 1 hour recitation]. Prerequisite: OT 319.

OT 321 FIELDWORK SEMINAR I (0)
This seminar is designed to involve students in the analysis and preparation for professional practice, to introduce students to the fieldwork process, and to prepare them for fieldwork selection. [1 hour per week]. Prerequisite: OT major.

OT 425 OCCUPATIONAL THERAPY PROCESS AND THEORETICAL FOUNDATIONS II (2)
This course is an introduction to the theories, philosophies and research that guide practice in OT. Pediatric (referring to both children and adolescents) practice environments will be described and pediatric models will be studied. [2 hour seminar]. Prerequisite: OT 101 and OT 320.

OT 427 METHODS OF EVALUATION AND DOCUMENTATION I (2)
This course is an introduction to the principles and techniques of OT evaluation and documentation. The evaluation process, types of assessments, and the interpretation and documentation of evaluation data pertinent to pediatric practice will be included. [1 hour lecture, 2 hour lab]. Prerequisites: OT 101, OT 109, OT 210, OT 212, and OT 214; Co-requisite: OT 425.

OT 429 CHILD AND ADOLESCENT INTERVENTION (4)
This course is an application of OT concepts and processes to prevent and remediate occupational role dysfunction in individuals from infancy through adolescence. It includes exploration and application of selected therapeutic methods, strategies, and techniques. The laboratory includes guidance and practice in treatment methods. Level I fieldwork experience with children or adolescents is included. [2 hour lecture, 3 hour lab, level I fieldwork]. Prerequisites or corequisites: OT 101, OT 109, OT 210, OT 212, OT 320, OT 425, and OT 427.

OT 432 FIELDWORK SEMINAR II (0)
This seminar is designed to prepare students for fieldwork experiences and responsibilities. Personal and professional behaviors required on fieldwork are discussed. Strategies for success in fieldwork are offered, and preparation/arrangements for fieldwork will be finalized. [1 hour per week]. Prerequisite: OT 321.

OT 433 METHODS OF EVALUATION AND DOCUMENTATION II (2)
This course is a continuation of OT 427 and offers an in-depth study of the evaluation and documentation principles and procedures used by occupational therapists. The evaluation process, types of assessments, and the interpretation and documentation of evaluation data pertinent to occupational therapy practice with adults and elders will be studied. [1 hour lecture, 2 hour lab]. Prerequisite: OT 427.

OT 434 ADULT AND GERIATRIC INTERVENTION (4)
This course is an integrated theory and practice course examining OT models and techniques for prevention and remediation of role dysfunction and maintenance of competence and adaptation in individuals from adulthood through senescence. Includes exploration of related research, introductory and advanced therapeutic assessments, and techniques. Laboratory includes guidance and practice in the implementation of assessment and treatment methods. Level I fieldwork experience with adults or elders included. [2 hour lecture, 3 hour lab, level I fieldwork]. Prerequisites: OT 320, Prerequisite or co-requisite: OT 433, OT 635.

OT 524 RESEARCH SEMINAR (3)
This seminar introduces students to the entire thesis/project process required to complete the master’s degree in OT. Students will learn how to search for and appraise literature pertinent to a topic suitable for OT research and evidence-based practice. [3 hour seminar]. Prerequisites or corequisites: OT 101; OT 425.

OT 602 INT RESEARCH METHODS IN OCCUPATIONAL THERAPY (3)
This course will assist the student in developing an understanding of the research process. Emphasis will be placed on the occupational therapist as a producer and consumer of research. Students will undertake a conceptual review of research designs and methods relevant to the profession. [3 hour seminar]. Prerequisite/corequisite: MAT 123.

OT 605 (ELECTIVE) CLINICAL FIELDWORK (VARIABLE CREDIT PER ARRANGEMENT WITH ACADEMIC FIELDWORK COORDINATOR)
This OT elective course allows for a third-level II fieldwork experience in a setting or with a population that differs from OT 640 and OT 641.

OT 610 RESEARCH DEVELOPMENT (3)
This course provides a detailed overview of the thesis/project process and guides students in the development of a defensible thesis or project proposal. [3 hour seminar]. Prerequisites: OT 524 and OT 602.

OT 629 RESEARCH ADVISEMENT (3)
This course provides for a systematic investigation of a research problem selected by the student as an independent learning situation with faculty guidance. Students complete a thesis or project according to the college and/or department research guidelines. Students must register for their research director’s section. Prerequisite: OT 610.

OT 630 CONTINUED RESEARCH ADVISEMENT (1)
This course provides continued faculty guidance to complete either the thesis or research project. Students must register for their research director’s section. Prerequisite: OT 629.
OT 635 OT PROCESS AND THEORETICAL FOUNDATIONS III (2)
This course is a continuation of the study of the theories, philosophies, and research that guide occupational therapy practice. Adult and geriatric practice environments and practice models will be studied. [2 hour seminar]. Prerequisite: OT 425.

OT 640 CLINICAL FIELDWORK I (4)
This course allows an in-depth Level II fieldwork experience that is integral to and consistent with the sequence, depth, focus and scope of content in the curriculum design of the program. Level II fieldwork can take place in a variety of traditional or emerging practice areas that are consistent with curriculum design and in which supervision will be provided by a currently licensed or credentialed OT, who may or may not be on-site. Each Level II fieldwork course is generally a full-time experience but options can vary from one placement to four, and in some instances be part-time. Prerequisites: OT 215, OT 427, OT 429, OT 432, OT 433, OT 434 and OT 635.

OT 641 CLINICAL FIELDWORK II (4)
This course allows an in-depth Level II fieldwork experience that is integral to and consistent with the sequence, depth, focus and scope of content in the curriculum design of the program. Level II fieldwork can take place in a variety of traditional or emerging practice areas that are consistent with curriculum design and in which supervision will be provided by a currently licensed or credentialed OT, who may or may not be on-site. Each Level II fieldwork course is generally a full-time experience but options can vary from one placement to four, and in some instances be part-time. Prerequisites: OT 215, OT 427, OT 429, OT 432, OT 433, OT 434 and OT 635.

OT 643 MANAGEMENT OF OCCUPATIONAL THERAPY SERVICES INT (3)
This course is an advanced, in-depth analysis of the knowledge and practical skills required for the application of the principles of management within the various systems in which the provision of occupational therapy services to individuals and organizations takes place. Students will participate in interactive distance learning activities on the Internet and perform independent learning activities and assignments while on Level II fieldwork. Students will be in contact via electronic communication with faculty and fellow classmates and engage in group discussions and project activity related to course material. [3 hour Internet activities per week]. Co-requisite: OT 641.

OT 689 PROFESSIONAL ISSUES II (2)
This course involves critical analysis of current professional issues specific to the delivery of services provided by occupational therapists functioning in a variety of systems and roles. Regulatory agencies, legal concerns, reimbursement, specialization, grantsmanship, validation of theory, and development of philosophy are included as important issues. [2 hour seminar]. Prerequisite: OT 640 or OT 641.

OT 690 COMMUNITY PRACTICE (2-3)
An advanced practicum in a community-based or education-based setting, for the purpose of exploring new, non-traditional, or specialty applications of occupational therapy knowledge and skills. Requirements are based on a contract negotiated between the student and the preceptor, and approved by the course coordinator. Individuals with a variety of professional backgrounds and education levels may serve as preceptors. [Practicum (variable 5 – 15 hours per week) and 1 hour seminar per week] Prerequisite: OT 640 or OT 641.

PA 303 CLINICAL MEDICINE I (5)
This course is a comprehensive study of diseases with emphasis on etiology, pathophysiology, signs and symptoms, diagnostic procedures, critical review of medical literature, preventive care and therapeutic measures involved in treating medical problems. Topics will be presented through demonstrations, discussions and clinical conferences as well as lectures by physicians, physician assistants and other appropriate health professionals. This course will include discrete blocks on major organ systems and special populations. It is closely integrated with the pharmacology, clinical skills and physical diagnosis courses. Prerequisites: BIO 339 and BIO 307; Corequisites: PA 335, PA 309 and PA 312; Offered in the fall semester; Open to physician assistant students only.

PA 304 CLINICAL MEDICINE II (5)
Continuation of Clinical Medicine I. Prerequisite: PA 303; Corequisites: PA 336, PA 311, PA 313 and PA 310; Offered in the spring semester; Open to physician assistant students only.

PA 305 BEHAVIORAL MEDICINE (2)
This course focuses on understanding human behavior in health and illness. Health, illness and sick role behaviors, psychosocial factors in the etiology of illness, patient compliance with prescribed therapeutic regimens, use of health behavior models in patient education, health maintenance, and disease prevention and sexuality will be discussed. Offered in the fall semester; Open to physician assistant students only.

PA 309 CLINICAL LABORATORY MEDICINE I (2)
This course explores common laboratory procedures employed in the evaluation of disease processes. Students develop proficiency in interpreting clinical laboratory values in relation to disease, therapy and prognosis. Prerequisites: BIO 208, CHE 122 or equivalent; Corequisites: PA 303, PA 335 and PA 312; Offered in the fall semester; Open to physician assistant students only.

PA 310 CLINICAL LABORATORY MEDICINE II (2)
This course is a continuation of PA 309. Prerequisite: PA 309; Corequisites: PA 304, PA 336, PA 315 and PA 311; Offered in the spring semester; Open to physician assistant students only.

PA 311 CLINICAL SKILLS (3)
Proper methods of performing various clinical procedures such as intravenous catheter insertion, intramuscular injections, passing nasogastric tubes, applying casts and drawing blood will be covered in this course. Prerequisites: BIO 208 and BIO 240; Corequisites: PA 304, PA 310, PA 336 and PA 312; Offered in the spring semester; Open to physician assistant students only.

PA 312 PHYSICAL DIAGNOSIS I (2)
Most of the course is devoted to the development of physical examination skills and the art of developing a rapport with patients. By the end of the course, students will have received instruction and training in basic communication skills and how to conduct a medical interview, as well as training in techniques of physical diagnosis. The course includes the use of simulated patients, as well as a range of field experiences to provide direct contact with patients and practicing physicians. This allows students to interact with patients and to integrate knowledge and skills in the setting of clinical interactions. Prerequisite: BIO 240; Corequisites: PA 304, PA 310, PA 311 and PA 336; Offered in the fall semester; Open to physician assistant students only.

PA 313 PHYSICAL DIAGNOSIS II (2)
This course is a continuation of PA 312. Prerequisite: PA 312; Offered in the spring semester; Open to physician assistant students only.
PA 335 PHARMACOLOGY I (3)
This course includes topics such as pharmacotherapeutics, drug absorption, distribution and metabolism and drug interactions. The course is closely integrated with the clinical medicine course. All major systems of the body are covered in relation to drugs and diseases. Prerequisites: BIO 107, BIO 108 and BIO 303; Corequisites: PA 303, PA 309 and PA 312. Offered in the fall semester; Open to physician assistant students only.

PA 336 PHARMACOLOGY II (3)
This course is a continuation of Pharmacology I. The course explores clinical pharmacology and medical therapeutics, including disease states and their medical management. Prerequisite: PA 335; Corequisites: PA 304, PA 310, PA 311 and PA 313. Offered in the spring semester. Open to physician assistant students only.

PA 401B INTERNAL MEDICINE (3)
Over a four-week period, the course provides the foundation for clinical evaluation and treatment. Training may occur in inpatient internal medicine in hospitals or outpatient internal medicine. The rotation will expose the student to adult populations and their medical problems. The student will learn clinical presentation of general medical problems, evaluation, therapeutic intervention and methods of documentation. Prerequisite: Successful completion of all third-year courses; Open to physician assistant students only.

PA 401C FAMILY MEDICINE (3)
This course is presented on a four-week rotation and exposes students to patients from all age groups, from pediatrics to geriatrics. Students will learn the clinical presentation of general medical problems, evaluation, therapeutic intervention and methods of documentation in a family practice setting. Prerequisite: Successful completion of all third-year courses; Open to physician assistant students only.

PA 402 GENERAL SURGERY (3)
During the four-week general surgery rotation, students will learn management of surgical patients in the hospital and in ambulatory settings including presentation and workup of common surgical problems, as well as surgical interventions, and in-hospital care of the pre-and postoperative patient. Prerequisite: Successful completion of all third-year courses; Open to physician assistant students only.

PA 403 GENERAL PEDIATRICS (5)
This six-week rotation provides the opportunity to assess medical problems that require both inpatient and outpatient management of children. Students will get practical clinical experience in the outpatient setting managing routine childhood illnesses and health maintenance, and with the medical team in the hospital at the time of delivery assessing, the newborn and caring for children with more severe medical problems. Documentation in the medical record will augment skills previously acquired for data collection. Students will come to understand the influence that family interactions can have on the course of the patient’s development, well-being and illness. Prerequisite: Successful completion of all third-year courses.

PA 404 OBSTETRICS AND GYNECOLOGY (3)
OB/GYN is a four-week rotation with the purpose of providing practical clinical experience for the evaluation and treatment of women. Experience will be gained in the areas of general women’s health; family planning, pre-, intra- and postpartum care; as well as routine gynecologic care for sexually transmitted diseases, dysmenorrhagia and menopausal health. Students will come to understand the effects that sexual activity, childbearing and menopause have on a woman’s psychological, social and medical well-being. Prerequisite: Successful completion of all third-year courses.

PA 405 PSYCHIATRY (3)
The purpose of the four-week psychiatry rotation is to provide the student with clinical experience in the varied presentations of mental illness. The student will have an opportunity to evaluate, identify and learn management of both acute and non-acute psychiatric patients. Prerequisite: Successful completion of all third-year courses.

PA 406 EMERGENCY MEDICINE (3)
Emergency medicine is a four-week rotation with the purpose of providing practical clinical experience in the care of acute medical emergencies. Students will develop an understanding of the concept of triage in an emergency situation where care is provided to the development of physical examination skills, and the art of developing rapport with patients. By the end of the course, students will have received preceptored and training in basic communication skills and how to conduct a medical interview, as well as future care. Prerequisite: Successful completion of all third-year courses.

PA 407 GERIATRICS (1)
The two-week course will take place in a freestanding, long-term care facility or inpatient skilled nursing facility and provide students with experience addressing the special needs of this patient population. Prerequisite: Successful completion of all third-year courses.

PA 408 ORTHOPEDICS (3)
The four-week orthopedics rotation will give students the opportunity to observe treatment of common musculoskeletal complaints. The rotation will combine clinical experience in an ambulatory practice setting with following orthopedic patients in the hospital. Prerequisite: Successful completion of all third-year courses.

PA 500 PROFESSIONAL ISSUES (1)
This course provides a historical perspective of the physician assistant profession, as well as content related to current trends and issues. The course will include discussion of the importance of professional responsibility in the health care role, as well as information on professional organizations, graduate certification and re-certification, employment considerations, professional liability and prescriptive authority. Open to physician assistant students only.

PA 501 ELECTIVE I (3)
Elective Clinical Rotation I offers an opportunity for physician assistant students to explore subspecialty areas of medicine not covered in the current curriculum, spend more clinical time in primary care, or work with a physician that has been identified as a potential employer. Open to physician assistant students only.

PA 502 ELECTIVE II (3)
Elective Clinical Rotation II offers an opportunity for physician assistant students to explore subspecialty areas of medicine not covered in the current curriculum, spend more clinical time in primary care, or work with a physician that has been identified as a potential employer. Open to physician assistant students only.

PA 503 PRIMARY CARE (6)
Primary care, an eight-week rotation, provides the opportunity to refine the foundation in clinical evaluation and treatment and to establish patient education and community education skills. This will occur in a setting, which provides continuity of patient care and the opportunity to establish an ongoing preceptor/P.A. relationship. Training
occurs over an eight-week period at a single clinical site. Open to physician assistant students only.

**PA 504 GRADUATE SEMINAR I (1)**
Graduate Seminar I offers an opportunity for physician assistant students to receive instruction in professional practice, community service, patient education, medical malpractice legislation, recognizing an impaired medical provider and other issues pertinent to their development as health care professionals. The students will also have an opportunity to participate in clinical enrichment lectures and workshops, focusing on particular issues pertaining to medical management of the critically ill inpatient. Open to physician assistant students only.

**PA 505 GRADUATE SEMINAR II (1)**
Graduate Seminar II offers an opportunity for physician assistant students to receive instruction in areas of professional practice, to receive additional enrichment in areas of particular clinical interest to the student, and to address other issues pertinent to their development as health care professionals. Open to physician assistant students only.

**PA 509 NEUROANATOMY (3)**
This course is an in-depth training of the student to the human nervous system. Topics include embryology, neurophysiology, neuroanatomy, pathology, psychiatry and pharmacology. The accompanying lab will reinforce topics covered in the class, and include review of neurologic, sensory and psychiatric physical exam. Open to physician assistant students only.

**PA 511 MED MICRO-MODIFICATION (3)**
Medical micro-modification will emphasize diagnosis, disease progression and therapies in patients with infectious diseases. Building upon the clinical experiences of the PA student during their clinical rotation, this course will focus on recognizing specific infectious diseases and their causative organisms. The student will be expected to develop and understanding of disease progression as it relates to the pathophysiology of infection and treatment. With this context in mind, the course will develop the skills of the PA student to render a differential diagnosis, formulate a diagnostic workup and recommend appropriate treatment for the disease state. Open to physician assistant students only.

**PA 512 ALTERNATIVE MEDICINE (3)**
This class will offer insight into the modalities of alternative medicine. Today’s health care providers need to be proficient in alternative therapy to Western medicine. Much of the population is looking into the alternative treatment methods available for a variety of medical problems. This course will review in detail the many different options that are available to the patient who is not satisfied with Western modalities or the patient who would like to try a different approach to treatment. The combination of both treatment methods can be very successful in treating medical problems. This course will review the wide array of available modalities. The course will also include lectures from alternative medicine practitioners. Open to physician assistant students only.

**PA 603 APPLIED RESEARCH METHODS (3)**
This course will introduce the graduate-level PA student to concepts of critical thinking related to scientific research. The course will emphasize the rigor involved in completing the research project required as part of the master’s degree portion of the PA degree. In this course, the student will be introduced to quantitative, qualitative and survey methods of research. Students will be instructed on critical review of the medical literature from peer-reviewed journals. A review of creative writing and concepts in performing literature searches is provided. The framework for completion of the subsequent phases of the research project (Applied Project Seminar I & II) will be introduced during Research Methods. Finally, the PA student will choose their research topic.

**PA 604 APPLIED PROJECT SEMINAR I (3)**
During this course, the student completes the first phase of the research project: the research proposal. The PA student is guided through the sequence of developing the research project, completing an outline of objectives for the project and creating a clear vision of the importance of the original project. During the second phase of the course, the student completes a literature review applicable to the research topic. The third phase involves developing the materials and methods and then applying for approval of the project through the Institutional Review Board (IRB) at D’Youville. The PA student can then proceed to completion of the project in Applied Project Seminar II (APSI).

**PA 605A APPLIED PROJECT SEMINAR II (APSI) (3)**
During this course the PA graduate student will complete their research project. During the last six months of their training, the PA student will collect data or complete surveys based upon the research method pertaining to their project. The student is guided at interpretation of the data, presentation of the data in the results and conclusions from the data. The student then defends their project with a poster presentation at the end of their training.

**PA 606 INT MEDICAL EPIDEMIOLOGY (3)**
This online course will explore how the study of epidemiology is applied to the discipline of medicine. The course will review general definitions of epidemiology, disease transmission, measures of outcome of disease (morbidity and mortality) and screening methods to measure disease. In addition, the study of preventative and therapeutic intervention, through randomized trials, will be explored. The second phase of the course will review study design (ie., case control) and how it is applied to identify cause for disease states. The final phase of the course will review how genetic and environmental factors influence diseases and how molecular biology plays a role in medical epidemiology.

**PH 301 HEALTH BEHAVIOR (3)**
This course will review the determinants of health-related behavior and important theories, as well as discuss how these theories can be practically applied in planning, implementing, and evaluating public health programs. This course will begin to answer the meta-question as it relates to health behavior: “Why do people do what they do?” Prerequisite: HSM 110

**PH 302 GLOBAL HEALTH (3)**
The capstone experience will be designed to integrate, synthesize and apply knowledge as developed throughout the student’s academic program. Students will be eligible to complete their capstone in their junior or senior year (senior status will be required for the thesis option). The undergraduate student will have four options for completion of the capstone requirement: internship, study abroad, honors thesis or independent study. All capstone experiences will require prior approval from the chair before work can begin. Prerequisite: HSM 110
PHI 101 PHILOSOPHY AND THE HUMAN CONDITION (3)
This course explores divisions of philosophy and the perspectives of major philosophers and movements. Emphasis is placed upon central philosophical problems such as the relationship between mind and body, the possibility of human freedom, the existence of God, and the scope and limits of human understanding. Offered as needed.

PHI 201 ETHICS IN THEORY AND ACTION (3)
This course is an examination of human conduct and responsibility and the relationships between individuals and society. Offered in the fall and spring semesters. Prerequisite: at least sophomore status.

PHI 204 LOGIC AND PRACTICAL REASONING (3)
This course is a study of formal reasoning methods through informal fallacies, class logic and introduction to propositional logic. Offered in the fall semester.

PHI 214 CHALLENGES OF DEATH (3)
SEE RS 214
This course examines the ways that death challenges human meaning and action. Topics include the meaning of suffering and death, challenges of death to morality, psychological spiritual processes of dying and bereavement. Offered in the fall and spring semesters.

PHI 280 WESTERN ANCIENT PHILOSOPHY (3)
This course takes a thematic approach covering the central philosophical ideas of the classical period from pre-Socratics to Plotinus. Emphasis is placed on the contributions of Plato and Aristotle to the development of Western philosophy and culture. Prerequisite: Philosophy 101 or 201 or permission of instructor; Offered as needed.

PHI 305 HISTORY OF MODERN PHILOSOPHY I (3)
This course explores the metaphysical and epistemological theories in their relation to a study of the main philosophical controversies in the 16th and 17th centuries. Students read works from Hobbes, Descartes, Spinoza, Leibniz, Locke, Berkeley and Hume, and are given a background on Kant. Offered as needed. Prerequisite: PHI 201 or at least sophomore status.

PHI 306 SOCIAL AND POLITICAL PHILOSOPHY (3)
SEE PSC 342
This course focuses on social and political theories in their relation to philosophic problems, the nature of social and political institutions and the grounds for sound social and political decisions. Prerequisite: PHI 201 or RS 201; Offered as needed.

PHI 307 METAPHYSICS (3)
This course deals with traditional and contemporary theories of reality and change, being, transcendentals and causality. Prerequisite: PHI 101 or junior or senior status; Offered as needed.

PHI 308 EASTERN PHILOSOPHY (3)
This course surveys Confucianism, Taoism, Buddhism and Zen and compares Eastern and Western traditions. Prerequisite: Sophomore, junior or senior status; Offered as needed.

PHI 309 PHILOSOPHICAL PERSPECTIVES: IDEAS IN CONFLICT (3)
This course is designed to acquaint students with major philosophical themes and problems that have become the framework of the philosophical enterprise. The continuity of prominent issues is emphasized, (e.g., freedom and determinism, faith and reason, universals and problems of logic and language). The methods of rationalism and empiricism underlie the approach to these perennial issues. Prerequisite: PHI 201 or RS 201 or permission of the instructor; Offered in the spring semester of even-numbered years.

PHI 310 HISTORY OF MODERN PHILOSOPHY II (3)
This course is a study of the philosophical influence of Kant and Hegel’s epistemological and metaphysical development throughout the 19th and early 20th centuries. Selected works of Schopenhauer, Nietzsche, J.S. Milland and C.S. Pierce are considered. Prerequisites: PHI 201 or at least sophomore status. Offered as needed.

PHI 312 BIOETHICS SEMINAR (3) SEE RS 312
This course analyzes ethical dilemmas and problems posed by developments in the biosciences. Problems discussed include choices for life or death, allocation of resources, human experimentation, reproductive technologies and professional-client relationships. Offered yearly.

PHI 316 INTERMEDIATE LOGIC (3)
The course deals with the syntax of propositional calculus and first order quantification theory. Prerequisites: PHI 204 or MAT 101, MAT 117 or MAT 125. Offered as needed.

PHI 325 ETHICAL DECISION MAKING IN BUSINESS (3)
SEE MGT 325
This is an applied ethics course that examines policy decisions made in business and their ethical implications in society. Emphasis is placed on the theories of ethics and economic justice in relation to decisions made in business. Prerequisite: PHI 201 or RS 201; Offered as needed.

PHI 336 PROBLEMS IN PROFESSIONAL ETHICS (3)
SEE NUR 336
This is an interdisciplinary course that examines how sociopolitical conditions have contributed to the self image and value crisis in the health professions. A variety of problem-solving techniques are studied in order to offer alternative social policies that would reconstruct the identity of the professions. Prerequisite: PHI 201 or RS 201; Offered as needed.

PHI 401 PHILOSOPHY OF THE PERSON (3)
This course examines the human person and personality in its philosophical context as well as the individual and society, alienation and self affirmation. Prerequisite: PHI 101 or junior or senior status; Offered in the spring semester.

PHI 402 AMERICAN PHILOSOPHY (3)
This course deals with the development of American philosophical thought from the 17th century to the present. Prerequisite: PHI 101 or junior or senior status; Offered as needed.

PHI 404 CONTEMPORARY THOUGHT (3)
This course focuses on major contemporary currents as well as dialectical materialism, phenomenology, existentialism, analytic philosophy and representative readings. Prerequisite: PHI 101 or junior or senior status; Offered as needed.

PHI 409 PHILOSOPHY OF EDUCATION (3)
This course is a study of the underlying philosophical assumptions that govern
educational theories. Among the theories evaluated are perennialism, essentialism, experimentalism and reconstructionism. Prerequisite: PHI 101 or junior or senior status; Offered as needed.

**PHI 410  PHILOSOPHY OF RELIGION (3)**  
SEE RS 410  
This course analyzes ideas relevant to religious belief through a discussion of these ideas and the philosophical studies deriving from them. Prerequisite: PHI 101 or junior or senior status.

**PHI 411  MYSTICISM (3)**  
SEE RS 411  
This course defines mysticism, the history, theory, phenomena and practices of selected mystical schools and the positive and negative aspects of the mystical experience. Prerequisite: sophomore, junior or senior status; Offered as needed.

**PHI 420  MYSTERIES OF THE MIND (3)**  
This course is an introduction to the philosophy of the mind. It investigates a series of problems concerning the mind and its place in the natural world. Students in the course will have an opportunity to read and discuss works of philosophy that deal with issues such as the mind-body problem, the nature of consciousness, artificial intelligence, self-knowledge and mental causation. Counts as a philosophy core in humanities core.

**PHI 423  PHILOSOPHY OF ART (3)**  
This course investigates and assesses the value dimensions of fine art endeavors. These endeavors include but are not limited to theater arts, drawing, painting, photography, architecture, dance and music. It explores the fundamental question of “what is art?” and analyzes a range of aesthetic works for their instrumental or intrinsic worth. Prerequisite: Completed area coursework for minor in fine arts or permission of the instructor.

**PHI 444  INTERNSHIP (3-12)**  
The philosophy internship is a variable credit (3-12 hours), required course that encourages juniors/seniors to investigate a career through a placement in a professional setting or in development of future projects (graduate study). This allows students to work under the guidance of an immediate supervisor and/or a college faculty sponsor. Offered as needed.

**PHI 450  SENIOR RESEARCH (3)**  
This course consists of individualized or small seminar research and reading projects under the instructor's supervision. Students have the option to apply for admission to PHI 600, Philosophical Theories, as a substitute for this requirement. Prerequisite: Philosophy major and permission of instructor; Offered as needed.

**PHI 479/480  INDEPENDENT STUDY**  
Qualified students may investigate selected topics with permission of the instructor. The title will reflect the course content.

**PHI 489/490 SPECIAL TOPICS IN PHILOSOPHY (3)**  
This course is presented in a seminar format. Philosophical problems or a major figure in philosophy are studied and are determined by student and faculty interest. Prerequisites stated at time of offering; Offered as needed.

**PHI 600  PHILOSOPHICAL METHODS (3)**  
This course examines the historical development of metaphysical and epistemological methods: existentialism, phenomenology and analytic philosophy. Prerequisite: Graduate standing or permission of instructor; Offered in the fall and spring semesters.

**PHI 609  ETHICS IN HEALTH CARE (3)**  
This course addresses ethical issues frequently encountered by health care managers. Topics considered include bioethical theory, policy formation and decision making in the professional setting. Specific problems discussed include such issues as the right to health care, allocation of scarce resources, human experimentation and choices regarding death. Prerequisite: Graduate standing; Offered in the summer or as needed.

**PHI 101  GENERAL PHYSICS (3)**  
This calculus-based course is an introduction to the principles of kinematics and dynamics as they apply to both translational and rotational motion. Topics include Newton’s laws, forces, friction, gravity, Kepler’s laws, dot products and cross products, potential and kinetic energy, and momentum. Considerable attention is paid to the intellectual history that accompanied the emergence of the Newtonian world view. Prerequisite or corequisite: MAT 125; Corequisite: PHY 101L; This course is intended for biology, chemistry and mathematics majors but can also replace PHY 111 in allied health majors.

**PHY 102  GENERAL PHYSICS (3)**  
This course is a continuation of PHY 101. The course covers statics, fluids, oscillations, sound and waves, temperature and heat, electricity and magnetism, and geometric optics. Prerequisite: PHY 101; Prerequisite or corequisite: MAT 126 (may be taken concurrently); Corequisite: PHY 102L.

**PHY 103  PHYSICS FOR ENGINEERS I (3)**  
This course is a calculus-based introductory course in physics enriched in material of relevance to computer science, information technology and engineering students, including: kinematics, Newtonian mechanics, momentum, energy, rotational motion, statics, materials, fluids and oscillatory motion. Prerequisite or corequisite: MAT 125; Corequisite: PHY 103L.

**PHY 103L  PHYSICS FOR ENGINEERS I LAB (1)**  
This course is a physics laboratory to accompany PHY 103. The course includes experiments in mechanics and oscillatory motion. Prerequisites: MAT 125 (may be taken concurrently); PHY 103 may be prerequisite but is preferably a corequisite; PHY 103L may not be taken before PHY 103.

**PHY 104  PHYSICS FOR ENGINEERS II (3)**  
This course is a continuation of PHY 103 and is a calculus-based introductory course in physics enriched in material of relevance to computer science information technology, and engineering students, including: wave motion, thermodynamics, heat transfer electricity, circuits and circuit components, magnetism, electromagnetic radiation and optics. Prerequisites: PHY 103, Prerequisite or corequisite: MAT 126; Corequisite: PHY 104L.

**PHY 104L  PHYSICS FOR ENGINEERS II LAB (1)**  
This physics laboratory accompanies PHY 104. Experiments in wave motion, thermodynamics, electricity, magnetism and optics are performed. Prerequisites: MAT 125 and PHY 103, Corequisite: PHY 104.

**PHY 111-112 INTRODUCTION TO PHYSICS (3, 3)**  
This course is designed for health services/PT majors and for other students who wish to use it to fulfill the core requirement in science. The course lecture must be taken prior to, or concurrently with, the corresponding lab. PHY 111 covers kinematics, dynamics, conservation of energy and momentum, and rotational motion. PHY 112 covers statics, fluids, oscillations, sound and waves, temperature and heat, electricity and magnetism, and ray optics. PHY 111 must
be taken prior to PHY 111L or concurrently with PHY 111L. PHY 112 must be taken prior to PHY 112L or concurrently with PHY 112L. PHY 111 is a prerequisite for PHY 112. Prerequisite: MAT 122 or permission of instructor.

PHY 101L AND PHY 102L (1,1)
PHY 111L AND PHY 112L (1,1)
These labs accompany PHY 101 & 102 and PHY 111 & 112.

PHY 142 INTRODUCTION TO ASTRONOMY (3)
This course is an introductory astronomy course for students from all majors. Students are introduced to the basics of the telescope, light, the seasons and the tides, the moon, the sun, the solar system, stars, galaxies and the search for extraterrestrial intelligence. Experience involving field use of telescopes and other observational tools is incorporated into the course. Astronomy will satisfy the non-lab core science elective or can also be used as a free elective. If taken in conjunction with the optional PHY 142L, it will also fulfill the core science requirement for a laboratory-based science course.

PHY 142L INTRODUCTION TO ASTRONOMY LAB (1)
This laboratory accompanies the introductory astronomy course. The laboratory work supplements the lectures in PHY 142, focusing on the underlying physics of light, optics, wave motion and planetary motion. Corequisite: PHY 142.

PHY 145 THE PROCESS OF SCIENTIFIC DISCOVERY (3)
SEE BIO 145

PHY 149 ROBOTICS (3)
CROSS-LISTED AS CSC 149
This is an interdisciplinary course which examines the physical and computer scientific underpinnings of robots as well as the history and humanistic implications of this relatively new technology. Students build and program their own robots and make them do things, and learn the science and computer skills that underlie what they are doing. This is an introductory course, which carries credit in computer science for the core computer science requirement or credit in physics for the core science requirement. Prerequisite: MAT 101, a placement test score indicating mastery of the MAT 101 material, or permission of instructor; Offered as needed.

PHY 151 PHYSICS FOR POETS (3)
This introductory physics course for non-science majors aims to survey the West’s understanding of the physical universe from its origins in Greek thought to the latest discoveries of the 21st century. Since this covers such a vast area of study, the emphasis will be on breadth rather than depth. However, it is hoped that the student will acquire a comprehensive overview and appreciation for the discipline called physics.

PHY 389-390 SPECIAL TOPICS IN PHYSICS (3)
This course presents an opportunity to study a selected topic in physics. Topics can originate with faculty or students. Offered as needed.

PHY 499 CAPSTONE EXPERIENCE (1,2)
SEE MNS 499

PSC 201 AMERICAN GOVERNMENT AND ECONOMICS (3)
This course is a study of the American political and economic systems including the theories underlying them, political parties, pressure groups, the money system, the credit system and the relations between government and the economy. This course meets the core requirement in political science/economics. Offered in the fall and spring semesters.

PSC 250/350/450 INTERNATIONAL RELATIONS (3)
This course is a practical study and application of theory and contemporary realities of relations among nations. There is a unit on international procedures and organizations, contemporary foreign policy problems. Students will actively participate in Model United Nations at Harvard University. Students may take this course more than once. Offered in the spring semester.

PSC 342 SOCIAL AND POLITICAL PHILOSOPHY (3)
SEE PHI 306
This course is a study of social and political theories in their relation to philosophical problems: the nature of the social and political institutions and obligations, the basis of knowledge of social and political obligations, the grounds for sound social and political decisions. Offered as needed.

PSC 349 POLITICAL ACTIVISM (3)
This is a course that gives students a combination of academic knowledge and practical experience in the electoral process, utilizing fieldwork, guided reading and seminar discussion. Offered in the fall semester of even-numbered years.

PSC 490 THE STATE AND SOCIAL POLICY (3)
SEE SOC 490
This course offers a historical and comparative understanding of the rise, developments and challenges faced by nation-states pertaining to the development of social policy (i.e., welfare, healthcare, social security). It focuses on the historically situated struggles social groups over access to and influence over the state, as well as development of state expertise and forms of governing. Students learn quantitative and qualitative measurement techniques used to script social policy. Prerequisites: SOC 102 or PSY 201.

PSC 652 POLITICS AND ECONOMICS OF HEALTH (3)
This course examines the relation of government and economics to the health care systems from the perspective of regulations and financial provisions. It looks at national, state and local political struggles and alternatives and policy issues such as cost containment and national health insurance. Prerequisite: Graduate standing; Offered in the fall and spring semesters.

PSY 101 GENERAL PSYCHOLOGY (3)
This course is an overall survey of the scientific study of behavior and mental processes. Topics include biology of behavior, sensation and perception, consciousness, learning and memory, intelligence, motivation and emotion, stress and personality. The course meets the core requirement in psychology. Offered in the fall and spring semesters.

PSY 102 HISTORY OF PSYCHOLOGY (3)
This course examines the roots of modern psychological thought. Students will trace these roots from their early origins in philosophy and the natural sciences through the early schools of psychology and on into its current form. In addition to learning about the major schools of psychology, students will explore how cultural and political forces shaped the development of various psychological theories. In addition, students will also examine the lives of the men and women whose works created psychology’s foundation. Students will select a person or a classic experiment to research and present to the class. Prerequisite: PSY 101; Offered in the spring semester.

PSY 201 STATISTICS IN BEHAVIORAL SCIENCES (3)
This course provides students with an introduction to statistical and research methods. Various types of research designs and the process of developing a
PSY 202  RESEARCH METHODS IN BEHAVIORAL SCIENCES (3)
This course is a continuation of PSY 201. Students will complete research projects designed in PSY 201 and develop skills in data analysis and writing research papers. Prerequisite: PSY 201; Offered in the spring semester.

PSY 203  DEVELOPMENTAL PSYCHOLOGY (3)
This course explores milestones of physical, cognitive and psychosocial development from conception through old age. Emphasis is placed on global principles that guide human growth and change across the lifespan. The course meets the core requirement in psychology. Offered in the fall and spring semesters.

PSY 204  PHYSIOLOGICAL PSYCHOLOGY (3)
This course examines the physiological basis of behavior through consideration of nervous and endocrine system structure and function followed by a detailed analysis of specific behaviors such as aggression, ingestion, sexual behaviors, sleep, and memory and learning. Prerequisite: Core course in psychology; Offered in the spring semester.

PSY 205  SOCIAL PSYCHOLOGY (3)  SEE SOC 205
This course studies the individual in society, social learning and perception, formation and measurement of attitudes, social norms and roles, public opinion and propaganda. Prerequisite: Core course in psychology; Offered in the fall semester.

PSY 206  ABNORMAL PSYCHOLOGY (3)
This course scientifically describes and discusses the forms of abnormal behavior guided by the DSM-IV. Specific focus is placed on assessment and diagnosis, etiological factors, treatment possibilities, and predictions of recovery. Prerequisite: Core course in psychology; Offered in the fall and spring semesters.

PSY 207  COGNITIVE PSYCHOLOGY (3)
This course will examine cognitive functioning in humans through a consideration of sensory register, attention, short-term and long-term memory. Topics include encoding, retrieval, comprehension, reasoning and problem-solving, and language. Prerequisite: Core course in psychology; Offered in the fall semester.

PSY 208  PERSONALITY (3)
This course examines multiple perspectives on the construct of personality. It aims to provide the student with a thorough background in the major theories as well as an ability to integrate and apply the concepts in these theories. To accomplish this, students will engage in case studies as they master the theories within each major perspective. Prerequisite: Core course in psychology; Offered in the spring semester.

PSY 209  PSYCHOLOGY AS A PROFESSION I
This first course in the two-semester sequence provides a foundation for students considering a career in psychology or related fields. Students are guided in their own professional development via self-assessments of professional interests, establishment of professional goals, and how facets of the psychology curriculum can be tailored to their individual needs. As part of this exploration, students will be acquainted with contemporary and historical issues in the profession of psychology (e.g., professional organizations, licensure requirements) and will be provided with an overview of the many sub-fields and disciplines within psychology. Prerequisite: Sophomore status in the psychology major, or permission of instructor; Offered in the fall semester.

PSY 210  PSYCHOLOGY AS A PROFESSION II
This second course in the two-semester sequence provides a foundation for students considering a career in psychology or related fields. The emphasis of this seminar is to enable students to become more acquainted with baccalaureate-level career opportunities in psychology as well as professional career opportunities in psychology and related fields. Students will be guided in the process of researching and interviewing professionals within the community. Invited guest speakers from specialized careers within psychology and related fields will supplement lecture presentations of vocational and career opportunities. Prerequisite: PSY 209; Offered in the spring semester.

PSY 211  PSYCHOLOGY OF HUMAN RELATIONS (3)
This course is a study of theories and processes of interpersonal behavior. It primarily a laboratory for human relationship training and the content is designed to help students understand themselves in order to understand and experimental course will include some field observations as well as lectures and discussions. Prerequisite: Core course in psychology; Offered in the spring semester of even-numbered years.

PSY 212  PSYCHOLOGY OF GENDER (3)
This course examines the genetic, neuroanatomical, neurochemical and hormonal basis of anxiety disorders, mood disorders, substance-related disorders, sexual and gender-identity disorders, personality disorders, psychotic disorders and childhood disorders. Physiological factors contributing to both the onset and maintenance of mental disorders will be covered. Prerequisite: PSY 204 and PSY 206; Offered in the spring semester of odd-numbered years.

PSY 213  CRIME AND CRIMINOLOGY (3)
This course explores the major theories, basic concepts and techniques of counseling. The student will be expected to demonstrate a working knowledge of the terminology, concepts and counseling applications of the major counseling theories, such as Psychoanalytic, Adlerian, Person-centered, Gestalt, Rational Emotive, Existential and Family Therapy. This course is suggested for students in all areas in which such a need exists in their professional work. Prerequisite: PSY 206; Offered in the spring semester of even-numbered years.

PSY 214  PSYCHOLOGY OF HUMAN RELATIONS (3)
This course is a study of theories and processes of interpersonal behavior. It primarily a laboratory for human relationship training and the content is designed to help students understand themselves in order to understand and
relate effectively with others. Prerequisite: Core course in psychology; PSY 208 (recommended); Offered in the fall semester of odd-numbered years

**PSY 363  HUMAN SEXUALITY (3)**

This course is designed to provide students with a multidimensional overview of human sexuality and an opportunity to clarify their own sexual value systems. Human sexuality is considered from biological, cultural, psychosocial, developmental, behavioral and clinical perspectives. Prerequisite: Core course in psychology; Offered in the fall semester of even-numbered years

**PSY 364  NEUROPSYCHOLOGY (3)**

This course applies the knowledge gained from Psychological Physiology to an advanced study of human neuropsychology. Students will gain an appreciation of the relationship between the structure and function of the nervous system and qualities of mind and behavior. Prerequisite: PSY 204; Offered in the fall semester of odd-numbered years

**PSY 365  FORENSIC PSYCHOLOGY (3)**

This course will provide an introduction and overview to the field of forensic psychology. Attention will be given to the ways in which psychologists, either clinically or empirically, have or can influence the law in terms of issues such as assessment of competency and sanity, legal decision-making, jury composition, police psychology, eyewitness testimony, criminal behavior and profiling, and juvenile and family legal matters. Prerequisite: PSY 101 (required), PSY 205 (recommended); Offered in the fall semester of odd-numbered years

**PSY 366  PSYCHOLOGICAL ASSESSMENT (3)**

The course will provide an introduction to and focus on the major characteristics of psychological assessment. Such assessment includes the measurement of human skills and abilities, aptitudes, and aspects of psychological functioning such as personality and psychopathology. The course will be organized in two parts. The first part of the course will provide students with a background in psychometric principles including how to evaluate tests (i.e., reliability, validity, etc.) and procedures in test development (e.g., item analysis, construct validation). Issues in effective test administration will also be covered. The latter portion of the course will cover popular means of assessment including interviewing and a survey of the most popular psychological tests. Students will gain some “hands on” experience with these assessment devices through demonstration and self-administration. Prerequisite: PSY 101, PSY 201/202 or MAT equivalent; Offered in the spring semester of odd-numbered years

**PSY 367  PSYCHOLOGY OF CONSCIOUSNESS (3)**

This course examines consciousness, the “last great mystery of science”. Excluded from scientific research for most of the last century, consciousness is now a rapidly expanding area of study in both psychology and neuroscience. This course will discuss all the major theories of consciousness, from those rooted in traditional Western philosophy to those coming out of neuroscience, quantum theory, and Eastern philosophy. Students will engage in readings, self-assessments, and practical exercises that will allow students to examine their understanding of their own consciousness. Prerequisite: PSY 207; Offered in the spring semester of even-numbered years

**PSY 368  STRESS AND ADJUSTMENT (3)**

This course explores the biology and psychology of the experience of stress. Students will learn from both lecture and self-exploration. The course will provide the opportunity for students to learn and practice traditional and “alternative” stress management skills through individual and group practice. Prerequisite: Core course in psychology, PSY 208 (recommended); Offered in the fall semester of even-numbered years

**PHY 369 THE PSYCHOLOGY OF RELIGION AND SPIRITUALITY (3) SEE RS 369**

This course will focus on understanding the purpose, development and experience of spirituality, religious thought and practice and its implication for individual and social behavior. Offered as needed.

**PSY 453  DEVELOPMENTAL PSYCHOPATHOLOGY (3)**

This course examines the development of emotional and behavioral maladjustment in children and adolescents. Emphasis will be given to theories, assessment strategies, and research methods and findings regarding the etiology and treatment efficacy for disorders including mental retardation, the pervasive developmental disorders (autism), elimination disorders, attention deficit hyperactivity disorder (ADHD) and learning disabilities, conduct disorders, and eating disorders. Psychiatric conditions such as mood disorders, anxiety disorders, schizophrenia, sleep disorders, and emerging personality disorders will also be considered from a developmental perspective. Psychosocial factors (e.g., family violence and abuse) that have been empirically identified in affecting psychological adjustment and research regarding prevention of these emotional and behavioral problems will also be addressed. Prerequisite: PSY 203; Offered in the spring semester of odd-numbered years

**PSY 454  BIOPSYCHOLOGY OF ADDICTION (3)**

This course examines the problem of addiction through a review of terminology, the types and effects of psychoactive substances, and the current theories from human and animal research identifying possible genetic, neuroanatomical, neurochemical and hormonal factors. Prerequisite: PSY 204; Offered in the fall semester of even-numbered years

**PSY 455  MULTICULTURAL PSYCHOLOGY (3)**

This course will review the history and present status of multicultural psychology within an emphasis on fundamental assumptions, fundamental theories and future directions. Particular emphasis will be directed to understanding American Indian, Asian American, Black American and Hispanic American individuals. Prerequisite: PSY 205; Offered in the fall semester of even-numbered years

**PSY 456  BEHAVIOR MODIFICATION (3)**

This course examines major theories, basic concepts and techniques of behavior modification. The student will develop an understanding of the application of operant conditioning principles, implementation of behavior modification techniques, and assessment and evaluation of program effectiveness. Prerequisite: PSY 101; Offered in the fall semester of odd-numbered years

**PSY 457  LEARNING AND MEMORY (3)**

This course is an exploration of questions and topics such as: How do animals (human and non-) acquire, store, and retrieve information? How is new information integrated into existing memory structures? What is forgetting, and how can memory be improved? From the relatively simple mechanisms of conditioning to higher-order cognitive constructs, the class will discuss research findings from a multidisciplinary perspective including basic and applied psychology, neuroscience, physiology and genetics. Prerequisite: PSY 207; Offered in the fall semester of odd-numbered years
PSY 458 PSYCHOLOGY OF GENDER (3)
This course is a review of the scientific literature on gender differences and their development. Discussion will include the impact of these differences on an individual’s life and in society. Prerequisite: Core course in psychology, PSY 208 (recommended); Offered in the spring semester of even-numbered years.

PSY 463 SPECIAL TOPICS IN DEVELOPMENTAL PSYCHOLOGY (3)
This course is an in-depth consideration of topics in the field of developmental psychology. Prerequisite: PSY 203, or permission of instructor; Offered as needed.

PSY 464 SPECIAL TOPICS IN PHYSIOLOGICAL PSYCHOLOGY (3)
This course is an in-depth consideration of topics in the field of physiological psychology. Prerequisite: PSY 204, or permission of instructor; Offered as needed.

PSY 465 SPECIAL TOPICS IN SOCIAL PSYCHOLOGY (3)
This course is an in-depth consideration of topics in the field of social psychology. Prerequisite: PSY 205, or permission of instructor; Offered as needed.

PSY 466 SPECIAL TOPICS IN ABNORMAL PSYCHOLOGY (3)
This course is an in-depth consideration of topics in the field of abnormal psychology. Prerequisite: PSY 206, or permission of instructor; Offered as needed.

PSY 467 SPECIAL TOPICS IN COGNITIVE PSYCHOLOGY (3)
This course is an in-depth consideration of topics in the field of cognitive psychology. Prerequisite: PSY 207, or permission of instructor; Offered as needed.

PSY 468 SPECIAL TOPICS IN PERSONALITY PSYCHOLOGY (3)
This course is an in-depth consideration of topics in the field of personality psychology. Prerequisite: PSY 208, or permission of instructor; Offered as needed.

PSY 469 PSYCHOLOGY INTERNSHIP I (4)
The purpose of this course is to allow students the opportunity to gain experience in a psychology-related field setting that is in keeping with their educational and/or vocational goals. It is the intent of the course that students will build upon their knowledge and skills in a research or community internship placement. Through agreement among the instructor/internship coordinator, the student, and the internship supervisor, the student will participate in an internship(s) for a minimum of 225 hours for the semester (15 hours per week). Prerequisite: Senior status in the psychology program; Corequisite: PSY 489; Offered as needed.

PSY 470 PSYCHOLOGY INTERNSHIP II (4)
This course will allow students the opportunity to gain experience in a psychology-related field setting wherein they can build upon their learning experiences from their first semester of internship. Student learning may entail continued placement at their first semester of internship (in keeping with their educational or vocational goals) with the intent of advancing their skills and knowledge acquired from the previous semester, or placement in an alternative setting that enables students to develop their knowledge, professional networking, and further evaluate their educational and career goals. Through agreement among the instructor/internship coordinator, the student, and the internship supervisor, the student will participate in an internship(s) for a minimum of 225 hours for the semester (15 hours per week). Prerequisite: PSY 469; Corequisite: PSY 490; Offered as needed.

PSY 489 SENIOR SEMINAR I (2)
This course provides the student with extensive faculty and peer guidance and feedback throughout the psychology internship experience during the senior year. Corequisite: PSY 469; Offered as needed.

PSY 490 SENIOR SEMINAR II (2)
This course provides the student with extensive faculty and peer guidance and feedback throughout the psychology internship experience during the senior year. Corequisite: PSY 470; Offered as needed.

RS 201 RELIGION AND SOCIAL RESPONSIBILITY (3)
The nature and principles of religious ethics in the Judeo-Christian tradition, with examples drawn from other major religious traditions. These are explored with an emphasis on historical and contemporary attitudes of religion toward social responsibility. Topics for discussion include: sexuality, identity, power, violence, war, racism and medical ethics. Satisfies the core requirement for ethics. Open to sophomores, juniors and seniors. Offered both semesters.

RS 202 LIFE OF CHRIST (3)
This is a study of the person of Jesus Christ in history and in faith including theories regarding his identity and his role, his impact on society from his day to ours. Offered as needed.

RS 207 RELIGION AND SCIENCE (3)
This course examines the historical relations between religion and science, methods of scientific and theological investigation. Issues of mutual interest, such as the origin and nature of man, attitudes toward nature, scientific research and moral responsibility are discussed. Offered as needed.

RS 209 MAJOR WESTERN FAITHS (3)
This course surveys the main elements of the history, thought and practice of the major religious traditions of the Western world: Judaism, Christianity and Islam. Offered as needed.

RS 211 CATHOLICISM TODAY (3)
This is a systematic study of the foundational beliefs of Catholicism: where they came from, how they have changed and how they are interpreted today. Offered as needed.

RS 214 THE CHALLENGES OF DEATH (3)
See PHI 214
This course examines the ways in which death challenges human meaning and action. Topics such as the meaning of suffering and death, challenges of death to morality, psychological spiritual processes of dying and bereavement are considered. This course is open to sophomores, juniors and seniors. Offered in the fall and spring semesters.

RS 201 RELIGION AND SOCIAL RESPONSIBILITY (3)
The nature and principles of religious ethics in the Judeo-Christian tradition, with examples drawn from other major religious traditions. These are explored with an emphasis on historical and contemporary attitudes of religion toward social responsibility. Topics for discussion include: sexuality, identity, power, violence, war, racism and medical ethics. Satisfies the core requirement for ethics. Open to sophomores, juniors and seniors. Offered both semesters.

RS 202 LIFE OF CHRIST (3)
This is a study of the person of Jesus Christ in history and in faith including theories regarding his identity and his role, his impact on society from his day to ours. Offered as needed.

RS 207 RELIGION AND SCIENCE (3)
This course examines the historical relations between religion and science, methods of scientific and theological investigation. Issues of mutual interest, such as the origin and nature of man, attitudes toward nature, scientific research and moral responsibility are discussed. Offered as needed.

RS 209 MAJOR WESTERN FAITHS (3)
This course surveys the main elements of the history, thought and practice of the major religious traditions of the Western world: Judaism, Christianity and Islam. Offered as needed.

RS 211 CATHOLICISM TODAY (3)
This is a systematic study of the foundational beliefs of Catholicism: where they came from, how they have changed and how they are interpreted today. Offered as needed.

RS 214 THE CHALLENGES OF DEATH (3)
This course examines the ways in which death challenges human meaning and action. Topics such as the meaning of suffering and death, challenges of death to morality, psychological spiritual processes of dying and bereavement are considered. This course is open to sophomores, juniors and seniors. Offered in the fall and spring semesters.

RS 209 MAJOR WESTERN FAITHS (3)
This course surveys the main elements of the history, thought and practice of the major religious traditions of the Western world: Judaism, Christianity and Islam. Offered as needed.
pedagogical technique for addressing religious, social and cultural problems faced by the primitive Christian church. St. Paul's response to these issues in the epistles provides a framework for discussion of several major theological themes, including faith and revelation, grace and salvation, and the development of doctrine. This course is open to sophomores, juniors and seniors. Offered as needed.

RS 312  BIOETHICS SEMINAR (3) SEE PHI 312
Ethical dilemmas and problems posed by developments in the biosciences are analyzed. Problems discussed include choices for life or death, allocation of resources, human experimentation, reproductive technologies, professional client relationships, etc. This course is open to sophomores, juniors and seniors. Recommended: PHI 201 or PHI/RS 214; Offered both semesters.

RS 314  THE MESSAGE OF THE PROPHETS (3)
This course is designed to introduce the student to the prophetic literature of the Old Testament. The religious importance of the prophetic books will be examined through an investigation of the political, cultural and theological milieu of the Middle East from the tenth to the fifth centuries B.C. The course also explores the impact of the prophetic personality in our times regarding questions of social justice, peace and international relations. This course is open to sophomores, juniors and seniors. Offered as needed.

RS 315 SPIRITUALITY IN HUMAN EXPERIENCE (3)
This course explores the history of spirituality in human experience. Traditional and non-traditional expressions will be investigated as well as the varied applications in life. Offered as needed.

RS 316  CATHOLIC SOCIAL TEACHING (3)
This course provides a historical, theoretical and practical overview of the principles and themes of the Roman Catholic encyclical tradition. It explores views of Christian social responsibility through classic texts and contemporary problems. Offered as needed.

RS 351 RELIGION IN AMERICAN HISTORY (3) SEE HIS 351
This course will explore the many important issues in American religious history over the past 400 years. Offered as needed.

RS 369  THE PSYCHOLOGY OF RELIGION AND SPIRITUALITY (3) SEE PHY 369
This course will focus on understanding the purpose, development and experience of spirituality, religious thought and practice and its implications for individual and social behavior. Offered as needed.

RS 408  MODERN RELIGIOUS THOUGHT (3)
Current trends in religious thought are presented in seminar form. Representative theologians and their works are examined for their understandings of God, human nature and society, and the implications of religious insight for personal and social life. Prerequisite: One of PHI 101, RS 101, RS 102 or junior or senior status; Offered as needed.

RS 410  PHILOSOPHY OF RELIGION (3)
See PHI 410

RS 411  MYSTICISM (3)
See PHI 411

RS 412  SPECIAL STUDIES IN RELIGION (3)
This course explores selected issues of concern to students and faculty in religious studies in seminar format. Topics are announced at the time of registration. Students follow a schedule of readings, discussion and research writing. Prerequisites: Determined at time of course offerings; Offered as needed.

RSC 203  MEDICAL TERMINOLOGY (1)
See HSM 203

SOC 101  PRINCIPLES OF SOCIOLOGY (3)
This course examines interactions among individuals and groups within institutions. Attention is paid to the role of the state and the super-state in perpetuating social stratification in both North America and globally, and how unequal power relations organize society and shape identities. The ways in which individuals negotiate their lives in different social and economic contexts are also considered. Fundamental sociological concepts are investigated, such as culture, socialization, stratification, social structure, social institutions, and social interactions. This course meets the core requirements in sociology. Offered in the fall and spring semesters.

SOC 102  SOCIAL PROBLEMS (3)
This course is designed as an introduction to major social problems, and sociological concepts and theories used to understand them. Attention is paid to problems such as inequalities related to social class, race/ethnicity, gender, employment and environmental issues. Focus is also put on social change. Sociologists contend the existence of social problems cannot be understood simply by looking at individual-level behavior. Rather, in order fully to understand societal problems and how to solve them, larger structural, cultural, and historical forces are examined. Solutions at the individual, social movement, and policy-making level are considered. This course meets the core requirement in sociology. Offered in the fall and spring semesters.

SOC 203  SOCIAL THEORY (3)
The course is a survey of the development of sociological theories since the nineteenth century. How theory influences society and the sociocultural influences which shape theory are also explored. Emphasis is on theory in the late twentieth and twenty-first centuries. Offered in the spring semester.

SOC 211  THE CHANGING SOCIAL WORLD
This course is designed to help make sense of a rapidly changing world of increasing global interdependence, violence, expanding knowledge and telecommunications, changing values, clashes between religious and secular agendas, transforming family relations and shifting patterns of social inequalities. A number of explanations of social change will be identified and discussed. Special focus is placed on how major social trends influence individuals, intergroup relations and various organizations such as family, work and community. Students will enhance their abilities to plan and shape their own lives in the world around them. Prerequisite: Core course in sociology; Offered in the fall semester.

SOC 214  CULTURAL DIVERSITY (3)
The course focuses on the experiences of those from culturally marginalized groups within the larger Western culture. Attention is paid to concepts such as the social construction of race, colonialism/postcolonialism, institutional racism, deculturalization, cultural hegemony and forms of resistance. Prerequisite: Core course in sociology; Offered in the fall semester of even-numbered years.

SOC 215  RESEARCH METHODS IN SOCIOLOGY (3)
In this course, students are introduced to qualitative methods and the basics of interpreting statistics. Students learn how to analyze and evaluate existing research, conduct a research project, conduct focus groups and in-depth interviews, and analyze primary documents. Ethical considerations regarding conducting research and uses of research are discussed. Prerequisite: Core course in sociology; Offered in the fall semester.
SOC 231  WOMEN, MEN AND SOCIETY (3)
This course is an exploration of the concept of gender, and how gendered forms of meaning making are shaped culturally, internalized and enacted. Attention is also placed on challenges and alternatives to conventional gender prescription, the confluence of gender and power, sexism and homophobia, and the meanings of gender in various religious, ethnic/racial, class and age groups. Prerequisite: Core course in sociology; Offered in the fall semester.

SOC 309  SOCIOLOGY OF DISABILITY AND REHABILITATION (3)
The consequences of disability can have an impact at many levels. The effects of disability (personal, interpersonal and cultural) have significant implications for persons with disabilities, rehabilitation workers and the rehabilitation system. This course will analyze the effects of disability within a sociology framework. Prerequisite: Core courses in sociology; Offered in the fall semester.

SOC 310  SOCIOLOGY OF URBAN EDUCATION (3)
In this course, students analyze core problems facing urban public schools. Issues explored include funding inequities, testing schemes, privatization, high-stakes testing, bilingual education, curriculum control, and the impact of poverty on schooling. Attention is also paid to the experiences of students who come from culturally diverse backgrounds, and to immigrant and refugee youth. The possibilities of public schools are investigated throughout this course, as is the potential for reform through the use of critical pedagogy and equitable policy initiatives. Offered each fall.

SOC 311  SOCIOLOGY OF FAMILIES (3)
This course emphasizes the changes in contemporary families, compositions of families, expectations of family members, current policies impacting families, and family as a political issue. Consideration is also given to the myths and stereotypes of family life. Prerequisite: Core course in sociology; Offered in the spring semester.

SOC 312  SOCIOLOGY OF SPORT AND PHYSICAL ACTIVITY (3)
This course explores the social and cultural aspects of sport and physical activity. Students will study a range of topics including drug use in sport, equality of opportunity for women and people of color, social patterns and cultural perceptions of sports injury, exercise and preventive health, homophobia, gender and racial discrimination in sport, educational impacts of athletic participation, athletic participation and adolescent health, and violence in sport. Sociological, anthropological and historical perspectives will be used in this course. Offered in the spring semesters.

SOC 322  HEALTH, ILLNESS AND SOCIETY (3)
This is a critical survey and analysis of theory and research on health institutions in modern society as well as social etiology of disease, sociological components in treatment, hospital organization and medical practice and sociology of medical education. Prerequisite: Core course in sociology; Offered each fall.

SOC 323  SOCIOLOGY OF THE CITY (3)
The course deals with the processes of urbanization and conditions of urban life. Topics include the nature of urban social relationships, the organization of city life, urban ecological patterns and demographic conditions and regional influences on metropolitan centers. Prerequisite: Core course in sociology; Offered in the spring semester of even-numbered years.

SOC 342  SOCIOLOGY OF HUMAN RIGHTS (3)
This course is designed as an investigation of human rights concerns in contemporary society. Attention is paid to human rights abuses experienced by women, men and children in both North America and a global context. Key documents are related to the human rights movement are analyzed as are major debates in their field. Prerequisite: Core course in sociology; Offered in the spring semester.

SOC 400  SOCIAL EPIDEMIOLOGY (3)
Prerequisites: Core course in sociology; Offered in the fall semester.

SOC 408  COLLECTIVE BEHAVIOR (3)
This course is designed to present the study of collective behavior, collective action and social movements. Attention is given to various sociological theories used to explain these behaviors. The focus includes fads and fashion, sports fans, crowds/mobs that form and dissolve quickly, formal organizations and interest groups that spring up in the aftermath of disasters, outbreaks of social protest, and full-blown social movements. Students will consider the particular circumstances which bring about collectivity, the actions taken by the group, media and public response, and the political impact of the behavior Offered in the spring semester of odd-numbered years.

SOC 410  SENIOR PROJECT (3)
The senior project involves a major research paper and is highly recommended for students planning on graduate school in sociology or related field. Prerequisite: Senior status; Offered as needed.

SOC 420  VARIABLE TOPICS (3)
This is an in-depth consideration of a special topic, problem or issue in sociology. The course may be taken more than once. Prerequisite: SOC 101 or SOC 102 or permission of the instructor; Offered as needed.

SOC 441  CASE STUDIES IN URBAN SOCIOLOGY (3)
SEE HIS 441
This course combines on-campus lectures about the geography, history, culture and society of a designated urban center with a one-week service learning experience in that city. Campus lectures will take place in the fall semester and the one week of service learning is held between semesters, in January. Offered each fall.

SOC 444  INTERNSHIP (3-12)
The sociology internship is a variable credit (3-12 hours), required course that encourages juniors/seniors to investigate a career through a placement in a professional setting or in the development of future projects (graduate study). This allows students to work under the guidance of an immediate supervisor and a college faculty sponsor. Offered as needed.

SOC 479-480  INDEPENDENT STUDY
Qualified students may investigate selected topics with the permission of the instructor. The title will reflect the course content. Offered as needed.

SOC 490  THE STATE AND SOCIAL POLICY (3)
SEE PSC 490
This course offers a historical and comparative understanding of the rise, developments and challenges faced by nation-states pertaining to the development of social policy (i.e., welfare, healthcare, social security). It focuses on the historically situated struggles social groups over access to and influence over the state, as well as development of state expertise and forms of governing. Students learn quantitative and qualitative measurement techniques used to script social policy. Prerequisites: SOC 102; Offered in the spring semester of even-numbered years.
SOC 600  EPIDEMIOLOGY (3)
This course focuses on social epidemiology, the factors determining the occurrence and distribution of disease, health defects, disability and death among groups. The interdisciplinary nature of epidemiological theory, statistical measures commonly used, and an analysis of the distribution of health care in the United States are studied. Prerequisite: Graduate standing; Offered in the fall semester.

SPA 101  SPANISH LEVEL I (3)
This course is designed to introduce true beginners to the Spanish language. The primary focus of the course is to provide a basic knowledge of Spanish through the extensive practice of the four fundamental skills in language learning: listening, speaking, reading and writing. Attention is also given to the fifth language skill—cultural awareness. Through a communicative approach and through the use of the Spanish language, students will learn the fundamental grammatical workings of the Spanish language and apply their knowledge of such concepts in both spoken and written exercises. Integrated throughout the course, are lessons and readings linked to the daily activities and basic aspects of the Hispanic culture, which vary from country to country. Like all the foreign language courses taught at the college, this course is guided by the national standards known as the five Cs: communication, culture, connections, comparisons and community.

SPA 102  SPANISH LEVEL II (3)
This course is the second semester of beginner Spanish and the continuation of SPA 101. Before moving forward to the material of SPA 102, the course begins with a review of the salient points of SPA 101. The primary focus of the course is to expand knowledge of the Spanish language and develop an elementary foundation of the language. There will be extensive practice of the four fundamental skills: speaking, listening, reading and writing. Increased attention is also given to the fifth skill of cultural awareness. Through a communicative approach and an increased use of the Spanish language, students will learn the fundamental grammatical workings of the Spanish language and apply knowledge of such concepts in both spoken and written exercises. Integrated throughout the course, are lessons and readings linked to the daily activities and basic aspects of the Hispanic culture, which vary from country to country. Like all foreign language courses taught at the college, this course is guided by the national standards known as the five Cs: communication, culture, connections, comparisons and community.

SPA 111  SPANISH LEVEL III (3)
This course is an intermediate-level integrated skills language course that will expand on the language skills mastered in SPA 101 and SPA 102. The course begins with a quick review of the salient points of beginner Spanish before introducing intermediate-level material. This course will enhance proficiency in the language and develop and intermediate-level foundation in the Spanish language. There will be extensive practice of the four fundamental skills: listening, speaking, reading and writing, as well as extensive instruction on culture. Through a communicative approach and the exclusive use of Spanish, students will learn more complex grammatical structures of the Spanish language and apply their knowledge of such concepts in both spoken and written exercises. Integrated throughout the course, are lessons and readings linked to the daily activities and basic aspects of the Hispanic culture, which vary from country to country. Like all foreign language courses taught at the college, this course is guided by the national standards known as the five Cs: communication, culture, connections, comparisons and community.

SPA 116  SPANISH FOR NATIVE SPEAKERS (3)
This course is a continuation of SPA 115. Offered as needed.

SPA 201  SPANISH LEVEL III (3)
This course is an intermediate-level integrated skills language course that will expand on the language skills mastered in SPA 101 and SPA 102. The course begins with a quick review of the salient points of beginner Spanish before introducing intermediate-level material. This course will enhance proficiency in the language and develop and intermediate-level foundation in the Spanish language. There will be extensive practice of the four fundamental skills: listening, speaking, reading and writing, as well as extensive instruction on culture. Through a communicative approach and the exclusive use of Spanish, students will learn more complex grammatical structures of the Spanish language and apply their knowledge of such concepts in both spoken and written exercises. Integrated throughout the course, are lessons and readings linked to the daily activities and basic aspects of the Hispanic culture, which vary from country to country. Like all foreign language courses taught at the college, this course is guided by the national standards known as the five Cs: communication, culture, connections, comparisons and community.

SPA 215  HISPANICS IN THE U.S. (3)
The course explores the life and culture of people of Hispanic origin who live in the U.S.: Chicanos, Puerto Ricans and Cubans. Attention is given to Spanish language skills, reading, composition and conversation. Prerequisites: SPA 201, SPA 226 or four years of high school Spanish; Offered as needed.

SPA 211  CONVERSATION AND COMPOSITION (3)
This intermediate-advanced-level course is designed to give students already familiar with Spanish a greater opportunity for oral and written expression. It includes a review of grammar but assumes the students are already knowledgeable in this area. Prerequisite: SPA 202 or SPA 226 or four years of high school Spanish; Offered as needed.

SPA 225  SPANISH FOR HEALTH PROFESSIONS (3)
This course is an intermediate level course designed to introduce a more specialized vocabulary linked to the different health professions and increase awareness about the many cultural and health topics specific to the Hispanic population. The primary focus of the course is to provide an intermediate-level proficiency in both the written and oral forms of the Spanish language required for communicating with future Spanish-speaking clients or patients. Students will practice the four fundamental skills of language learning: listening, speaking, reading and writing. Much attention is also given to the fifth skill—cultural awareness. Through a communicative approach, students will
SPA 101  SPANISH FOR HEALTH PROFESSIONS I (3)
This course is the introduction to SPA 225. It is an introductory level course designed to further knowledge of vocabulary, grammar and culture linked to the different health professions. The primary focus of the course is to provide and intermediate level proficiency in both the written and oral forms of the Spanish language required to communicate with future Spanish-speaking clients or patients. Students will practice the four fundamental skills of language learning: listening, speaking, reading and writing. Much attention is also given to the fifth skill—cultural awareness. Through a communicative approach, students will review the fundamental grammatical workings of the Spanish language and apply knowledge of such concepts in both written and spoken exercises. Like all foreign language courses taught at the college, this course is guided by the national standards known as the five Cs: communication, culture, connections, comparisons and community. Prerequisite: SPA 101, SPA 102 or equivalent or permission of the instructor; Offered as needed.

SPA 226 SPANISH FOR HEALTH PROFESSIONS II (3)
This course is the continuation of SPA 225. It is an intermediate-advanced level course designed to further knowledge of vocabulary, grammar and culture linked to the different health professions. The primary focus of the course is to provide and intermediate-advanced level proficiency in both the written and oral forms of the Spanish language required to communicate with confidence with future Spanish-speaking clients or patients. Students will practice the four fundamental skills of language learning: listening, speaking, reading and writing. Much attention is also given to the fifth skill—cultural awareness. Through a communicative approach, students will review the fundamental grammatical workings of the Spanish language and apply knowledge of such concepts in both written and spoken exercises. Like all foreign language courses taught at the college, this course is guided by the national standards known as the five Cs: communication, culture, connections, comparisons and community. Prerequisite: SPA 225 or permission of instructor; Offered as needed.

SPA 250 CROSS-CULTURAL SEMINAR (3)
This course combines on-campus lectures about the history, culture and society of a Latin American country with a two-week stay in that country. While abroad, students attend on-site presentations at schools, hospitals, and points of cultural interest. The course is offered in the spring, and travel takes place after final exams in May. Offered as needed.

SPA 304 THE CONTEMPORARY LATIN AMERICAN SHORT STORY (3)
This course focuses on reading of short fiction by, among others, Jorge Luis Borges, Gabriel García Márquez, Juan Rulfo, Julio Cortázar and Mario Vargas Llosa. Class discussions and course essays will be in Spanish. Prerequisites: SPA 115 or SPA 116, SPA 211 or higher, or four years of high school Spanish with a grade of A or better and permission of instructor; Offered as needed.

SPA 315 LITERATURE OF HISPANICS IN THE U.S.: POETRY AND SHORT STORIES (3)
This survey of short stories and poems reflects the perspectives and experiences of the three largest U.S. Hispanic communities: Puerto Ricans, Chicanos and Cubans. Prerequisite: SPA 115 or SPA 116; or SPA 211 or higher; or four years of high school Spanish with a grade of A or better; and permission of instructor; Offered as needed.

SPA 321 PUERTO RICAN LITERATURE (3)
This course explores the history of Puerto Rican literature and combines readings and discussions of selections from significant Puerto Rican authors from the 19th and 20th centuries. Prerequisite: SPA 115 or SPA 116; or SPA 211 or higher; or four years of high school Spanish with a grade of A or better; and permission of instructor; Offered as needed.

SPA 340 TOPICS IN SPANISH AND LATIN AMERICAN LITERATURE (3)
The course explores topics in Spanish or Latin American literature including theater, poetry, novels and short stories. Topics selected will be determined by student and faculty. Prerequisites: SPA 115 or SPA 116, SPA 211 or higher; or four years of high school Spanish with a grade of A or better and permission of instructor; Offered as needed.

SPA 479-480 INDEPENDENT STUDY
Qualified students may investigate selected topics with permission and under supervision of the instructor. Meeting times will be arranged between faculty member and student.

SPE 201 PUBLIC SPEAKING (3)
This is an introduction to speaking before groups and includes techniques of speech preparation and delivery, adapting to the purpose of the speaking situation, and practice in various types of oral presentation in a comfortable workshop atmosphere.

THE 104 THEATER PRODUCTION (3)
This course acquaints students with theater history and the elements of theater (the roles of the playwright, director, producer, actor, scenic-lighting/sound and costume designers) as well as key developments, periods, playhouses and figures of influence in theater’s evolution.

THE 202 INTRODUCTION TO ACTING (3)
This course will introduce students to the fundamentals of character development through work on short scenes from major plays. A review of various theories of acting, from Stanislavski and Uta Hagen to the Meisner approach to acting, will dovetail the development of a living character on stage with script analysis.

THE 444 THEATER AS OUTREACH (3)
A practical workshop aimed at equipping students from all disciplines in the use of theater-based techniques in schools, community or non-theatrical environments (hospitals, therapeutic settings, youth centers, business retreats, etc.)

LAURA HECHTEL, Ph.D.  
Assistant Professor, Biology, Math and Natural Sciences  
B.A., Augustana College; Ph.D., Illinois State University

TIMOTHY HUTCHERSON  
Clinical Assistant Professor, School of Pharmacy  
B.S., University of Missouri-Columbia;  
Pharm.D., University of Missouri-Kansas City

CHRISTOPHER JADOCH  
Assistant Professor, School of Pharmacy  
B.S., JD, University at Buffalo

PAUL R. JOHNSON  
Professor Emeritus, Religious Studies  
B.A., Bethel College; M.Div., Bethel Theological Seminary; Ph.D., Duke University

JOSEPH JURKOWSKI, Ph.D.  
Assistant Professor, Business

JOSEPH KABACINSKI  
Assistant Professor, Business  
M.B.A., Canisius College

NANCY M. KACZMAREK, GNSH  
Professor, Education  
B.A., D’Youville College; M.A., Teachers College, Columbia University; Ph.D., University at Buffalo

JAMES L. KARNES  
Associate Professor, Physical Therapy  
B.S., Ph.D., University at Buffalo

DAVID KELLY  
Professor Emeritus, History  
A.B., University of Chicago; M.A., Ph.D., Indiana University

MARTIN KELLY, Ph.D.  
Assistant Professor, Biology, Math and Natural Sciences  
B.S., University at Buffalo; M.S., University of Indiana, Bloomington; Ph.D., University of Texas, Austin

M. RUTH REILLY KELLY  
Professor Emerita, History  
B.A., D’Youville College; M.A., Ph.D., University at Buffalo; M.A.T., Christ the King Seminary

MARY KENNEDY  
Assistant Professor, Nursing

CHARLES J. KERRIGAN  
Professor Emeritus, Business  
A.B., Ph.L., Woodstock College; M.A., Georgetown University; S.T.L., College of immaculate Conception (Montreal)

PAULA GIACOBBE KERSCH  
Assistant Professor, Spanish  
B.A., Canisius; M.A., University of North Carolina at Chapel Hill; Ph.D., University at Buffalo

JULIE KIRSCH  
Assistant Professor, Philosophy  
B.A., SUC at Buffalo; Ph.D., University of Toronto

HELENA KITTLESON  
Assistant Professor, Nursing  
B.S., University at Buffalo; M.S., Daemen College

JOHN KOFORD  
Assistant Professor, School of Pharmacy  
B.S., MBA, University of North Carolina at Chapel Hill

SUSAN KOWALEWSKI  
Chair, Assistant Professor, Business  
M.B.A., M.S., Ph.D., University at Buffalo

LESLIE C. KRENTZ  
Clinical Assistant Professor, Occupational Therapy  
B.A., University at Buffalo; B.S./M.S., D’Youville College

JULIE KIRSCH  
Assistant Professor, Sociology  
B.A., Canisius; M.A., University of North Carolina at Chapel Hill; Ph.D., University at Buffalo

PETER J. KERRIGAN  
Professor Emeritus, Business  
M.B.A., University at Buffalo; M.S., D’Youville College

CABER KERRIGAN  
Professor Emeritus, Religious Studies  
B.A., Ph.D., University of Chicago; M.A., Ph.D., University at Buffalo

DAVID KELLY  
Associate Professor, Education  
B.A., M.A., Ph.D., University at Buffalo

CATHERINE LALONDE  
Assistant Professor, Education  
B.A., Hobart and William Smith Colleges; M.A., Ph.D., University at Buffalo

STACIE LAMPKIN  
Clinical Assistant Professor, School of Pharmacy

ROBERT LEOPOLD  
Associate Professor, School of Pharmacy  
B.S., Long Island University; M.S. St Johns University; PharmD, Shendoah University;  
M.D, Medical University of the Americas

JUDITH H. LEWIS  
Dean, School of Nursing  
B.S.N., M.S., The Ohio State University; Ed.D., University of Cincinnati

KACIE LIWOSZ  
Assistant Professor, Chemistry, Math and Natural Sciences  
B.S., Rochester Institute of Technology; Ph.D., SUNY Buffalo

HILARY LOCHTE  
Associate Professor, Chair, Education  
B.A., M.A., University at Buffalo; Ph.D., University at Buffalo

WILLIAM LOEFFLER  
Clinical Assistant Professor, School of Pharmacy

PharmD, University at Buffalo
JOHN G. ROUSSELLE
Associate Professor, Physical Therapy
B.S., Valparaiso University; B.S./M.S., D’Youville
College; Ed.D., University at Buffalo

ARUP SEN
Vice President for Academic Affairs
Associate Professor, Business
B.S., Hampton University; M.S., Virginia Commonwealth University; Ph.D., University at Buffalo

CARREN SHAPIRO, Ph.D.
Professor Emerita, Biology
B.A., University of California at Davis; M.S., Ph.D., University of Wisconsin

VICTORIA SHIMANOVICH
Assistant Professor, Mathematics
Ph.D., University of Iowa

WALTER SISTO, Ph.D.
Assistant Professor, Religious Studies
B.A., Rutgers; M.A., Seton Hall; Ph.D., University of Toronto

GREGORY SOJA, Ph.D.
Assistant Professor, Chemistry, Math and Natural Sciences
B.S. Wagner College; Ph.D., SUNY Buffalo

FRANK STEPHEN, Ph.D.
Assistant Professor, Biology, Math and Natural Sciences
B.A., Canisius College; Ph.D., University at Buffalo

DAVID T.R. STEWART, Ph.D.
Assistant Professor, Chemistry, Math and Natural Sciences
B.S., Binghamton University; Ph.D., SUNY Buffalo

CATHERINE SZABO
Assistant Professor, Nursing

JOHN TAYLOR, DCBR
Professor, Chiropractic

SARAH TOMLINSON, PH.D.
Emerita, Assistant Professor, Biology, Math and Natural Sciences
B.A., Kalamazoo; B.S., North Carolina State; M.S., Ph.D., University of Michigan

CRAIG TYSON, Ph.D.
Assistant Professor, Liberal Arts

THERESA VALLONE
Clinical Fieldwork Coordinator, Clinical Associate Professor, Occupational Therapy
B.S., University at Buffalo; M.S., D’Youville College; Ed.D., D’Youville College

JAMES VELASQUEZ
Assistant Professor/Coordinator
Exercise and Sports Studies
B.S., Canisius College; M.S., Syracuse University, Ed.D, D’Youville College

DOMINIC VENTURA, Ph.D.
Assistant Professor, Chemistry, Math and Natural Sciences
B.S., Ph.D., University at Buffalo

CHRISTINE VERNI
Assistant Professor, Nursing
B.S.N., M.S., D’Youville College

REBECCA WAITE
Clinical Assistant Professor, School of Pharmacy
B.S., SUNY-Oswego; PharmD, University of Maryland

CHRISTINE WALAWANDER
Assistant Professor, Psychology
B.B.A., B.A., Niagara University; M.S., Ed.D., Northern Illinois University

JASON WALLACE, PH.D.
Assistant Professor, Chemistry, Math and Natural Sciences
B.S., Ph.D., University of Rochester

TODD WALTER
Assistant Professor, Psychology
B.A., Niagara University; M.A., University at Buffalo; Ph.D., University of Florida

IAN WALTERS, Ph.D.
Professor, Mathematics, Math and Natural Sciences
B.A., Indiana University; Ph.D., Western Michigan University

EDWARD WEISS, III
Professor, Dietetics
B.A., Gettysburg College; M.A., Duke University; Ph.D., Pennsylvania State University

MARTA WERNER
Professor, English
B.A., Ithaca College; M.A., Ph.D., University at Buffalo

MEGAN WHELAN
Clinical Assistant Professor, Dietetics
B.S., University of Massachusetts; M.S., University at Buffalo

RONALD WHITE, DPT
Clinical Assistant Professor, Physical Therapy

STEPHEN WILLIAMS
Professor, Education
B.A., University of Montreal; M.Ed., Bridgewater State College; Ed.D., Clark University

BRIAN H. WROTNIAK
Professor, Physical Therapy
B.S., SUNY at Geneseo; B.S., Daemen College; M.S., University of Indianapolis; Ph.D., University at Buffalo

MARTHA J. YINGLING
Professor Emerita, Nursing
B.S., Niagara University; M.S., Canisius College

SHOSHANNA ZUCKER
Assistant Professor, School of Pharmacy
B.S., Iona; M.S., Ph.D., Albert Einstein College of Medicine
LYNN M. BRUNNER  
Instructor, Liberal Arts  
B.A., The College of Wooster;  
Ed.M., Ph.D., University at Buffalo

JOSEPH CALDARELLI  
Instructor, Business  
B.S., M.B.A., Canisius College

LEAH CARUSO  
Instructor, Dietetics  
M.S., University at Buffalo

BONNIE CASS  
Instructor, Dietetics  
B.S., University at Buffalo

DAWN CERCONE  
Assistant Professor, Nursing  
B.S., D'Youville College; M.S., University at Buffalo

MELISSA CHABOT  
Instructor, Dietetics  
M.S., University at Buffalo

ROBERT CHAMBERS  
Instructor, Music  
B.A., M.Ed., Canisius College

CHRISTINA COYLE  
Instructor, Business  
B.S., M.S., M.B.A., University at Buffalo

LINDA CRONIN  
Assistant Professor, Nursing  
B.S., Villa Maria College; M.S., University at Buffalo

ERIC DeSOYE  
M.A., University at Buffalo

Assistant Professor, Nursing  
B.S., M.S., University at Buffalo

DAVID WOJTOWICZ  
B.S., Daemen College
CLINICAL AFFILIATIONS

The performance of abortion procedures is not consistent with the tradition, mission and values of the college. Therefore, D’Youville College does not enter into clinical contracts or agreements nor place students on clinical rotations at sites with individual practitioners for OB/GYN placements, in which students are expected to observe or participate in abortion procedures or to provide any information about abortion services beyond referral to another medical professional. Students reserve the right not to participate in procedures that conflict with personal values.

TITLE IX STATEMENT

Title IX of the Education Amendments of 1972 (Title IX), 20 U.S.C. § 1681 et seq., is a federal civil right law that prohibits discrimination on the basis of sex in education programs and activities. All public and private elementary and secondary schools, school districts, colleges, and universities (“schools”) receiving any federal funds must comply with Title IX. Under Title IX, discrimination on the basis of sex can include sexual harassment or sexual violence, such as rape, sexual assault, sexual battery and sexual coercion. Inquiries concerning the application of Title IX may be referred to the college’s Title IX coordinators:

College Center, Room 111
716.829.8198
titleixcoordinator@dyce.edu

Niagara Street Annex, Room 206
716.829.7811
titleixcoordinator@dyce.edu

The college’s Title IX policy can be located on the college website at: www.dyce.edu/titleix.

RETENTION

To comply with the Student Right-to-Know and Campus Security Act, the college must report its completion or graduation rate of full-time degree-seeking undergraduate students. For those students who entered D’Youville College in the fall of 2008, the percentages of those completing their degree program by August 2014 are the following:

Full-time, first-time college students ................................................................. 44%
Transfer students .............................................................................................. 61%

Research conducted across the nation on completion rates of full-time students entering as freshmen are between 40 and 49 percent depending on the research study.

Please note these statistics reflect both four year programs and five year dual-degree programs combined.

If you desire more information, please contact the director of retention services at 716.829.7625.

PLACEMENT

The following are the overall career progress results from the graduating class of 2013, based upon the annual survey:

Total graduates ................................................................. 688
Total responses to the annual survey ........................................... 60.8%

Based upon the responses, the following were tabulated:
Graduates continuing studies (at masters, doctoral, advanced certificate level) ........ 10.5%

Note: Graduate school rates are affected by the fact that many D’Youville graduates obtain their master’s degree from the college in combined programs.

Successful placement for 2013 ................................................................. 90.2%
(includes direct career employment, graduate school and other employment)
ACCREDITATION AND MEMBERSHIPS

D’Youville College is accredited by the Middle States Commission on Higher Education, 3624 Market Street, Philadelphia, PA 19104, 267-284-5000.

The baccalaureate and master’s degree programs in nursing are accredited by the Commission on Collegiate Nursing Education. Programs of instruction are registered with the Office of Higher Education of the New York State Education Department.
